The filings required by these rules will be used by the Commission to determine the nature of the corporate, financial, partnership, ownership and other business relationships that confer on their holders a degree of ownership or other economic interest, or influence or control over an entity engaged in the provision of communications services such that the holders are subject to the Commission's regulations.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0678.

Title: Part 25 of the Commission's Rules Governing the Licensing of, and Spectrum Usage by Satellite Network Stations and Space Stations.

Form No.: FCC Form 312, including Schedule B; Schedule S.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 3,473.

Estimated Time per Response: .50-40 hours.

Frequency of Response: On occasion and annual reporting requirements and third party disclosure requirements.

Total Annual Burden: 42,136 hours.

Total Annual Cost: \$610,644,061.

Privacy Act Impact Assessment: N/A.

Needs and Uses: The Commission will submit this revised information

collection to OMB after this 60-day comment period to obtain the full three-year clearance from them.

The Federal Communications Commission ("Commission"), on its own motion, proposes to revise OMB Control No. 3060-0678 to add a section to the Application for Satellite Space and Earth Station Authorizations (FCC Form 312) which will enable satellite applicants to certify whether or not they are subject to geographic service or geographic coverage requirements and whether they will comply with the requirements. Currently, Section 25.148(c) of the Commission's rules requires Direct Broadcast Satellite (DBS) operators to provide service to Alaska and Hawaii if "technically feasible," or to provide a technical analysis showing that such service is not technically feasible. In addition, some Mobile Satellite Service (MSS) operators and Non-geostationary Satellite Orbit Fixed Satellite Service (NGSO FSS) operators have similar geographic coverage requirements. For example, Ka-band NGSO FSS systems must provide service between 70° North Latitude and 55° South Latitude for at least 75 percent of every 24-hour period in accordance with Section 25.145(c)(1) of the Commission's rules. The Commission also proposes to require other applicants to provide this certification in the event that it expands its geographic rules, as proposed in two pending rulemakings. See 71 FR 43687 (Aug. 2, 2006); 71 FR 56923 (Sept. 28, 2006).

The addition of the certification will require modification of the FCC Form 312 which is housed in the International Bureau Filing System ("MyIBFS"), an electronic filing system. In 2005, the Commission received approval from the Office of Management and Budget (OMB) for mandatory electronic filing of all satellite and earth station applications. Therefore, all certifications must be filed with the Commission electronically in MyIBFS.

This collection is used by the Commission staff in carrying out its duties concerning satellite communications as required by Sections 301, 308, 309 and 310 of the Communications Act, 47 U.S.C. 301, 308, 309, 310. This collection is also used by the Commission staff in carrying out its duties under the World Trade Organizations (WTO) Basic Telecom Agreement. The information collection requirements accounted for in this collection are necessary to determine the technical and legal qualifications of applicants or licensees to operate a station, transfer or assign a license, and to determine whether the

authorization is in the public interest, convenience and necessity. Without such information, the Commission could not determine whether to permit respondents to provide telecommunication services in the U.S. Therefore, the Commission would be unable to fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended, and the obligations imposed on parties to the WTO Basic Telecom Agreement.

DATES: Written PRA comments should be submitted on or before December 26, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Les Smith, Federal Communications Commission, Room 1-C216, 445 12th Street, SW., Washington, DC 20554, or via the Internet to PRA@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s) contact Les Smith at (202) 418-0217 or via the Internet at PRA@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0749.

Title: Section 64.1509, Disclosure and Dissemination of Pay-Per-Call Information.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 25.

Estimated Time per Response: 410 hours.

Frequency of Response: Annual and on occasion reporting requirements; Third party disclosure.

Total Annual Burden: 10,250 hours.

Total Annual Cost: None.

Privacy Impact Assessment: No impact(s).

Needs and Uses: On July 16, 2004, the Commission released the Notice of Proposed Rulemaking (NPRM), In the Matter of Policies and Rules Governing Interstate Pay-Per-Call and Other Information Services, and Toll-free Number Usage; Truth-in-Billing and Billing Format, CC Docket No. 98-170 and CG Docket No. 04-244, FCC 04-162, which initiated a new proceeding to review the effectiveness of the Commission's rules governing pay-per-call services, related audiotext information services, and toll-free numbers. The *NPRM* sought comment as to whether the Commission's existing rules governing billing specifically for pay-per-call services and those for charges billed through toll-free numbers are sufficient to address any current billing concerns. The *NPRM* sought comment specifically on whether the Commission should adopt a requirement that charges for presubscribed audiotext information services accessed through toll-free numbers must be displayed separately from local and long-distance telephone service.

Common carriers that assign telephone numbers to pay-per-call services must disclose to all interested parties, upon request, a list of all assigned pay-per-call numbers. For each assigned number, carriers must also make available (1) a description of the pay-per-call services; (2) the total cost per minute or other fees associated with

the service; and (3) the service provider's name, business address, and telephone number. In addition, carriers handling pay-per-call services must establish a toll-free number that consumers may call to receive information about pay-per-call services. Finally, the Commission requires carriers to provide statements of pay-per-call rights and responsibilities to new telephone subscribers at the time service is established and, although not required by statute, to all subscribers annually.
