

transformations of mixture component chemicals.

- The scope is focused on the evaluation of health risks from exposures to multiple chemicals, including multiple exposure routes and times as well as multiple health endpoints.

- Areas of cumulative health risk assessment emphasized in this report can often be performed with existing information.

- Exposure and toxicity characterizations of mixtures are strongly dependent on mixture composition (chemicals and concentrations) and timing of exposures and health effects.

- Qualitative and semiquantitative approaches provided can simplify the number of potential combinations of chemicals, exposures, and effects to make the cumulative health risk assessment more feasible.

II. How to Submit Technical Comments to <http://www.regulations.gov>

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Findings of Scientific Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Notice is hereby given that on February 28, 2006, the Department of Health and Human Services (HHS) Debarment Official, on behalf of the Secretary of HHS, issued a final notice of debarment based on the scientific misconduct findings of the U.S. Public Health Service (PHS) in the following case:

Susan M. Aronica, PhD, Indiana University Purdue University Indianapolis: Based on the evidence and findings of an investigation report by Indiana University Purdue University Indianapolis (IUPUI) and additional analysis conducted by the Office of Research Integrity (ORI) in its oversight review, ORI found that Susan M. Aronica, Ph.D., former Postdoctoral Student/Fellow, IUPUI, committed 21 acts of scientific misconduct by knowingly and intentionally falsifying and fabricating data in her notebooks, in 17 figures and figure panels, in two tables published in the *Journal of Biological Chemistry (J. Biol. Chem. 270:21998-22007, 1995)* and *Blood (Blood 89:3582-3595, 1997)*, and in two figures in a manuscript submitted for publication to *Blood* in August 1997.

ORI issued a charge letter enumerating the above findings of scientific misconduct. However, Dr. Aronica requested a hearing to dispute these findings to the Departmental Appeals Board. Based upon the insufficiency of Dr. Aronica's hearing request, ORI filed a Motion to Dismiss.

On February 10, 2006, the Administrative Law Judge (ALJ) ruled in ORI's favor by dismissing Dr. Aronica's request for a hearing. ORI's research misconduct regulation specifically delineates the requisite content for an acceptable hearing request. A sustainable hearing request must admit or deny each finding of research misconduct, and each denial must be detailed and substantive. 42 CFR 93.501(c). Dr. Aronica's hearing request contained only a general denial of the proposed findings. The regulation states that a general denial is not sufficient to establish a genuine dispute. 42 CFR 93.503. The regulation also states that the ALJ must dismiss a hearing request if the respondent does not raise a genuine dispute over facts or law material to the research misconduct findings. 42 CFR 93.504(a)(2). The ALJ concluded that the determination of whether the hearing request raises a genuine dispute is a threshold jurisdictional determination. Thus, the ALJ decided that Dr. Aronica's request did not show a genuine dispute, because it did not specifically deny any allegation. As a result, the ALJ concluded that Dr. Aronica's hearing request could not be granted, but was required to be dismissed pursuant to 42 CFR 93.504(a)(2).

Specifically, ORI found that Dr. Aronica falsified and fabricated data in:

- Figures 1, 2, 3, 4, 5A, 5B, 5C, 6A, and 6B, and Tables III and IV in: Aronica, S.M., Mantel, C., Gonin, R., Marshall, M.S., Sarris, A., Cooper, S.,
