

trade, or sales the prices of which are otherwise unrepresentative, are disregarded; sales used to establish a fictitious market are disregarded; no contemporaneous sales of comparable merchandise are available; or in other circumstances where the Secretary determines that home market or third country prices are inappropriate. (See section 773(e) and section 773(f) of the Act.) This section clarifies the meaning of certain terms relating to constructed value.

(b) *Profit and selling, general, and administrative expenses.* In determining the amount to be added to constructed value for profit and for selling, general, and administrative expenses, the following rules will apply:

(1) Under section 773(e)(2)(A) of the Act, “foreign country” means the country in which the merchandise is produced or a third country selected by the Secretary under §351.404(e), as appropriate.

(2) Under section 773(e)(2)(B) of the Act, “foreign country” means the country in which the merchandise is produced.

**§ 351.406 Calculation of normal value if sales are made at less than cost of production.**

(a) *Introduction.* In determining normal value, the Secretary may disregard sales of the foreign like product made at prices that are less than the cost of production of that product. However, such sales will be disregarded only if they are made within an extended period of time, in substantial quantities, and are not at prices which permit recovery of costs within a reasonable period of time. (See section 773(b) of the Act.) This section clarifies the meaning of the term “extended period of time” as used in the Act.

(b) *Extended period of time.* The “extended period of time” under section 773(b)(1)(A) of the Act normally will coincide with the period in which the sales under consideration for the determination of normal value were made.

**§ 351.407 Calculation of constructed value and cost of production.**

(a) *Introduction.* This section sets forth certain rules that are common to the calculation of constructed value

and the cost of production. (See section 773(f) of the Act.)

(b) *Determination of value under the major input rule.* For purposes of section 773(f)(3) of the Act, the Secretary normally will determine the value of a major input purchased from an affiliated person based on the higher of:

(1) The price paid by the exporter or producer to the affiliated person for the major input;

(2) The amount usually reflected in sales of the major input in the market under consideration; or

(3) The cost to the affiliated person of producing the major input.

(c) *Allocation of costs.* In determining the appropriate method for allocating costs among products, the Secretary may take into account production quantities, relative sales values, and other quantitative and qualitative factors associated with the manufacture and sale of the subject merchandise and the foreign like product.

(d) *Startup costs.* (1) In identifying startup operations under section 773(f)(1)(C)(ii) of the Act:

(i) “New production facilities” includes the substantially complete retooling of an existing plant. Substantially complete retooling involves the replacement of nearly all production machinery or the equivalent rebuilding of existing machinery.

(ii) A “new product” is one requiring substantial additional investment, including products which, though sold under an existing nameplate, involve the complete revamping or redesign of the product. Routine model year changes will not be considered a new product.

(iii) Mere improvements to existing products or ongoing improvements to existing facilities will not be considered startup operations.

(iv) An expansion of the capacity of an existing production line will not qualify as a startup operation unless the expansion constitutes such a major undertaking that it requires the construction of a new facility and results in a depression of production levels due to technical factors associated with the initial phase of commercial production of the expanded facilities.

(2) In identifying the end of the startup period under clauses (ii) and (iii) of section 773(f)(1)(C) of the Act:

(i) The attainment of peak production levels will not be the standard for identifying the end of the startup period, because the startup period may end well before a company achieves optimum capacity utilization.

(ii) The startup period will not be extended to cover improvements and cost reductions that may occur over the entire life cycle of a product.

(3) In determining when a producer reaches commercial production levels under section 773(f)(1)(C)(ii) of the Act:

(i) The Secretary will consider the actual production experience of the merchandise in question, measuring production on the basis of units processed.

(ii) To the extent necessary, the Secretary will examine factors in addition to those specified in section 773(f)(1)(C)(ii) of the Act, including historical data reflecting the same producer's or other producers' experiences in producing the same or similar products. A producer's projections of future volume or cost will be accorded little weight.

(4) In making an adjustment for startup operations under section 773(f)(1)(C)(iii) of the Act:

(i) The Secretary will determine the duration of the startup period on a case-by-case basis.

(ii) The difference between actual costs and the costs of production calculated for startup costs will be amortized over a reasonable period of time subsequent to the startup period over the life of the product or machinery, as appropriate.

(iii) The Secretary will consider unit production costs to be items such as depreciation of equipment and plant, labor costs, insurance, rent and lease expenses, material costs, and factory overhead. The Secretary will not consider sales expenses, such as advertising costs, or other general and administrative or non-production costs (such as general research and development costs), as startup costs.

**§ 351.408 Calculation of normal value of merchandise from nonmarket economy countries.**

(a) *Introduction.* In identifying dumping from a nonmarket economy country, the Secretary normally will calculate normal value by valuing the nonmarket economy producers' factors of production in a market economy country. (See section 773(c) of the Act.) This section clarifies when and how this special methodology for nonmarket economies will be applied.

(b) *Economic Comparability.* In determining whether a country is at a level of economic development comparable to the nonmarket economy under section 773(c)(2)(B) or section 773(c)(4)(A) of the Act, the Secretary will place primary emphasis on *per capita* GDP as the measure of economic comparability.

(c) *Valuation of Factors of Production.* For purposes of valuing the factors of production, general expenses, profit, and the cost of containers, coverings, and other expenses (referred to collectively as 'factors') under section 773(c)(1) of the Act the following rules will apply:

(1) *Information used to value factors.* The Secretary normally will use publicly available information to value factors. However, where a factor is purchased from a market economy supplier and paid for in a market economy currency, the Secretary normally will use the price paid to the market economy supplier. In those instances where a portion of the factor is purchased from a market economy supplier and the remainder from a nonmarket economy supplier, the Secretary normally will value the factor using the price paid to the market economy supplier.

(2) *Valuation in a single country.* Except for labor, as provided in paragraph (d)(3) of this section, the Secretary normally will value all factors in a single surrogate country.

(3) *Labor.* For labor, the Secretary will use regression-based wage rates reflective of the observed relationship between wages and national income in market economy countries. The Secretary will calculate the wage rate to be applied in nonmarket economy proceedings each year. The calculation
