

benefit attributable to the equity infusion.

(4) *Equityworthiness*—(i) *In general.* The Secretary will consider a firm to have been equityworthy if the Secretary determines that, from the perspective of a reasonable private investor examining the firm at the time the government-provided equity infusion was made, the firm showed an ability to generate a reasonable rate of return within a reasonable period of time. The Secretary may, in appropriate circumstances, focus its equityworthiness analysis on a project rather than the company as a whole. In making the equityworthiness determination, the Secretary may examine the following factors, among others:

(A) Objective analyses of the future financial prospects of the recipient firm or the project as indicated by, *inter alia*, market studies, economic forecasts, and project or loan appraisals prepared prior to the government-provided equity infusion in question;

(B) Current and past indicators of the recipient firm's financial health calculated from the firm's statements and accounts, adjusted, if appropriate, to conform to generally accepted accounting principles;

(C) Rates of return on equity in the three years prior to the government equity infusion; and

(D) Equity investment in the firm by private investors.

(ii) *Significance of a pre-infusion objective analysis.* For purposes of making an equityworthiness determination, the Secretary will request and normally require from the respondents the information and analysis completed prior to the infusion, upon which the government based its decision to provide the equity infusion (*see*, paragraph (a)(4)(i)(A) of this section). Absent the existence or provision of an objective analysis, containing information typically examined by potential private investors considering an equity investment, the Secretary will normally determine that the equity infusion received provides a countervailable benefit within the meaning of paragraph (a)(1) of this section. The Secretary will not necessarily make such a determination if the absence of an objective analysis is consistent with the actions

of reasonable private investors in the country in question.

(iii) *Significance of prior subsidies.* In determining whether a firm was equityworthy, the Secretary will ignore current and prior subsidies received by the firm.

(5) *Benefit where firm is equityworthy.* If the Secretary determines that the firm or project was equityworthy (*see* paragraph (a)(4) of this section), the Secretary will examine the terms and the nature of the equity purchased to determine whether the investment was otherwise inconsistent with the usual investment practice of private investors. If the Secretary determines that the investment was inconsistent with usual private investment practice, the Secretary will determine the amount of the benefit conferred on a case-by-case basis.

(6) *Benefit where firm is unequityworthy.* If the Secretary determines that the firm or project was unequityworthy (*see* paragraph (a)(4) of this section), a benefit to the firm exists in the amount of the equity infusion.

(7) *Allegations.* The Secretary will not investigate an equity infusion in a firm absent a specific allegation by the petitioner which is supported by information establishing a reasonable basis to believe or suspect that the firm received an equity infusion that provides a countervailable benefit within the meaning of paragraph (a)(1) of this section.

(b) *Time of receipt of benefit.* In the case of a government-provided equity infusion, the Secretary normally will consider the benefit to have been received on the date on which the firm received the equity infusion.

(c) *Allocation of benefit to a particular time period.* The benefit conferred by an equity infusion shall be allocated over the same time period as a non-recurring subsidy. *See* § 351.524(d).

§ 351.508 Debt forgiveness.

(a) *Benefit.* In the case of an assumption or forgiveness of a firm's debt obligation, a benefit exists equal to the amount of the principal and/or interest (including accrued, unpaid interest) that the government has assumed or forgiven. In situations where the entity

§ 351.509

assuming or forgiving the debt receives shares in a firm in return for eliminating or reducing the firm's debt obligation, the Secretary will determine the existence of a benefit under § 351.507 (equity infusions).

(b) *Time of receipt of benefit.* In the case of a debt or interest assumption or forgiveness, the Secretary normally will consider the benefit as having been received as of the date on which the debt or interest was assumed or forgiven.

(c) *Allocation of benefit to a particular time period*—(1) *In general.* The Secretary will treat the benefit determined under paragraph (a) of this section as a non-recurring subsidy, and will allocate the benefit to a particular year in accordance with § 351.524(d).

(2) *Exception.* Where an interest assumption is tied to a particular loan and where a firm can reasonably expect to receive the interest assumption at the time it applies for the loan, the Secretary will normally treat the interest assumption as a reduced-interest loan and allocate the benefit to a particular year in accordance with § 351.505(c) (loans).

§ 351.509 Direct taxes.

(a) *Benefit*—(1) *Exemption or remission of taxes.* In the case of a program that provides for a full or partial exemption or remission of a direct tax (*e.g.*, an income tax), or a reduction in the base used to calculate a direct tax, a benefit exists to the extent that the tax paid by a firm as a result of the program is less than the tax the firm would have paid in the absence of the program.

(2) *Deferral of taxes.* In the case of a program that provides for a deferral of direct taxes, a benefit exists to the extent that appropriate interest charges are not collected. Normally, a deferral of direct taxes will be treated as a government-provided loan in the amount of the tax deferred, according to the methodology described in § 351.505. The Secretary will use a short-term interest rate as the benchmark for tax deferrals of one year or less. The Secretary will use a long-term interest rate as the benchmark for tax deferrals of more than one year.

(b) *Time of receipt of benefit.*—(1) *Exemption or remission of taxes.* In the case

19 CFR Ch. III (4-1-03 Edition)

of a full or partial exemption or remission of a direct tax, the Secretary normally will consider the benefit as having been received on the date on which the recipient firm would otherwise have had to pay the taxes associated with the exemption or remission. Normally, this date will be the date on which the firm filed its tax return.

(2) *Deferral of taxes.* In the case of a tax deferral of one year or less, the Secretary normally will consider the benefit as having been received on the date on which the deferred tax becomes due. In the case of a multi-year deferral, the Secretary normally will consider the benefit as having been received on the anniversary date(s) of the deferral.

(c) *Allocation of benefit to a particular time period.* The Secretary normally will allocate (expense) the benefit of a full or partial exemption, remission, or deferral of a direct tax to the year in which the benefit is considered to have been received under paragraph (b) of this section.

§ 351.510 Indirect taxes and import charges (other than export programs).

(a) *Benefit*—(1) *Exemption or remission of taxes.* In the case of a program, other than an export program, that provides for the full or partial exemption or remission of an indirect tax or an import charge, a benefit exists to the extent that the taxes or import charges paid by a firm as a result of the program are less than the taxes the firm would have paid in the absence of the program.

(2) *Deferral of taxes.* In the case of a program, other than an export program, that provides for a deferral of indirect taxes or import charges, a benefit exists to the extent that appropriate interest charges are not collected. Normally, a deferral of indirect taxes or import charges will be treated as a government-provided loan in the amount of the taxes deferred, according to the methodology described in § 351.505. The Secretary will use a short-term interest rate as the benchmark for tax deferrals of one year or less. The Secretary will use a long-term interest rate as the benchmark for tax deferrals of more than one year.
