Section 87.219 requires that if airports have control towers or Federal Aviation Administration (FAA) flight service stations, and more than one licensee wants to have an automated aeronautical advisory station (Unicom), they must write an agreement outlining who will be responsible for the Unicom's operation, sign the agreement and keep a copy of the agreement with each licensee's station authorization.

Specifically, only one automated Unicom may be operated at an uncontrolled airport. Prior to the operation of an automated Unicom at an airport with more than one Unicom licensee, all of the licensees at that airport must sign a letter of agreement stating which licensee(s) control the automated Unicom operations, and, if control is to be shared among several operators, how that control will be divided or scheduled. The original or a copy of the letter of agreement must be kept with each licensee's station records. Within 90 days of the date upon which a new Unicom operator is licensed at an airport where more than one Unicom is authorized, and an automated Unicom is being operated, an

amended letter of agreement that includes the new licensee's signature must be sign or automated Unicom operations must cease.

The information will be used by compliance personnel for enforcement purposes and by licensees to clarify responsibility in operating Unicom.

Manufacturers of Low Power Radio Service (LPRS) transmitters used for auditory assistance, health care assistance, and law enforcement tracking purposes must include with each transmitting device the following statement: "This transmitter is authorized by rule under the Low Power Radio Service (47 CFR Part 95) and must not cause harmful interference to TV reception or United States Navy SPASUR installations. You do not need an FCC license to operate this transmitter. This transmitter may only be used to provide: auditory assistance to persons with disabilities, persons who require language translation, or persons in educational settings; health care services to the ill; law enforcement tracking services under agreement with a law enforcement agency; or automated maritime telecommunications system (AMTS) network control communications. Two-way voice communications and all other types of uses not mentioned above are expressly prohibited."

Prior to operating a LPRS transmitter for AMTS purposes, an AMTS licensee must notify, in writing, each television station that may be affected by such

operations, as defined in 47 CFR 80.215(h) of the Commission's rules. The notification provided with the station's license application is sufficient to satisfy this requirement if no new television stations would be affected.

The information is used by Commission staff and affected television stations to be aware of the location of potential harmful interference from AMTS operations. If this information was not available, the location of potential harmful interference from AMTS operations would be negatively affected.

Nature and Extent of Confidentiality:

There is no need for confidentiality. This information collection does contain personally identifiable information (PII) on individuals. The FCC maintains a system of records

Section 90.129 requires that applicants proposing to use transmitting equipment that is not type-certified by FCC laboratory personnel to provide a description of the proposed equipment. This assures that the equipment is capable of performing within certain tolerances that limit the interference potential of the device.

Additionally, this rule section requires that each application under this part that is received by the Commission, through the application process outlined in 47 CFR part 1, subpart F, must be accompanied by the applicable supplementary information described in the paragraphs in 47 CFR 90.129. Title: Sections 61.49 and 69.4, Price Cap Performance Review for Local Exchange Carriers, FCC 99-206 (New Services).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Nature and Extent of Confidentiality:

There is no need for confidentiality. The Commission is not requesting that the respondents submit confidential information to the FCC. Needs and Uses: This collection will be submitted as an extension (no change in reporting requirements) after this 60 day comment period to Office of Management and Budget (OMB) in order to obtain the full three year clearance.

In the Fifth Report and Order in FCC 99-206, the Commission permitted price cap local exchange carriers (LECs) to introduce new services on a streamlined basis, without prior approval. The Commission adopted rules to eliminate the public interest showing required by section 69.4(g) and eliminated the new services test (except in the case of loop-based new services) required under sections 69.49(f) and (g). These modifications eliminated delays that existed for the introduction of new services as well as encouraging efficient investment and innovation.

The information is used by the Commission to determine whether this is in the public interest for the incumbent LEC to offer a proposed new switched access service.
