

complete discussion of the proposed compliance deadline.

B. What Is the New Information EPA Is Making Available for Review and Comment?

- Comments provided by Aerospace Industry Association and an airline, indicating that changing solvents involves a rigorous approval process to meet requirements of the Federal Aviation Administration (FAA) and of the original equipment manufacturer (OEM). The commenter indicates that such an approval process takes considerable time and requires many steps.

- Comments provided by HSIA indicated that a compliance period of as much as 10 years would be required for industry to complete the multi-step process of upgrading degreasing operations. The commenter cites installations of new equipment at an existing facility may require the following: (1) Extended time to test performance of untried degreasing technologies for their particular application, (2) additional or redesigned floor space, (3) customer approval of new degreasing techniques and machines, (4) amending air permits; (5) amending government agency directives on cleaning protocols. HSIA did not submit data to support this comment.

- Comments and data provided by the American Safety Razor Company indicated that EPA should remain consistent with the proposed HON rule and provide affected facilities three (3) years after the effective date of the promulgated standard.

- Comments and data provided by Salem Tubing Company on the compliance period for sources of existing HSC machines and constructed or reconstructed HSC machines after August 17, 2006. The facility indicated that vacuum-to-vacuum cleaning is not a feasible option for the narrow tube manufacturing industry because of the large size of their degreasing machines and the fact that the vacuum-to-vacuum technology is not currently available in the machines sizes required. The commenter contends that in order to design, test and implement such a system would take much longer than the proposed compliance period.

- Comments provided by the HSIA indicated that the compliance schedule should be amended to (1) require new facilities constructed after the date of promulgation to be in compliance upon startup; (2) consider new facilities constructed prior to the date of promulgation to be existing facilities; (3) allow existing HSC facilities that installed new equipment after the date

of proposal, but prior to the date of promulgation, 10 years to come into compliance with any new requirements consistent with CAA section 112(i)(7), and (4) allow the maximum amount of time possible for existing HSC facilities to come into compliance.

C. What Additional Supporting Data or Documentation Do I Need To Provide With My Comments?

EPA is soliciting comment on the new information provided described above that relates to the issues identified at the outset of this NODA. In addition, as for the narrow tubing manufacturing facilities, aerospace manufacturing and maintenance facilities, large military vehicle maintenance operations, facilities that use multiple degreaser machines, and facilities that use continuous web cleaners, EPA specifically seeks data and information from these facilities including, but not limited to, information on the time to design and install new HSC machines, the lifespan of the typical HSC machine used in the facilities of interest (listed above), the time required to seek additional permits from State and local air permitting agencies, the time required for FAA and OEM approvals to vary or change degreasing cleaning procedures, whether a 2-year or a 3-year compliance period is appropriate, or data on how much time it would take to comply with the proposed requirements.

SUPPLEMENTARY INFORMATION:

A. Background

The proposed changes to FAR 32.1000, 32.1003, 32.1004, 32.1005, and 32.1007 and the clause at 52.232-32 are intended to increase the use of performance-based payments as the method of contract financing on Federal Government contracts, and improve the efficiency of performance-based payments when used on these contracts. These proposed changes originated from recommendations submitted by the Department of Defense Performance-based Payments Working Group in their March 8, 2005 report. This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Discussion

The Councils are proposing to revise the following FAR provisions:

1. The current FAR 32.1001(e) is renumbered to (d) and rephrased to require payments to be made in accordance with each agency's policy.

2. FAR 32.1001(e) is moved from 32.1000 to clarify when use of PBPs is appropriate.

3. FAR 32.1003 is revised to specifically address when PBP's may be used. This revised language clarifies use of PBPs on fixed-priced line items and orders and on Indefinite Delivery-Indefinite Quantity and non-Indefinite Delivery contracts.

4. FAR 32.1004(a)(1), to clarify that events not requiring meaningful effort or action must not be included as events or criteria for PBPs. FAR 32.1004(a)(2)(iii), to specifically state that all cumulative events be identified. FAR 32.1004(b)(2)(ii) requires that the contracting officer must document the rationale for establishing a performance-based payment rate that is below the applicable progress payment rate. FAR 32.1004(c) is added (and the existing (c) renumbered) to clarify that the contracting officer shall not limit the amount of a PBP payment to a percentage of actual incurred cost for

the scheduled event or performance criteria. FAR 32.1004(e)(1)(ii) is renumbered to 32.1004(f)(1)(ii) and revised to clarify that solicitations related to competitive source selections should state that the evaluation of the proposed prices will include an adjustment to reflect the estimated cost to the Government of providing each offeror's proposed PBP terms.

5. FAR 32.1007(a) is revised to clarify that the contracting officer responsible for administering the performance-based payments should also be responsible for reviewing, approving, and transmitting the payment requests to the payment office. FAR 32.1007(c) is revised to prohibit actual cost verification unless the purpose is to assist in establishing revised or new PBP milestones or values.

C. Regulatory Flexibility Act

The Councils do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because this rule should reduce administrative costs for contractor and the Government, thus further encouraging the use of performance based payments. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. We invite comments from small businesses and other interested parties. The Councils will consider comments from small entities concerning the affected FAR Parts 32 and 52 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (FAR case 2005-016), in correspondence.

D. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*
