# UTAH.

**Population \*414,518**  
(U. S. Census Bureau estimate for 1914).

STATE CAPITAL, SALT LAKE CITY.

UTAH is bounded north by Idaho and Wyoming, east by Wyoming and Colorado, south by Arizona, and west by Nevada; length, north to south, about 350 miles; width, about 200 miles; land area, 82,096 square miles. The surface is generally mountainous, interspersed with arid plains, valleys, and basins. The annual rainfall varies from five to twenty inches, the average for the state from twelve to fifteen inches. The timber lands, with a total stand estimated at 9 billion feet, are almost entirely situated in the National Forests.

Grazing and mountain lands comprise about two-thirds of the state. The area at present under cultivation is about four per cent. It is estimated that "dry" farming can be successfully practised on several million acres of land which has a limited rainfall, but by reason of its location cannot be irrigated. Much of the finest wheat is grown on such land, and the quality is superior to that grown in more humid climates. Twenty per cent. of the soil can be made productive by irrigation, which almost invariably brings good results, as the soil contains all the elements of fertility. The state contains 8,220 miles of canals and lateral ditches and nearly 7,000,000 cubic feet of irrigation reservoirs. The United States government has four reclamation projects under way and in prospect, on which \$12,000,000 is to be expended. There are about 7,000,000 acres susceptible of irrigation, of which about 1,500,000 acres were irrigated in 1912. Laws have been passed by which the rights of settlers on these lands will be thoroughly safeguarded. The mining industry, formerly Utah's chief source of wealth, and still increasing in value, year by year, has been compelled to yield first place by reason of the wonderful development of the state's agricultural resources. Wheat, oats, alfalfa, barley, rye, corn, potatoes, hay, sugar beets, and wool are the chief products. Wheat of fine quality is grown. It is the state's chief crop, 8,225,000 bushels being grown in 1915; 4,700,000 bushels of oats were also grown; 1,445,000 bushels of barley, 2,500,000 bushels of potatoes and 691,000 tons of sugar beets. Vegetables and small fruits grow luxuriantly on the irrigated lands. Cattle and sheep raising are profitable industries and are often successfully carried on where farming is impracticable. Utah had, in 1916, 2,089,000 sheep, 96,000 dairy cattle, 408,000 other cattle, 146,000 horses and 112,000 swine. The wool clip of 1915 was 13,320,000 pounds. About 10,000 acres are devoted to orchard and nursery interests.

Manufacturing industries, which are numerous and varied, are of considerable importance, goods to the value of \$66,100,000 being sent out from the factories of the state in 1911. Beet sugar, to the amount of 87,300 tons, was made in 1915. Extensive works for the mining and smelting of ores have been established.

The mineral wealth is very great. The total output of gold in 1915 was \$3,908,229; silver, 12,724,000 ounces; copper, 182,589,000 pounds; lead, 219,098,000 pounds; zinc, 22,643,000 pounds; coal, 3,103,036 tons; asphaltum, sulphur, gypsum, clay, building stone and salt are also largely produced and some radium. The coal fields have an area of over 13,000 square miles. Petroleum is found, but not in commercial quantities. The state is exceedingly liberal in the treatment accorded her schools, and there are many well equipped institutions for higher education.

The number of newspapers and periodicals published in Utah is 119, including 9 daily, 2 three times a week, 7 semi-weekly, 82 weekly, 1 semi-monthly and 18 monthly. The places of publication number 62, of which 25, designated by a dagger (†), are county seats.

# VERMONT.

**Population \*361,205.**  
(U. S. Census Bureau estimate for 1914).

STATE CAPITAL, MONTPELIER.

VERMONT is the most northwesterly of the New England states, bounded north by Quebec, east by New Hampshire, south by Massachusetts, and west by New York. It is 143 miles long by from 40 to 85 miles wide, with a land area of 9,135 square miles. The Green Mountains traverse it from north to south, mainly in two ranges, generally covered with dense forests, but affording excellent pasturage. Western Vermont and a large tract of the eastern part comprise beautiful pastoral regions, but the central part is rugged and mountainous. The best soil is found on the western slope of the mountains near the border of Lake Champlain, and in the valley lands of the Connecticut river.

The state occupies a prominent position in agriculture. When its area, population, amount of forest land, and long severe winters are considered, there is perhaps no other state that yields so large a return. All the ordinary agricultural staples are abundantly produced: 2,256,000 bushels of corn, 3,483,000 of oats, 216,000 of buckwheat, 2,592,000 of potatoes and 1,310,000 tons of hay were grown in 1915; also some rye, barley and wheat; wool and dairy products are abundant and excellent; cattle, sheep, and horses are raised in large numbers, and the state's live stock exceeds in value that of any other state in New England, although it is the smallest state in population. Vermont continues to be the greatest breeding state of fine horses (Morgans and Hambletonians) and of Spanish merino sheep. Every year numbers of these superior animals are shipped to all parts of this country, to South America and to Australia. The yield of maple syrup is large. As in all New England, the average crops per acre are much greater than in the country at large. The corn average for the United States in 1915 was 28.2 bushels per acre. No New England state went below 41 bushels. Vermont averaged 46 bushels, exceeded only by Massachusetts, with 47 bushels, and Connecticut, with 50 bushels per acre. Some wrapper tobacco is grown in the south, in the valley of the Connecticut.

Manufactures occupy a prominent position in its industries, and cover a wide range of goods, including flour, furniture, cotton and woolen goods, leather, agricultural tools, tin and copper ware, lumber, etc. The 1910 census enumerates 1,958 plants, producing goods valued at \$68,310,000, of which value \$33,487,000 was produced by the labor of the state's workers. Large quantities of lumber are exported.

Vermont leads in the production of marble and granite, and stands second in slate. These three substances make up more than nine-tenths of the value of the state's mineral output. The principal marble quarries are at Brandon, Dorset, Isle La Motte, Manchester, Middlebury, New Haven, Pittsford, Proctorsville (serpentine), Roxbury (verdantique), Rutland, Shelburn, Sutherland Falls, Swanton and West Rutland; slate quarries at Castleton, Fair Haven, Guilford, Northfield, Pawlet and Poultney; granite at Barre and Brattleboro. The United States Geological Survey statistics for 1914 give the value of Vermont's stone output as \$6,635,477; slate, \$1,414,247. Potters' clay comes from Bennington and Rutland; steatite from Castleton and Grafton; manganese, brown hematite, kaolin and ochre from Brandon, South Wallingford and Manchester Center; copper ore from Vershire and Corinth. Other minerals are asbestos, mineral paints, soapstone and small quantities of copper, gold and silver. Rutland is the largest marble center in the world, not less than \$6,000,000 of capital and 4,000 men being employed in 15 quarries and 20 mills. Burlington is a large market for Vermont and Ottawa lumber, having extensive mills and a trade extending throughout the eastern states.

The number of newspapers and periodicals published in Vermont is 98, including 10 daily, 79 weekly, 1 twenty times a year, 1 semi-monthly and 7 monthly. The places of publication number 67, of which 12, designated by a dagger (†), are county seats.

# VIRGINIA.

Population \*2,150,009.

(U. S. Census Bureau estimate for 1914).

STATE CAPITAL, RICHMOND.

VIRGINIA is bounded north by West Virginia and Maryland, east by Maryland and the Atlantic Ocean, south by North Carolina and Tennessee, and west by Kentucky and West Virginia. Its greatest length from east to west is about 440 miles, its greatest breadth 192 miles; land area, 40,125 square miles. The surface is divided into six great natural divisions, the Tidewater, comprising the south and southeast; the Middle, an undulating plain, extending westward to the Coast Range; the Piedmont, from the Coast Range to the Blue Ridge Mountains, and from the Potomac River to North Carolina; the Blue Ridge, stretching across the state in a southwesterly direction; the Valley—a part of the great Appalachian valley, reaching from Canada to Alabama—a broad belt of rolling country between the Blue Ridge and the Kittatinny or North Mountain; and the Appalachian, a mountainous region traversed by the Alleghanies. The soil in the Tidewater region is a light sandy loam, yielding large crops of vegetables and small fruits. The Valley region has a rich, fertile soil, well adapted for cereals, of which corn, wheat, oats and rye are the principal. Much of the mountain region is uncultivated and chiefly forest land; but the parallel valleys are very fertile. The Piedmont, Blue Ridge, Valley, and Appalachian regions are noted for their grasses. The forests of Virginia are rich in a large variety of trees, especially the valuable hardwoods, and the export of lumber is large.

The growth in the total products of the farms during the last ten or twenty years has been very large. The 1915 crop of corn was 60,562,000 bushels; wheat, 16,974,000; oats, 5,625,000; potatoes, 17,500,000; also barley, rye and buckwheat. The yield of tobacco is exceeded only by Kentucky and North Carolina; 144,375,000 pounds were produced in 1915. Some cotton is grown in the Tidewater section, 16,000 bales in 1914; fruit grows all over the state, Virginia being especially celebrated for the fine quality of its apples. Virginia's apple crop for 1915 was 4,393,000 barrels, exceeded only by New York, Pennsylvania and Michigan. A considerable part of the Tidewater region is devoted to the growing of early vegetables for northern markets, especially near Norfolk, where in some cases of intensive culture \$1,000 profit has been made in a year from a single acre. Dairying, stock raising, and wool-growing are important industries. The dairy products in 1909 were worth \$7,000,000, against only \$2,000,000 ten years before. The dairy cows in 1916 numbered 359,000, and other cattle 472,000, sheep 734,000 and hogs 1,023,000. There are profitable fisheries of bass, shad, etc., and Virginia leads in the oyster industry, her output being 6,000,000 bushels annually.

The manufacturing interests are also increasing, the chief seats being Richmond, Alexandria, Danville, and Lynchburg. The more important products are cotton goods, tobacco, leather, coke, saw and planing mill products, flour, clothing, woodenware, paper, agricultural implements, machinery, etc. The smoking and chewing tobacco in 1910 was worth \$12,504,844; cigars and cigarettes, \$8,989,894; leather, \$9,208,427; woodenware, baskets, boxes, etc., \$9,677,994; silk, \$1,583,631; paper and pulp, \$4,888,549; knit goods, \$2,423,152; flour and grist mill products, \$11,270,818; cotton goods, \$8,265,359; boots and shoes, \$3,819,232; lumber, \$10,088,478; sash, doors, etc., \$1,877,899; machinery and iron goods, \$24,143,272. In 1880 the cotton mills used 5,087,519 pounds of cotton. In 1909 they used 36,517,677 pounds. The lumber and mineral products increased almost in the same proportion. Virginia has excellent natural advantages for commerce, but it is only lately that she has begun to take a prominent part in foreign trade.

The state has a great variety of minerals. There are beds of anthracite, semi-bituminous and bituminous coal in the southwestern counties, some of them producing a good coking coal. There are coal-bearing strata in other parts of the state, particularly near Richmond; the coal is bituminous, and generally of good quality. There were 7,959,535 tons of bituminous coal produced in 1914. Virginia produces more than half of the country's output of iron pyrites (used in the manufacture of sulphuric acid) and also is first in the production of soapstone and of articles manufactured therefrom. There are also large deposits of gypsum and marl, and abundance of fine granite, marble, and other building stones; barytes, mica, mineral paints, salt, slate, sulphur, kaolin, fire clay and many other minerals. It abounds in mineral springs of great reputation. Iron and manganese are extensively mined, also zinc and lead ores. A little gold and silver is produced from mines in the northern and central counties. Some copper is mined. Lime burning is an important industry. Transportation facilities are good, both by water and rail. Water power is abundant; even in the Tidewater section the small streams have sufficient fall to operate the local grist mills and other industries.

NOTE:—The 1910 Census does not include the populations of the cities of Bristol, Charlottesville, Clifton Forge, Danville, Fredericksburg, Lynchburg, Newport News, Norfolk, Petersburg, Portsmouth, Radford, Richmond, Roanoke, Staunton, Williamsburg and Winchester in the populations of the counties in which these cities are situated. While these cities are now separate from the counties, we still give, for the purpose of reference, the population figures of the counties to which they formerly belonged.

The number of newspapers and periodicals published in Virginia is 258, including 35 daily, 3 three times a week, 5 semi-weekly, 169 weekly, 2 fortnightly, 1 semi-monthly, 33 monthly, 2 bi-monthly and 8 quarterly. The places of publication number 144, of which 67, designated by a dagger (†), are county seats.

# WASHINGTON.

Population \*1,407,865.  
(U. S. Census Bureau estimate for 1914).

STATE CAPITAL, OLYMPIA.

WASHINGTON is bounded north by British Columbia, west by the Pacific Ocean, east by Idaho, and south by Oregon. Its average length, east to west, is 330 miles; width, 220 miles; land area 66,880 square miles. It is divided by the Cascade Mountains into two distinct parts.

Western Washington is a fine timber country, with many fertile valleys, well settled and very productive in vegetables, of fine quality, fruit of all kinds and hops. Fruit growing has been especially successful, and some of the largest and finest fruits in the eastern market are those shipped from Washington. Dairying is an interest of growing importance, and produced butter worth \$3,160,599, cheese worth \$32,750, and condensed milk worth \$4,185,330 in 1909. Eastern Washington is especially adapted for the raising of fruit of all kinds, vegetables, hops and grain, particularly wheat, of which 50,394,000 bushels were grown in 1914. Oats also grow luxuriantly, frequently yielding seventy bushels to the acre. The 1915 crop was 13,750,000 bushels; potatoes 8,235,000 bushels; barley, 7,263,000 bushels; apples produced 2,433,000 barrels; hay, 1,868,000 tons. Some rye and corn were also grown. There are some waterless regions in the central and eastern portions of the state, between the eastern slopes of the Cascade range and the western slope of the Rocky mountains. Some parts of this area have been irrigated by private enterprise, and other reclamation projects are under way, in addition to the Yakima and Okanogan projects, which are being constructed by the United States government. The former of these is expected to reclaim at least 500,000 acres, and within a few years the area of irrigated land will be fully 1,500,000 acres. The climate of Washington is perfection; the mean average temperature for the year being 53°, without extremes of heat or cold. It is the best agricultural country on the Pacific coast. Cattle and stock of all kinds do remarkably well; the ranges are good and it is not considered necessary to feed the stock in the winter time, owing to the generally light snow fall and the abundance of natural grasses. In 1916, Washington had 308,000 horses, 263,000 dairy cows, 221,000 other cattle, 568,000 sheep and 314,000 hogs.

Extensive coal and iron mines are being operated, and coke ovens established; 3,064,820 tons of coal were mined in 1914. Next to coal, the principal mineral industry is the manufacture of cement, of which 2,045,465 barrels were made in 1914. Clay products are also of importance. There are copper, silver and gold mines, all of which are being developed; \$407,000 in gold was produced in 1913; silver, 220,000 ounces; copper, 915,000 pounds and also some lead and zinc. There is also an abundance of limestone, granite, marble, etc.

Puget Sound is a vast harbor, having an extent of 1,594 miles of shore line, and Seattle, its principal seaport, is fast becoming the metropolis of the northwest Pacific coast. Fish of all kinds abound, and the taking and canning of salmon employs about ten thousand people in the season. The total value of the fisheries products in 1909 was \$13,534,010.

Manufacturing industries of all kinds are increasing rapidly in numbers and importance. The 1910 census gave the number of plants as 3,674, employing over 80,000 people, and their product had a value of \$220,746,000, nearly half of which was created by the labor of Washington citizens. The principal industry is the manufacture of lumber and its products. In this Washington leads the nation. In addition to general wood-working factories, there are over a thousand lumber and shingle mills, and the pay rolls of the loggers and lumbermen reach a total of \$60,000,000 to \$70,000,000 annually. Washington's cedar shingles are celebrated for quality and durability. In the year 1912 over 8,000,000,000 shingles and over 4,000,000,000 feet of lumber were manufactured. Ship building is one of the most important industries. The principal articles of export are lumber, shingles, coal, wheat and salmon.

Over 12,000 square miles of the state's area is in timber. Parts of this area bear immense trees, ten to twelve feet in diameter and 300 feet high. Douglas fir constitutes more than half of the standing timber. The rest consists of red cedar, hemlock, spruce and western pine. Hardwoods are found in small quantities.

The number of newspapers and periodicals published in Washington is 416, including 40 daily, 10 semi-weekly, 305 weekly, 8 semi-monthly, 45 monthly, 3 bi-monthly, 1 six times a year and 4 quarterly. The places of publication number 203, of which 39, designated by a dagger (†), are county seats.

| SEATTLE†, pop. *313,029 (F 3); KING Co. (W.C.), pop. 284,638. It is estimated that the population of the city is now—December 1913,—about 300,000, and of the county 350,000. On Puget Sound. Columb. & Pug. Sound; Chic., Milw. & St. P.; N'thrn Pac.; Gt. N'thrn; Oreg.-Wash. R.R. & Nav. Co. and other R.Rs. Tel. Exp. Banks. Largest city in the state. Extensively engaged in manufacturing, having numerous saw mills, large iron works, sash and door, and furniture factories, brick yards, shingle mills and numerous minor industries. Water power abundant and cheap. Large Sound trade, particularly in coal, of which half a million tons are annually exported, also in lumber, hops, oats, fruits, fish, etc. Trans-Pacific commerce is large and growing, and Seattle is the chief gateway to Alaska. Fine harbor, with ample docking facilities. There are sixty steamships lines to home and foreign ports doing business in Seattle. Extensive fisheries. |          |        |          |        |         |

## WEST VIRGINIA.

**Population \*1,332,910.**  
(U. S. Census Bureau estimate for 1914).

STATE CAPITAL, CHARLESTON.

WEST VIRGINIA is bounded north and east by Pennsylvania and Maryland, east and south by Virginia, and west by Kentucky and Ohio. Its greatest length from north to south is about 240 miles; greatest breadth, 160 miles; land area, 24,715 square miles. It is abundantly watered, many navigable tributaries of the Ohio flowing through the state. The surface of its rivers is estimated at 135 square miles. The climate is remarkably healthful, without extremes of temperature or of dryness or moisture, making energetic outdoor labor possible at all seasons, which conditions, combined with the fertility of the soil, make possible the widely diversified and abundant harvests for which the state is celebrated. A large part of the surface is mountainous and hilly; about two-thirds is covered with forest. The soil of the ridges is fertile to the tops, and the summits of many mountains are flat, natural meadows or glades.

There are over 100,000 farms in the state, averaging about 114 acres. The valley of the Great Kanawha is the finest grazing region of the state. No finer blue grass farms exist than those of the central, northern and Greenbrier sections. West Virginia is especially famous for wool, the product of the Northern Panhandle obtaining the highest award at the Paris Exposition; while the live stock interests generally are large. Other great staples are corn, wheat, oats, and tobacco. The 1915 crops included 25,200,000 bushels of corn; 4,500,000 of wheat; 3,480,000 of oats; 1,095,000 tons of hay; 5,850,000 bushels of potatoes; 9,831,000 pounds of tobacco; 836,000 bushels of buckwheat and some rye. The soil is particularly well adapted for apples, peaches and other fruits. In 1916 there were 194,000 horses and 603,000 cattle, of these 241,000 were dairy cows. The lumber trade is important, the forests being principally composed of hardwood timber of the most valuable kinds. The product is worth about \$15,000,000 per year.

The mineral wealth is very large, and the total production in 1914 was \$134,071,803, second only to Pennsylvania. Nearly the whole of the state lies within the Alleghany coal system, and large quantities of coal are exported both by river and rail, and new mines are constantly being opened. Fifty of the fifty-five counties have workable coal seams, generally bituminous, and the total area is about 11,000,000 acres, about one-thirteenth of the coal area of the country. In 1914 the mines employed about 75,000 persons, and the total production of coal was 71,707,628 tons, this production being second only to that of Pennsylvania. The coke output was 1,427,862 tons. The salt industry is of considerable importance. The Kanawha valley is one of the great salt-producing regions of the United States. Petroleum is extensively produced, chiefly in Ritchie, Pleasants, Marshall, Wood and Wirt counties. The 1915 output was 9,000,000 barrels. Natural gas is found in several places, Wheeling and the Northern Pan Handle using it as a fuel almost to the exclusion of coal. The state's production in 1914 was worth \$35,515,323, placing it first among the states and exceeding Pennsylvania's output by nearly \$15,000,000. The three fuels, coal, petroleum and natural gas, furnish over 90 per cent. of the state's mineral output. Not more than 25 per cent. of these fuels is consumed in the state, the greater portion being transported by rail, river or pipe line to manufacturing centers in other states. Limestone, sandstone, and grinding stone abound generally throughout the state.

Manufactures are increasing. In the ten years, from the 1900 census to that of 1910, 2,300 new industries were started, costing over \$152,000,000, and employing over 60,000 people. The state has abundant water power, all its streams having a rapid descent, but so far this has been but little utilized. The leading products are steel and iron in various forms, glass, flour, salt, wood pulp, liquor, lumber, queensware and porcelain, fire brick, leather, cigars and tobacco, and machinery. The cigar manufacture is very important. The total value of manufactured goods for 1909 was \$161,950,000, the increase in value through manufacturing processes being \$69,072,000. Wheeling is the largest and most important city; it is the manufacturing center and all the industries enumerated above, except salt manufacturing, flourish there. Transportation facilities are being extended in all directions, 1,200 miles of new railroad having been laid within ten years. Much attention is given to education. Over 1,200 new schoolhouses were built in the ten years after 1901, and the value of property devoted to educational purposes increased in the same time from \$4,515,000 to \$12,931,694. Over \$5,000,000 was appropriated for educational purposes in 1911. The population increased 27.4 per cent. from 1900 to 1910, the total assessed property increased from \$278,829,659 in 1904 to \$1,114,000,000 in 1911, and bank deposits, which in 1895 were \$16,447,000, increased to over \$100,000,000 in 1911.

The number of newspapers and periodicals published in West Virginia is 203, including 32 daily, 3 semi-weekly, 155 weekly and 13 monthly. The places of publication number 91, of which 55, designated by a dagger (†), are county seats.

# WISCONSIN.

**Population \*2,467,716.**  
(U. S. Census Bureau estimate for 1914).

STATE CAPITAL, MADISON.

WISCONSIN is bounded north by Lake Superior, northeast by Michigan, east by Lake Michigan, south by Illinois, and west by Iowa and Minnesota. Its greatest length from north to south is 300 miles; greatest breadth, 260 miles; land area, 54,450 square miles. The surface is generally an elevated plain, with high bluffs along the rivers and lakes, and elsewhere gently undulating, diversified with prairie, woodlands, and numerous lakes. The northern part is heavily timbered, and has a somewhat severe climate. The lumber business of this section of the state, in pine and hard wood, has built up many large and flourishing inland cities, like Oshkosh, Eau Claire, Wausau, Chippewa Falls, Stevens' Point, Merrill and Shawano.

Wheat, corn, rye, oats, barley, potatoes, dairy products, and maple sugar are all produced in large quantities, especially oats, of which the 1915 crop reached 99,975,000 bushels; rye, of which Wisconsin grew more than any other state, her crop being 7,770,000 bushels, and potatoes, in which Wisconsin stood second with 25,926,000 bushels. Corn produced 40,825,000 bushels; barley (Wisconsin stood fifth), 23,288,000; wheat, 4,662,000; and hay, 4,508,000 tons. Sugar beets are grown largely, the state's factories in 1914 turning out 16,964 tons of sugar. Some linseed is grown; hops are exceedingly prolific; fruit growing is an important industry. The dairy cows number 1,675,000 head, an average of 9 to every farm, in addition to 1,313,000 other cattle. Cheese and butter making have increased to enormous proportions, especially in the central and southern counties, making this state the leader in dairy products. The value of the state's dairy products in 1909 was \$53,843,249, almost a quarter of the country's total. The most recent authentic figures show 1,005 creameries in the state, Wisconsin leading the country in the number of plants devoted to this industry. 46% of the cheese factories of the United States are in Wisconsin. 84,000 farmers supply the creameries and 40,000 the cheese factories. The growing of seed leaf tobacco for wrappers has become an important and profitable industry, and the product commands good prices, being excelled only by the wrappers from the Connecticut valley. The 1915 crop was 36,900,000 pounds. This state is third in cranberry production. Large numbers of horses are bred; hogs numbered 2,142,000 in 1916; sheep are numerous, and the wool clip large and valuable.

Zinc is the most important mineral product. Wisconsin, in 1914, produced 31,113 tons. Iron ore comes next, with a production of 886,512 tons. Limestone and lead exist in the southwest, chiefly near Mineral Point. One of the best hydraulic cements comes from the neighborhood of Milwaukee. Other minerals existing in workable quantities are graphite, mineral paints and pyrites.

The lakes and streams abound with fish, especially trout and black bass. The commercial fisheries are valuable. Those of the waters of Lakes Superior and Michigan, subject to Wisconsin laws and control, during the season of 1911 gave employment to 1,363 fishermen. The catch, amounting to 15,380,137 pounds, had a total value of \$743,485.

Manufactures are thriving and numerous, lumber and wood work of all kinds holding a very prominent position. Wisconsin leads the lake states in the lumber industry. Her 1914 output was 1,391,001,000 feet. The manufactures of furniture, wagons and other goods made wholly, or in great part, of wood; agricultural implements, leather and brooms are large and increasing, while at Milwaukee are situated several of the largest breweries in the world, and the manufactures of cotton and woolen goods, nails, paper, steel rails and merchant iron are of great importance. The 1910 United States census reported, for the year 1909, 9,721 factories, producing \$580,305,000 in goods.

The number of newspapers and periodicals published in Wisconsin is 690, including 63 daily, 12 semi-weekly, 534 weekly, 1 fortnightly, 4 semi-monthly, 63 monthly, 5 bi-monthly, 1 five times a year, 1 four times a year, and 6 quarterly. The places of publication number 359, of which 71, designated by a dagger (†), are county seats.

| <b>MILWAUKEE</b> †, pop. *417,054 (L 9); <b>MILWAUKEE Co. (S.E.)</b> , pop. 433,187. On Lake Michigan, at m. of Milwaukee R., 90 m. N. of Chicago. Chic. & N. West; Chic., Milw. & St. P.; Minneap., St. P. & S. Ste. Marie R.Rs. Tel. Exp. Bank. Port of entry, and the largest city in the state. Manufacturing interests here are numerous and extensive. Bay View Rolling Mills employ nearly 2,000 men, the E. P. Allis machine shops about 1,500. Knit goods extensively produced. Flour is manufactured in great quantities. The breweries produce annually over 1,000,000 barrels of beer. Other important products are leather, lumber, boots, and shoes, carriage, furniture, tobacco and cigars. Milwaukee has an excellent harbor and a large shipping trade, being among the greatest grain markets in the world. Its wheat shipments are over 9,000,000 bushels annually, and large quantities of corn, barley, oats, rye, flour and lumber are handled. State Normal School, Marquette University (Rom.Cath.), an Industrial School for Girls, and, in the vicinity, a National Soldiers' Home. |            |      |               |      |        |

# WYOMING.

Population #141,705.

STATE CAPITAL, CHEYENNE.

WYOMING is bounded north by Montana, east by South Dakota and Nebraska, south by Colorado and Utah, and west by Utah, Idaho, and Montana; length, east to west, 365 miles; width, 274 miles; land area, 97,575 square miles. The mean elevation of the state is about 6000 feet. The clear, dry atmosphere and the abundance of sunshine has made the state a favorite health resort, especially for persons afflicted with pulmonary diseases. Its surface is broken by mountain ranges, deep river canyons and flat-topped hills or buttes, the latter a feature of South Wyoming, which rise from valley or plain like walled cities or mounds. In the northwest corner is the Yellowstone National Park. There are extensive areas of pine and spruce timber, widely distributed throughout the mountain regions. The forests cover about 7,000,000 acres and as much more of the surface is more or less timbered.

For many years cattle raising was the only industry, and it is still in the front rank. There were on January 1st, 1916, 708,000 cattle in the state, in addition to 50,000 dairy cows, 189,000 horses, and 4,438,000 sheep. But here, as in all the western states, agriculture is steadily progressing over the ranges. Wyoming leads all the states in the value of its sheep and of its annual wool clip, which reached 29,040,000 pounds in 1915. Hay is also a leading product. Irrigation is needed in a large part of the country to make the soil productive, as there are few places, except in the eastern portion, where crops can be successfully grown without additional water supply. Where it is used, however, the returns are very large; fine crops of alfalfa, sugar beets, vegetables and small fruits being grown. It is estimated that 10,000,000 acres may be reclaimed, and there are numerous public and private systems in operation and under construction. Over 1,000,000 acres are now supplied from the existing systems. Experiments are being made in methods of "dry farming" suitable for localities where irrigation is not practicable, and good crops of grain and alfalfa have been grown. The best results are obtained from the two-year system, by which half of the farm is allowed to lie idle each year, being plowed and harrowed to preserve the moisture for the next year's crop. By this method profitable crops have been secured where the annual precipitation is less than fifteen inches. Certain varieties of wheat and barley do especially well. It is believed that fully 20,000,000 acres can be made productive by dry farming. The total value of Wyoming farm and range products for 1912 was calculated to be \$50,000,000. The United States crop report for 1915 shows 3,315,000 bushels of wheat, 9,584,000 bushels of oats, 612,000 bushels of barley, 2,400,000 bushels of potatoes and 1,210,000 tons of hay.

There are few states with greater mineral resources than Wyoming. One hundred and fifty-six varieties of minerals have been discovered, and new ores are constantly being brought to light. Copper in commercial quantities has been found in many places. Gold and silver are found, but the quantity produced in recent years is small. There are vast beds of iron ore and plenty of good coal, the latter underlying 41,500 square miles of territory; 6,475,293 tons were dug in 1914. Gypsum, salt, soda, graphite, asphaltum, epsom salts, asbestos, plaster, clays, sulphur, lead, tin, and other minerals are found. There are many mineral springs. The oil fields in central and northern Wyoming cover a territory 350 miles long and 150 miles wide. Many wells have been drilled and promise to be large producers, but the majority are capped until the several projected pipe lines shall be constructed. The 1915 production was 4,200,000 barrels. All the various qualities of petroleum have been found, and several strong wells of natural gas. The total mineral output in 1914 was valued at \$12,417,752. Lumber and railroad ties are the chief articles manufactured.

The number of newspapers and periodicals published in Wyoming is 89, including 5 daily, 5 semi-weekly, 76 weekly and 3 monthly. The places of publication number 54, of which 21, designated by a dagger (†), are county seats.

## PORTO RICO.

**Population \*1,184,489.**  
(U. S. Census Bureau estimate for 1914).

CAPITAL, SAN JUAN.

Seventy miles east of San Domingo and 1,400 miles from New York. The island is 108 miles long from east to west and 36 miles broad. Its area is about 3,600 square miles, approximately the size of Delaware and Rhode Island together. It is traversed by a mountain range from east to west, the highest point of which is about 3,700 feet. The climate is generally salubrious. The soil is unusually fertile.

The chief industry is agriculture and the principal products are sugar, of which 364,000 tons were made in 1914, coffee, rice, tobacco, salt, corn, oranges, pineapples, bananas and other tropical fruits. Some cotton is grown. In the southern parts of the island irrigation has been found necessary for the better development of its agricultural possibilities, and plans have been made to supply water to about 80,000 acres. Beef cattle are raised in large numbers, and the dairy industry is growing fast, especially near the large cities. It is said that there are over 500 varieties of trees growing on the island and lumbering is an industry of considerable importance.

The mineral deposits are not large, but have been worked to some extent. Gold, silver, copper, iron and lignite are found, and there are salt works in several localities. Marble, limestone and other building stones exist in large quantities, but have been very little used.

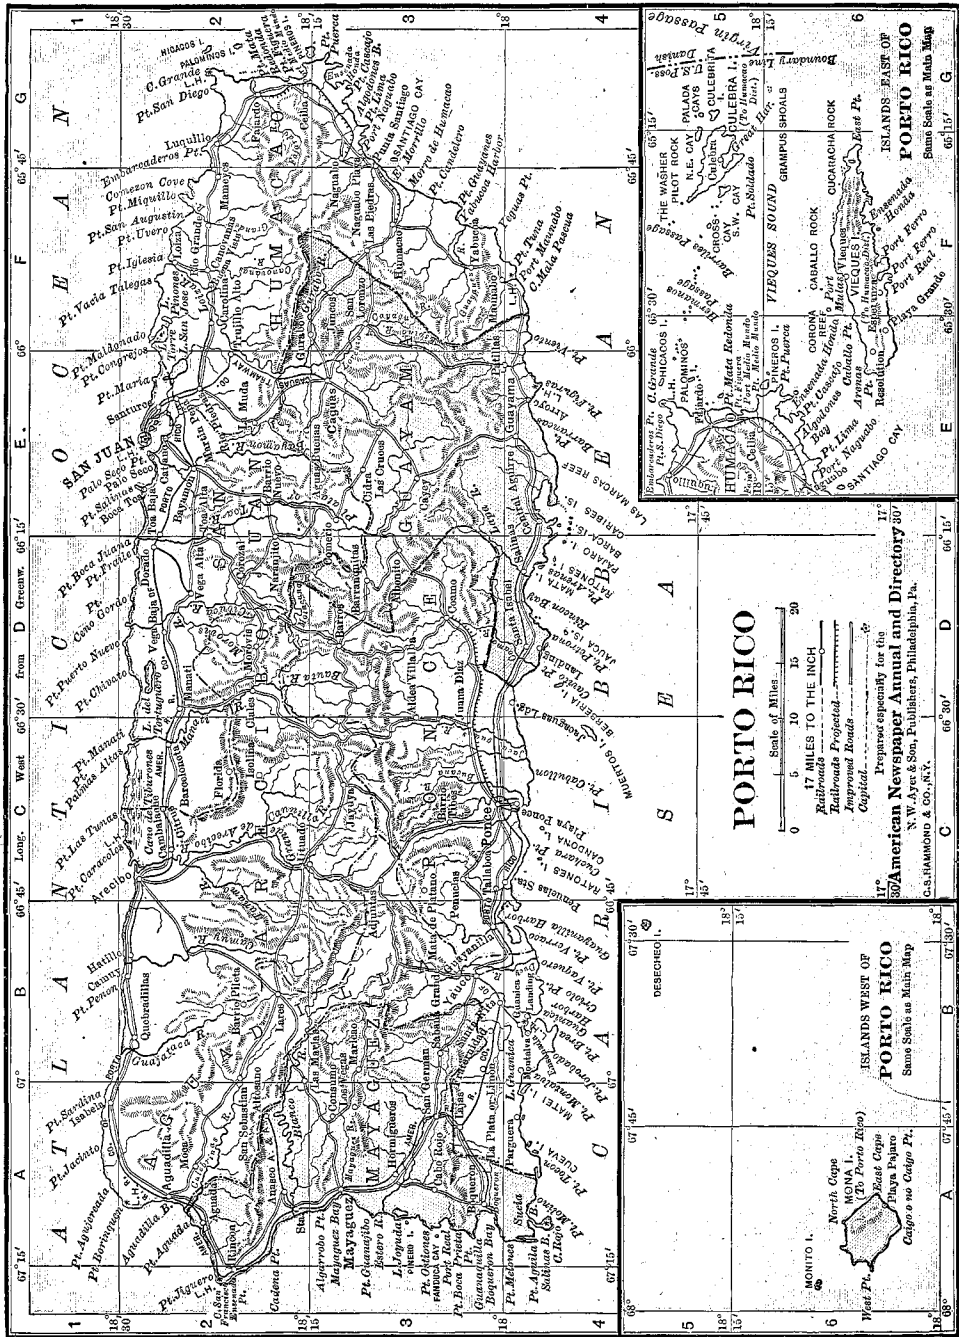

The trade of Porto Rico is chiefly with the United States and Great Britain. The exports to the United States for the year ending June, 1915, were valued at \$41,950,419 and the imports from the United States at \$30,149,764. The imports from foreign countries were \$2,964,465; the exports to foreign countries, \$7,044,987. Large quantities of sugar, coffee, lumber, tobacco and cigars are exported. Fruits, fresh and preserved, are also a large article of export. When the island came into the possession of the United States, in 1898, the people, in common with those of all the Spanish colonies, lived in the densest ignorance, over eighty per cent being unable to read. Since that time much progress has been made in education and numerous good schools established. The public highways and transportation facilities of all kinds have also been greatly extended and improved.

The number of newspapers and periodicals published in Porto Rico is 30, including 13 daily, 2 semi-weekly, 11 weekly, 2 semi-monthly and 2 monthly. The places of publication number 6, of which 4, designated by a dagger (†), are department capitals.

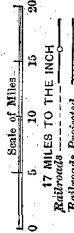

(All papers are Spanish unless otherwise stated.)

# HAWAII.

Population, \*208,063.  
(U. S. Census Bureau estimate for 1914.)

## TERRITORIAL CAPITAL, HONOLULU.

The HAWAIIAN ISLANDS are situated in the North Pacific Ocean between longitude 154° 40' and 160° 30' west and latitude 22° 16' and 19° 13' north, 2,100 miles from San Francisco. The eight principal islands have an area of 6,454 square miles, the others are mere rocks. Hawaii is the largest, with an area of 4,210 square miles, and has given its name to the whole group. The islands are of volcanic formation. There are two active volcanoes, Kilauea and Mauna Loa. Mauna Kea, the highest point on Hawaii, is 13,825 feet high; the mountains generally range from 4,000 to 5,000 feet. Their sides abound in forests containing an abundance of timber and ornamental woods. Although the islands are situated within the tropic zone, the heat is tempered by the trade winds and ocean currents, and the average temperature is no higher than that of many places situated much further north. A large proportion of the population is Japanese and Chinese. The Chinese in 1910 numbered 21,674, the Japanese 79,674. The native race is dying out, there being but 26,041 of unmixed blood in the year 1910, a decrease of 3,746 since 1900. There are now 23,000 Portuguese resident in the islands.

The chief agricultural products are sugar, rice, coffee, fruits, and vegetables. The production of sugar in 1914 was 612,000 tons. Bananas are an important product, over 100,000 bunches being exported annually, with a capacity of many times that number. The culture and canning of pineapples is a large and rapidly developing industry, one of the canneries being the largest fruit preserving plant in the world. Pineapples to the value of \$4,000,000 were exported in 1914. Rubber culture is a new industry, but has made good progress, about 500,000 trees having been planted in the past four years, and they are all thriving. The culture of cotton is increasing, and sisal hemp is one of the established products. The United States Experiment Station has been conducting a series of experiments in tobacco culture, and has discovered that a large area of the soil is suitable for this crop, which will probably be one of the staple products in the near future. Cattle and sheep are raised in sufficient numbers to supply the needs of the islands. Large quantities of commercial fertilizers are manufactured.

The United States practically monopolizes the trade of Hawaii. The total exports from July 1, 1914, to June 30, 1915, to the United States, were valued at \$80,610,935. Sugar forms about 80 per cent of the exports and canned pineapples 12 per cent. The imports from the United States reached a total value of \$20,295,829. The principal imports were bread stuffs, textiles and iron and steel goods. There were exported to foreign countries, during the same period, goods to the value of \$377,509; imported, \$5,716,023. There are excellent roads throughout the islands and seven steam railroads, three on Hawaii, two on Oahu, one on Kauai and one on Maui. The steam railroads have a total length of 296.69 miles.

The number of newspapers and periodicals published in five towns of Hawaii is 37, including 7 daily, 3 three times a week, 2 semi-weekly, 16 weekly and 9 monthly.

## PHILIPPINE ISLANDS.

**Population \*8,650,937**  
(U. S. Census Bureau estimate for 1914).

CAPITAL, MANILA.

An important group of islands in the Malay Archipelago, lying mainly between latitude 82° and 19° 38' north and longitude 117° and 128° east. They number over 3,000, large and small, about half of them being known by name. They range in area from the size of New York state down to tiny islets of less than a square mile, nearly ninety per cent. being in the latter class. The total land area is about 115,000 square miles, approximately the size of New York and New England. The principal islands are Luzon, 40,969 square miles, nearly 4,000,000 people; Mindanao, 36,292 square miles, 500,000 people; Samar, 5,081 square miles, 225,000 people; Panay, 4,611 square miles, 750,000 people; Mindoro, 3,811 square miles, 30,000 people; Leyte, 2,732 square miles, 360,000 people; Negros, 4,881 square miles, 475,000 people; Palawan, 4,027 square miles, — people; Cebu, 1,762 square miles, 600,000 people; Bohol, about 1,200 square miles, 250,000 people. There are many diverse races among the people, speaking as many different dialects. The Visayans are the most numerous, numbering about 3,250,000. Next in order come the Tagalogs, 1,500,000, and the Ilocanos, 800,000. Americans number eight or nine thousand; foreigners, chiefly Chinese, about 50,000. Education and religion have made much progress through the islands, and fully ninety per cent. of the people may be considered as being, to some extent, civilized. One beneficial result of American occupation has been the establishment of schools. There are now nearly 10,000 teachers in primary schools, more than ninety per cent. of them being Filipinos, and hundreds of new schools are opened each year. There are about 600 postoffices in the islands and 437 postal savings banks, with 36,000 accounts. All but about 14 per cent. of the depositors are Filipinos. There are about 6,000 miles of telegraph and cable line and 700 miles of railroad in operation.

Agriculture is the chief industry. At present not more than twelve per cent. of the land is under cultivation, but this will, no doubt, be largely extended, as the soil is remarkably fertile, and a great proportion of the total area of the islands is suitable for tillage. One of the chief products is hemp, which is known throughout the world as Manila hemp. The crop from 800,000 acres in 1914 was 150,000 tons, valued at \$15,000,000. Tobacco of good quality is grown almost everywhere. The other principal products are rice, corn, sugar, coconuts, spices, cacao and timber, including dye-woods. Practically all of the forest land is in forest reserves under the control of the Bureau of Forestry of the Philippines. The reserves have a total area of 59,500 square miles, and less than one per cent. of the forest lands are privately controlled. The production of crude sugar in 1914 was 380,000 tons; of corn, over 12,500,000 bushels (shelled), of coffee 1,400,000 pounds, of rice about 46,000,000 bushels; of tobacco, 102,000,000 pounds. There are 49,190,368 coconut trees in the coconut plantations. Their product for 1914 was 591,266,399 nuts, of which 63,057,700 were consumed for food. Other coconut products (for 1914) were 118,122 tons of copra, having a value of \$8,692,543; 900,000 gallons of oil, value \$612,706 and 54,048,393 liters (about 13,500,000 gallons) of tuba. Tuba is the sap of the coconut palm, chiefly used as a fermented beverage. Its value is about thirteen cents in American money per gallon and the 1914 output was worth about \$1,760,551. Copra is dried coconut meat, the material from which desiccated or shredded coconut, coconut oil, etc., are made. The total value of the coconut products was nearly \$12,500,000. Cacao is grown in the southern islands, chiefly in Mindanao. The 1914 crop produced 1,250,000 pounds.

The principal manufacturing industries are those connected with the manufacture of hemp, cigars and tobacco. The commerce is considerable, the imports for the year ending June 30th, 1915, from the United States being valued at \$24,691,611 and from other countries \$21,862,494. The exports to the United States were valued at \$23,834,388, to foreign countries \$27,809,058. Great Britain, China and Spain have most of the foreign trade. There were entered, in 1912, 862 vessels, and cleared 872, with a total tonnage, going and coming, of 3,378,952. Gold was mined to the value of \$1,099,300 in 1914. Silver, copper, iron, lead, coal, sulphur and petroleum are also found, but not in large quantities. Salt is manufactured in considerable quantities, by the evaporation of sea-water and that from saline springs by an old process in use among the natives from time immemorial. By the adoption of modern methods and machinery the salt industry may be made one of great importance.

The number of newspapers and periodicals published in 7 towns of the Philippines is 39, including 19 daily, 1 three times a week, 3 semi-weekly, 8 weekly, 1 three times a month, 6 monthly and 1 quarterly.

## Population of the Dominion in 1911, 7,204,838.

## ALBERTA.

Population.....374,663

PROVINCIAL CAPITAL, EDMONTON.

The PROVINCE OF ALBERTA, formerly a part of the Northwest Territories, is bounded on the north by the parallel of 60° north, on the west by British Columbia, on the south by the 49th parallel (the boundary of the United States) and on the east by the Province of Saskatchewan. Its length from north to south is about 800 miles, its greatest breadth from east to west about 400 miles and its land area is 161,872,000 acres. 100,000,000 acres of this, about 60 per cent. of the whole, is capable of cultivation. The northern half is unsettled except for the scattered trading stations of the Hudson's Bay Company.

The southern portion has for a number of years been the grazing ground of large herds of cattle, and is now attaining prominence in agriculture, especially in grain growing, for which the soil and climate seem peculiarly adapted, wheat in particular being of the finest quality. The number of farms in 1911 was 61,496, an increase of 52,000 over the 1901 census, and the area of land in occupied farms increased in the same period from 2,735,630 acres to 17,751,899 acres and the growth still continues. An enlightened system of taxation, based solely on site values, is in force in many districts and attracts a desirable class of energetic citizens, as the farmer who develops his farm and improves and increases his stock, buildings, etc., is not compelled to pay an extra tax for doing so, as in most communities elsewhere. In 1915 the wheat crop was 51,355,000 bushels, oats 107,741,000 bushels, barley 6,984,000 bushels, rye 463,000 bushels. Potatoes produced 5,155,000 bushels and flax seed 1,124,000 bushels, turnips, etc., 1,356,000 bushels, hay 311,000 tons. Ninety-six varieties of wild grasses have been identified, of which 46 make valuable hay. They furnish an abundant supply and very little grass seed is sown. Alfalfa, however, has been tried with success and will, no doubt, come into general use, as the open range is taken up and devoted to farming. The 1915 crop was 34,000 tons. Live stock forms an important part of the wealth of the province, there being 544,772 horses, 229,696 swine, 238,579 sheep, 133,974 dairy cows and 660,000 other cattle in 1915. The creameries produced 2,149,121 pounds of butter and the cheese factories 193,479 pounds of cheese in 1910. What is said to be the largest irrigation system in the world is now being constructed in this province by the Canadian Pacific Railway, and will add 1,400,000 acres to the tillable area. It will cost about \$8,000,000, and will have over fifty miles of main canals and nearly 3,000 miles of lateral canals and ditches.

Timber is plentiful in the western portion, chiefly spruce, poplar, tamarack and pine of medium size. In the Rocky mountain section, in the extreme western portion of the province, large deposits of coal are found, also petroleum, natural gas, gold, iron and zinc. The coal is being worked, and the annual production is steadily increasing. In 1915 the coal mines produced 3,320,431 tons, chiefly bituminous. Natural gas produced 4,378,947,000 feet. The total mineral production for 1915 was valued at \$9,915,232. Nearly 1,000,000 barrels of cement and about 90,000,000 bricks were made in 1913. The fur industry in the north is of great value, and a large business is done in Edmonton in supplies for this industry, and in shipping its products. The fishery products in 1915, mostly whitefish, were valued at \$86,720. The province is developing rapidly, its population having increased from 73,022 in 1901 to 374,663 in 1911, and the land is being taken up at the rate of 2,000 acres a day.

The number of newspapers and periodicals published in 89 towns of Alberta is 117, including 9 daily, 102 weekly, 3 semi-monthly and 3 monthly.

## BRITISH COLUMBIA.

Population .....392,480

PROVINCIAL CAPITAL, VICTORIA.

BRITISH COLUMBIA is bounded on the north by the parallel of 60° north, on the west by the Pacific Ocean and Alaska, on the south by the 49th parallel (the boundary of the United States), on the east by Alberta. It has an area of 390,344 square miles. It includes a number of islands, the largest being Vancouver, which contains the capital of the province, and has an area of about 14,000 square miles. The province is about 700 miles long and 500 wide. The Fraser river, its principal stream, is 800 miles long, and 600 yards wide at its mouth, its valley containing much the greater part of the arable land. The climate in the western half is generally mild, the eastern portion reaching greater extremes, both of heat and cold. The rainfall, except in some limited districts in the southeast, is abundant. There is unlimited water power everywhere. The surface is largely mountainous and densely wooded, producing trees of enormous size.

The forest area is about 180,000,000 acres. Lumbering is one of the principal industries, and as the land becomes cleared the soil is found very fertile and a considerable area is well adapted for agriculture of all kinds. The product of the lumber industry in 1913 was worth \$33,650,000. In normal times the lumber industries pay half of the wages in the province. The manufacture of paper and pulp is becoming important. Douglas fir, cedar, hemlock and spruce furnish the bulk of the lumber.

The number of farms is increasing, and agriculture will soon be one of the prominent industries. The 1915 harvest included 525,000 bushels of wheat, 4,390,600 of oats, 106,900 of barley, 104,000 of other grains, 3,956,000 of potatoes, 1,731,000 of turnips, 391,000 tons of hay and 43,000 tons of alfalfa. The fruit growing industry has become a very important one. Tobacco has been successfully grown in the Okanagan Valley. The country is well suited for stock raising, which industry is gradually increasing.

In minerals, this province stands first in copper, zinc and lead; second in gold and silver and third in coal. Gold has been found in large quantities, and mining is one of the chief industries. Copper and iron are widely distributed, and many other minerals are found. The mineral production in 1915, exceeded only by Ontario, reached a total value of \$24,932,658, of which gold, \$5,628,982; copper, 56,692,988 pounds and coal, 2,039,966 tons, produced the greater portion. The lead produced was 45,367,055 pounds; silver, 3,628,727 ounces; coke, 275,375 tons, zinc about 12,000,000 pounds. Platinum, antimony, tin and mercury are found in small quantities. In addition to the coal on Vancouver Island, at present the chief seat of this industry, there have been already discovered on the mainland over 5,000 square miles of coal-bearing lands. The total mineral wealth of the province is beyond computation, for many thousands of square miles of territory have never been surveyed or prospected, and large regions known to be rich in minerals are almost inaccessible at present, and have barely been touched. Of non-metallic minerals there are abundant supplies of building stone of many kinds, brick, fire and pottery clays, limestone and cement rock.

The fisheries are the most valuable in the Dominion, salmon forming by far the greatest portion of the catch, followed by halibut, herring and cod. The 1915 catch of salmon had a value of \$8,018,835; halibut, \$1,561,626; herring, \$876,651; cod, \$366,957. The whale fisheries produce over \$300,000 annually. The total value of the catch of all kinds in 1915 was \$11,515,806. The capital invested is \$8,829,740 and 18,328 persons are engaged in the industry. Fur bearing animals are very numerous. The fur sealing industry has decreased greatly since the Behring Sea fishing has been restricted. Some seals are still taken off the coast of British Columbia, and a few sea otter pelts are turned in each year, although the animal is almost extinct. The principal town on the mainland is Vancouver, the terminus of the Canadian Pacific Railway.

The number of newspapers and periodicals published in British Columbia is 103, including 17 daily, 1 three times a week, 6 semi-weekly, 62 weekly, 2 semi-monthly and 15 monthly. The places of publication number 55.

# MANITOBA.

Population ..... 455,614

PROVINCIAL CAPITAL, WINNIPEG.

MANITOBA extends from the 49th to the 60th parallel of north latitude, and is bounded south by Minnesota and North Dakota, east by Ontario and Hudson Bay, north by Mackenzie Territory and west by Saskatchewan, and has an area of about 251,831 square miles, of which about 20,000 square miles is water.

The settled portion lies almost wholly south of the 52d parallel. Its surface is principally prairie land, with groves of timber along the rivers and streams. Over 6,000,000 acres are under cultivation at present, in more than 50,000 farms. The area devoted to agriculture is increasing rapidly, as thousands of new settlers take up land in the province each year, coming from all the northern European countries. Many also come from the United States. The soil is classed among the richest in the world, and produces the finest wheat known in the market. Almost all other cereals grow and ripen in great abundance, also vegetables and small fruits of all kinds suited to the latitude. The 1915 crops were: oats, 69,471,000 bushels; wheat, 96,475,000; barley, 17,763,000; rye, 155,000; other grains, 50,000; flaxseed, 374,000; potatoes, 3,104,000; turnips, etc., 1,157,000; hay, 307,000 tons; alfalfa, 10,300 tons. Field crops in 1915 had a total value of \$119,447,000. There are numerous elevators and warehouses scattered through the province and new ones are constantly being erected to take care of the immense crops of grain. In 1912 there were 3,193 threshing outfits operated in this province. The province has been prominent as a most favorable district for the cattle raising industry for many years. The stock returns for 1915 show 317,847 horses, 157,494 dairy cows, 246,603 other cattle and 163,308 hogs. Dairy products are increasing in amount year by year, the annual output of butter being over 9,000,000 pounds. Irrigation is not needed, the work necessary for improving and adding to the area of tillable land consisting chiefly in reclaiming a large amount of first-class land which has a surplus of water.

Coal of the lignitic variety is abundant, though mining operations so far have been inconsiderable. There are abundant deposits of clay, sand, gypsum, building stone, etc. The mineral production for 1915 was \$1,351,604. The Laurentian district of the north and east is thought to be rich in other minerals, though it is yet unexplored. This region gives a rich yield of furs, while its streams are full of fish.

Winnipeg is on the main line of the Canadian Pacific Railway, which passes through Manitoba from east to west, and from it several railways branch out into the province and the United States, the province having a total of over four thousand miles of railroad. The means of water communication are also very considerable.

Manufacturing industries are growing in size and number, especially those using the products of the province, as flour and oatmeal mills, meat packing houses, breweries, etc. The manufactures are large and rapidly growing larger, and \$39,000,000 worth of goods was the 1912 output of the city of Winnipeg alone. Flour and other mill products reached \$3,809,333, dressed meats and meat products \$2,336,000, lumber and forest products, nearly \$3,000,000. The fisheries are a valuable asset, their annual product being worth nearly \$1,000,000.

The number of newspapers and periodicals published in 68 of the cities and towns of Manitoba is 139, including 9 daily, 1 semi-weekly, 100 weekly, 8 semi-monthly, 20 monthly and 1 quarterly.

| WINNIPEG, pop. 136,035 (E 7); WINNIPEG ELEC. DIST. (E.), pop. 128,157, and SELKIRK ELEC. DIST. (E.), pop. 53,091. Capital of the Province. On Red R., at junct. of the Assiniboine Riv. Gr. Trunk Pac.; Can. Pac.; Can. N'thrn and other R.Rs. Tel. Exp. Banks. Surrounded by a fertile prairie region, particularly adapted to wheat. Chief industries flour, saw, planing, grist and oat meal mills, foundries, machine shops, breweries, soap, biscuit, confectionery, boot, shoe pickle, sauce and aerated water factories, tannery, cured meats, linseed oil, etc. The western offices of almost all Canada's largest manufacturing, commercial and financial organizations are situated in Winnipeg. It is the metropolis of western Canada, and does a wholesale business of over \$140,000,000 a year. The freight, incoming and outgoing, averages nearly 2,500,000 tons each year. Winnipeg is the leading grain market on the continent. Its receipts of grain for the year 1912 were 143,832,750 bushels of wheat, 51,883,000 of oats and 10,049,800 of barley. A dam across the Red River of the North with a system of locks, has made it possible for vessels of considerable size to reach the city from Lake Winnipeg, fifty-two miles distant. The water power of Lac du Bois, east of the city, is being developed, and when the work is finished will supply over 500,000 horse power, with electrical distribution. University of Manitoba, Manitoba College, St. John's College (Episcopal Divinity). |           |                 |         |         |       |

# SASKATCHEWAN.

Population.....492,432

PROVINCIAL CAPITAL, REGINA.

The PROVINCE OF SASKATCHEWAN, formerly a part of the Northwest Territories, is bounded on the north by the parallel of 60° north, on the west by the Province of Alberta, on the south by the 49th parallel (the boundary of the United States), and on the east by Manitoba. Its length from north to south is about 760 miles, and its breadth 320 miles. Its land area is 242,332 square miles. North of the 54th parallel the country is a region of lakes, swamps and forests, and is practically uninhabited, except by Indians, the white population consisting chiefly of the employes of the Hudson's Bay Company. The annual production of furs from this region is very large. The province is well watered, having numerous streams, lakes and rivers, some navigable. The climate is healthful, although the winters are somewhat severe. The summer days are long, and the great duration of the sunlight brings the crops to maturity in a shorter season than in many countries apparently more favorably situated. The rainfall, averaging 16.68 inches, is usually fully sufficient, especially as the heaviest rains occur during the growing period of the crops. The lumber industry, chiefly handling spruce and small pine, is attaining considerable importance.

The acreage under cultivation is increasing at the rate of over 1,000,000 acres yearly, although there is still about 90 per cent. of the tillable land open to settlement. The 1911 census showed 96,371 farms, more than seven times as many as in 1900, containing a total of 28,642,985 acres, and the area of improved land was nearly ten times as great, being nearly 12,000,000 acres. About 60 per cent. of the land, or nearly 100,000,000 acres, is capable of cultivation. The total value of the field crops for 1915 was \$224,875,000, being 28 per cent. of the total value of all field crops in Canada, against a little over \$4,500,000 in 1900, and the yield per acre of all the grain crops has almost doubled since that year. The southern portion is unexcelled as a grain growing district. The wheat production in 1915 was 195,168,000 bushels; oats, 157,628,000 bushels; barley 10,570,000 bushels; potatoes, 4,428,000 bushels; turnips, etc., 2,936,000 bushels, and flaxseed, 9,061,000 bushels. In addition to these, large quantities of hay, sugar beets and other crops were grown. There are about 900 grain elevators in the province, having a total capacity of 29,314,000 bushels. Live stock is also of considerable value, there being, in 1915, 630,062 horses and 755,293 cattle, 211,684 of these being dairy cows, 133,311 sheep, 411,324 hogs and about 5,000,000 head of poultry. The provincial government allows a subsidy to co-operative creameries and the industry is increasing so fast that figures given early in the year afford no idea of conditions at the end of the year. The output has increased more than 1,000 per cent. in four years. Eighty per cent. of the population is engaged in the various branches of agriculture.

Coal is mined to some extent, the 1915 output being 236,940 tons and there are deposits of petroleum, salt, sulphur and various other minerals. There were in December, 1912, 4,617 miles of railroads in the province, and extensions and branches are being built as needed. Many thousands of new citizens settle in the province each year, by far the greater number being farmers. The fishery industry reported in 1915 a production valued at \$132,017.

The number of newspapers and periodicals published in 144 towns of Saskatchewan is 170 including 7 daily, 4 semi-weekly, 156 weekly and 3 monthly.

# YUKON TERRITORY.

Population.....**8,512**

PROVINCIAL CAPITAL, DAWSON.

YUKON TERRITORY is bounded on the north by the Arctic Ocean and Mackenzie Territory, on the east by Mackenzie Territory, on the south by Alaska and British Columbia, and on the west by Alaska. Its extreme length from north to south is about 675 miles, its greatest breadth about 625 miles, and its land area 206,427 square miles.

Yukon contains the great Klondike gold-producing region. Practically the only industry in Yukon is mining, chiefly for gold; silver and copper are mined to some extent. The amount of gold produced has been decreasing for some years past. In 1900 the value of the output was \$22,275,000. In succeeding years it dropped rapidly, reaching in 1907 the low-water mark of \$3,150,000; since then it has increased. In 1915 it was \$4,765,721. The decrease was due to the deposits of gold accessible to the methods of placer mining, formerly used, having become, to a considerable extent, exhausted. Many companies have been formed recently to prosecute the search for this metal by the more modern methods of hydraulic mining and dredging, also quartz mining. Much machinery has been imported for these purposes, and in a few years the output will no doubt be again large. Silver also decreased from \$177,857 in 1900 to \$23,000 in 1909. In 1915 it was \$29,000. The copper production was 534,216 pounds. The production of coal is variable. In 1911 it was 2,840 tons; in 1912, 9,245 tons; in 1913, 19,722 tons. In 1915 it dropped to 9,724 tons. The total mineral production for 1915 was \$4,915,863.

There are a number of successful "truck" farms, on which a considerable portion of the vegetables used in the territory are grown, but practically all other agricultural products must be imported. Experiments are being carried on to determine what crops are best suited to the soil and conditions. Oats and barley have been successfully grown. The varieties of wheat so far tested have attained good growth, but have failed to ripen the kernels. Vegetables started under glass, and set out when the summer opens, grow to a large size, the almost continuous sunlight being highly favorable to rapid growth. The fisheries in 1915 reported a product, chiefly white fish and salmon, valued at \$69,725. The population, which was 27,219 in 1901, has decreased, with the decrease of gold production, to 8,512.

Three papers are published in two towns in the Territory, including 1 daily and 2 weekly.

(For map see Alaska.)

# NEW BRUNSWICK.

Population ..... 351,889

PROVINCIAL CAPITAL, FREDERICTON.

NEW BRUNSWICK is bounded north by Quebec, east by the Gulf of St. Lawrence, west and south by the Bay of Fundy, part of Nova Scotia, and Maine. It is 210 miles in length and 180 miles in breadth, and has a coast line of about 500 miles. Its area is 27,174 square miles. Surface generally is undulating, and there is scarcely an elevation on the east coast exceeding 300 feet, while on the north there is a district of mountainous character, consisting of hills of considerable elevation, covered with dense forest, of which there is about 7,500,000 acres, and surrounded by fertile valleys and table lands. The forests are extensive, and lumbering is one of the principal industries. The stand of available timber is estimated at 22 billion feet. The pulp wood exports in 1910 were 122,695 cords.

The climate is healthful and the soil fertile, with great agricultural capabilities. The principal cereals, legumes, root plants, and vegetables are grown, with apples and the small fruits. The chief grain crop is oats, of which in 1915, 5,559,000 bushels were grown. Buckwheat is also largely grown, the 1915 crop being 1,815,000 bushels. Wheat produced 267,000 bushels. Potatoes and turnips produced 5,772,000 and 2,633,000 bushels respectively; hay, 791,000 tons. The manufacture of cheese, for which New Brunswick has long been famous, is falling off, the production having decreased from 1,910,733 pounds in 1902 to 1,044,325 pounds in 1911, a loss of over 40 per cent. In 1911 there were 16 creameries which made 844,000 pounds of butter. Much attention is given to fruit culture. The area of land under cultivation and the number of farms show a steady increase each year. The live stock reports for 1915 show 198,102 cattle, of which 101,665 were dairy cows, 65,827 horses, 73,533 hogs and 111,026 sheep.

Ship building, formerly extensively carried on, has declined of late years, owing to the modern practice of building almost all large ships of iron. The fisheries, chiefly salmon, mackerel, cod, sardine, smelt, herring, oyster and lobster, are third in value among the provinces. About 22,000 persons are engaged in this industry and the 1915 product was worth \$3,765,020. Lobster leads, with a value of \$729,100.

This province stands second in iron mining. The 1913 output was 86,416 tons of ore. Coal, antimony, copper, manganese, salt, petroleum, natural gas and other minerals are found in considerable quantities. The total mineral production in 1915 was valued at \$916,329.

Manufactures are chiefly sawed lumber and wooden wares, cotton and woolen goods, refined sugar, rope and cordage, canned goods, polished granite, boots and shoes, edge tools, furniture, paper, castings, machinery, locomotives, etc. The total value of manufactured goods in 1910 was \$35,422,302, an increase of over sixty per cent. over 1900. Chief exports—lumber, fish, cotton goods, potatoes, butter and eggs, beef and mutton, gypsum, hay, etc. Game and fish, especially salmon, are abundant, and it is a favorite resort for hunters and anglers from the other provinces and the United States.

The number of newspapers and periodicals published in New Brunswick is 49, including 8 daily, 1 three times a week, 11 semi-weekly, 21 weekly, 1 semi-monthly and 7 monthly. The places of publication number 17.

## NOVA SCOTIA.

Population.....492,338

PROVINCIAL CAPITAL, HALIFAX.

NOVA SCOTIA consists of a narrow peninsula, connected with New Brunswick by a narrow isthmus about 16 miles wide, and of the island of Cape Breton. It is bounded on the north by the Gulf of St. Lawrence, on the east and south by the Atlantic, on the west by the Bay of Fundy and New Brunswick. It is 300 miles long and from 80 to 100 wide, with an area of 20,907 square miles, or about 13,000,000 acres, of which 5,000,000 are fit for tillage. The rest is nearly all covered with forest, from which as much as 400,000,000 feet of lumber are cut each year. The wood is mostly spruce, fir, hemlock and pine, with some birch, oak and maple. A great part of the wood is used in the ship-building industries of the province. Much is also used for the manufacture of pulp, which is exported to paper mills in the other provinces and the United States. The lumber cut in 1911 was valued at \$2,000,000. The Cobequid Range runs through the interior, the soil on both sides of it being very fertile; which is also the case in the beautiful valley of the Annapolis river.

The soil is rich and agricultural productions, such as wheat, rye, oats, barley, buckwheat, corn, root crops, vegetables in general, and fruit grow abundantly. The farmers are industrious and prosperous, and all but a very small percentage own their own farms. Oats are largely grown, the 1915 crop being 3,487,000 bushels, that of potatoes 4,769,000 bushels, turnips 3,589,000 bushels. The two latter crops were, in that year, much below average. Potatoes in 1912 produced 9,447,000 bushels, turnips 5,606,000 bushels. The dairy and live stock products are worth \$6,000,000 per year. Farm animals in 1915 were: Horses, 63,244; dairy cows, 128,814; other cattle, 144,458; sheep, 205,542, and swine, 53,402. Fruit growing, especially in the Annapolis valley, is an industry of great importance. Apples are exported in large quantities, being in great demand in England. The crop of this fruit ranges from 750,000 to 1,000,000 barrels annually, and is worth over \$2,000,000.

Nova Scotia is third among the provinces in mineral wealth. The principal minerals are coal, iron and gold. Coal is abundant, and more than half of Canada's total production comes from Nova Scotia's mines. Over 13,000 men are employed in the coal mining industry, and 7,429,888 tons were dug in 1915. In coke, Nova Scotia leads, producing in 1915 584,993 tons. Canada's total output was 1,200,766 tons. The pig iron output of Nova Scotia was 420,219 tons. Gold was produced to the value of \$137,178. Iron is found in large quantities and is practically inexhaustible; it is of a fine quality and the ore commands the highest price in the market. Small quantities of antimony, tin and tungsten have been found. Manganese, gypsum, and roofing slate abound. The minerals produced in 1915 were worth \$18,126,672.

Manufactures are numerous, and include railroad cars, coarse cloth, flannels, blankets, carpets, boots and shoes, wood pulp, ships and boats, saddlery, furniture and farm implements. The manufactured products have more than doubled in ten years, and the output for 1912 was over \$70,000,000. The fisheries are second only to British Columbia, the 1915 catch being worth \$7,730,191. About 30,000 people are engaged in this industry, with an equipment valued at nearly \$8,000,000. Lobsters worth \$2,522,599, cod worth \$1,992,100, herring worth \$549,123, mackerel worth \$424,283 and haddock worth \$1,200,267, are the leading species of fish. Hake and halibut are also abundant.

The capital city, Halifax, is situated on the west side of the harbor of that name, and contains nearly 50,000 inhabitants. The harbor is one of the finest in existence, over half a mile in width at its narrowest part, and large enough to contain the navies of the world. Halifax is the winter port for the direct mail steamers, and has direct communication with Liverpool, Boston, Baltimore, Quebec and the West Indies. As a summer resort it is yearly becoming better known; its suburbs furnish the pleasantest of drives and superior bathing facilities, and its public gardens have been pronounced by those who have visited them among the most beautiful on this side of the Atlantic.

The number of newspapers and periodicals published in Nova Scotia is 73, including 14 daily, 1 three times a week, 6 semi-weekly, 38 weekly, 1 fortnightly, 5 semi-monthly and 8 monthly. The places of publication number 32.

(For Map see New Brunswick.)

# ONTARIO.

Population.....2,523,274

PROVINCIAL CAPITAL, TORONTO.

ONTARIO is bounded on the east by Quebec, north by Hudson Bay and Manitoba, south-west and south by Minnesota, the Great Lakes and St. Lawrence river, west by Manitoba, and has an area of 407,252 square miles, exclusive of its water surface. It is the most populous and wealthy province of the Dominion of Canada, and contains many large cities. Ottawa, population (1911) 87,062, is the seat of government and capital of the Dominion. The surface is mostly undulating, traversed by the Laurentian Hills and Blue Mountains, but except in the neighborhood of Lake Superior and Georgian Bay these nowhere exceed a few hundred feet in height.

The agricultural resources are very great. Three-fourths of the present area of habitation is fertile, while an immense region beyond is capable of cultivation. New Ontario, as the northern and the northwestern districts are called, has scarcely been touched by the plow, but settlement is now beginning, and the farms which have been cut out of the forests show that it will be fully equal to any part of Canada in productiveness. Oats are the chief grain crop, amounting in 1915 to 122,810,000 bushels. In the same year barley produced 15,369,000 bushels, wheat 30,252,000, buckwheat 3,686,000, corn 13,880,000, rye 1,551,000, peas 3,007,000, flaxseed 62,000, potatoes 14,862,000, turnips 44,175,000. Sugar beets, alfalfa, fodder corn and hay yield heavily. The total value of the field crops was \$207,043,500, more than a quarter of Canada's total. Two of Canada's three beet sugar factories are in Ontario. The produce of all crops per acre is usually well above the average in other countries. There are no more successful horticulturists than those of Ontario, who produce about seventy-five per cent of all the fruit grown in Canada. About 350,000 acres are devoted to fruit growing, and almost all the fruits of the temperate zone flourish luxuriantly. The apple is the greatest fruit crop. In addition to those used in the province, over 1,000,000 barrels of apples are exported, chiefly to Great Britain, although many go to the western provinces and to the United States. Grapes are another large crop. The 1913 crop was 36,000 tons, about  $3\frac{1}{2}$  tons per acre. Tobacco has been successfully grown in the southern part for some years, chiefly in Essex and Kent Counties. The annual crop is over 7,000,000 pounds, about two-thirds of Canada's total, the remainder coming from Quebec. Horses and cattle are raised in large numbers, and of the finest quality, and have taken many first prizes at international shows. The live stock included in 1915 903,527 horses, 1,077,808 dairy cows, 935,606 other cattle, 611,789 sheep, 1,469,573 swine. The 1912 wool clip was 3,669,419 pounds. The dairy industry is very large and much care is given to improving the breed of dairy cattle. There are over a thousand cheese factories and in 1910 they made 157,631,823 pounds of cheese, worth \$14,845,661. The total value of dairy products ranges from thirty to thirty-five million dollars each year.

There are over 100,000 square miles of forest land in the province, and the timber cut in 1911 was worth \$30,011,000. There are large areas of spruce, which is cut for pulp wood, and the pulp and paper mills of the province use up 300,000,000 cords of pulp wood in a single year. The fisheries, chiefly on the great lakes, employ over 4,000 persons, and the 1915 catch was worth \$2,755,291.

The mineral treasures are exceedingly rich and varied. The total mineral production for Canada in 1915 had a value of \$138,513,750, of which Ontario's share was more than two-fifths, being \$61,800,178. More than half of this was represented by silver, 24,653,057 ounces, 86 per cent. of the total for the Dominion, and nickel, 68,077,823 pounds. Ontario is the only province where nickel is found, and it produces about four-fifths of the world's supply. It is obtained almost entirely from the nickel-copper ores of the Sudbury district. Cobalt is another mineral of which the world's needs are supplied principally by Ontario. It is a valuable by-product of the silver mines of the Cobalt region. Arsenic is another important product. The output of gold in 1915 was \$3,386,956, 44 per cent. of Canada's total; copper, 39,303,279 pounds; cobalt, 477,068 pounds; petroleum, 214,444 barrels; natural gas, 13,510,071,900 feet; pig iron, 493,500 tons; salt, 119,900 tons; pyrites, 110,616 tons. Mica is extensively worked. Marble, said to be equal to that of Carrara, is quarried. Galena, plumbago, and various other minerals exist.

The water power is widely distributed and abundant. Manufactures are rapidly increasing in number and importance, among the principal being agricultural implements of all kinds, wagons, carriages, railroad stock (including locomotives), cotton and woolen goods, leather, furniture, paper and pulp, soap, wooden ware, etc. Ontario is the first province in manufactures. Transportation facilities are abundant. In addition to the great trunk lines, the Grand Trunk Railway and Canadian Pacific, every important section has competing lines stretching out to it. The province has a magnificent system of waterways, both natural and artificial. It has over 1,300 miles of water front on the lakes and the St. Lawrence. Surveys are being made for a ship canal across the province, to connect Georgian Bay, on Lake Huron, with Montreal. It is to have a depth of twenty-two feet, and in addition to its use as a canal is expected to produce power to the extent of over a million horse power.

The number of newspapers and periodicals published in Ontario is 647, including 58 daily, 2 three times a week, 16 semi-weekly, 416 weekly, 1 fortnightly, 9 semi-monthly, 134 monthly, 2 bi-monthly and 9 quarterly. The places of publication number 273.

## PRINCE EDWARD ISLAND.

Population ..... 93,728

PROVINCIAL CAPITAL, CHARLOTTETOWN.

PRINCE EDWARD ISLAND is bounded north by the Gulf of St. Lawrence, east by Cape Breton Island, south by Nova Scotia proper, and west by New Brunswick. The greatest length is 130 miles; greatest breadth, 34 miles; least breadth, 4 miles; area about 2,134 square miles. The surface is gently undulating, a large part of it formerly forest, but the forest area has been greatly reduced by lumbering operations, fires, etc.

The soil is a light loam, not known to contain available minerals, but remarkably rich and particularly favorable for the growth of grasses, and practically the whole is fit for cultivation. The province is essentially agricultural. There are 14,369 farms, with 80 per cent. of the population resident thereon. Principal productions are oats, wheat, barley and other grains, hay, pork, potatoes, butter, cheese, starch, horses, sheep, etc. Oats, as in all the eastern provinces, are the chief grain crop, and produced 6,832,500 bushels in 1915. The potato crop for that year was 3,558,000 bushels. Turnips are an important root crop, being much in requisition for the dairy cattle. The 1915 crop was 3,551,000 bushels. Hay made 351,000 tons. The cattle number 106,546, 59,503 being dairy cows; sheep, 86,640 and hogs, 40,792. The production of butter and cheese is very large, the 1910 output of the cheese factories being 3,293,765 pounds, and that of the creameries being 670,913 pounds of butter, in addition to that produced on the farms. Apples are an important crop. The latest count shows 205,979 apple trees in the province.

There are valuable fisheries, especially of lobsters, smelts, cod, herring, mackerel and oysters; upwards of twenty thousand barrels of oysters and nearly 3,000,000 pounds of canned lobsters being shipped annually. The fisheries in 1915 produced a value of \$1,261,666, the lobster production alone being worth \$983,315. In late years a new industry, that of breeding black and silver foxes for their fur, has taken root in Canada. In this industry Prince Edward Island leads. The "fur farms" reported in 1912 numbered 241 for the whole of Canada, and held in captivity 2,510 black, silver, cross and red foxes. Prince Edward Island had 200 of the 241 farms and 1,800 of the animals. As a high grade black fox skin has sold for as much as \$2,500, the industry will probably be much further extended in the future.

Tweeds, flannels, pottery, boots and shoes, agricultural implements and domestic articles, sufficient only for home use, are manufactured; shipbuilding was formerly carried on to a considerable extent, but has latterly become much reduced.

The number of newspapers and periodicals published in Prince Edward Island is 10, including 4 daily and 6 weekly. The places of publication number 2.

(For map see New Brunswick.)

## QUEBEC.

Population ..... **2,002,712**

PROVINCIAL CAPITAL, QUEBEC.

QUEBEC is bounded north by Hudson Bay, east by Labrador and the Gulf of St. Lawrence, south by New Brunswick, Maine, New Hampshire, New York and the Ottawa river, which separates it from Ontario, and west by Hudson Bay and Ontario. Extreme breadth from east to west 1,080 miles, length from north to south 1,280 miles; area 706,834 square miles. Surface south of St. Lawrence generally hilly, further north mountainous and rocky and abounding in rivers and small lakes. The extreme northern part is an unexplored wilderness. A great part of the surface of the province is covered with forests.

The soil in many districts is rich, and cereals grow well. Oats, potatoes and hay are the chief crops. The 1915 harvest included 42,182,000 bushels of oats, 508,000 bushels of corn, 2,255,000 of barley, 2,568,000 of buckwheat, 17,510,000 of potatoes and 3,144,000 of turnips and other root crops, 1,411,000 of wheat and 3,682,000 tons of hay. Peas, beans, rye and other grains were grown abundantly. The total value of field crops was \$104,683,000. Hops and apples are extensively grown. Some tobacco is grown, the 1913 crop being 4,000,000 pounds. Nearly a third of Canada's sheep are in this province, and the wool clip is large. Cattle raising and cheese dairying are important industries. There were, in 1915, 720,420 dairy cows in the province, besides 612,500 other cattle. Sheep and hogs are raised in great numbers. The creameries in 1910 made 87,346,107 pounds of butter, the production of cheese in the cheese factories was 67,741,302 pounds. The total annual value of the dairy products is over \$25,000,000.

Copper and mica abound in the eastern townships, where silver is also found. The whole Canadian supply of asbestos is in Quebec and the asbestos industries find employment for more than 3,000 people. The 1915 output of this useful mineral was 113,115 tons and its value was \$3,491,450. In the same year Quebec's copper reached 6,082,003 pounds, pyrites, 117,698 tons; mica, to the value of about \$80,000. Gold, silver, graphite, platinum, zinc, etc., are found, and there are large deposits of phosphate of lime in the Ottawa river district. The total mineral production for 1915 was \$12,159,486.

Lumbering is the principal industry, and its products form a great part of the exports. The total production is about 1,000,000,000 feet a year. The fisheries are also of considerable importance. Salmon, lobster, cod, herring, mackerel and whale are the leading kinds, with cod, value \$1,050,918, in front, followed by herring, \$240,969 and lobster, \$204,915. Over 11,000 persons are engaged in this industry and a capital of \$1,400,000. The value of the total catch in 1915 was \$1,924,430. The catch of fur is greater than that of any other province. In 1910 it was over \$400,000, more than a fifth of Canada's total. Shipbuilding is carried on in Quebec.

The principal manufactures are cloth, linen, furniture, leather, sawed timber, flax, iron and hardware, paper, pulp, chemicals, boots and shoes, cut stone, cement, clay products, cotton and woolen goods, agricultural implements, aluminum (from imported bauxite), etc. Quebec is one of the world's great centers in the manufacture of paper and pulp, its immense forests of spruce and other pulp woods and its abundant water power combining to give it unsurpassed advantages in this industry. The manufacturing establishments have increased 30 per cent. in five years. Montreal, though not the capital, is the largest city in the province and the chief commercial city of the Dominion. About 80 per cent. of the people are of French origin.

The number of newspapers and periodicals published in Quebec is 149, including 20 daily, 1 three times a week, 1 semi-weekly, 90 weekly, 1 fortnightly, 1 semi-monthly, 31 monthly, 1 bi-monthly, 1 four times during the college year and 2 quarterly. The places of publication number 46.

Cent.; Intercolonial and other R.Rs. Tel. Exp. Banks. Largest city, and commercial metropolis of the Dominion of Canada. At head of ocean, and commencement of lake and river navigation, with an extensive commerce. Montreal is to be the terminus of the projected ship canal from the St. Lawrence to Georgian Bay, on Lake Huron, which will place the city in a high position among the seaports of the world. Manufactures are numerous, including saw and flour mills, iron, lead, and brass works, locomotive, engine, hardware, farm implement factories and many others. The total output of manufactured goods in 1910 was nearly \$20,000,000; more than double the production of 1900. The city is growing fast, and its present population including suburbs is estimated at \$70,000. # NEWFOUNDLAND.

Population.....242,619

CAPITAL, ST. JOHN'S.

NEWFOUNDLAND lies to the eastward of the Dominion of Canada and comprises the island of Newfoundland, in the Atlantic Ocean, at the mouth of the Gulf of St. Lawrence, and a strip 800 miles long and about 30 miles wide along the eastern coast of the Labrador peninsula. Newfoundland is bounded on the east, north and south by the Atlantic ocean, and on the west by Quebec and the Gulf of St. Lawrence. The extreme length of the island of Newfoundland is 350 miles; average breadth 130 miles, and area 42,000 square miles. The surface is generally rugged, with numerous lakes and rivers. The central and eastern portion of the interior is but thinly wooded, and consists in part of elevated plains called "barrens." The river valleys and the western portion of the island have a considerable growth of timber, chiefly spruce and birch of moderate size.

The soil is fertile near many of the lakes and rivers, and in many places farming is profitable. The area of the cultivated land is rapidly increasing, having more than doubled within the past ten years. About 200,000 acres is now under cultivation or pasturage. Wheat, oats and barley grow well; also potatoes and green crops generally; apples and small fruits are profitable. The report of the Newfoundland Agricultural Board shows a production during the year 1911 of 15,000 bushels of oats, 80,000 tons of hay, 650,000 barrels of potatoes, 100,000 barrels of turnips and other root crops, 1,500,000 dozens of cabbage, 1,100,000 pounds of butter, 6,650,000 pounds of beef, mutton and pork. There were in the colony 12,745 horses, 18,408 dairy cows, 27,300 other cattle, 101,440 sheep, 36,409 swine. These figures all show considerable increase over those of the 1901 census. Agriculture is progressing, and while it has been necessary to import a proportion of the foodstuffs, especially meat, dairy products and oats, the government is endeavoring to develop the agricultural resources in every way and before long the colony will be self-supporting in the matter of food supplies. The lumber industry, while not large, is growing, and the exports in 1914 were valued at \$106,620. Much of the spruce is also made into paper pulp.

Copper and iron are mined; the other minerals found are lead, gold, silver, manganese, nickel, plumbago, marble, limestone, petroleum, coal, talc, slate, etc. The total value of the mineral exports in 1914 was \$1,450,512, by far the greater part being iron ore. Copper ore is next. Lead and a few other minerals are worked on a small scale. The coal deposits are extensive, but have not yet been developed.

The fisheries, both on the Grand Bank and in shore, are very valuable. The seal fishery employs a large number of vessels. The Newfoundland cod fishery is the most extensive of the kind in the world. The aggregate annual catch of cod in North American waters is estimated at about 150,000,000 fish, worth about \$15,000,000. The principal exports are fish and fish-oils, seal-oil and skins, and other fishery products, forming about 80 per cent. of the total exports. The total exports of all fishery products, including the whale and seal products, in 1914, were valued at \$10,907,677, of which codfish in its various forms, including oil, brought \$8,475,724; herrings, \$469,546; lobsters (canned), \$347,941; salmon, \$101,498; seal products, \$759,854; whale fishery products, \$100,000. Including what is used for home consumption, the total value of the fisheries is not less than \$13,000,000.

Manufactures consist chiefly of lumber, pulp, paper, and canned fish and lobsters. Several large English companies have built pulp mills, with a total capacity of several hundred tons per day. Goods were exported to the United States in the year ending June 30, 1915, to the value of \$1,391,668. The imports from the United States were \$5,352,628. The imports from Canada in 1914 were \$4,861,047, from the United Kingdom \$3,826,529; exports to Canada 1,971,809; to the United Kingdom \$3,256,446. Total imports, chiefly coal, flour, textiles, railroad supplies and hardware, \$15,193,726; total exports \$15,134,543. The exports go chiefly to the United Kingdom and Brazil, each of which takes over \$3,000,000. Besides the United States; Canada, Spain and Italy, each take over \$1,000,000, the rest being distributed all over the world. The coast of Labrador, included in the colony, comprises about 120,000 square miles, but has only 3,939 inhabitants. These are engaged in the cod and seal fisheries and, during the winter months, in trapping.

The number of newspapers and periodicals published in Newfoundland is 21, including 5 daily, 10 weekly, 5 monthly and 1 quarterly. The places of publication number 7.

## BERMUDA.

Population 21,576

(White, 9,244; Negroes, 12,332).

CAPITAL, HAMILTON.

A group of islands in the North Atlantic Ocean, 660 miles southeast of New York. Although said to be 365 in number, they occupy a space only 18 miles by 2½ miles. The largest has an area of 9,000 acres, the whole group containing only about 12,000. They are of coral formation, on the summit of a submarine mountain. The climate is delightful, without extremes of heat or cold, the temperature ranging from 55 to 85 degrees, and the islands are becoming very popular as a summer and winter pleasure and health resort, and are visited every year by increasing numbers of Americans and Canadians. Although a governor is appointed by the British crown, the islands have their own representative government for local affairs, having the oldest parliament among all the British colonies.

The soil produces almost every description of fruits, flowers and vegetables abundantly. Onions, potatoes, celery and early table vegetables are the chief crops, and the culture of flowers, especially Easter lilies, for the American market, is a large and growing industry. The 1911 crop of onions was worth \$210,000, potatoes, \$165,000, and other vegetables, \$125,000. Total imports, chiefly from New York, \$2,700,000. The United States sent to Bermuda in the year ending June 30, 1915, goods valued at \$1,485,950 and imported from Bermuda \$500,912. There is frequent and regular steamship communication with New York, and also direct lines to Canada and England.

CUBA AND WEST INDIES.

## CUBA.

Population 2,048,980.

CAPITAL, HAVANA.

CUBA, the largest of the West India Islands, is situated about 100 miles south of Florida, from which it is separated by the Florida Straits. It is 800 miles in length from east to west; greatest breadth at Cape Cruz, 110 miles; average width from 50 to 60 miles, except at its western extremity where it is about 80 miles. Total area, 44,164 square miles. A mountain range intersects it longitudinally. The climate is hot and dry, and healthy only in the interior. Snow is never known to fall, but frost occurs occasionally on the highest points. The rainy season is mainly confined to July, August and September. The mountains are rich in minerals and there are abundant forests of mahogany, ebony, cedar and other valuable woods.

The vegetation is exceedingly luxuriant; the principal cereal is corn, of which two crops are obtained in a year. Rice is also produced in large quantities, but the principal crops are sugar, coffee and tobacco, and of these the first is by far the most important. The production of sugar in 1913 was 2,428,537 tons, practically all of which went to the United States. The 1912 tobacco crop was 42,030,000 pounds. The chief fruit crops are oranges, pineapples and grape fruit.

The commerce of Cuba is rapidly increasing, especially with the United States, which furnishes about half of the goods imported and takes almost all of the exports. The principal imports are cereals, meats, cotton and cotton goods, and machinery. The total imports for 1914 were \$119,001,000, the total exports \$177,554,000. Honey and beeswax form an important part of the exports. Other exports are cocoa, molasses, asphalt, iron ore, nickel, cedar, mahogany, etc. The exports to the United States for the year ending June 30, 1915, were valued at \$185,707,901, imports from the United States \$75,530,382.

Cuba forms an exception to the rule in the West Indian islands, in that the white people far outnumber the negroes. Fully seventy per cent. of the people are white. Education has made great strides since the people attained independence. Under the policy of those dominant under the Spanish regime, the people had no educational facilities, and only a very small percentage could read. At the present time the percentage of the people over ten years of age who can read is 82.6 in the cities and in the country districts 47.9. In the cities 49.9 per cent. of the children attend school, in the country districts 31.6 per cent.

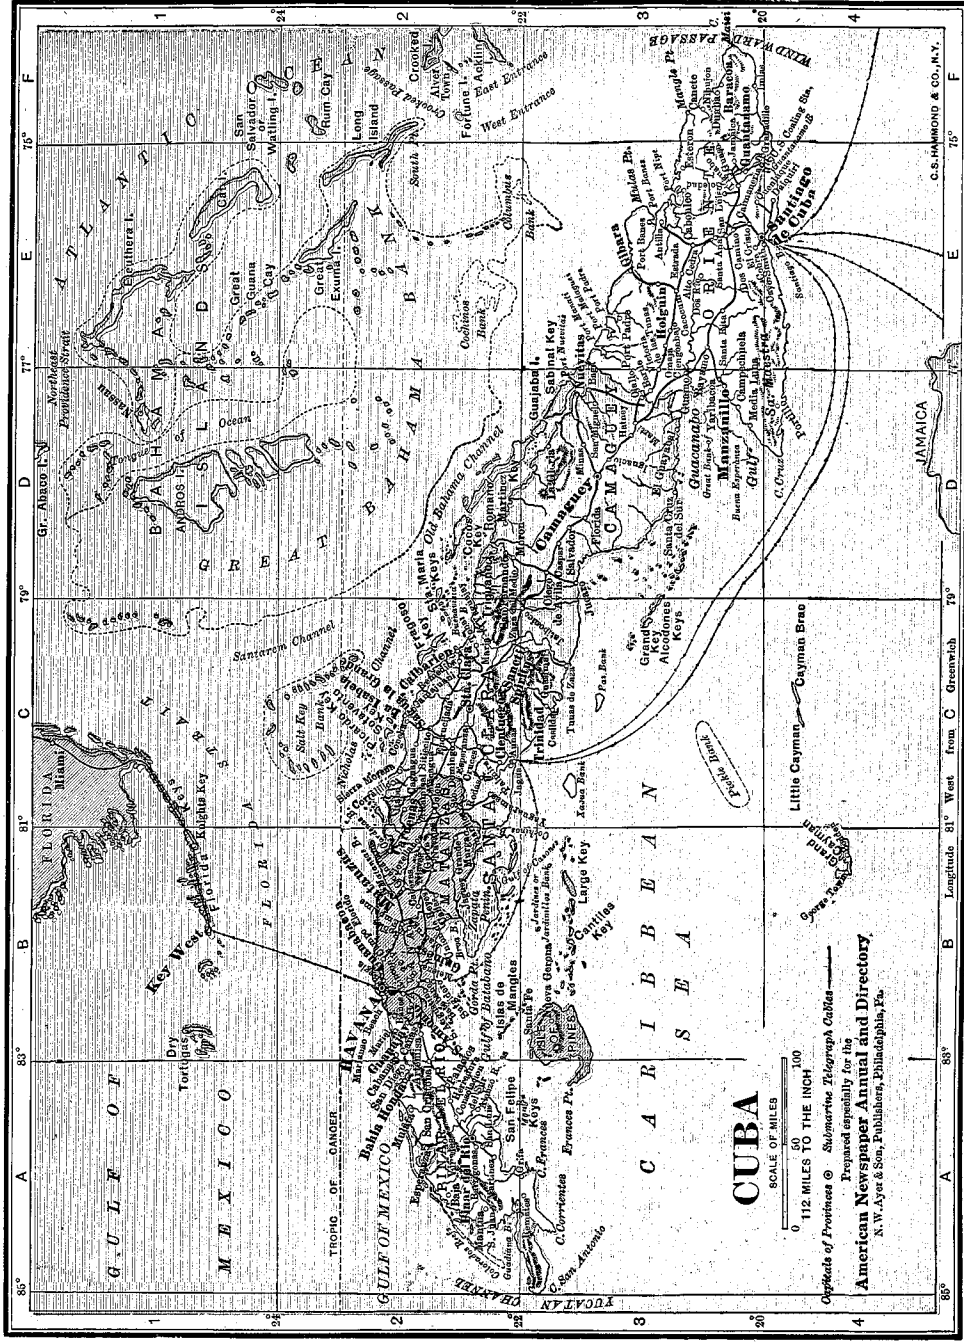

(All papers are Spanish unless otherwise stated. Papers marked with an asterisk are reported to us as being published, but no copies have yet been received.)

## DOMINICAN REPUBLIC.

**Population, 650,000.**

CAPITAL, SANTO DOMINGO.

(For Map, see Cuba.)

The DOMINICAN REPUBLIC, or SANTO DOMINGO, occupies the eastern and the larger part of the island of Hayti, and has an area of 19,325 square miles, more than double the area of the Republic of Hayti. The central part is mountainous, reaching the highest elevation in the Pico del Yaque—9,695 feet, but the valley lands and the plains along the northern coast are extremely fertile, and abundant crops of tropical and sub-tropical fruits, vegetables, etc., are grown. The country is well watered, numerous rivers having their origin in the mountain ranges. The largest are in the north, and are the Yaque del Norte, which rises near Yaque mountain, and after a course of 249 miles flows into the ocean at Monte Cristo Bay, and the Guna, which rises a few miles east of the source of the Yaque and flows 186 miles to Samana Bay. The basins of these two rivers form the great valley known as the Vega Real de Colon, reaching from Samana Bay on the east to Manzanillo Bay on the northwest, which is unexcelled for fertility. The chief rivers of the south are the Yaque del Sur, the Ozama and the Macoris. While the climate in general is hot and humid, there are districts in the south and east where the rainfall is so slight that agriculture has not been successful. For these regions the government has decided to construct large irrigation works, the surveys for which are now being made.

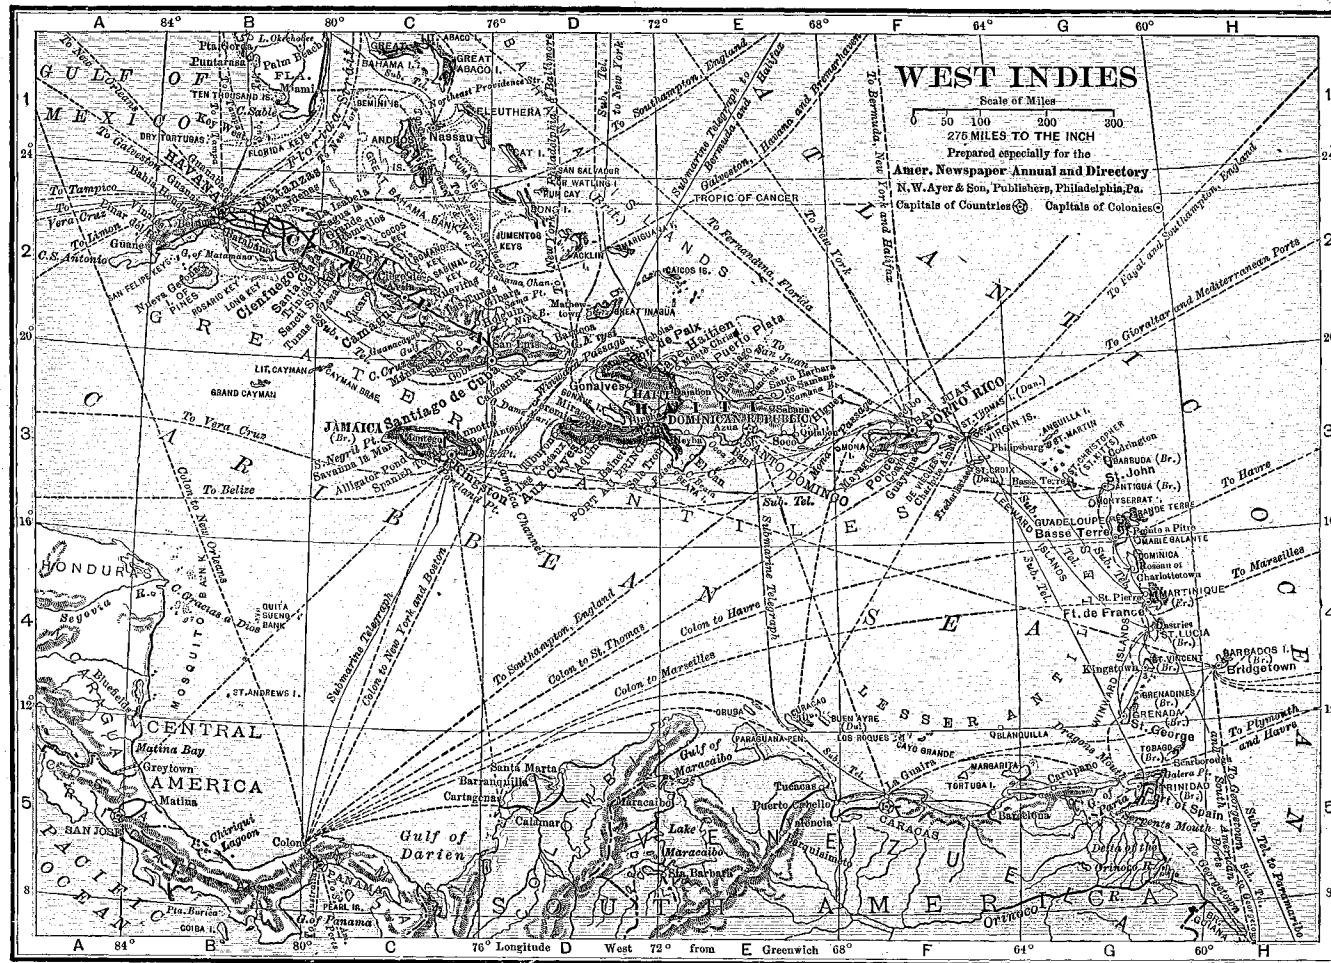

The principal products are sugar, cacao, coffee, bananas and tobacco, also some cotton. Corn and tropical cereals do well. The value of the 1909 crop of sugar was \$3,500,000. All of it was exported to the United States. Cacao is produced chiefly in the northern part of the island, and most of it goes to Germany, the rest to the United States and France. The 1909 crop was valued at \$4,500,000. Bananas, to the value of \$3,000,000, were shipped to the United States, which takes all the crop. The tobacco is all shipped to Germany. It is grown chiefly in the vicinity of Santiago. The 1912 crop was 18,000,000 pounds. Other products were coffee, \$350,000, and beeswax, \$140,000.

About \$1,000,000 worth of hardwoods and other miscellaneous products is exported each year. The exports in 1912 were \$9,595,321, of which the United States took \$5,223,330, Germany, \$2,795,340, and France, \$1,413,507. The forests produce large quantities of mahogany, satin-wood, logwood and cedar. The timber has been cut chiefly near the coast, and the extensive forests of the interior have scarcely been touched. These contain vast amounts of the most valuable hard woods and dye-woods, and the higher elevations in certain regions are covered with a large growth of pine. The mineral resources have been neglected, although deposits of gold, copper, iron and coal are known to exist. The leading industries are the manufacture of sugar, rum, cigars and cigarettes, leather, soap, candles and lumber, besides minor industries. The major portion of the people are engaged in agricultural pursuits. A railroad in the northern portion and another along the southern coast connect the chief cities in those districts. There is regular steamer communication with France, Germany, the United States and Cuba, and submarine cable connection over French systems. Although political disturbances were formerly frequent, there have been few of importance in recent years, since the United States took charge of the customs, and the government has now a surplus over the necessary expenses. Crops are more abundant and of better quality, and commerce is increasing. Exports to the United States for the year ending June 30th, 1915, were valued at \$9,826,897. Imports from the United States, \$5,680,299.

(All papers are Spanish unless otherwise stated.)

# HAYTI.

Population 2,000,000.

CAPITAL, PORT-AU-PRINCE.

(For Map, see Dominican Republic.)

HAYTI occupies the western or smaller part of the island known as Hayti, and has an area of 10,240 square miles. Ninety per cent. of the population is of the negro race. Although much of the land is mountainous and rugged, and covered with dense forests, the soil, where cleared and cultivated, is remarkably fertile, and large crops of coffee, cotton, cacao, sugar and tobacco are grown. Large quantities of valuable timber, consisting of mahogany, cedar and various dye-woods, the products of the forests, are also exported. United States Treasury reports show that in the year ending June 30, 1915, Hayti imported from the United States goods worth \$3,184,618. The exports to the United States were \$1,542,886. The mineral deposits, which are valuable, have been but little developed. A convention, signed between the United States government and Hayti and ratified by the senates of both countries, is now in operation and much benefit is expected to result from it in the future development of the country. With the help of the United States, the government will be more settled and industrial progress will probably be rapid.

(All papers are French unless otherwise stated.)

### BAHAMAS. (BRITISH.)

**Population 60,000.**  
(Three-fourths negroes.)

CAPITAL, NASSAU.

A chain of islands extending nearly 600 miles northwest from near the north coast of Hayti to the east coast of Florida, and including 20 larger islands, 153 islets, and innumerable reefs. The area is 5,400 square miles. The chief products are sponges, grape fruit, oranges, pineapples, sisal hemp and vegetables. There is an abundance of fine hardwoods. An important industry is the supplying of stevedore and contract labor.

### BARBADOS. (BRITISH.)

**Population 171,982**

(Of whom about 12,000 are white.)

CAPITAL, BRIDGETOWN.

One of the Windward Islands, 78 miles east of St. Vincent. Length, 21 miles; greatest breadth, 14½ miles; area, 166 square miles. It is wholly given up to cultivation. There is only one harbor, Carlisle Bay, the island being almost entirely surrounded by coral reefs. Surface diversified, soil generally fertile. Chief articles of export are sugar, rum, cotton, molasses, syrup and bananas. In the year ending June 30th, 1915, Barbados sent to the United States goods worth \$386,743 and imported goods worth \$1,281,700.

CAPITAL, ROSEAU.

The largest British Island of the Leeward group, lying between Martinique and Guadeloupe, about thirty miles from each. Twenty-nine miles long by sixteen broad, total area 304 square miles. Surface rough and broken, only a small part being arable, but that very fertile. Chief products are lime juice, cocoa, coconuts, oranges and other fruit, timber, starch, spices, rubber, essential oils, etc. Total value of imports in the year 1915 was 206,373 pounds sterling (about \$1,130,000). Exports 235,937 pounds sterling (\$1,175,000).

**GADELOUPE. (FRENCH.)**

**Population \*180,000.**

(Mostly negroes.)

CAPITAL, BASSE-TERRE.

GADELOUPE is the largest of the Lesser Antilles. Area, 494 square miles. Consists of two distinct islands, the western and largest one is known as Guadeloupe proper, the eastern is called Grande-Terre. The former is of volcanic formation and traversed by a ridge of mountains, one of which, Mount Soufriere, reaches a height of 4,800 feet, and is an active volcano. Grande-Terre is generally flat. Soil is fertile and well cultivated. Climate hot but salubrious. On the upper slopes of the mountains the temperature is much milder, averaging 68 degrees for the year, the minimum being 50 degrees. There have been no cases of yellow fever or contagious disease for twenty years. Forests of valuable hardwoods and dye-woods. Thermal mineral springs of medicinal repute. The chief articles of export are sugar, coffee, dye-woods, rum, limes, vanilla, bananas, cacao, coconuts, preserved pineapples, etc.

## JAMAICA. (BRITISH.)

Population 831,383. (Census of 1911.)

(Of whom about 15,000 are white.)

## CAPITAL, KINGSTON.

The most important of the British West India Islands, situated 90 miles south of Cuba. Its length is 145 miles, the greatest width 50 miles. Area 4,207 square miles, of which 940,126 acres, or over 1,300 square miles are devoted to tillage or pasture, 31,160 acres of this to sugar cane, 20,023 acres to coffee, 85,468 acres to bananas and 19,995 to cocoanut palms. It is traversed by mountains in all directions, the highest of which (Blue Mountain) reaches an elevation of 7,360 feet. There are numerous other peaks varying from 2,000 to 6,000 feet. The census of 1911 gave the population of the island as 831,383; 15,605 being white; 630,181 negroes; 163,201 with an admixture of negro blood; 17,380 East Indian; 2,111 Chinese and 2,905 of races not specified.

The soil in the valleys is very productive and vegetation extremely luxuriant. Most of the staple products of tropical climates are grown. Jamaica is famous for its coffee. The 1913 reports show exports of 6,517,607 pounds. In addition to sugar and bananas, which are the chief products, dye-woods, coconuts, coffee, cocoa, ginger and other spices, rum, fruits, etc., are largely exported. In 1913 the production of sugar was 4,891 tons, valued at \$243,551; rum, 953,677 gallons, value about \$492,454; bananas 11,597,881 bunches, value \$4,802,826. The total exports amounted to \$11,810,306. 57.4 per cent went to the United States. Jamaica is not a manufacturing country, almost all the manufactured goods being imported, chiefly from the United States and England. The value of imports in 1913, consisting chiefly of provisions and manufactured goods, was \$13,789,987. The United States supplied 46.7 per cent and Great Britain 38.3 per cent. The imports of live animals, provisions and beverages, of all kinds, had a value of \$5,950,931; the textiles imported amounted to \$2,425,412; the metal goods to \$1,549,743; raw materials to \$592,071 and other miscellaneous imports to \$3,471,830. The imports from the United States in the year ending June 30th, 1915, were \$4,564,703, the exports to the United States \$5,561,585. There is an abundance of timber, including all tropical hard woods; there are some copper mines. The fisheries are not of great commercial importance.

**ST. THOMAS. (DANISH.)****Population \*10,537.**

(About 500 white).

**CAPITAL, CHARLOTTE AMALIE.**

Thirty-eight miles east of Porto Rico. Length 13 miles, breadth about 3 miles. Surface rugged and elevated at the centre. The island is the original home and the headquarters of the manufacture of bay rum, which is the chief industry. It is exported to all parts of the world. Large trade in panama hats. The imports are principally foodstuffs and manufactured goods. There is a magnificent harbor at Charlotte Amalie, which is a favorite coaling station. Goods were imported from the United States to the value of \$703,354 in the year ending June 30th, 1915, and exports to the United States were \$350,822.

**TRINIDAD. (BRITISH.)****Population about 333,552 (Census of 1911).**

(About 5,000 white).

**CAPITAL, PORT OF SPAIN.**

The most southerly of the British West India Islands, 7 miles northeast of the coast of Venezuela, and about ten degrees north of the equator. Length, 50 miles from north to south; average breadth, 30 miles; area, 1,754 square miles. The surface is diversified, embracing mountain chains, hills, plains, and valleys. The soil is generally fertile; the climate hot and moist, but generally healthful. The products are sugar, molasses, rum, cocoa, tobacco, petroleum fruits, etc. Pitch Lake, near Labrea on the west coast, yields annually over 100,000 tons of asphalt. The commerce with the United States is large. Trinidad imported therefrom, in the year ending June 30th, 1915, goods valued at \$3,257,188, and sent goods to the United States worth \$5,533,558.

## MONTHLY AND WEEKLY PUBLICATIONS OF GENERAL CIRCULATION.

---

### **SPECIAL NOTE.**

---

In dividing publications of **general circulation** into classes or groups, it is not possible to meet the ideas of every publisher or every advertiser.

It must be borne in mind that some publications have more than one subject to which they devote special attention. Because of this there is apt to be some difference of opinion concerning the best classification of the publications that appear in the Magazine, the Women's, or the Mail Order list.

If the publication sought has general circulation, as distinguished from special or class circulation, it can as a rule be found in one of the three lists in this group, if it is not in the one first consulted.

## MAGAZINES, WOMEN'S PUBLICATIONS, AND MAIL ORDER JOURNALS.

See Special Note on Preceding Page.

Mid-Year Supplement

*to the*

AMERICAN  
NEWSPAPER ANNUAL  
& DIRECTORY

1917

A NEW FEATURE  
*of the*  
American Newspaper Annual  
and Directory

---

**T**HE American Newspaper Annual and Directory is published to supply the need of our own organization for information as to what publications exist in the country, where they are, what they are like, and what is happening to them. Without this data we could not do business.

The book serves many people—publishers, advertisers, advertising agents, the Government, business men, libraries, and those who have use for statistical information—but our own need was the first consideration in gathering this data. It has been from the first an expensive undertaking. The recent elimination of advertising and the loss of income resulting therefrom have, of course, made it much more so.

As publishers of the American Newspaper Annual and Directory we have always taken our task seriously—the task of describing and setting forth in detail the vast publishing interest of the country. When they have sensed the magnitude of this undertaking, some advertisers, and even some publishers, have suggested that the Annual should cover only the largest publications. This has always seemed to us a very superficial suggestion. Where and by whom could any line be drawn? Small papers often possess greater relative importance than large ones, and the trade and class publications certainly have definite value. The enormous publishing industry of the United States is carried on in more than 10,000 different cities and towns; for a directory to omit any legitimate factor would seem to us misleading and inequitable.

The publication of the A. & D. is, moreover, a “Keeping Everlastingly At It” proposition. The whole work stands in type and is revised from day to day as the numerous changes are discovered and verified.

It has long been our habit to advise the various departments of our office concerning some of these changes; it has now occurred to us to share the knowledge with those who purchase the book.

We accordingly issue herewith a list of material changes in the publications of the country for the first half of 1917. These include only such as tend to interest advertisers and publishers—changes of name, issue, consolidations, suspensions and removals. No reference is made to management, size, circulation, price, politics, street address or other changes which already number, perhaps, 15,000 during the first half of this year.

Of course, many of the papers in this supplement may be still further changed, some of the deceased publications may rise again, some of those removed go back home, some of the consolidated ones be “unscrambled,” and some, both old and new, may not live to see the light of 1918, but all are correct according to the latest direct information we have today.

We also include a list of all new papers received up to the 10th of May and found worthy of insertion in the next issue of the Annual.

It will be noted that these pages are the same size as those of the Annual and Directory and that they are printed only on one side of the sheet; this is in order that they may be cut apart if desired and the information placed wherever it is considered most appropriate.

This supplement is being sent without charge to those who have purchased the 1917 volume and it will also be included with copies of the book sent out during the remainder of the year.

As stated above, this is an experiment on our part and we shall be interested to learn how the patrons of the book regard our attempt to extend and improve the service which the volume seeks to render them.

A handwritten signature in cursive script, appearing to read "A. M. Johnson". The signature is written in dark ink and is positioned centrally above the publisher information.

Publishers,

American Newspaper Annual and Directory.

*Philadelphia, June 30, 1917.*

## ALABAMA

BIRMINGHAM—Birmingham College Reporter, now issued weekly (Wed.).  
 HEADLAND—Henry Co. Standard—name changed to Wiregrass Farmer.
