For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734-7477.

SUPPLEMENTARY INFORMATION:

Title: Specimen Submission.

OMB Number: 0579-0090.

Type of Request: Extension of approval of an information collection.

Abstract: The United States Department of Agriculture (USDA) is responsible for, among other things, preventing the interstate spread of livestock diseases and for eradicating such diseases from the United States when feasible.

In connection with this mission, the Veterinary Services (VS) program of USDA's Animal and Plant Health Inspection Service conducts disease surveillance programs. The VS Form 10-4 and its supplemental sheet (VS Form 10-4A) are critical components of these programs. They are routinely used whenever specimens (such as blood, milk, tissue, or urine) from any animal (including cattle, swine, sheep, goats, horses, and poultry) are submitted to our National Veterinary Services Laboratories for disease testing.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.25 hours per response.

Respondents: State veterinarians, accredited veterinarians, animal health technicians, other State personnel who are qualified and authorized to collect and submit specimens for laboratory analysis, and herd owners.

Estimated annual number of respondents: 14,000.

Estimated annual number of responses per respondent: 2.

Estimated annual number of responses: 28,000.

Estimated total annual burden on respondents: 7,000 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 3rd day of May 2006.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

Forest Service

Plumas National Forest; Beckwourth Ranger District, California; Beckwourth Ranger District Tall Whitetop Project

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: The USDA Forest Service Plumas National Forest will prepare an Environmental Impact Statement (EIS) to eradicate populations of the noxious weed tall whitetop (*Lepidium latifolium*), along the Middle Fork of the Feather River approximately one-mile southwest of the town of Beckwourth.

DATES: Although comments will be accepted throughout any phase of this project, it would be most helpful if comments on the scope of the analysis

were received within 30 days of the date of publication of this notice of intent in the **Federal Register**. The draft EIS is expected in September 2006 and the final EIS is expected in January 2007.

ADDRESSES: Send written comments to Acting District Ranger, Ronald L. Baer, Plumas National Forest, P.O. Box 7, Blairsden, CA 96103. Fax: (530) 836-0493. Comments may be: (1) Mailed to the Responsible Official; (2) hand delivered between the hours of 8 a.m.-4:30 p.m. weekdays Pacific Time; (3) faxed to (530) 836-0493; or (4) electronically mailed to: comments-pacificsouthwest-plumas@fs.fed.us. Comments submitted electronically must be in Rich Text Format (.rtf).

FOR FURTHER INFORMATION CONTACT: Terry R. Miller, Interdisciplinary Team Leader, Plumas National Forest, Beckwourth Ranger District, P.O. Box 7, Blairsden, CA 96103 (530) 836-2575.

SUPPLEMENTARY INFORMATION:

Project Location

The project area is one-mile southwest of the town of Beckwourth, T23N, R14E Sec. 26, 27, 28, and 29. It is comprised of the river corridor on either side of the junction of county road A-23 and highway 70.

Purpose and Need for Action

The effects of eradicating a noxious weed using an integrative pest management strategy will be analyzed in this EIS. The purpose of the project is to eradicate tall whitetop in the project area. Tall whitetop is invading the project area along the Middle Fork of the Feather River at a rapid rate. In 2003 there was one known location. Currently there are eighty-six tall whitetop locations. These locations total an estimated 36,000 plants over approximately 8 total acres. Hand pulling, over the last four years, at the original known site has proven ineffective for controlling the relatively small population there. Without effective treatment tall whitetop would continue to spread, invading additional acres nearby and potentially spreading throughout the entire corridor of the Middle Fork of the Feather River.

Proposed Action

Scattered populations of the noxious weed, tall whitetop, would be treated in order to eradicate it from the 844-acre project area. These scattered areas total approximately 8 acres, less than 1 percent of the project area.

A three-step process would be used over a period of five years to ensure successful eradication of tall whitetop from the project area. First plants would
