

public comment and coordination with State and local governments or other Federal agencies. The criteria developed for the Calnev Project EIS/EIR include the following:

1. Comply with applicable laws, Executive Orders, and regulations.
2. Minimize deviations from the existing utility corridor to the extent feasible.
3. Select an alignment in consideration of its effects on other critical linear public utilities and transportation corridors.
4. Analyze a corridor modification that reestablishes a complete corridor along I-15 adequate to accommodate the current Calnev project and anticipated future projects and that avoids crossing lands within the Mojave National Preserve.

BLM must take into consideration state law when granting the ROW. The EIS/EIR will describe and analyze the proposed project as proposed and will include: (1) BLM measures to avoid, minimize, or mitigate impacts on the environment; (2) Additional mitigation measures; (3) The "No Action" alternative; and (4) Alternative pipeline routes, segments or other distribution methods. Through public scoping BLM expects to identify various issues, potential impacts and mitigation measures. BLM has identified a potential list of issues that will need to be addressed in this analysis including but not limited to: Air quality; social and economic, traffic; ground and surface water quantity and quality; plant and animal species including special status species; cultural resources; visual resources; and public health and safety. If approved, this pipeline project on public lands would be authorized in accordance with the Mineral Leasing Act at Title 30, Chapter 3A, Subchapter I, Subsection 185.
