## INTRODUCTION.

---

The number of Newspapers and Periodicals enumerated in this edition of the AMERICAN NEWSPAPER ANNUAL is 22,092, an increase of 137 over the number given in the issue for 1897.

The net increase in the number of Newspapers and Periodicals in the United States and Canada has undergone some remarkable fluctuations during the past five years. The year 1894 was the first to show a decline in the averages which had ruled up to that time, thus giving the first indication of the depression which had already been noticeable in other branches of trade. The gain in 1894 was 659, a decline of 445 from the figures of the previous year. In 1895 the gain was only 368, and in 1896 it fell to 83. In 1897, however, an increase of 730 was shown, which was supposed to indicate that the tide had turned, and that succeeding issues of the ANNUAL would show increases approximating those which had been customary previous to 1894. This expectation has not been realized; the net gain in the present volume being, with one exception, the smallest we have yet had to record. There is a partial explanation of this. The number in 1897 was abnormally large, partly because of the increase usual to a Presidential Election, which had been in progress while that edition of the ANNUAL was being prepared, and also because that issue had been delayed three months, in order that it might contain the detailed reports of the election, and consequently showed the increase of fifteen months instead of twelve, as in previous issues. Conversely the number in the present edition is necessarily lessened; first, because there is always a larger proportion of suspensions than usual in the months immediately following a general election and, secondly, because there has been only the increase for nine months in this edition. But, making these allowances, there has still been an unusually large mortality in the newspaper world during 1897. A very large number of consolidations have taken place, and this alone has had a great deal to do with bringing down the net increase. We are, however, glad to note the growing conviction of publishers that, in a very large number of cases, there have been too many newspapers and that one strong paper is much better than two or three weak concerns struggling for existence.

A large number of new papers have been started during the year. Although the actual increase in the total number is small, yet this edition contains the names of 2,142 publications which are not found in the previous one. This number—about ten per cent of the whole—includes papers started since the last publication of the ANNUAL, consolidations under their new titles and removals from one locality to another, but does not include only partial changes of name. The number of entirely new publications is about 1,800.

In accordance with our usual custom there are several hundred publications which we do not insert, having no value for the general advertiser or the general public. Among them are those issued by private and high schools, the smaller colleges, local church papers, and publications issued in the interest of institutions, unless having an influence outside of the particular one by or for which they are published. Care has also been exercised in the selection of newspapers and periodicals which rightly come within the scope of this work. Experience teaches that it is not wise to insert every paper that comes to hand in its first or early number; for, while the exclusion may be unfortunate in a few instances, much dead matter is thereby

kept out of the book; not a few of these ventures never reaching beyond their first number, and very many failing to maintain an existence of over a few weeks.

An analysis of the Tabulated Statement on page 8 shows that the New England section gains 7, thus regaining its loss of last year. New York State gains 38. The Middle States, as a whole, gain 78. Pennsylvania has 56 more than last year. Maryland gains 10; New Jersey, 6; the District of Columbia 6 and Delaware 1. The South loses 29: Alabama loses 14; Arkansas, 8; Mississippi, 4; South Carolina, 3; Tennessee and Texas, 15 each; Virginia, 11, and West Virginia, 12. States gaining are, Florida, 8; Georgia, 9; Kentucky, 4; Louisiana, 11; North Carolina, 21. The Western States gain 21 only. The States in this section which show gains are, Colorado, 6; Idaho, 2; Indiana, 10; Minnesota, 12; Missouri, 6; Nebraska, 16; Nevada, 3; North Dakota, 3; Ohio, 22; Oregon, 5; Utah, 20, and Wisconsin, 11. The States losing are, California, 3; Illinois, 14; Iowa, 19; Kansas, 12; Michigan, 9; Montana, 10; South Dakota, 5; Washington, 21; Wyoming, 2.

The Territories show a loss of 11, of which Oklahoma contributes 9 and New Mexico 4. Indian Territory gains 3 and Alaska and Arizona remain as before.

Canada has 1,031 papers, an increase of 33 over last year.

The States having more than 1,000 papers are, New York, 2,014; Illinois, 1,709; Pennsylvania, 1,525; Ohio, 1,187, Iowa, 1,120 and Missouri, 1,024. Those having between 500 and 1,000 are, Indiana, 848; Michigan, 783; Texas, 775; Massachusetts, 728; Kansas, 686; California, 678; Wisconsin, 652; Nebraska, 633 and Minnesota, 627.

As will be seen in the Summary and Comparative Statement (p. 9), the total number of counties in the United States is 2,839, a gain of 6, while the number of counties in the United States and Canada in which newspapers are published has increased 13. The number of towns in which papers are published is 8,958, an increase of 85. The whole number of county seats is 2,706; a gain of 11. There is shown a gain of 8 only in the number of dailies, against 80 last year. The tri-weeklies have gained 7. The semi-weeklies have gained 21 only, against 71 last year. The number of weeklies recorded is 127 less than in 1897. As this issue that year was 507 larger than in the year previous, there is a total loss of 634 in the two years. Semi-monthlies have gained 18, the bi-monthlies 4, the quarterlies 11, while the fortnightly and miscellaneous remain as before.

The increase reported in the number of monthlies (195) needs some explanation. A portion of this gain is due to the fact that a syndicate of 65 monthly church papers in Philadelphia and another of 14 in New York have been included in the count this year, although the former have been in existence longer than a year, but have not hitherto been counted. None of these are entered under their individual names, in accordance with our custom, but as they are entered under the syndicate title, and are more or less used by our clients, we have thought it right to add them to the count. Even without these the increase in the number of monthlies is a notable one and shows that this issue is regaining lost ground. In 1895 and 1896 the total loss was 190. In 1897 a gain of 53 was made and the gain of 116, excluding the 79 above alluded to shows that the loss has, in a great measure, been made good.

POPULATION.—Population is taken mainly from the official reports of the United States census of 1890 and the Canadian census of 1891. Iowa, Kansas, Massachusetts, Minnesota, New Jersey, Rhode Island, South Dakota, Utah and Wisconsin took census in 1895 and the populations in those States are from the official reports. Population in Michigan is from the State census of 1894. Where publishers in other States have furnished us with figures we have generally used them, marking them "estimated" as customary.

STATE AND COUNTY HEADINGS.—The State and County headings have been carefully revised and brought up to the present time. The State headings especially are exceedingly

interesting and instructive reading, giving concise and valuable statements of the wonderful resources and growth of the country. The county headings are of great value to advertisers of specialties, who, by carefully examining them can readily decide which counties are likely to prove remunerative territory, and thus confine their expenditures within limits which may be expected to yield the greatest return for their outlay.

**TOWN HEADINGS.**—These headings have also been carefully revised. The location of the county in the State is given by a system of initial letters, which enables the reader to find quickly any county on the map, or to determine its location, no matter what may be the contour of a State, or however numerous may be its counties. The distance of the town, and in most cases the direction from some prominent point is given; its means of communication by railroad, water or stage; whether it is a telegraph and express station or not, and if not, what the nearest telegraph or express point is. If a place has a bank the word "Bank" appears, if more than one, "Banks," if there is no bank in the place the nearest, or most accessible, or the usual banking town for that point is given. Then follows the description of the place itself, setting forth as fully as possible its advantages of location, the nature of the surrounding district, with its productions, agricultural or otherwise, the leading manufactures, and educational and other public institutions.

**SUB-EDITIONS.**—As in previous issues we have endeavored to distinguish between independent and distinct publications and those which are simply reprints of some other paper with but little and often with no change whatever beyond the name. All papers so issued, as far as it was possible to trace them, have been entered in the Catalogue under the name of the leading paper, and, under the place of apparent publication, the name of the sub-edition is given with a reference to the paper issuing it. In the County List these sub-editions do not appear at all; the main paper has an italic note referring to the Catalogue for information respecting its sub-edition or editions.

It may be well to add that it is very difficult at times to determine positively this question of similarity of issue. Publishers of such papers generally are not willing to give information nor to send sample copies, and it is possible that in some instances an error may have been made either in quoting a paper as a sub-edition of another, when it would be fairly entitled to an independent entry if all the facts were known, or in giving a paper an independent standing when it is not entitled to it. Every effort has, however, been made to guard against either of these possibilities.

**NAMES OF EDITORS AND PUBLISHERS.**—No labor has been spared in the effort to have this department of the work as accurate as possible at the time of going to press; the continual changes of ownership and places of publication, however, necessarily preclude absolute accuracy.

**POLITICAL STATISTICS.**—In accordance with our established custom the political statistics are those of the latest Presidential election.

#### CIRCULATION.

(See also article on page 16.)

Circulations for which affidavits have been furnished are set in **bold-face** type throughout the book. Detailed statements are designated by a six-pointed star (\*). A double dagger (‡) indicates the publisher's claim unsupported by either affidavit or detailed statement. Our own estimates are set in Roman figures and unmarked.

While we would greatly prefer a detailed statement of issues for a whole year, yet records for six or eight months, will, if properly signed by the publisher or some responsible person for him, ordinarily entitle the paper to a rating in accordance therewith. We say *ordinarily*, because we do not believe that the rendering of such a statement is incontesti-

ble proof of its correctness, and there are instances in which such statements, even when supported by affidavits, could not be accepted in the face of positive information to the contrary; but we believe that such instances are comparatively few in number, and in the large majority of cases a detailed statement covering a period of several months, properly signed, is *prima facie* evidence of its reliability.

It frequently happens that the publishers when sending in their orders and copy for advertisements in the AMERICAN NEWSPAPER ANNUAL inclose therewith a statement of circulation, generally accompanied by a request that the ratings of their papers in the ANNUAL may be made to agree with the figures thus given. This will not be done. Circulation ratings are fixed before the solicitation of advertisements begins, from reports made out in proper form, and signed by publishers, or, in the event of failure to receive such reports, from any believed-to-be-authentic information in the Editorial Office.

Although the greater number of ratings are determined when copy is being made in July and August we are always willing to revise the figures as late as Sept. 30th, provided acceptable statements are sent to the editor of the ANNUAL, entirely apart from any consideration of the subject of advertising therein, with which he has nothing to do. Advertisements, however, being received up to the time of going to press, not unfrequently contain much later information than can possibly be given in the Catalogue. This will explain, in many cases, what would otherwise appear to be discrepancies between the statements made in the advertisements and the ratings given the papers in the various lists.

Circulation is not given in the following instances—where the paper has been established during the current year, or is entered for the first time in the ANNUAL; where the information received is unsatisfactory, or the reports are conflicting; where publishers have requested omission, in which case the word "Decline" is printed in the circulation column, and where the publication is devoted exclusively, or nearly so, to advertising the business or interests of the individual, business house or corporation issuing it. Papers of this latter class are designated in the Catalogue as "issued for advertising purposes," and in the County and Class Lists by the letters "Adv." in the circulation column.

We aim at strict impartiality in this important part of our work, and desiring always to avoid injustice to publishers, in our efforts to procure accurate and trustworthy information for advertisers, we will gladly receive communications from any who may consider themselves unfairly dealt with in any statement in this volume, and will cheerfully correct in future editions any mistakes made in the present one, if furnished with satisfactory evidence of error.

Papers which are believed to decline general advertising are designated in the Catalogue by the words "No Advts." in the circulation column, and are not included in the County and Class Lists.

NEWSPAPER ADVERTISEMENTS.—An alphabetical index to the advertisements will be found commencing with page 1499. A careful examination of these will result in the acquisition of a mass of valuable information which, for the sake of compactness and facility of reference, must necessarily be excluded from the Catalogue itself. We invite attention to the article on this subject on page 1368.

THE REVISION of this book for the edition of 1899 will be commenced immediately, and newspaper publishers will confer a favor by notifying us of the establishment, suspension or change of any papers within their knowledge, or by calling our attention to any inaccuracies.

Populations in the United States, unmarked, are from the United States Census of 1890, or State Census of 1895, as indicated in the foot notes, except in Michigan, where they are from the State Census of 1894. Those marked with an asterisk (\*) are estimated. Canadian populations are mainly from the Census of 1891.

Circulations from which affidavits have been furnished, are printed in **bold-face** figures; detailed statements are designated by a six-pointed star (\*); when neither affidavit nor detailed statement is furnished, they are designated by a double-dagger (‡); those unmarked are estimated.

Where statement of circulation is omitted, we have been unable to obtain any satisfactory information, or the paper was established during the current year, or is entered for the first time in the ANNUAL, or else is issued for advertising purposes. The word "decline" indicates that the publishers have declined or objected to furnish any statement for publication.

County seats are indicated by a dagger(†).

## CIRCULATION

---

The form sent to every publisher when the revision of the ANNUAL commences contains the following:

By CIRCULATION we do not mean the number of readers, on a basis of five (or any other number of) readers to each copy of the paper; nor do we mean sheets, nor impressions. The legitimate circulation of a newspaper or a periodical is its regular, necessary issue, sent to names on its honestly compiled mailing list or subscription book; sold over the counter, or through news agents or news boys. Returned and unused papers should not be included in the count.

Our understanding of the term "CIRCULATION" is embodied in the above paragraph. The word "AVERAGE" is liable to be misinterpreted. It is the custom of some publishers to issue occasional large extra editions; to add these and the regular editions together for a given time, and divide the total by the number of days, weeks or months, as the case may be, contained within that period. This is not what we desire. By "AVERAGE CIRCULATION" we mean that number of complete copies which *usually* fills the needs of the mailing lists, and the demand either in or out of the office.

Averages made up by including one or more large editions are not fair averages; they are admissible only when made from a uniform, a slightly fluctuating, or a steadily growing circulation.

Statements in detail enable us to see to what extent special or extra editions figure in the issues of a given period, and when such statements are furnished, publishers may rely on being rated fairly, and they will have no cause of complaint against us, if, in the absence of such reports, our ratings are inadequate.

SWORN DETAILED STATEMENTS covering a period of not less than six months preceding date of report we consider the strongest kind of statements that can be made. All such are printed in **bold face type**, and marked with a star (\*).

We earnestly ask those publishers who desire that the vexed question of circulation shall be placed on a more satisfactory footing to second our efforts in that direction by making their own reports in such a shape that they may be unimpeachable.

We received for this edition 434 sworn detailed statements, 575 detailed statements not sworn to, making a total of 1,009. In addition to these there were 1,043 sworn reports without statements in detail, making a total of 2,052 verified circulation reports. The number of sworn statements with and without detail was 1,477. There were a considerable number of detailed statements which are not included in the above count; not filling our requirements in length of time or fulness of detail they were not accepted. We hope to see the number very largely increased in the next and succeeding editions.

<b>ST. LOUIS, pop. 451,770. On Mississippi R., abt. 20 m. bel. mouth of Missouri. Has 20 lines of railroad, comprising nearly all the trunk lines running West, and several starting from this point. Tel. Exp. Banks. One of the leading cities of the United States, with an immense distributing and manufacturing business. Its principal articles of manufacture include tobacco, flour, beer, plate glass, chairs, carriages, saddles, agricultural implements, stoves, bricks, iron goods, boots and shoes, white lead, linseed and cottonseed oil. The commerce in coal, grain, cotton, and hog products is very extensive. Live stock is very largely handled, and many other articles are extensively dealt in. St. Louis has numerous important institutions, including Washington and St. Louis Universities, Shaw Botanical Gardens, etc., while one of its most striking features is the grand bridge which crosses the Mississippi at this point.</b>

NEW YORK †, pop. 1,515,301; NEW YORK Co. (S.E.), pop. 1,515,301. On Manhattan Island at m. of Hudson R., and on Long Island Sound (or East R.), and New York Bay. Term. of 14 important R.Rs. running to all parts of the country, including the Erie; N. Y., C. & H. R.; Penna.; W. Shore; N. J. Cent.; and others. Exp. Banks. Has one of the finest harbors in the world, and is the commercial metropolis of the United States. The foreign commerce of New York is very large, comprising more than half the entire import and export trade of the nation. Its domestic commerce is still greater, a considerable portion of the country drawing its supplies from this city. Its manufactures are little less important, and have grown rapidly of recent years. These are too various to be epitomized. Some few of the larger being furniture, clothing, machinery, sugar refining, tobacco and segars, printing and publishing, lard refining, malt liquors, musical instruments, etc. Its educational and other institutions include Columbia College, the University of the City of New York, the Cooper Institute, Colleges of Medicine, Law, Theology, etc.; the Astor, Lenox, Mercantile, and other libraries; the Metropolitan Museum of Art, the Museum of Natural History, and others too numerous to mention.

Y., Chic. & St. L.; and six other railroads. Tel. Exp. Banks. A port of entry, and the second city of Ohio. Has an excellent harbor of refuge, and canal connection with the Ohio river. The principal port on Lake Erie, with a large commerce; its shipping trade in iron ore, coal and lumber being very extensive. The pork packing interests are important, and the petroleum oil refining works are claimed to be the largest in the world. The head quarters of the Standard Oil Company are here. The iron interest is still larger, there being 150 iron and steel manufactories, employing about 18,000 hands. There are also five large ship yards, extensively engaged in building wooden and steel vessels. The institutions of Cleveland include Adelbert College, the Case School of Applied Science, the Western Reserve University, a Public Library, several medical colleges, hospitals, and asylums, etc. Two immense viaducts extend across the gulf, which divides the city, and are among the finest and costliest works of the kind in the United States.

COLUMBUS†, pop. *100,000; FRANKLIN Co. (C.), pop. 124,087. The State Capital. On Scioto R., near center of State, 120 m. N. E. of Cincinnati. Balt. & Ohio; Pittsb., Cinn., Chic. & St. L.; Cleve., Cinn., Chic. & St. L.; and five other railroads. Tel. Exp. Banks. Columbus has a large inland trade in grain, wool, live stock, iron and coal, and important manufactures, in which iron and steel products, agricultural implements and buggies are the most prominent. Lumber, leather, edge tool and plows are also largely produced, and there are various other industries. Here are a magnificent State Capitol, the Ohio State University, Capital University, Ohio Agricultural and Mechanical College, State Library, and important institutions for the insane, the blind, the deaf and dumb, and for imbecile youth, and a large State Penitentiary.

Penna.: Balt. &amp; Ohio; Phila. &amp; Read.; Phila., Wilm. &amp; Balt., and other railroads. Tel. Exp. Banks. A port of entry, the metropolis of Pennsylvania, and, according to the Census of 1890, the third city of the U. S. in population. Philadelphia is principally distinguished as a manufacturing city, having in the variety and importance of its manufactures no rival in America, and few in the world. The Wm. H. Cramp &amp; Co's. Shipyards give employment to 5,000 men. The Baldwin Locomotive Works employ 3,000 men, and have a capacity of 1,000 locomotives annually. In carpets, woolen and cotton goods, and other textile fabrics, its production is enormous, and the same may be said of the products of iron and steel, while many other branches of manufacture are also very largely represented. The domestic and foreign commerce of this city is also large, but is secondary in importance to its manufactures. Among its numerous institutions may be named Independence Hall, the University of Pennsylvania, Jefferson, and other medical colleges, Girard College, Drexel Institute, Franklin Institute, Academy of Natural Sciences, Academy of Fine Arts, Philadelphia Library, the magnificent new City Hall, and Fairmount Park, the largest and most picturesque pleasure ground in the United States.</p>

Penna.; Balt. &amp; Ohio; Pittsb. &amp; Lake E.; and several other railroads. Tel. Exp. Banks. The second city of Pennsylvania, and the leading iron and steel manufacturing city in America. Its pig iron product is said to be one-fourth, and its steel product more than one-half of the total product of the United States. The glass manufacture is also very important, the product being claimed to be about one-half of the total produced in this country. Coke is very largely produced, and there are numerous smaller manufactures. The abundance of natural gas fuel gives Pittsburgh special advantages in manufacturing. The commerce of this city is also very considerable; oil, coal, lumber, iron, steel, and glass products, etc., being largely distributed. Here are the Western University of Pennsylvania, Pittsburgh Female College (Methodist), a handsome City Hall, a United States Arsenal, etc.</b>
