

Background

The Florida scrub-jay (scrub-jay) is found exclusively in peninsular Florida and is restricted to xeric upland communities (predominately in oak-dominated scrub with open canopies) of the interior and Atlantic coast sand ridges. Increasing urban and agricultural development has resulted in habitat loss and fragmentation, which have adversely affected the distribution and numbers of scrub-jays. Remaining habitat is largely degraded due to the exclusion of fire, which is needed to maintain xeric uplands in conditions suitable for scrub-jays. The total estimated population is between 7,000 and 11,000 individuals.

Applicant's Proposal

The applicant is requesting take of approximately 5.75 ac of occupied scrub-jay habitat incidental to the project. The 44-ac project is located northeast of the Hancock Road and Lost Lake intersection within Section 34, Township 22 South, Range 26 East, Lake County. The proposed project currently includes commercial buildings, infrastructure and a stormwater management system. The applicant proposes to mitigate for the take of the Florida scrub-jay at a ratio of 2:1 based on Service Mitigation Guidelines. The applicant will contribute a total of \$215,050.00 to the USDA Forest Service to be utilized for scrub-jay conservation pursuant to an MOU between the Service and the Forest Service. As minimization for impacts to the species, clearing activities during project construction will occur outside the scrub-jay nesting season (March 1–June 30).

We have determined that the applicant's proposal, including the proposed mitigation and minimization measures, would have minor or negligible effects on the species covered in the HCP. Therefore, the ITP is a "low-effect" project and qualifies for categorical exclusions under the National Environmental Policy Act (NEPA), as provided by the Department of the Interior Manual (516 DM 2 Appendix 1 and 516 DM 6 Appendix 1). This preliminary information may be revised based on our review of public comments that we receive in response to this notice. A low-effect HCP is one involving (1) minor or negligible effects on federally listed or candidate species and their habitats, and (2) minor or negligible effects on other environmental values or resources.

We will evaluate the HCP and comments submitted thereon to determine whether the application

meets the requirements of section 10(a) of the Act (16 U.S.C. 1531 *et seq.*). If we determine that the application meets those requirements, we will issue the ITP for incidental take of the scrub-jay. We will also evaluate whether issuance of the section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in the final analysis to determine whether or not to issue the ITP.

Authority: We provide this notice under section 10 of the Act and NEPA regulations (40 CFR 1506.6).

Dated: January 10, 2008.
