DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Agency information collection activities: Proposed collection; comment request.

SUMMARY: The Energy Information Administration (EIA) is soliciting comments on the proposed three-year extension to the Form EIA-28, "Financial Reporting System (FRS)."

DATES: Written comments must be filed by April 7, 2006. If you anticipate difficulty in submitting comments within that period, contact the person identified below as soon as possible.

ADDRESSES: Comments should be directed to Gregory P. Filas of EIA. To ensure receipt of the comments by the due date, submission by Fax (202-586-9753) or e-mail (greg.filas@eia.doe.gov) is recommended. Mr. Filas' mailing address is Energy Information Administration (EI-62), Financial Analysis Team, Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Filas may be telephoned at (202) 586-1347.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Mr. Filas at the address listed above.

SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. No. 93-275, 15 U.S.C. 761 *et seq.*), and the Department of Energy Organization Act (Pub. L. No. 95-91, 42 U.S.C. 7101 *et seq.*), require the Energy Information Administration (EIA) to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer-term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35), provides the general public and

other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected, and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) of the collections under Section 3507(h) of the Paperwork Reduction Act of 1995.

Under Public Law 95-91, section 205(h), the Administrator of the EIA is required to "identify and designate" the major energy companies who must annually file Form EIA-28 to ensure that the data collected provide "a statistically accurate profile of each line of commerce in the energy industry in the United States." Data collected on Form EIA-28 are published and used in analyses of the energy industry.

II. Current Actions

EIA is proposing a three-year extension with changes to the previously approved Form EIA-28 for the FRS survey to be conducted in 2007 collecting information for 2006.

U.S. major energy companies report financial and operating information to the FRS survey each year on a consolidated corporate level, by individual lines of business, by major functions within each line of business, and by various geographic regions. From this information, EIA produces the annual publication Performance Profiles of Major Energy Producers. The data are also used for analyses and inquiries concerning earnings, profitability, investments, production and refining costs, reserve growth, and other issues related to the financial performance of major energy producers.

In 2004, EIA expanded the form to include the downstream natural gas and electric power lines of business. The expanded form increased the time and cost of processing the additional data. In addition, some of the new questions required very detailed information from the operational units of the FRS respondent companies, which increased the time required for companies to compile data for the form.

After working with the expanded form for two years, EIA reviewed the detailed elements of the form and the responses and is proposing to reduce the scope of the data collected in the downstream natural gas and electric power sections of the Form EIA-28. The reductions will eliminate some of the intra-line of business flows and some detailed operating information, which
