Camping and Picnicking on the National Forests of Southern Idaho & Western Wyoming

2 0 0 4

This Land is Your Land

This guide is provided as an introduction to the the camping and picnicking opportunities in the National Forests of the Intermountain Region. More detailed information can be obtained from each National Forest office listed. Two key documents that you may wish to request are the "National Forest Visitor Map" and the "Travel Map" for the Forest you are interested in.

The Intermountain Region of the Forest Service encompasses National Forests in Utah, Nevada, southern Idaho, western Wyoming, and parts of Colorado and California. This Region boasts rugged mountains, fertile valleys, rivers, deserts, varied wildlife, campgrounds,

CHEYENNE,

BOISE

wildernesses, adventure, solitude, and scenery enough to saturate your aesthetic cravings.

A National Forest is more than trees and camping, hiking, fishing, and hunting. You can enjoy the magnificence of the mountains; the serenity of the wilderness; the thrill of skiing and kayaking; the miracles of spring flowers, baby animals, and majestic big game; the sound of birds; a camping trip; and the fun of a summer picnic in your National Forest-the Land of Many Uses.

So, leave your stress behind and spend time with nature. In a few hours from any place in the Intermountain Region you can pull into a National Forest campground. Pitch your tent and spend a great get-away weekend fishing for the big ones or dabbling a hook in the stream, swimming, canoeing, and cooking over a campfire.

You want to go farther from civilization? Space for backpacking is almost limitless. Please consult Forest Service maps and handouts for information on where to go and how to get there.

Feeling adverturesome? White water river running, big game hunting, winter camp outs and sports, mountain climbing, and horseback riding are challenges to be explored

in your multiple-use National Forests.

For those who prefer a less robust trip, how about a scenic drive, photography excursion, bird watching, or a picnic? All these experiences-and more-await you.

Woodcutting, a popular family outing in the Intermountain Region, starts early in the summer and continues through the fall. Contact your local Ranger District for information and a woodcutting permit.

These suggestions only scratch the surface. When you play in a National Forest, let your imagination lead you to exciting (and safe) adventures in the out-of-doors.

Roads take you and bring you back from far-flung corners of your National Forests. Every road serves many users. Some roads invite you to enter the Forest while others, closed after timber hauling, mineral extraction, or other uses, ask you not to intrude. Often times these roads are closed to provide privacy and protection for animals. In the springtime, wild mothers prefer to give birth to their young away from the prying eyes of humans. Sometimes, the flowers and grasses need to grow untrampled by visitors. Closed roads invite you to explore on foot rather than in your vehicle.

As stewards of the National Forests, heed the "closed-road" signs, but follow and enjoy the open roads as they beckon you to outdoor adventures. Remember, Tread Lightly, protect the earth, and have fun!

Each generation becomes the custodian rather than the absolute owner of National Forest resources, and each generation has the obligapartners in seeing that the National Forests fulfill and magnify the intent of their creation. Your partnership decrees the right to enjoy, but not destroy, any facet of the National Forest.

Forest Supervisors, District Rangers, their staffs, and volunteers, live and work in the National Forests. They will answer your questions, serve your needs when you visit a National Forest, and dedicate themselves to protecting these lands-your lands. So, as part owner in this public resource, you are challenged to protect and use wisely all facets of your National Forests.

I Pledge to TREAD LIGHTLY on public and private lands by:

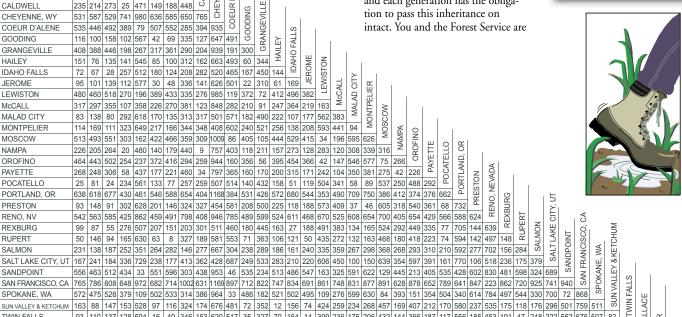

raveling only where motorized vehicles are permitted and never blazing my own trail.

especting the rights of hikers, skiers, campers, and others to enjoy their activities undisturbed.

Ξ ducating myself by obtaining travel maps and regulations from public agencies, complying with signs and barriers, and asking owners' permission to cross private property.

- voiding streams, lakeshores, meadows, muddy roads and trails, steep hillsides, wildlife, and livestock.
- D riving responsibly to protect the environment and preserve opportunities to enjoy my vehicle on wild lands.

82

Become a National Forest Volunteer

The Forest Service is looking for volunteers and has opportunities for almost everyone – retirees, professionals, housewives, students, and young people, as well as service clubs and organizations. If you like people and care about our country's natural resources, the Forest Service needs your time and talents.

Some volunteers work fulltime for several months, while others donate a few hours a day each week, or contribute a "one time" service. Students may volunteer to earn college credits through a college-approved Intern program.

The Forest Service and the volunteer negotiate an agreement stating what responsibilities and benefits have been agreed upon. All volunteers are covered by the Federal Tort Claims Act and the Federal Worker's Compensation Act.

If you are interested in becoming a Forest Service volunteer, please contact a local Forest Service office. You may also access our volunteer directory on our web site at: www.fs.fed.us/r4/volunteer/ index.html.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audio tape, etc.) should contact the USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

Wildfires: We Can't Stop Them Without Your Help

Carelessness – Wildland "Enemy #1." Each year, the number of wildfires increase. Why? Because forest users–well meaning people–haven't been careful when

people–haven't been careful when fire danger is high. You can be a part of the fire prevention team by knowing a few facts, and following a few simple rules:

• Don't throw burning objects–like cigarettes or matches– from any vehicle.

• Parking over dry grass may cause a fire. Hot exhaust pipes, catalytic converters, and mufflers are as dangerous as a match.

• When you camp or walk through wildland areas, follow fire safety rules. Above all, never leave any fire until it is completely out.

• Learn the facts about fires: how they start, what conditions favor them.

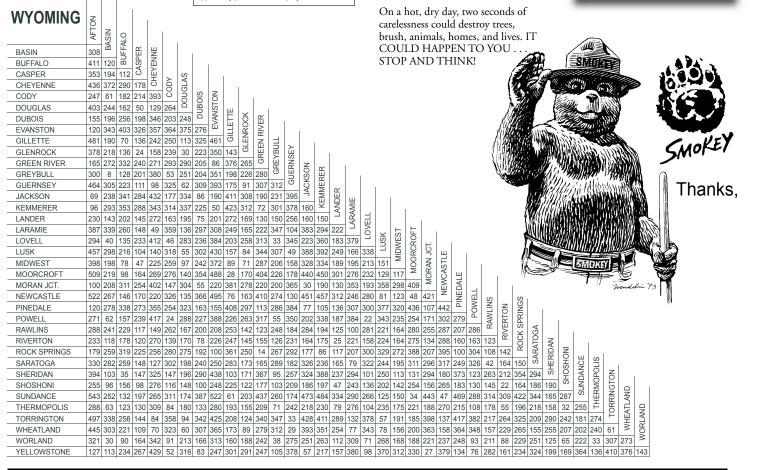

• Don't start any fire when the fire danger is high.

Use the National Recreation Reservation Service (NRRS) for some Forest Service Recreation Sites

Selected camp sites throughout the Intermountain and other Forest Service Regions are available for reservation. Campground reservations may be made by phone at 1-877-444-6777 or TDD 1-877-833-6777, or on line at www.reserveusa.com.

Over the phone, operators will either take your reservation for a specific site or help you find a site to your liking. A user fee and service charge can be made via major credit card or check.

Contact the Forest Service or NRRS for more information and to learn which facilities are included in this service.

The Forest

The Boise National Forest includes about 2,612,000 acres of National Forest System Lands located north and east of the city of Boise, Idaho. Intermingled with the Forest are 348,000 acres owned or administered by private citizens or corporations, the State of Idaho, and other Federal agencies.

Most of the land supports an evergreen forest that includes pure or mixed stands of ponderosa pine, Douglas-fir, Engelmann spruce, lodgepole pine, and subalpine fir. Brush-grass or grasses are found in the non-timbered areas. The Forest contains large areas of summer range for big game species, such as mule deer and Rocky Mountain elk. Trout are native to most streams and lakes, while ocean-going salmon and steelhead inhabit the many tributaries of the Salmon River.

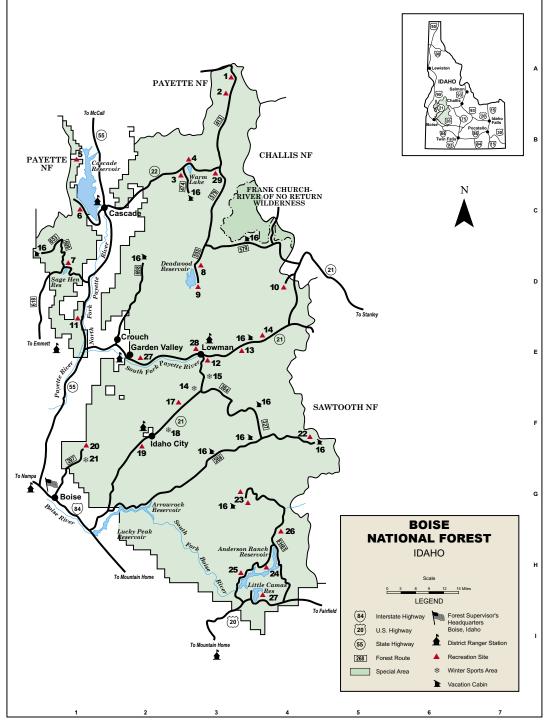

Most of the land lies within the Idaho Batholith – a large and erosive geologic formation. Through uplift, faulting, and subsequent dissection by stream cutting action, a mountainous landscape has developed. Elevations range from 2,600 to 9,800 feet. The major river systems represented are the Boise and Payette Rivers, and the South and Middle Fork drainages of the Salmon River. The average annual precipitation ranges from 15 inches at lower elevations to 70 inches at higher elevations.

Recreation Opportunities

There are many year-round recreation opportunities. Visitors will find over 70 campgrounds and picnic areas providing a variety of recreation experiences. Several of the campgrounds provide access for the physically challenged.

For those who want solitude, the Frank Church-River of No Return Wilderness has lots of it, as do other undeveloped areas throughout the Forest. In addition, portions of the Sawtooth Wilderness, the Sawtooth National Recreation Area, and the Middle Fork of the Salmon River, a part of the National Wild and Scenic Rivers System, are easily

accessed from a number of Boise National Forest campgrounds and trailheads. These rugged areas are famous for their spectacular scenery.

There are many opportunities for general or dispersed recreation. Big game hunting and trout fishing are popular. Over 7,600 miles of streams and more than 250 lakes and reservoirs offer excellent water sports activities including rafting, kayaking, sailing, and water skiing. Visitors can hike, ride horseback, or motorbike on over 850 miles of trails. Three trails have been established as National Recreation Trails: William H. Pogue (motorized/non-motorized travel), Whoop-Um-Up (cross-country skiing), and Hull's Gulch (nonmotorized travel).

Snowmobiling, cross-country skiing, alpine and nordic skiing, and ice fishing are popular in winter. Many of the snow trails are regularly groomed.

KEY TO RECREATION SITE INFORMATION

Fees (Camping, Picnicking and Group): F = Fee Charged

Modification of Facilities to Assist Users With Physical Impairments:

- A = Facilities not modified. B = Limited modification - At least one unit has been modified, but modification may not be
- sufficient to be usable by many individuals who are confined to a wheelchair. C = Significant modification - At least one unit has been modified to allow use by most indi-
- viduals who are confined to a wheelchair.

Reservations (Camping, Picnicking, Group): H = Non-reservation area.

- J = Reservation accepted/recommended
- K = Reservation required.
- L = One or more units reserved until 6 pm forhandicapped use.

Type of Facilities Available (Camping): T = Tents U = Trailers

Special Features Located Within One Mile of the Site: 1 = Fishing

- 2 = River or stream 3 = Reservoir or lake (powerboats permitted)
- 4 = Reservoir or lake (no powerboats)
 5 = Boat ramp
- 6 = Boat rental
- 7 = Floating, rafting, kayaking 8 = Swimming
- 9 = Marina
- 10 = Store
- 11 = Resort
- 12 = Restaurant 13 = Museum
- 14 = Cave
- 15 = Ghost town 16 = Canyon 17 = Trailhead
- 18 = Historic trail
- 19 = Nature trail
- 20 = Accessible by trail or boat only 21 = Wilderness access
- 22 = Waterfalls
- 23 = Geological area
- 24 = Handicapped facilities 25 = Evening program
- 26 = Scenic drive 27 = Timbered setting
- 28 = Open setting

Bridger-Teton

National Forest

The Forest

The 3,400,000-acre Bridger-Teton National Forest is the second largest National Forest in the United States outside Alaska. It lies in western Wyoming, adjoining Yellowstone and Grand Teton National Parks and within the Greater Yellowstone Ecosystem, the largest remaining area of undeveloped land in the 48 conterminous United States. It is noted for its unusual scenery and natural features, large and diverse wildlife populations, and habitat for threatened and endangered species.

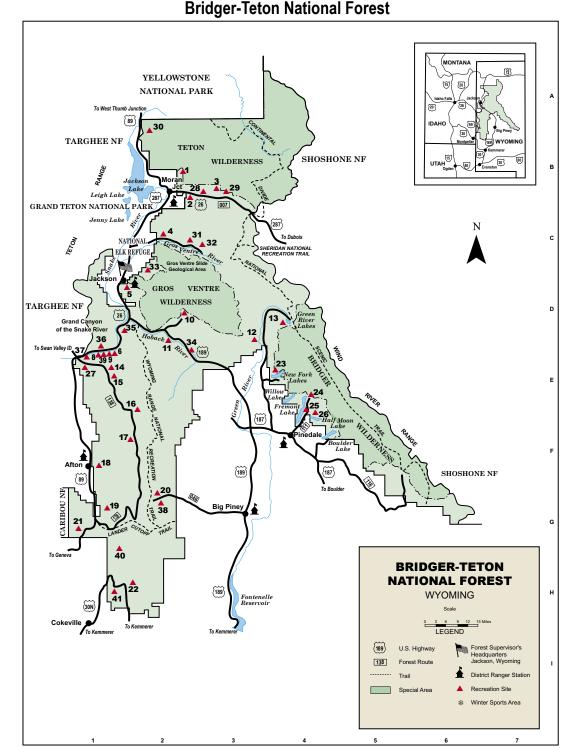

The Forest contains headwaters of four major river basins: the Yellowstone (Missouri/Mississippi Basin); Snake (Columbia); Green (Colorado Basin); and Bear River (Great Basin).

Seven major mountain ranges are found within Forest boundaries. These mountain ranges are part of the northern Rocky Mountains and include part of the striking Teton Range and Wind River Mountains. The Forest borders Jackson Hole, famous in the history of early explorers and fur traders, and winter home of the well-known Jackson elk herd.

Recreation Opportunities

For its two million annual visitors, the Forest offers an excellent variety of all-season recreation from remote wilderness to developed resorts and ski areas. There are over 800 miles of winter sports trails, some of which are groomed for snowmobiling and cross-country skiing, and 2,600 miles of trail that provide summer and fall access to the backcountry. In addition to three wildernesses the Forest offers large areas of undeveloped backcountry.

Fishing and big game hunting opportunities are among the finest found in any National Forest. River recreation is another popular use of the Forest, particularly in the Grand Canyon of the Snake River. Over 300 outfitters provide services such as guided hunting and fishing, river rafting, mountaineering, hiking and horseback riding, cross-country

skiing, snowmobiling, and helicopter skiing.

Several other natural features are of special interest. The Gros Ventre Slide Geological Area, north of Jackson, is the site of a massive landslide in 1925 which created the Lower Slide Lake. Periodic Spring, east of Afton, is an impressive cold-water geyser. The Wind River Mountains, with large glacial lakes tucked into the moraines left by glaciers, provide an outstanding example of Pleistocene glaciations.

Explore the Caribou-Targhee

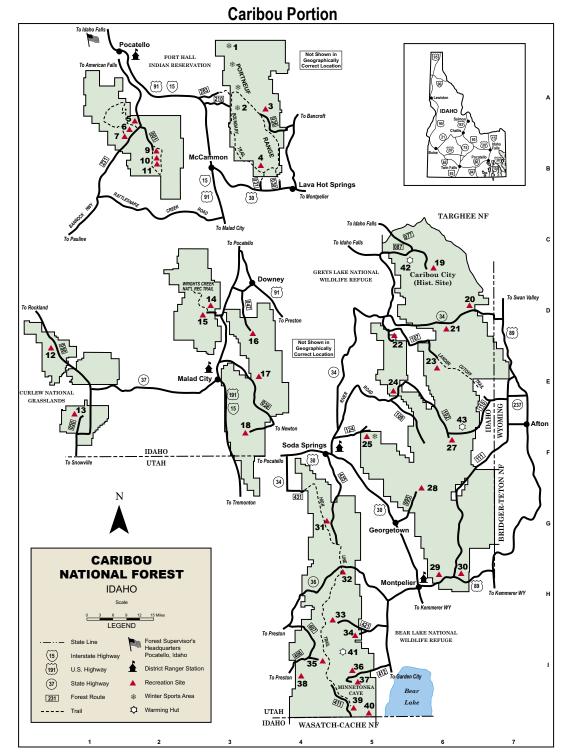

National Forest

The Caribou Portion

Created in 1907 by President Theodore Roosevelt, the Forest now covers more than one million acres in southeast Idaho. The Forest, named for Caribou Mountain, is home to elk, deer, and moose – but not caribou.

In 1870, a colorful gold miner nicknamed "Carriboo Jack" and his partners discovered gold on Mt. Pisgah. Jessie Fairchild, aka "Carriboo Jack," was famous in local mining towns for his tall tales of the Canadian caribou country. Soon, Mt. Pisgah was known as "Caribou Mountain." The Mountain's 20-year gold rush produced 50 million dollars in placer gold. Abandoned relics of this era can still be found near Caribou Mountain.

Several north-south mountain ranges of the Overthrust Belt characterize the Forest. Visitors will encounter both conifer and sagebrush-covered slopes. The Curlew National Grasslands near Malad are also administered by the Forest and are known for their upland game birds.

Recreation Opportunities

The Caribou National Forest offers an ample variety of outdoor activities such as camping, hiking, back packing, fishing, snowmobiling, and horseback and trail bike riding. More than a half-million visitor days are spent in recreation in the Forest each year. Developed campgrounds provide a diversity of scenic atmospheres and facilities, with most sites located in wooded

areas and accessible by good roads. Camping fees are based on the facilities provided in the campground.

Fishing and hunting are also popular activities on the Caribou. Approximately 250 miles of streams and 8,100 acres of lakes and reservoirs are within the Forest boundary. Game fish species include rainbow trout, eastern brook trout, brown trout, cutthroat trout, bluegill, and bass. Some of the best big game hunting in the West is found in the Forest. Game species include moose, elk, mule deer, bear, several grouse species, ducks, and geese. Hunting and fishing permits are available from the Idaho Department of Fish and Game

With a ski area on the west side of Mt. Bonneville and several snowmobiling and cross-country ski trails on the Forest, winter recreation is a growing activity in southeastern Idaho. Over 300 miles of winter trails are groomed by the Idaho Department of Parks and Recreation.

There are approximately 1,200 miles of hiking and back packing trails in the Forest. Many trails are well maintained and marked. Some roads and trails are closed to motorized vehicles to protect soils, watersheds, and important wildlife habitat.

Some sites of special interest are:

• The Wright's Creek National Recreation Trail (14) runs north and south for 12 miles in the Elkhorn Mountain Range. This trail is open to all uses and activities. Indian Mill Trail leads to the top of Elkhorn Peak.

• The Lander Cutoff Trail (23) is the first government-built wagon road in the West. Used by wagon trains in the late 1800's, the Lander Cutoff took settlers from the Oregon Trail to California and is today on the National Register of Historic Places.

 Trail Canyon (25) is a great all-season play area with trails, picnicking area, and a large warming ĥut.

• The Highline National Recreation Trail (39) is 55 miles long and runs north and south in the gorgeous Bear River Mountain Range.

• Minnetonka Cave (37) located in St. Charles Canyon, is home to unique stalagmite and stalactite formations, a variety of bat species, and very friendly tour guides.

· Cherry Springs Nature Area (5) in Mink Creek Canyon offers a fully accessible nature trail and picnic area, just right for the avid bird watcher.

• Scout Mountain Campground (10) features improved campsites, the Justice Park day-use picnic area, a group area, and the beautiful Scout Mountain Nature Trail (9).

Discover the Caribou-Targhee

National Forest

The Targhee Portion

The Targhee is a National Forest of contrasts! Its 1.8 million acres encompass semi-desert, sagebrush-dotted, arid land; timbered highlands and peaks over 10,000 feet; and streams, lakes, waterfalls, rivers, and wilderness areas. The Forest is located in southeastern Idaho, with a small portion in southwestern Wyoming. It borders Yellowstone and Grand Teton National Parks on the east, with its northern boundary along the Continental Divide.

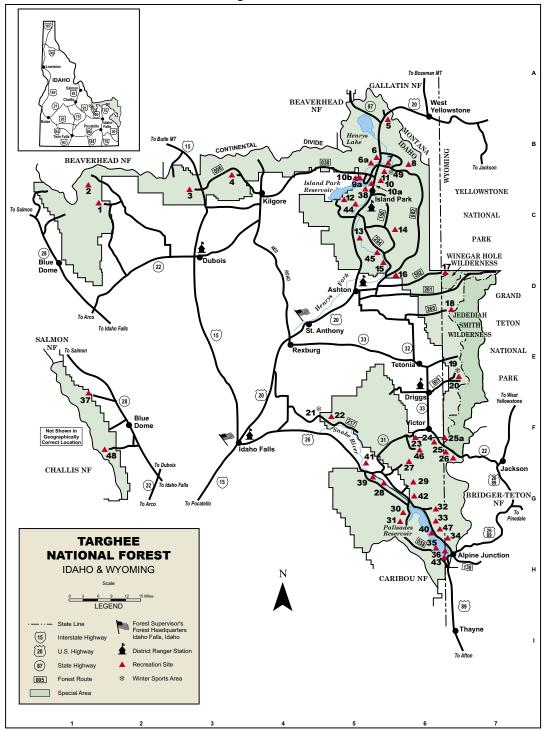

Average summer daytime high temperatures are 70-80 degrees Fahrenheit, with evenings often 20-30 degrees cooler. Winter can be quite cold, sometimes dipping to -40 degrees Fahrenheit, particularly at the higher elevations. Snowfall can occur even during summer months. Visitors may need clothing appropriate for snow, rain, cold, or heat, especially for trips into mountainous areas.

Recreation Opportunities

The Forest's varied landscape offers wonderful scenic beauty all year long. Diverse settings allow unlimited year-round recreation, whether you prefer more developed facilities such as campgrounds, ski resorts, and boat docks, or hiking, camping, and horseback riding in the open spaces of the back country.

Most campgrounds are adjacent to rivers or reservoirs. Camping fees are based on the facilities provided in the campground. Most undeveloped areas within the Forest are open to camping. The number of days you can spend in campgrounds and open forest areas is limited. Concessionaires manage many campgrounds under a special use agreement with the Forest Service.

Boating and water-skiing occur mainly on the Island Park and Palisades Reservoirs. Rafting, kayaking, and canoeing are popular sports on short stretches of the Snake River near Swan Valley and on the

Henry's Fork. Dams, large falls, and irrigation canals present hazards along several stretches of streams and rivers. The Big Springs Water Trail, the first National Recreation Water Trail established by the Forest Service, is on the Targhee. This

water trail offers a five-mile float on calm water where many species of wildlife can be seen.

Hunting and fishing are popular activities which a require State license. Game species are moose, elk, antelope, mule deer, mountain goat, whitetail deer, bighorn sheep, black bear, small animals, and game birds. The Island Park area is worldrenowned for its excellent stream and lake fly-fishing opportunities. Game fish are rainbow, eastern brook, brown and cutthroat trout, kokanee, salmon and whitefish. Other areas of the Forest provide more solitude and similar successes.

The Targhee National Forest offers abundant back country to experience. In addition to the more common activities previously listed, there are photography, rock climbing, rock collecting, bird watching, berry picking, gold panning, and mushroom collecting. Some activities may require a permit.

Over 1,200 miles of trails exist on the Targhee, with over 40 trail heads serving the trail system. Not all trails are maintained every year.

When traveling in groups of 15 or more, obtain a free group permit in advance at any Forest office.

For winter recreation, counties within and adjacent to the Forest groom between 400-600 miles of snowmobile trails. Registration and license fees help finance trail grooming. The Island Park and Big Hole areas are considered a snowmobiler's paradise with their vast number of groomed trails. The well known Two Top National Recreation Snowmobile Trail is in this area. Groomed trails and open back country areas for cross-country skiing and snowshoeing are available on the Forest. Two area ski resorts offer opportunities for all types of snow skiing.

KEY TO RECREATION SITE INFORMATION

Fees (Camping, Picnicking and Group): F = Fee Charged

Modification of Facilities to Assist Users With Physical Impairments:

- A = Facilities not modified.
- B = Limited modification At least one unit has been modified, but modification may not be sufficient to be usable by many individuals who are confined to a wheelchair
- C = Significant modification At least one unit has been modified to allow use by most individuals who are confined to a wheelchair

Reservations (Camping, Picnicking, Group):

H = Non-reservation area.

- J = Reservation accepted/recommended
 - K = Reservation required. L = One or more units reserved until 6 pm for handicapped use.

Type of Facilities Available (Camping): T = Tents U = Trailers

Special Features Located Within One Mile of

- the Site: 1 = Fishing

Experience the **Payette** National Forest

The Forest

The Payette National Forest spans over 2.3 million acres of some of west-central Idaho's most beautiful and diverse country. In one day you can travel from hot desert grasslands through cool conifer forests to snow capped peaks. This spectacular land is bordered by two of the deepest canyons in North America: The Salmon River Canyon on the north and Hells Canyon of the Snake River on the west. To the east lies the 2.4million-acre Frank Church-River of No Return Wilderness, the largest congressionally designated Wilderness in the lower 48 states. To the south, the Payette is bordered by the Boise National Forest.

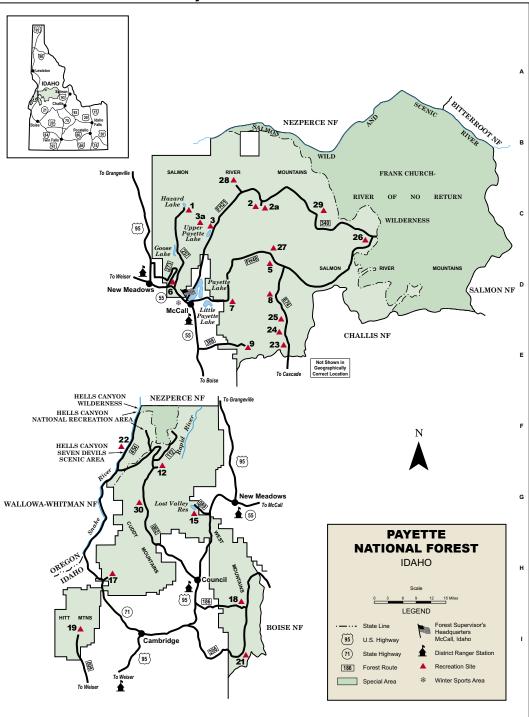

Geology and topography play an important role in determining resource management on various areas of the Forest. For example, the presence of valuable minerals, scenic beauty of the landscape, and different soil conditions are all influenced by geologic factors.

Recreation Opportunities

The Payette National Forest offers many recreation opportunities, outstanding physical settings, and visual resources. The Payette includes a large portion of the Frank Church-River of No Return Wilderness. Pristine, high mountain lakes lie along the ridge between the South Fork Salmon River and the North Fork Payette River drainages. Lakes grace the Lava Ridge-Hard Butte area east of the Little Salmon River drainage.

The Forest supports sizeable big game herds, game bird populations, and a wide variety of non-game species. Spring through Fall, the Forest provides fishing, hunting, hiking, back packing, camping, picnicking, pleasure driving, sightseeing, horseback riding, off-highway vehicle driving, nature study, and forest product gathering (e.g., firewood, berries and mushrooms). Heavy winter snow pack is popular for downhill and cross-country skiing, snowmobiling, and snow play. Two downhill ski areas are located on the Payette National Forest.

KEY TO RECREATION SITE INFORMATION

Fees (Camping, Picnicking and Group): F = Fee Charged

Modification of Facilities to Assist Users With Physical Impairments: A = Facilities not modified.

- B = Limited modification At least one unit has been modified, but modification may not be sufficient to be usable by many individuals who are confined to a wheelchair.
- C = Significant modification At least one unit has been modified to allow use by most individuals who are confined to a wheelchair.

Reservations (Camping, Picnicking, Group): H = Non-reservation area.

- J = Reservation accepted/recommended.
- **K** = Reservation required. L = One or more units reserved until 6 pm forhandicapped use.
- Type of Facilities Available (Camping): T = Tents U = Trailers

Special Features Located Within One Mile of the Site: 1 = Fishing

- 2 = River or stream 3 = Reservoir or lake (powerboats permitted)
- 4 = Reservoir or lake (no powerboats)
 5 = Boat ramp
- 6 = Boat rental
- 7 = Floating, rafting, kayaking
- 8 = Swimming
- 9 = Marina 10 = Store
- 11 = Resort
- 12 = Restaurant
- 13 = Museum 14 = Cave
- 15 = Ghost town 16 = Canyon 17 = Trailhead
- 18 = Historic trail
- 19 = Nature trail
- 20 = Accessible by trail or boat only 21 = Wilderness access
- 22 = Waterfalls 23 = Geological area
- 24 = Handicapped facilities 25 = Evening program
- 26 = Scenic drive 27 = Timbered setting
- 28 = Open setting

Explore the Salmon-Challis

National Forest

The Forest

The Salmon-Challis National Forest covers over 4.3 million acres, of which over 1 million acres are located within the Frank Church-River of No Return Wilderness. Rugged and remote, this country offers adventure, solitude, and breathtaking scenery. Panoramic vistas highlight travel atop the Continental Divide; northwest-southeast trending mountain ranges culminate in the jagged heights of Mt. Borah, Idaho's tallest peak; the Wild and Scenic Middle Fork and Salmon Rivers plunge through the shadowy depths of immense canyons; and sagebrush slopes are blanketed with colorful displays of wildflowers in spring.

For over 8,000 years, ancestors of the Shoshone-Bannock people have lived in this region. White settlement began shortly after the Lewis and Clark Expedition traveled through the territory in 1805. Initially, fur trappers then miners worked this area. The development of Salmon, Challis, and their surrounding communities followed and by the 1880's were flourishing. Traces of the past can be found throughout the Forest. Remember, leave these clues untouched to allow the next visitors discovery of their heritage.

The Headquarters Office is located in Salmon, Idaho. There are currently seven administrative units and two natural research areas: the Challis, Salmon/Cobalt, Leadore, Lost River, Middle Fork, North Fork, and Yankee Fork Ranger Districts.

Recreation Opportunities

Most roads branch off main highways and turn to gravel or dirt surfaces, with many being suitable for sedans, while others require 4wheel drive vehicles. Recommended travel precautions are to have a full tank of gas and a good spare tire.

Three popular road tours: the Custer Motorway Loop, the Lewis and Clark Backcountry Byway, and the Salmon River Road, take you through the Salmon River mountains, to the crest of the Continental Divide, and along the scenic Salmon River. You will discover historic mining towns and share their history of mining life. You will be able to trace the steps of the 1805 expedition that changed the West. And, while exploring you may catch glimpses of Rocky Mountain sheep, mountain goat, bald eagles, and river otter, among other wildlife living in the Forest.

Known as the "white water capital of the world," the Salmon and Middle Fork Rivers offer adventures to provide a lifetime of memories. Trip lengths vary and can be arranged privately or through a licensed outfitter. Permit applications for the wild section of the Main Salmon River and for the Middle Fork River are available at the North Fork and Middle Fork Ranger Districts and on the Forest web page (www.fs.fed.us/r4/sc) from October 1 - January 31.

October 1 - January 31. Nearly 3,292 miles of trails traverse the Forest, almost half of which are located in the Wilderness. Hiking season is generally between April and October, with elevations above 7,500 feet usually clear of snow by July 4. Trails range from moderate to difficult. Many nonwilderness trails are designated for motorized use. A Forest Travel Plan and personnel at Forest offices can help determine the best spot for you.

Hunting opportunities for deer, elk, bighorn sheep, moose, mountain goat, black bear, and mountain lion exist on much of the Forest. Hunt on your own or with a licensed outfitter. Be sure to check out chukar, grouse, and goose hunting opportunities as well.

Most streams and lakes on the Forest are home to trout. Steelhead average 4-6 pounds, with the occasional 15-20 pounder providing the experience of a lifetime. Mackay Reservoir, situated on neighboring Bureau of Land Management managed land, offers good angling for kokanee salmon. For additional information on fishing or hunting regulations, contact the Idaho Department of Fish and Game at (208) 756-2271; P.O. Box 1336, Salmon, Idaho 83467, or visit their web site at www2.state.id.us/fishgame.

There are a wide variety of opportunities for beginners to advanced downhill skiers, snow boarders, and telemarkers. Williams Creek Summit offers 22 miles of moderate to difficult cross-country ski trails, or you can try your backcountry skiing skills on Copper Mountain. Gentler, groomed trails at Chief Joseph Pass on the Idaho-Montana border (Beaverhead National Forest) provide fun for the whole family. Local snowmobile clubs maintain a number of groomed routes on the Ridge Road to the Stanley-Landmark Snowmobile Trail system. Please respect sharing the trails with a diversity of users.

Winter anglers may try their skills at Jimmy Smith and Williams Lake, a 30-minute drive from Salmon.

Most campgrounds on the Forest have at least one wheelchair accessible site. Williams Lake provides wheelchair accessible spots for both fishing and picnicking.

Enjoy the Sawtooth National Forest

The Forest

The Sawtooth National Forest comprises more than 2.1 million acres of public land, most of it in south-central Idaho, with one unit in northern Utah. Forest Headquarters is located in Twin Falls, Idaho. The Forest is made up of four administrative units: the Minidoka, Ketchum, and Fairfield Ranger Districts, and the Sawtooth National Recreation Area.

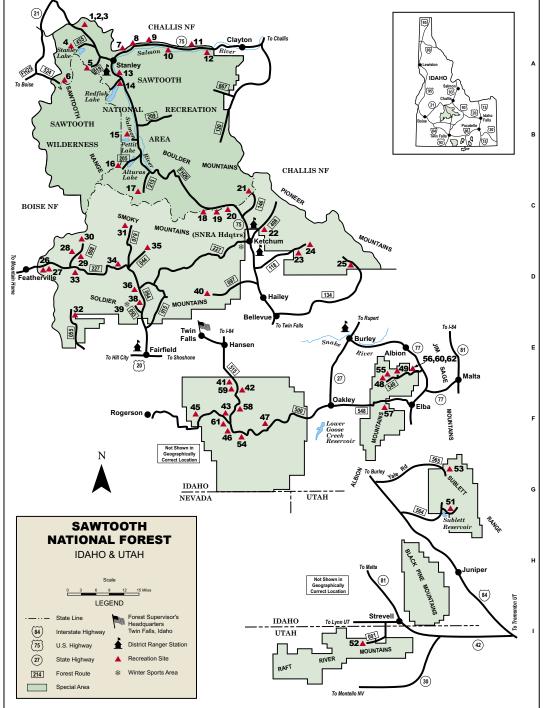

Recreation Opportunities

The Sawtooth offers a remarkable combination of environmental settings for recreation opportunities. Units of this Forest rise from the salt flats of the historic Great Salt Lake in the south to the 12,076-foot, glacially-formed Hyndman Peak in the north. The Forest's 1,100 lakes and more than 3,000 miles of rivers and streams provide native trout and annual runs of salmon and steelhead. Major rivers, such as the Salmon, South Fork of the Boise, South Fork of the Payette, and the Wood River, offer experiences ranging from primitive to highly developed water recreation. The Forest's Redfish Lake is one of the outstanding large mountain lakes accessible by vehicle with first-class family camping opportunities.

The Forest provides habitat for 354 wildlife species and 25 species of fish, including runs of steelhead and salmon from the Pacific Ocean. Onethird of Idaho's mountain goat population is found here, as well as one of the State's most important deer herds. Hunters come here for deer, elk, antelope, mountain goat, bear, and mountain lion. The Sawtooth also offers wing shooting for duck, geese, chukar and Hungarian partridge, and forest grouse.

Sightseers, bird watchers, hikers, horse riders, and trail and mountain bikers add to recreational traffic on the Forest. So do skiers and snowmobile operators. Cross-country skiing is a rapidly expanding winter use of the Sawtooth's abundant high country snow.

The congressionally designated 754,000-acre Sawtooth National Recreation Area is part of the Sawtooth National Forest. This area offers outstanding opportunities for

recreation and viewing wildlife in a pastoral setting indicative of the old western way of life.

Developed recreation sites include ski areas, campgrounds, picnic areas, boat ramps, scenic overlooks, trail heads, interpretive sites, and visitor centers. Combined, these sites have a total capacity of 24,920 persons at one time. Most of the popular sites, such as the campgrounds at Redfish Lake, are consistently full in July and August. Daily use fees are charged at the more developed campgrounds. June, July and August are the busy months for campers.

The Forest includes large tracts of undeveloped country. The Sawtooth Wilderness and other high country areas such as the White Clouds, Boulders, Pioneers, and Smoky's, each with its own distinctive characteristics, attract thousands of hikers and riders annually.
