SUPPLEMENTARY INFORMATION:**The Direct Final Rule Procedure**

The FAA anticipates that this
regulation will not result in adverse or
negative comments, and, therefore,
issues it as a direct final rule. Unless a
written adverse or negative comment or
a written notice of intent to submit an
adverse or negative comment is received
within the comment period, the
regulation will become effective on the
date specified above. After the close of
the comment period, the FAA will
publish a document in the **Federal
Register** indicating that no adverse or
negative comments were received and
confirming the effective date of the rule.
If the FAA receives, within the
comment period, an adverse or negative
comment, or written comment notice of
intent to submit such a comment, a
document withdrawing the direct final
rule will be published in the **Federal
Register**, and a notice of proposed
rulemaking may be published with a
new comment period.

Comments Invited

Although this action is in the form of
a direct final rule, and was not preceded
by a notice of proposed rulemaking,
interested persons are invited to
comment on this rule by submitting
such written data, views, or arguments
as they may desire. Comments that
provide the factual basis supporting the
views and suggestions presented are
particularly helpful in developing
reasoned regulatory decisions on the
direct final rule. Comments are
specifically invited on the overall
regulatory, aeronautical, economic,
environmental, and energy-related
aspects of the direct final rule.
Commenters wishing the FAA to
acknowledge receipt of their comments
on this rule must submit with those
comments a self-addressed, stamped
postcard on which the following
statement is made: "Comments to
Docket No. FAA-2008-0339, Airspace
Docket No. 08-ASW-5." The postcard
will be date/time stamped and returned
to the commenter. Communications
should identify both docket numbers
and be submitted in triplicate to the
address specified under the caption
Addresses above or through the Web
site. All communications received on or
before the closing date for comments
will be considered, and this rule may be
amended or withdrawn in light of the
comments received.

The Rule

This action amends Title 14, Code of
Federal Regulations (14 CFR) part 71 by
providing additional Class D controlled
airspace extending upward from the

surface and Class E airspace extending
upward from 700 feet above the surface
at Altus AFB. Additional controlled
Class D and Class E airspace is
necessary for the safety of IFR
operations at Altus AFB. The area will
be depicted on appropriate aeronautical
charts. The Class D and E airspace areas
are published in paragraphs 5000 and
6005, respectively, of FAA Order
7400.9R, dated August 15, 2007 and
effective September 15, 2007, which is
incorporated by reference in 14 CFR
Part 71.1. The Class D and E airspace
designations listed in this document
will be published subsequently in the
Order.

The FAA has determined that this
regulation only involves an established
body of technical regulations for which
frequent and routine amendments are
necessary to keep them operationally
current, is non-controversial and
unlikely to result in adverse or negative
comments. It, therefore, (1) is not a
"significant regulatory action" under
Executive Order 12866; (2) is not a
"significant rule" under DOT
Regulatory Policies and Procedures (44
FR 11034; February 26, 1979); and (3)
does not warrant preparation of a
Regulatory Evaluation as the anticipated
impact is so minimal. Since this is a
routine matter that will only affect air
traffic procedures and air navigation, it
is certified that this rule, when
promulgated, will not have a significant
economic impact on a substantial
number of small entities under the
criteria of the Regulatory Flexibility Act.
The FAA's authority to issue rules
regarding aviation safety is found in
Title 49, of the United States Code.
Subtitle I, Section 106 describes the
authority of the FAA Administrator.
Subtitle VII, Aviation Programs,
describes in more detail the scope of the
agency's authority. This rulemaking is
promulgated under the authority
described in subtitle VII, Part A, subpart
I, section 40103. Under that section, the
FAA is charged with prescribing
regulations to assign the use of airspace
necessary to ensure the safety of aircraft
and the efficient use of airspace. This
regulation is within the scope of that
authority as it provides additional
controlled airspace at Altus AFB,
Oklahoma.

The FAA published this direct final rule with a request for comments in the **Federal Register** on January 30, 2008 (73 FR 5429). The FAA uses the direct final rulemaking procedure for a non-controversial rule where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a

written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on April 10, 2008. No adverse comments were received, and thus this notice confirms that effective date.

ACTION: Final rule.

SUMMARY: This Rule establishes, amends, suspends, or revokes STANDARD Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports.
