

borne out in practice and was not intended by Congress.

Accordingly, because the NPFC claims procedures under 33 U.S.C. 2713 and the implementing regulations at 33 CFR part 136 are internal, informal administrative processes the use of a MCIR in those processes is not precluded by 46 U.S.C. 6308.

The NPFC may consider and rely on any part of a report of a MCIR in determining whether to pay or deny a claim. While any part of such a MCIR may be considered, it is the enclosures to such a report, such as witness statements, navigation records and vessel logs that will most likely bear on any determination to pay or deny a claim. While such reports may be of use to NPFC in this regard, and may also be submitted by claimants to support their claims, the NPFC is not bound by such reports of investigation. The NPFC may require additional information from claimants in order to support their claims and may, considering the record as a whole, find additional facts or different facts than those determined in such reports of investigation.

**SUPPLEMENTARY INFORMATION:** The National Disaster Medical System (NDMS), authorized by 42 U.S.C. 300hh-11(b), has primary responsibility for providing emergency medical care after a natural or man-made disaster or in the

event of a public health emergency. NDMS functions as a coordinated effort by the Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA), Department of Health and Human Services, the Department of Defense, and the Department of Veterans Affairs, but is managed by FEMA's Response Division.

NDMS personnel are composed of medical professionals and allied health members<sup>1</sup> who are hired and deployed specifically to provide medical care in the event of an emergency. NDMS members are activated and employed as Federal employees not only to provide health care services, but also health-related social services, family assistance, and coordination with other assisting agencies. NDMS personnel also function as appropriate auxiliary service providers for mortuary and veterinary services to respond to the needs of victims during an emergency. These individuals are assigned to Disaster Medical Assistance Teams (DMATS) or other specialty teams that are placed in various locations throughout the United States.

To facilitate the continued provision of high quality care to both people and animals, NDMS collects the information necessary to make decisions concerning the hiring and retention of these individuals for disaster relief efforts. In addition, NDMS collects information on qualified medical professionals who are System Members of the National Urban Search and Rescue Response System (US&R), which also falls under the responsibility of FEMA's Response Division.

To assess qualifications, NDMS asks applicants to complete the Optional Form (OF) 612 or other standard formats for applications for Federal employment or status. While the employment forms, like the OF 612 (used to gather information necessary for credentialing) are currently submitted in paper format, NDMS has developed electronic data entry forms specifically for credentialing and the forms have been submitted to the Office of Management and Budget (OMB) for approval. Information taken from the completed paper applications is transferred to a database that is maintained by NDMS.

The information that is collected on the OF 612 or other application formats, consists of:

- Name (Last, First, Middle), including any other names known by and when.
- Social Security Number.
- Position Being Applied For.
- Home Address, including street address, City, State, and Zip Code.
- Home Telephone.
- Cell Phone, if applicable.
- Fax number, if applicable.
- E-mail address, if applicable.
- Current Employer Name, if applicable, or place of employment.
- Primary Office Address, including street address, City, State and Zip Code.
  - Primary Office Telephone, Fax, or E-mail.
  - Place of Birth, City, State, Country other than U.S.
  - Citizenship, and if not a citizen, Status and Visa Number.
  - Gender.
  - Military Service History, if applicable, and copy of DD 214.
  - Other Employment History, including name, location, dates, and contact information.
    - Other health care facility affiliations.
    - Education Background, including names and dates for all certificates and diplomas.
    - Specialty(ies), including all certificates or other documentation.
    - If certifying Board membership, Board name and address, and most recent date.
      - Certification, date of initial certification and most recent certification.

      - Other information, such as criminal history, medical malpractice action, or other disciplinary action taken against the applicant, if applicable. (This includes statements from all malpractice insurance carriers, dating back ten years.)

This collected information serves as the basis by which hiring officials can certify the providers' basic qualifications for the jobs to which they are assigned, as well as to determine the clinical privileges<sup>2</sup> designated to

<sup>2</sup> Privileges are granted by an institution based on credentials, skill currency, skill proficiency, and resources available within the organization. For example, if an individual was trained in a skill ten years ago but has not practiced that skill recently, the institution would not allow that skill to be performed within its facility without demonstrated refresher training. Privileges are used to ensure providers and institutions are providing quality care.

specific team members. The verification of credentials ensures that the medical treatment provided is done by qualified, licensed, professionals who meet the industry standard. Credential verification also provides DHS the ability to utilize these employees in the most effective way possible. Similar information on US&R medical professionals is included in the database.

The Privacy Act (5 U.S.C. 552a) embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses and disseminates personally identifiable information. The Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The National Disaster Medical System Medical Professional Credentials File System established by this notice is such a system of records.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses for which such information may be disseminated and the purpose for which the system is maintained. The following description is provided for the National Disaster Medical System Medical Professional Credentials System of Records. In accordance with 5 U.S.C. 552a(r), notification of the creation of this record system has been provided to Congress and to OMB.

- (A) To a Member of Congress or a Congressional staff member in response to an inquiry from the Congressional office made at the request of the individual to whom the records pertain.
