4. *Performance Measures*: To evaluate the overall success of its research program, NIDRR assesses the quality of its funded projects through review of grantee performance and products. Each year, NIDRR examines, through expert review, a portion of its grantees to determine:

- The degree to which the grantees are conducting high-quality research, as reflected in the appropriateness of study designs, the rigor with which accepted standards of scientific and engineering methods are applied, and the degree to which the research builds on and contributes to the level of knowledge in the field; and

- The number of new or improved assistive and universally designed technologies, products, and devices developed by grantees that are deemed to improve rehabilitation services and outcomes, enhance opportunities for participation by individuals with disabilities, and are successfully transferred to industry or other private entities for potential commercialization.
