obtained from veterans during the Agent Orange registry examination process. VA is required to organize and update the information contained in the AOR to be able to notify Vietnam era veterans who served in the Republic of Vietnam of any increased health risks resulting from exposure to dioxin or other toxic agents. VA may also provide, upon request, a health examination, consultation, and counseling for veterans who are eligible for listing or inclusion in any health-related registry administrated by VA that is similar to the Persian Gulf War Veterans Health Registry. Registry examinations are provided to veterans who served in Korea in 1968 or 1969, and/or any U.S. veteran who may have been exposed to dioxin, or other toxic substance in a herbicide or defoliant, during the conduct of, or as a result of, the testing, transporting, or spraying of herbicides, and who requests an Agent Orange Registry examination. VA will enter the information obtained from the veteran during the interview on VA Form 10-9009, Agent Orange Registry Code Sheet. The registry will provide a mechanism that will catalogue prominent symptoms, reproductive health, and diagnoses and to communicate with Agent Orange veterans. VA will inform the veterans on research findings or new compensation policies through periodic newsletters. The registry is not designed or intended to be a research tool and therefore the results cannot be generalized to represent all Agent Orange veterans.

If these organizations substitute or propose to add a new activity that falls under the umbrella of this generic approval, including those activities that are currently in a planning stage, OMB will be notified and will be furnished a copy of pertinent materials, a description of the activity and number of burden hours involved. NCA and IG will conduct periodic reviews of ongoing survey activities to ensure that they comply with the PRA.
