What Are the Administrative Requirements for This Action?

For a complete discussion of all the administrative requirements applicable to this action, see the direct final rule in the Rules and Regulations section of this **Federal Register**.

The Regulatory Flexibility Act (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedures Act or any other statute unless the agency certifies that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small government organizations, and small government jurisdictions.

For purposes of assessing the impacts of today's proposed rule on small entities, small entity is defined as follows:

(1) A small business in the regulated industry that has a gross annual revenue less than \$6 million (this varies by industry category, ranging up to \$10.5 million for North American Industrial Classification System (NAICS) code 562213 (VSMWC)), based on Small Business Administration's size standards;

(2) A small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; or

(3) A small organization that is any not-for-profit enterprise that is independently owned and operated and is not dominant in its field.

After considering the economic impact of today's proposed rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. This action does not propose any changes to the final OSWI rule, in which we determined that the final rule would not have a significant economic impact on a substantial number of small entities.

For additional information, see the direct final rule published in the Rules and Regulations section of this **Federal Register**.
