

N. W. Ayer & Son's  
AMERICAN  
NEWSPAPER ANNUAL  
& DIRECTORY

*A Catalogue of American Newspapers*

---

A CAREFULLY PREPARED LIST of newspapers and periodicals published in the United States, Territories, and Dominion of Canada, Cuba and the West Indian Islands, with valuable information regarding their circulation, issue, date of establishment, political or other distinctive features, names of editors and publishers, and street addresses in cities of fifty thousand inhabitants and upward, together with the population of the counties and places in which the papers are published.

A SEPARATE LIST of all daily newspapers in the United States and its possessions and the Dominion of Canada which are published continuously throughout the year, indicating by distinguishing marks those which issue Weekly or Sunday editions.

LISTS of monthly and weekly publications of general circulation, religious and agricultural publications, the various class and trade publications, newspapers printed in foreign languages, co-operative newspaper lists, etc.

---

*A DESCRIPTION of every place in the United States and Canada in which a newspaper is published, including railroad, telegraph, express and banking facilities, also state, territory or province, giving the location, character of surface and soil, chief products and manufactures, forming a valuable guide to the judicious placing of any line of advertising. Seventy-four maps of the United States and its possessions, the Canadian provinces and the West Indian Islands, carefully revised and corrected to date.*

# NEW YORK

Population 9,687,744

STATE CAPITAL, ALBANY

NEW YORK is bounded on the north and northwest by Lake Ontario and the provinces of Ontario and Quebec, east by Vermont, Massachusetts, Connecticut, and the Atlantic Ocean, south by the Atlantic Ocean, New Jersey, and Pennsylvania, and west and northwest by Pennsylvania and Lake Erie. Its greatest length from north to south is 312 miles; its greatest breadth 412 miles; land area, 47,620 square miles. The surface is exceedingly diversified.

The greater portion of the soil is arable, much of it exceedingly fertile. The dairy industry is of immense value. The value of its products is exceeded by only one state, Wisconsin. There were 1,589,000 dairy cows in the state in 1917, besides 939,000 other cattle. Delaware and St. Lawrence are the leading counties in this important industry, each turning out about six per cent. of the state's total, with Delaware a little in the lead. The reports of the State Department of Agriculture for a recent year show that in addition to the milk and milk products used on the farms and delivered direct to consumers, the state dairies shipped out 746,555,809 quarts of milk. Its creameries made 42,671,688 pounds of butter. 112,555,404 pounds of cheese and 68,838,289 pounds of condensed milk were also produced. Casein and other milk products are also manufactured in large quantities. The many large cities make hay a valuable product, and more land is devoted to this crop than in any other state. The 1916 crop was 7,290,000 tons, its value, \$86,751,000. New York was first in acreage, production and value. Immense crops of cereals are grown in the valley lands, which also produce an abundance of grapes and other fruit; hops in Otsego, Madison, Chautauqua and Oneida counties; tobacco is grown in several counties, and corn generally throughout the state. New York holds second place in buckwheat, this state and Pennsylvania producing nearly three-fourths of the country's total; first in onions and first in apples. The production of the principal cereals in 1916 (a year in which all grain crops were short), in bushels, was for corn, 16,200,000; buckwheat, 3,480,000; wheat, 9,030,000; oats, 31,356,000; barley, 1,887,000, and rye, 2,718,000. Potatoes yielded 22,400,000 bushels, onions (1915), 4,534,887 bushels. In the neighborhood of the large cities market gardening is extensively carried on. The fruit industry is of great value. New York's 1916 apple crop was 12,600,000 barrels, about a fifth of the country's total. The census of 1910 credited New York with 35,603,897 grape vines. They produced 253,006,361 pounds of grapes, having a value of \$3,961,677. The value of other fruit crops in the same year (1909) was: Apples, \$13,343,023; peaches, \$2,014,088; pears, \$1,418,218; plums, \$519,192; cherries, \$544,508; apricots and nectarines, \$14,490; quinces, \$135,345, and small fruits, \$2,875,495, a total of \$24,826,041.

The state is well wooded and the timber varied and excellent. Its leading mineral is iron ore, of which the mines, especially those of the Champlain and Adirondack regions, yield abundantly. Galena is found in large quantities in St. Lawrence and other counties. Building stone is abundant, consisting of granite, white and colored marbles, of which those of Westchester and St. Lawrence counties are the most important; Potsdam and Medina sandstones and gray and blue limestones; also fine brick clay. It has large quarries of slate and stone for flagging. There are extensive deposits of hydraulic cement and gypsum, the former being largely produced at Rondout, Manlius, and Akron, the latter near Syracuse. A vast amount of salt is made, chiefly from the springs of Onondaga county. The 1914 output was 10,389,314 barrels, an output exceeded by only one state. In recent years new and promising salt fields have been developed in Wyoming and Genesee counties. The 1914 graphite production was 10,455,139 pounds, value \$698,800. There are natural gas wells in several counties, with an output value in 1914 at \$2,600,352; and petroleum is found near Olean, Wellsville and other places. The 1914 production of petroleum was 938,974 barrels. Many other minerals are found. New York has no coal.

The state ranks first in the value of its manufactures. The industries cover almost the whole range of business and are well distributed over the state. The value of the manufactured goods in 1909 was \$3,369,490,000, over half of which (\$2,029,693,000) was credited to the five boroughs of "Greater New York." The fishing industry is large and valuable, the menhaden and oyster fisheries being the most productive. Transportation facilities in New York are of the best. Railroads penetrate everywhere, the total mileage in the state being 8,416 miles. The Erie Canal connects the great lakes with the Hudson river, and a new barge canal, costing \$101,000,000, is under construction, to take the place of the Erie Canal when completed. The main canal will run from the Niagara river to the Hudson river, with branches to Lake Ontario, and from the Hudson to Lake Champlain. It will have a depth of twelve feet, and the locks will be fifty-five feet wide and three hundred feet long, permitting vessels of 2,500 tons to pass, without transferring cargo, from any of the lake ports to the ocean. Much of its length is completed and in use. The state has appropriated \$50,000,000 to be expended at the rate of \$5,000,000 per year, together with a like sum from the counties, in improving the roads. The state ranked third in 1909, with an improved road mileage of 12,787. This is being increased every year.

The number of newspapers and periodicals published in New York is 2,148, including 210 daily, 7 three times a week, 42 semi-weekly, 1,029 weekly, 1 three times a month, 17 fortnightly, 47 semi-monthly, 1 twenty times a year, 1 twelve times during the college year, 689 monthly, 1 every 40 days, 1 nine times a year, 1 seven times a year, 1 five times a year, 25 bi-monthly, 3 four times during the college year and 72 quarterly. The places of publication number 497, of which 63, designated by a dagger (†), are county seats.

<p><b>NEW YORK</b> †, pop. 5,047,221 (HI7&amp;N17); <b>NEW YORK Co. (S. E.)</b>, pop. 2,137,747 and <b>BRONX Co. (S. E.)</b>, pop. 615,600. The city is divided into five boroughs:—Manhattan Borough, 2,137,747; Bronx Borough, 615,600. Brooklyn Borough, 1,798,613; Queen's Borough, 396,727; Richmond Borough, 98,634. (New York and Bronx Boroughs are served by the New York post-office, and only the publications in these two boroughs are listed here. Publications of Brooklyn Borough are entered at the Brooklyn post-office and will be found under Brooklyn. There are numerous post-offices in Queen's Borough and the publications issued therein will be found under their proper post-offices. Richmond Borough publications are served by the Staten Island post-office and will be found under Staten Island). On Manhattan Island at m. of Hudson R., and on L. I. Sound (or East R.), and New York Bay. Term. of 14 important R.Rs. running to all parts of the country, including the Erie; N. Y. Cent.; Penna.; W. Shore; Cent. R. R. of N. J., etc. Tel. Exp. Banks. Federal Reserve Bank. Has one of the finest harbors in the world, and is the commercial metropolis of the United States. The foreign commerce of New York is very large, comprising more than half the entire import and export trade of the nation. The tonnage entered in the port for the fiscal year ending in 1915 was 12,647,696 tons, and there were cleared 12,162,347 tons, not including coastwise trade. Its domestic commerce is still greater, a considerable portion of the country drawing its supplies from this city. Its manufactures are little less important, and have grown rapidly of recent years, there being over 20,000 manufacturing establishments. Some few of the larger are furniture, clothing, machinery, sugar refining, tobacco and cigars, printing and publishing, lard refining, malt liquors, musical instruments, etc. The total value of the goods manufactured in 1909 in Greater New York was \$2,029,693,000, sixty per cent. of the state's total production. Of this New York City proper as generally understood, consisting of Manhattan and Bronx Boroughs, produced \$1,431,088,000. Its educational and other institutions include Columbia University, University of the City of New York, Cooper Institute, Colleges of Medicine, Law, Theology, etc.; Astor, Lenox, Mercantile, and other libraries; Metropolitan Museum of Art, Museum of Natural History, and many others.</p>

STATEN ISLAND † (Richmond Borough, City of New York), pop. 98,634 (G 17); RICHMOND Co. (S.), pop. 98,634. Staten Island Rapid Transit R.R. Tel. Exp. Banks. Staten Island is the southernmost part of the State of New York and forms Richmond County. It forms part of the city of New York, under the name of Richmond Borough, and is about five miles from New York (Manhattan) by water, connected by a municipal ferry. It is separated from Brooklyn by the Narrows, and from New Jersey by Staten Island Sound and the Kill van Kull, with ferries to Elizabethport and Perth Amboy. It is about 13 miles long and 7 miles wide and has an area of 63 square miles. The surface is rolling, rising to a height of several hundred feet with much good farming land, many shore and fishing resorts, numerous manufactures, especially boat and ship yards. Many thousands of persons engaged in business in New York reside here.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

AN INDIANA PUBLISHER SAYS WHAT HE  
THINKS ABOUT IT:—

I am delighted to order one of your new directories. I would not undertake to do business without it. Your Annual covers the field thoroughly, completely, accurately and satisfactorily.

# NORTH CAROLINA

Population \*2,339,452  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, RALEIGH

NORTH CAROLINA is bounded north by Virginia, east and southeast by the Atlantic Ocean, south by South Carolina and Georgia, and west by Tennessee. Its extreme length from east to west is 490 miles; extreme breadth, 185 miles; land area, 48,580 square miles. The surface is very varied. For nearly 100 miles inland from the coast the country is level, marshy, and swampy; soil sandy but very fertile. It is estimated that there are nearly 3,000,000 acres of swamps in this region, which is known as the "Tidewater" section. Next is the middle or "Coastal Plain" section, with varied surface and fine soil. West of this is the "Piedmont" section, a fine farming region, producing North Carolina's staples, cotton and tobacco, in abundance, as well as large crops of wheat and other grain. It is a land of fertile valleys and gently sloping hills, increasing in altitude until they reach the "Mountain" region in the west. Some of the peaks in the Black Mountains and the Blue Ridge attain an elevation of from 5,000 to 6,000 feet, the highest land east of the Rocky Mountains. This region contains good grazing land, with much hard timber; and stock raising is largely carried on. It is a country of fine pastures and live stock of all kinds thrive. Grain and fruit, especially apples, are grown abundantly. The scenery is remarkably beautiful, and the climate is such that it is becoming a popular health and pleasure resort. In the coast region the river bottoms and reclaimed swamp lands are very fertile, and here cotton, corn, honey, beeswax, apples, peaches, and pears abound. Frost is infrequent, and the rainfall averages 60 inches. The Scuppernong and Catawba grapes are native here; cranberries and vegetables of all kinds are extensively produced, melons being especially fine. The lumber industries and fisheries are very valuable. Drainage work is being energetically prosecuted in this region, and many thousands of acres of swamp lands are annually brought under the plow. The pine region is being settled as the timber is cut off, but the forests are still extensive, and a large trade is done in timber, tar, and turpentine.

Cotton is grown chiefly in the southern and central counties. The middle section is adapted to the growth of cereals, tobacco, and cotton; sweet potatoes are a leading staple. In this section are a large number of cotton mills and woodworking plants. The state is excelled only by Kentucky in its tobacco crop, the production in 1916 reaching 176,000,000 pounds. In the truck growing industry she is among the first. The grain crops in 1916 were corn, 53,650,000 bushels; wheat, 9,975,000 bushels; oats, 6,562,000 bushels; rice, rye and buckwheat are grown to some extent. Potatoes produced 3,230,000 bushels; sweet potatoes 9,309,000 bushels, the largest crop in the country. Cotton produced 646,000 bales.

The principal manufactures are furniture, lumber, tar, turpentine, rosin, cotton and woolen goods, tobacco, zinc (smelted and rolled), carriages. The state takes fourth place among the southern states in lumber. The manufacture of cotton goods is very large and is constantly increasing, there being a greater number of cotton mills than in any other state. In the number of furniture factories North Carolina is exceeded by only one state. The 1910 census gives the value of manufactures for 1909 as \$216,656,000, the product of 4,931 factories. The state exports coastwise and to foreign ports large amounts of lumber, cotton, tobacco, flour, and fish.

North Carolina has a large variety of minerals. It leads all the states in the production of mica, of which it had an output in 1914 of \$195,270. Gold is mined to some extent in Cabarrus, Mecklenburg, Lincoln and Rowan counties, the 1915 yield being worth \$131,141, and there is a branch of the United States Mint at Charlotte. Silver, lead and zinc exist, and there is a valuable mine of copper in Ashe county; barytes, corundum and many other minerals, and some precious stones are found. Coal and iron are found; the coal is mostly bituminous, and is contained in two fields, one in Stokes and Rockingham counties, known as the Dan River field, the other in Chatham and Moore counties, known as the Deep River field. The region from the Roanoke and Cape Fear rivers westward to Cherokee county contains rich beds of magnetic and hematite ores; the "Cranberry" mine, in Mitchell county, yields the purest magnetic ore yet found in the United States, producing a remarkably strong and tenacious iron. Clay products make up about half of the total value of the state's mineral wealth, granite two-thirds of the remainder. The granite quarries in Surry and Rowan counties produce immense quantities of stone of high quality.

There are abundant transportation facilities by both water routes and railroads; and the latter are constantly extending. Particular attention is paid to educational matters, and over a thousand school houses were built in the three years preceding 1911.

The number of newspapers and periodicals published in North Carolina is 297, including 32 daily, 1 three times a week, 29 semi-weekly, 196 weekly, 1 fortnightly, 3 semi-monthly, 27 monthly and 8 quarterly. The places of publication number 167, of which 82, designated by a dagger (†), are county seats.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

SOME COMMENT BY A MAGAZINE PUBLISHER:—

We are constantly using this book for reference and it has proved an invaluable source of information for many departments of our organization.

# NORTH DAKOTA

Population 636,994

STATE CAPITAL, BISMARCK

NORTH DAKOTA is bounded north by Manitoba and Saskatchewan, south by South Dakota, east by Minnesota, and west by Montana. Length, east to west, about 355 miles, width, about 200 miles. Land area about 70,552 square miles. The Missouri river furnishes navigation for boats of three to six hundred tons burden. The Red River of the North, also navigable, drains the great wheat valley on its eastern border. That portion of the state east of the Missouri river is mostly rolling prairie; the soil on the Missouri slope being a black, sandy loam, with clay subsoil; while in the Red River valley it is a vegetable deposit of unsurpassed richness. West of the Missouri river the land is more broken, with stretches of excellent farming and grazing lands along the line of the Northern Pacific Railroad. In the north is a group of hills of moderate elevation known as the Turtle Mountains. In the southwest is a district of eroded clay hills, called the "Bad Lands," generally a good grazing region. Although great extremes of temperature are recorded, the Weather Bureau station at Bismarck registering 106° in July and -44° in January, the climate is healthful and the soil productive.

The total area of tillable land is about 40,000,000 acres. There are 64,442 farms, averaging 888 acres. North Dakota's live stock, next to its grain crops, is the state's chief product. In 1917 there were 1,039,000 cattle in the state, of which 410,000 were used for dairy purposes; 825,000 horses, 9,000 mules, 250,000 sheep and 650,000 hogs. Creameries are numerous, and the dairy interests are large and growing larger, the products for 1909 having a value of about \$4,000,000. The northern and central parts are especially adapted to the growing of wheat and other cereals, potatoes, vegetables and the earlier varieties of corn. The Red River valley is not excelled on this continent for wheat production. The chief products of the state are wheat, oats, barley, flax, corn, potatoes, dairy products, butter, cheese, and wool. North Dakota, in 1915, stood first in production of flaxseed; first in wheat, first in barley and fifth in oats. The 1915 crop of wheat was 151,970,000 bushels; oats produced 98,000,000 bushels; barley, 44,800,000 bushels; flaxseed, 6,534,000 bushels. These figures were reduced in the unfavorable season of 1916 to wheat, 39,325,000; oats, 53,750,000; barley, 26,735,000. Flaxseed increased to 8,137,000. While grain is still the greatest crop, other crops are claiming much attention, and diversified farming is becoming more common than formerly.

The rainfall is not great, but sufficient in ordinary years. The Missouri river and all small streams and lakes are lined with timber. Mineral products are natural gas, cement rock, lignite coal, brick and pottery clays, the last being found chiefly in Morton and Stark counties.

The number of newspapers and periodicals published in North Dakota is 881, including 11 daily, 2 semi-weekly, 353 weekly, 3 semi-monthly, 11 monthly and 1 quarterly. The places of publication number 291, of which 53, designated by a dagger (†), are county seats.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

A COMMENT FROM THE MISSISSIPPI VALLEY:—

The *only* real newspaper directory  
published.

## OHIO

Population **5,026,898**  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, COLUMBUS

OHIO is bounded north by Michigan and Lake Erie, east by Pennsylvania and West Virginia, south by West Virginia and Kentucky, and west by Indiana; greatest length from east to west 225 miles; greatest breadth 200 miles; land area, 40,760 square miles, of which less than 700 square miles is waste land. The general character of the surface is that of a plateau of about 800 to 1,000 feet above sea level. The most prominent feature is the great divide which separates the drainage of Lake Erie from that of the Ohio river. This passes diagonally across the state from Trumbull county in the northeast to Mercer and Darke counties in the west. Its average height is about 600 feet above the lake; and from it the surface slopes gradually northward toward the lake and southward toward the river. The rivers and streams have excavated deep valleys, which give to the surface its distinctive undulating or rolling character.

The soil is universally fertile; and Ohio holds a leading position in every branch of agriculture. The uplands are well suited to wheat, the southern slope of the watershed to grain generally, the northern slope to grazing and dairying, and the northeast section or Western Reserve especially so. The bottom lands of the Miami, Muskingum, and Scioto rivers are very rich in corn; the Western Reserve and Miami regions are famous for apples. Dairy products are also of great value. There were in 1917, 2,994,000 sheep in the state; the wool clip was 13,650,000 pounds. There were also 892,000 horses; 950,000 dairy cows, 863,000 other cattle; 3,527,000 hogs. Flax and flaxseed are staple products, and tobacco is largely grown in most of the southern counties. The production of the chief crops in 1916 (a year of short grain and potato crops), in bushels, was corn, 115,762,000; wheat, 20,250,000; oats, 48,076,000; potatoes, 6,300,000; hay, 4,867,000 tons. Some barley, rye and buckwheat are also grown. Apples made 2,867,000 barrels. Wheat, potatoes and apples were only about half the average. The other crops, except hay, were much reduced. Tobacco, in the same year, 95,000,000 pounds. Ohio stands fourth among the states in production of tobacco. Cincinnati is one of the country's largest tobacco markets. Beet sugar to the amount of 32,100 tons was made in 1915. Ohio is one of the leading states in poultry and poultry products.

The virgin forests have largely disappeared, and while about one-fifth of the state's area is forest land, chiefly second growth, it is not of high value commercially, and the numerous woodworking industries are only partially supplied by the native woods. The fishing interests of Lake Erie are important. The manufactures of the state are very numerous and valuable, and Ohio stands fifth among the states in the annual output of manufactured goods. Iron, pork products, farm implements, clothing, flour and grist mill products, lumber, pottery (in which Ohio leads all the states) and malt and distilled liquors are among the most important.

In mineral wealth Ohio produced in 1914 a value of \$101,661,384. Coal (bituminous) underlies 12,000 square miles. The production in 1914 was 18,843,115 tons; iron ore is abundant, especially in the south; salt is largely produced (5,482,836 barrels in 1914); lime and cement are other important products. Good grindstones and building stones are obtained at Amherst, Berea (Berea grit), Buena Vista, and Independence. There are excellent qualities of limestone and sandstone for building, especially at Massillon and Dayton. Marl deposits abound in the Maumee valley and other localities. There are good pottery and fire clays, the fire bricks of Mineral Point being among the best in the United States. Ohio stood first among the states in the value of clay products in 1914, with a value of \$37,168,768. Cleveland, Massillon, Youngstown, and the towns on the Ohio river are the chief seats of the iron manufacture, which includes pig, forged, and rolled; iron castings and sheet iron, rails, Bessemer steel rails, etc. The development of the wonderfully productive oil fields (7,900,000 barrels in 1915) and the discoveries of natural gas in apparently inexhaustible quantities at many places in the state have been of incalculable value to its industrial interests. The railroad facilities are rapidly increasing, and Ohio has a network of well constructed and busy transportation lines. Ohio had in 1909, 24,106 miles of good roads, being a pretty close second to Indiana, which occupied first place with 24,955 miles.

The number of newspapers and periodicals published in Ohio is 1,091, including 171 daily, 1 four times a week, 5 three times a week, 42 semi-weekly, 656 weekly, 12 fortnightly, 11 semi-monthly, 162 monthly, 5 bi-monthly, 1 four times during the college year and 25 quarterly. The places of publication number 418, of which 88, designated by a dagger (†), are county seats.

Good water power and several mills. One of the largest straw board factories in the United States; also a large sweet corn canning establishment, two pork packing houses, cream mush canning factory, buggy and rubber tire works, etc. One of the richest farming districts of the state, broom and Indian corn being the leading products. Derives its name from a large circular earthwork ascribed to the mound builders.

<b>CLARKSVILLE</b> , pop. 425 (E 12); CLINTON Co. (S.W.), pop. 23,680. 35 m. N.E. of Cincinnati. Cleve., Akron & Cin. R.R. Tel. Exp. Bank. Flour mill, chair factory, canning factories.						
Herald	Tuesday	1898	13	13 1/2 x 19	.50	600
C. A. HOWLAND, Editor; HERALD PRINTING COMPANY, Publishers.						
<b>CLEVELAND</b> †, pop. 639,431 (N 3); CUYAHOGA Co. (N.E.), pop. *700,000. On S. shore of L. Erie at mouth of Cuyahoga R., 150 m. N.W. of Pittsburg, Pa. N. Y. Cent.; Cleve., Cin., Chic. & St. L.; N. Y., Chic. & St. L.; and four other railroads. Tel. Exp. Banks. Federal Reserve Bank. Excellent harbor of refuge and canal connection with the Ohio river. Principal port on Lake Erie, with a large commerce; extensive shipping trade in iron ore, coal and lumber. The total value of the lake freight handled in this port is estimated at nearly one billion dollars yearly. Pork packing interests are important, and the petroleum oil refining works are claimed to be the largest in the world. Headquarters of the Standard Oil Company. Iron interest is large, there being 150 iron and steel manufactories, employing about 18,000 hands. In 1916, 38,426,893 tons of iron ore were received in the Cleveland district, valued at over \$125,000,000, and the value of the iron products manufactured in Cleveland alone was \$110,000,000. Also five large ship yards extensively engaged in building wooden and steel vessels. Its institutions include 120 public schools, 22 colleges, 3 universities, 32 hospitals, 44 public libraries, etc. Two immense viaducts extend across the gulf, which divides the city, and are among the finest and costliest works of the kind in the United States. The 2,500 manufacturing industries employ 125,000 wage earners and the annual value of the products is about \$375,000,000.

# OKLAHOMA

Population **\*2,026,534**  
(U. S. Census Bureau estimate for 1914)

## STATE CAPITAL, OKLAHOMA CITY

OKLAHOMA is bounded on the north by Kansas, on the east by Arkansas and Missouri, and on the south and west by Texas. Land area, 69,414 square miles. The surface is generally rolling prairie, with abundant timber in the eastern part. The Arkansas and Red rivers are navigable for boats of light draft for some distance into the state.

The land is generally tillable and the principal occupation of the people is agriculture. In 1910 Oklahoma had 189,438 farms, of an average area of 152 acres, and an average value of \$3,888. Corn is largely grown, and the area devoted to it is increasing. The 1916 crops included 53,325,000 bushels of corn, 29,585,000 bushels of wheat; 15,080,000 of oats; 1,802,000 bushels of potatoes; 835,000 bales of cotton were grown. All of these, except cotton, were far below the production for 1915, 1916 being a year of short crops in all the western states. Broom corn, kaffir corn and barley are also large and profitable crops. Hay and fruit of excellent quality are grown in considerable quantities. The production of alfalfa is increasing. The wealth of summer forage crops which may be grown and the abundant pasturage during the winter make the production of all classes of live stock very profitable. The value of domestic animals, poultry and bees in 1910 was \$144,276,000, an increase of over \$48,000,000 in ten years. The U. S. Department of Agriculture reported for January 1st, 1917, 535,000 dairy cows and 1,222,000 other cattle. Beef cattle were the only live stock showing a decrease in value in the ten years following the 1900 census, the decrease being due to the loss in range cattle caused by the increasing number of small farms and the consequent diminution of the open ranges. There were 743,000 horses in 1917, 276,000 mules, 1,372,000 swine and 104,000 sheep. Poultry of all kinds had a value in 1910 of \$3,714,000, almost treble the value of the poultry in 1900.

Coal is abundant, and the mines produced 3,988,613 tons in 1914. Limestone, gypsum, and good building stone are plentiful. Oklahoma is second only to California in petroleum production, its wells producing in 1914 80,000,000 barrels, more than a quarter of the country's total. The natural gas product was 78 billion feet. Among other minerals were lead, zinc, asphalt and silver.

Large shipments of flour are made to other states, after supplying home consumption. Cottonseed oil mills use the cottonseed produced on the farms, and large numbers of cattle are fed on the meal and hulls. Oklahoma, however, is an agricultural rather than a manufacturing state, although as the population grows, the number of factories established to supply the local needs and to use the local raw materials is constantly increasing. This increase has been considerable in the past few years. The total value of manufactured products, which was \$3,133,000 in 1899, had grown to \$53,682,000 in 1909, the year covered by the statistics of the 1910 census. In that year the state had 2,310 manufacturing establishments, employing 18,034 persons, and the value added by manufacture was \$19,529,000. The raw material used cost \$34,153,000 and the amount paid in wages to 13,143 wage earners was \$7,240,000 and in salaries \$2,045,000. The chief manufactures were flour and grist mill products, \$19,144,000; cottonseed oil and cake, \$5,187,000; lumber and its products, \$4,439,000.

The number of newspapers and periodicals published in Oklahoma is 579, including 60 daily, 3 semi-weekly, 481 weekly, 5 semi-monthly, 25 monthly and 2 quarterly. The places of publication number 367, of which 75, designated by a dagger (†), are county seats.

**THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY**

**FROM A VERY WELL-KNOWN ADVERTISER:—**

The fact that it has been kept up to date makes the work particularly valuable for reference purposes. We hardly know how we could get along without having this book available.

# OREGON

Population **753,239**  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, SALEM

OREGON is bounded north by Washington, east by Idaho, south by Nevada and California, and west by the Pacific Ocean; average length from east to west, about 300 miles; average breadth, about 260 miles; land area, 94,560 square miles. It is divided unequally by the Cascade Mountains. East of this range the surface is generally undulating table land, with high cone-like hills and deep canyons. Between the Cascade and Coast ranges is the Willamette valley, 60 miles wide by 150 miles long and exceedingly fertile; from the Coast range westward the surface is mountainous, hilly, and broken. The principal industries of this region are dairying and fruit growing, but it is well adapted to wool growing, stock raising, and the growth of winter wheat, barley, oats, and hay. The eastern portion does better as a stock raising region, but good wheat is also grown there, especially in the northern counties, and several irrigation projects have been started to develop the arid portions of this region, the soil of which needs only water to make it produce abundantly. The climate is salubrious. In the extreme west, between the coast range and the ocean, the annual rainfall is very heavy, being about 70 to 80 inches; in the central and eastern portions it ranges from normal to scanty.

In the Willamette valley wheat, corn, hops, tobacco, wool, flax, fruit, linseed, dairy products, and potatoes are produced in large quantities. Many of the trees are gigantic in size, and afford excellent lumber. The Rogue River valley, on account of its mild climate, is well adapted for raising fruits, especially grapes, and large quantities are shipped from there annually. The 1916 crop of apples was 1,285,000 barrels. The growing and drying of prunes form an important industry. Other important crops are strawberries, peaches, pears, cherries and plums. The chief grain crops are wheat, the 1916 crop being 19,550,000 bushels; oats, 17,280,000 bushels, and barley, 5,390,000 bushels. Some corn and rye are also grown. Potatoes produced 8,250,000 bushels. The live stock product is large, there being about 222,000 dairy cows, 577,000 other cattle and 2,484,000 sheep in the state. The wool clip of 1916 was 13,200,000 pounds.

The manufactures comprise lumber, the large Douglas fir affording the best masts and spars in the world; leather, boots and shoes, saddlery, milling and smelting of ores, carriages, furniture, liquors, linseed oil, etc. The lumber industries are of immense value. The 1909 output included 1,898,995,000 feet of rough lumber, over 161,512,000 lath and 293,644,000 shingles. The trees are chiefly Douglas fir, western hemlock, spruce and pine of various species, hardwoods forming a very small portion, not more than three per cent. The value of manufactured goods in 1909 was \$93,005,000, an increase of 67.5 per cent. over 1899. The net value of manufactures, excluding the cost of the materials, was \$42,453,000. The wage earners numbered 23,750 and salaried employes 3,473. The amount paid as wages was \$19,902,000, for salaries, \$4,047,000. The largest industry, its output comprising nearly one-third of the whole in value, is the lumber industry in its various branches. Other important manufactures are flour and grist mill products and meat packing. Salmon canning, especially along the Columbia, is a great industry.

Gold and silver are produced, the gold in 1915 being valued at \$1,771,618; copper, lead, platinum, cement rock, clay, glass sand, granite, marble, coal, etc., are also found. Navigable water lies on three sides of the state, the Snake River on the east, the Columbia River on the north and the Pacific Ocean on the west, and in addition to the mouth of the Columbia, which is one of the finest harbors in the world, there are several inlets along the coast.

The number of newspapers and periodicals published in Oregon is 297, including 93 daily, 1 three times a week, 9 semi-weekly, 219 weekly, 4 semi-monthly, 29 monthly, 1 six times a year and 1 quarterly. The places of publication number 159, of which 37, designated by a dagger (†), are county seats.

# PENNSYLVANIA

**Population \*8,245,967**  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, HARRISBURG

PENNSYLVANIA is bounded north by New York and Lake Erie, east by New York and New Jersey, south by Delaware, Maryland, and West Virginia, and west by West Virginia and Ohio. Its greatest length from east to west is about 302 miles; its greatest breadth about 175 miles; mean length 280 miles; mean breadth 158 miles; land area, 44,882 square miles. The surface is exceedingly varied, chiefly level or slightly undulating in the southeast, hilly and mountainous in the interior, and generally rolling or broken in the west. A series of parallel ridges, members of the Appalachian system, each with a distinct name, traverse the state from northeast to southwest. The most eastern of these is the South Mountain, an extension of the Blue Ridge, and the western and highest the Alleghany, from which the surface slopes generally toward Ohio.

The soil of the valleys and plains is generally fertile, and some of it exceedingly so. Lancaster county, and some of the counties bordering on the Ohio river, are the most productive. The state excels in dairy and market garden produce and all the agricultural staples of the Northern states. In 1916, 28,125,000 bushels of wheat, 35,030,000 bushels of oats, 56,550,000 bushels of corn, 3,780,000 bushels of buckwheat (in which this state stands first); 4,420,000 bushels of rye, some barley, 19,040,000 bushels of potatoes and 5,208,000 tons of hay were grown. The tobacco crop in 1916 was 49,096,000 pounds. Lancaster and York counties are the chief seats of this industry. Lancaster yielding more than any other county in the United States. Apples produced 6,207,000 barrels. The numerous large cities make dairying a popular and profitable industry and the total yearly milk production from the state's dairy cows, which number nearly 1,000,000, is about 575,000,000 gallons.

Pennsylvania stands first in total production of mineral wealth, and first in coal, coke, cement, stone, sand, gravel and slate, and second in natural gas and clay products. The total mineral output in 1914 was \$462,374,085. The beds of anthracite and bituminous coal and iron ore, and the great oil basin, are sources of immense wealth. Anthracite coal is found mainly in the counties of Carbon, Dauphin, Lackawanna, Luzerne, and Schuylkill, to some extent in Columbia and Northumberland, and semi-anthracite in Sullivan and Wyoming. Bedford, Bradford, Centre, Clearfield, Fulton, Lycoming, and Tioga counties contain fields of semi-bituminous coal, while the bituminous coal beds are located beyond the main Alleghany ridge, every county west of it, with the exception of Erie, yielding more or less of this coal. Mercer supplies a good block coal for furnace use. The total coal production in 1914 was 147,983,294 tons of bituminous coal, and 90,821,507 tons of anthracite, nearly a third of the total bituminous output of the country and practically all of the anthracite, as only a few thousand tons came from the other two states producing it. The coke produced in 1914 was 20,258,393 tons, worth \$42,447,886. The petroleum region is situated mainly in the counties of Venango, Butler, McKean, and Clarion, and covers about 2,000 square miles. The natural gas field is about 2,730 square miles. The output of petroleum for 1914 was 8,170,335 barrels. Natural gas was worth \$20,401,295 in that year. The slate output had a value of \$3,609,959, nearly 70 per cent. of the country's total. Salt springs abound in the same region. Iron, graphite and copper are found in paying quantities. There are many medicinal springs, the principal of which are at Bedford, Doubling Gap, Ephrata and Yellow Springs. The southeastern corner of the state is rich in limestone and marble, of which great quantities are quarried for use in Philadelphia. This region also produces combined iron and chromium ores, hematite, magnetic iron, and corundum. A handsome black limestone is quarried at Williamsport, Silurian limestone in the Cumberland valley and at other places.

The lumbering industry is decreasing, and the state, which was first in 1880, now occupies the seventh place. In manufactures, Pennsylvania is second only to New York, the value of its manufactured goods in 1909 amounting to \$2,628,740,000. The chief manufactured goods are iron and steel goods of all kinds. In woolen goods it is excelled only by Massachusetts, its production in 1909 being \$77,446,996. Philadelphia is one of the principal seats of foreign and coastwise trade. The leading exports are grain, provisions, petroleum, tobacco, oil cake, lumber, tallow, hides, leather, shoes, cotton goods, machinery, and coal. Erie and Pittsburgh are also great commercial centres. Philadelphia and Chester are the chief shipbuilding stations. Pittsburgh, Harrisburg, Reading, and Scranton are the chief seats of the iron manufactures. Philadelphia is one of the great manufacturing cities of the world, and has an enormous production of iron goods, woolen and other textile fabrics, and other articles.

The number of newspapers and periodicals published in Pennsylvania is 1,309, including 204 daily, 6 three times a week, 34 semi-weekly, 770 weekly, 3 fortnightly, 9 semi-monthly, 228 monthly, 2 eight times during the college year, 1 six times during the college year, 1 semi-quarterly, 9 bi-monthly, 1 five times a year, 1 four times a year and 42 quarterly. The places of publication number 435, of which 67, designated by a dagger (†), are county seats.

LANCASTER †, pop. *49,885 (J 9); LANCASTER Co. (S.E.), pop. 167,029. 89 m. W. of Philadelphia, Penna.; Phila. & Read. R.Rs. Tel. Exp. Banks. Lancaster has 309 separate industrial plants. The production of silk, cork products and cigars are the leading industries. There are several tanneries, iron works and machine shops, large chocolate and caramel factories, cork and linoleum works, large umbrella and watch factories, and a very considerable variety of other manufactories. The surrounding country is a rich agricultural section, its wheat product being very large. Lancaster county, according to the 1910 census, produced a greater annual value in farm crops than any other county in the United States, its yearly product being over \$18,000,000. Tobacco is extensively cultivated, and Lancaster is claimed to be the largest tobacco market north of the Ohio River, having numerous large warehouses. Its general trade is extensive. Franklin and Marshall College (German Reformed), and Theological Seminary of the Reformed Church of America.

<p><b>PHILADELPHIA</b>†, pop. *1,657,810 (L 10); <b>PHILADELPHIA Co. (S.E.)</b>, pop. *1,857,810. On W. bank of Delaware R., at m. of Schuylkill R., 96 m. from the ocean, 87 m. S.W. of New York. Penna.; Balt. &amp; Ohio; Phila. &amp; Read.; Phila., Balt. &amp; Wash.; and other railroads. Tel. Exp. Banks. Federal Reserve Bank. Port of entry, the metropolis of Pennsylvania, and the third city of the U. S. in population. Philadelphia is principally distinguished as a manufacturing city. Among the most notable of its industries are the Cramp Shipyards, and the Baldwin Locomotive Works, with a capacity of 3,000 locomotives annually. In carpets, woolen and cotton goods, and other textile fabrics, its production is enormous, and the same may be said of the products of iron and steel, while many other branches of manufacture are also very largely represented. The domestic and foreign commerce of this city is also large, but is secondary in importance to its manufactures. Among its numerous institutions may be named Independence Hall, the University of Pennsylvania, the Pennsylvania Hospital and many others, Jefferson Medical-Chirurgical and other medical colleges, Girard College, Drexel Institute, Franklin Institute, Academy of Natural Sciences, Academy of Fine Arts, Philadelphia Library, the magnificent City Hall, and Fairmount Park, the largest and most picturesque pleasure ground in the United States. United States Mint.</p>

WILLIAM G. IRWIN, Editor and Publisher.					
<b>PITTSBURGH †, pop. *570,000 (B 8); ALLEGHENY Co. (W.S.W.), pop. 1,018,463. On Ohio R., at junc. of Allegheny and Monongahela Rs. 270 m. W. by N. of Philadelphia. Penna.; Balt. &amp; Ohio; Pittsb. &amp; L. Erie; and several other railroads. Tel. Exp. Banks. Second city of Pennsylvania, and the leading iron and steel manufacturing city in America. Its pig iron product is said to be one-fourth, and its steel product more than one-half of the total product of the United States. The glass manufacture is also very important, the product being claimed to be about one-half of the total produced in this country. Coke is very largely produced, and there are numerous smaller manufactures. The abundance of natural gas fuel gives Pittsburgh special advantages in manufacturing. The commerce of this city is also very large; oil, coal, lumber, iron, steel and glass products, etc., being largely distributed. Here are the University of Pittsburgh, Pennsylvania College for Women (Presbyterian), Western Theological Seminary, Carnegie Technical Schools, Carnegie Institute and Library, a United States Testing station for the Bureau of Mines.</b>

Val.; Del. & Hud.; N. Y., Susq. & West. R.R. Tel. Exp. Banks. One of the most important coal and manufacturing towns in the state. The supply of anthracite in the vicinity is immense. Forty per cent. of all anthracite in the United States comes from Luzerne county, and its value is greater each year than all the gold produced in the country in the same time. Manufactures include copper wire, locomotives, automobiles, adding machines, car and wagon axles, filters, hosiery, curtains, stoves, electrical goods, silk, lace and cotton goods. There are also several iron works and foundries, flour and planing mills, coal screen factories, brick yards and various other industries. Large trade in coal mine and railroad supplies. Center of a population of 300,000 within 9 miles.

# RHODE ISLAND

Population 595,836

STATE CAPITAL, PROVIDENCE

RHODE ISLAND is bounded on the north and east by Massachusetts, south by the Atlantic Ocean, and west by Connecticut. Its extreme length from north to south is 47½ miles; extreme breadth, 40 miles; average breadth, 35 miles; land area, 1,067 square miles. It is the most densely peopled state in the union, but on five-sixths of the area the population averages only about fifty to the square mile. The remaining one-sixth holds ninety per cent. of the people. The surface is for the most part rough, hilly and stony. There are no mountains, and few hills of any altitude. Nearly one-fourth is woodland.

Rhode Island is not an agricultural state. The production of corn and oats is but little more than is used at home; that of other cereals small; dairy and market-garden produce and live stock very moderate. Agriculture is steadily declining, the only branch of this industry which is increasing being dairy farms carried on for supplying milk to the cities. The area devoted to the production of food crops has declined in ten years from 350,000 acres to less than 200,000.

Rhode Island is essentially a manufacturing community, and its factories produce an immense variety of goods. The most prominent manufactures are cotton, woolen and worsted goods, knit goods, machinery, jewelry, silver and plated ware, clothing, iron and ironware, rubber and elastic goods, leather, refined sugar and molasses, and flour mill products. In its production of cotton goods it is surpassed only by Massachusetts, in woolens only by Massachusetts and Pennsylvania, its production of woolen goods in 1909 being \$74,600,240; and it is the chief center of the jewelry manufacturing industry of the United States.

Coal was mined as early as 1812. The mines are situated in Cumberland, Portsmouth and Valley Falls, but the coal produced is hard and difficult to burn, and very little is being mined at present. There are extensive granite quarries at Westerly. Graphite is also mined, but not of high quality, as it contains much grit. The product is used chiefly for foundry facings, and as a basis for certain kinds of paint. Soapstone is found in paying quantities.

The fisheries employ 131 vessels, and about 1,500 men, and the product in 1909 was about \$2,000,000. The lobster catch is an important item. The highest catch was in 1908, 1,391,281 pounds. In 1911 it was 891,886 pounds.

The number of newspapers and periodicals published in Rhode Island is 55, including 11 daily, 1 three times a week, 3 semi-weekly, 27 weekly, 1 semi-monthly and 12 monthly. The places of publication number 18, of which 5, designated by a dagger (†), are county seats.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM A PUBLISHER OF WIDE EXPERIENCE:—

The foremost handbook of its kind in the writer's knowledge, and has been for more years than we care to say. That it is better than most that come to us is not saying a great deal, but that it is in constant use, for the purposes intended, and is the first thing sought for information in its line is some evidence of our appreciation of it, and what it contains.

## SOUTH CAROLINA

**Population \*1,590,015**  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, COLUMBIA

SOUTH CAROLINA is bounded north and northeast by North Carolina, southeast by the Atlantic Ocean, west and southwest by Georgia. Its greatest length from east to west is about 275 miles, and its greatest breadth about 210 miles; land area, 30,170 square miles. The climate along the coast might be termed sub-tropical. Through the rest of the state it is mild and temperate. The rainfall varies from 40 to 55 inches. The surface presents nearly the same features as that of North Carolina. The coast for 100 miles inland is low and level, with sandy soil, numerous swamps, and extensive pine forests; then follows a tract of low sand hills, the soil of which is moderately productive. The land rises abruptly on the western edge of this belt, and continues to rise until it terminates in the Blue Ridge, the highest peak of which, Table Mountain, is 4,000 feet above the sea. The swamps embrace over 1,000,000 acres, and the pine lands 6,000,000.

The sea islands are mainly devoted to sea island cotton and rice; the tidal swamps to rice; inland swamps, when drained, to rice, cotton, corn, and peas; the salt marshes to long staple cotton; the oak and pine and oak and hickory lands to corn and cotton; and the pine barrens to fruits and vegetables. Rice, cotton, and corn thrive best in the central and southern counties. The northwestern region produces corn, wheat, barley, oats, tobacco, and many fruits. The grain crops for 1916 were:—corn, 32,008,000 bushels; oats, 9,000,000; rice, 49,000; wheat, 2,226,000. The production of corn, oats and wheat is increasing, that of rice declining. The chief seats of rice production are now Arkansas, Louisiana and Texas. Sweet potatoes brought 5,676,000 bushels. Some rye is grown. Cotton is the chief crop, averaging well over 1,000,000 bales, the 1916 crop was low, being 920,000 bales, which put the state in fourth place in cotton growing. Tobacco is also an important product, and 20,280,000 pounds were grown in 1916. The time when cotton was almost the sole money crop has passed, and while it holds its own as the chief staple, the production of other crops, such as grain, tobacco, fruits and truck, is increasing year by year. Stock raising and wool growing are carried on with profit. Figs and pomegranates grow in the lower counties, and the peach and grape thrive over the state generally; strawberries are abundant. Tea is being grown at Pinehurst, and while the total product is still small, crops have been grown producing 600 pounds of dried tea of good quality to the acre, and the demand for native tea is growing. Much attention is being paid to the improvement of the breed of cattle, both dairy and beef stock. Much care and money is devoted to agricultural education. Besides the work of the State Agricultural Department, there are a number of agricultural high schools, with experimental farms attached, and good work is being done by these institutions in developing the agricultural possibilities of the state. Alfalfa has been successfully grown, and many experiments are being made with other crops not native to the soil.

In 1910, the standing timber in the state was estimated at 40 billion feet, chiefly yellow pine and cypress. The principal hardwood is oak, although ash, cottonwood and other species are plentiful. Tar, turpentine, and rosin have an important place among the state's forest products.

The manufactures are principally cotton goods, cottonseed oil, flour, lumber, machinery, tar, turpentine, carriages, and fertilizers. The chief industry is the manufacture of cotton goods, the annual production of which is rapidly increasing. In 1909 there were 179 textile mills in the state, with a total capital of over \$60,000,000, employing 46,855 persons, and the value of the product was \$66,971,307. The cottonseed oil mills numbered 108, and the product was worth over \$10,000,000. The state has abundant water power, except in the coastal plain, where the fall is very slight, and will, no doubt, work up a great part of its own raw cotton into textile goods before many years have passed. Commerce is mainly confined to Charleston, Georgetown, and Beaufort. Exports are chiefly rice, cotton, lumber, phosphate, naval stores, cottonseed and its oil, oil cake, fish, and spring vegetables. Shad and oyster fisheries are valuable.

The most important items in the mineral list are clay products, valued at \$568,645 in 1914; and phosphate rock, valued at \$415,039. The deposits of the latter mineral are becoming exhausted, however, and the production has gradually decreased from 502,564 tons in 1893 to 106,919 tons in 1914. Some gold is found in the northwestern counties, but the output has decreased in late years. Barytes, fuller's earth, lime, manganese, mica, silver and tin are all found, mainly in the northwest; white and colored marbles and limestones, granites and cyanites, soapstones, flagging stone, and buhr stone are abundant. In Fairfield county is found what is claimed to be the finest granite in the United States. It is of beautiful appearance, great strength and fine quality. Aiken county contains immense beds of the finest porcelain clay. A little coal is found in Chesterfield county.

The number of newspapers and periodicals published in South Carolina is 170, including 14 daily, 8 three times a week, 16 semi-weekly, 114 weekly, 1 semi-monthly, 20 monthly, 1 bi-monthly and 1 quarterly. The places of publication number 87, of which 45, designated by a dagger (†), are county seats.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM A GROWING BUSINESS HOUSE.—

I find that its use as a gazetteer is helpful. Whenever we receive a request from an unfamiliar locality, I look it up in the Annual so as to localize it.

# SOUTH DAKOTA

**Population 579,538**  
(Above figures from 1915 State Census)

STATE CAPITAL, PIERRE

SOUTH DAKOTA is bounded north by North Dakota, east by Minnesota and Iowa, south by Nebraska, and west by Montana and Wyoming. Length, east to west, nearly 360 miles; width, about 240 miles. Land area about 76,850 square miles. The Missouri River has depth enough for boats up to six hundred tons burden. That portion of the state east of the Missouri River is mostly rolling prairie; the soil on the Mississippi slope being a black, sandy loam, with clay subsoil. West of the river the land is more broken, with mining and grazing land in the southwestern or Black Hills region, which is a mountain district of nearly 5,000 square miles in extent, exceedingly rich in valuable minerals and in great part well adapted to stock raising. It is largely forested, and with the aid of irrigation much of it might be adapted to agriculture.

In the northwestern part of the state the United States Government is constructing irrigation works, which will cost about \$2,500,000 and will bring into cultivation many thousands of acres hitherto untilled. The eastern portion of the state is especially adapted to the culture of wheat and other cereals, potatoes, vegetables, and flax. The Missouri river and all small streams and lakes are lined with timber. The principal agricultural products are wheat, corn, oats, barley, flax, hay and vegetables. Stock raising is still one of the state's great industries. The U. S. government reports for 1917 estimate the dairy cows at 524,000, other cattle 1,181,000, sheep 658,000, hogs 1,432,000 and horses 774,000. The value of the live stock marketed in 1909 was \$49,065,000; dairy and creamery products, \$8,500,000; eggs and poultry, \$5,300,000; wool and hides, \$900,000. The wheat product in 1915 was 68,762,000 bushels, grown on 3,725,000 acres; corn, 94,250,000 bushels, on 3,250,000 acres; oats, 72,450,000 bushels, on 1,725,000 acres; barley, 24,000,000 bushels, on 750,000 acres. Flaxseed produced 1,650,000 bushels on 150,000 acres. These crops were greatly reduced in the unfavorable season of 1916, when wheat produced only 24,825,000 bushels; corn, 84,075,000; oats, 56,425,000; barley, 18,728,000; flaxseed, 1,395,000. Hay is an important crop producing 1,387,000 tons in 1916.

The Black Hills possess some of the richest gold mines in the world; the gold production for 1914 was valued at \$7,390,000, making South Dakota rank fifth among the states in this industry, which accounts for nine-tenths of the state's annual mineral wealth. Tin occurs in great abundance, though as yet but little developed, from difficulty in reducing. Other important mineral products are silver (193,000 ounces in 1914), copper, gypsum, mica, lime, brick, fire and potter's clay and a little coal. Petroleum and natural gas are also present, and marble and building stone are quarried.

The number of newspapers and periodicals published in South Dakota is 401, including 19 daily, 1 three times a week, 357 weekly, 1 four times a month, 2 fortnightly, 3 semi-monthly, 14 monthly, 1 bi-monthly and 3 quarterly. The places of publication number 279, of which 63, designated by a dagger (†), are county seats.

(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, NASHVILLE

TENNESSEE is bounded north by Kentucky and Virginia; southeast by North Carolina, south by Georgia, Alabama, and Mississippi; west by Arkansas and Missouri; greatest length from east to west 432 miles, breadth 109 miles; land area, 41,750 square miles. The climate is generally healthful and equable, the winters are short and the rainfall is everywhere sufficient for all needs, averaging about 52 inches. The state is popularly divided into East, Middle, and West Tennessee. East Tennessee comprises the eastern mountain border, the beautiful East Tennessee Valley, and about half of the Cumberland Mountain plateau. Middle Tennessee reaches from about the center of the plateau to the Tennessee river, and is a region of fertile terraces, including the vast elliptical basin of nearly 5,000 square miles, known as the Garden of Kentucky. West Tennessee extends from the Tennessee river to the Mississippi, and is somewhat broken in the east, succeeded by a rolling plain descending to the latter river. The Mississippi bottom is a low, flat, alluvial plain, covered with forests and abounding with lakes and swamps.

West Tennessee is extremely fertile, and produces corn and cotton in large quantities. Middle Tennessee is generally fertile, yielding excellent grain and tobacco and much cotton, especially toward the south. East Tennessee valley lands are fertile, producing corn, cotton, and winter wheat; potatoes, oats, hay, and hemp are extensively produced. The state's chief crop is corn, followed by cotton, wheat, hay and tobacco in the order named. The live stock production is large, especially of mules and swine. The Tennessee mule is much in demand in other states, as many of the breeders make a specialty of large and heavy animals, which command high prices. The wool clip is large and excellent, and much attention is paid to fine breeds of horses. The 1916 cotton crop was 378,000 bales. The leading cereals are corn, wheat, and oats. Some rye and barley are grown. Corn in 1916 reached 84,500,000 bushels; wheat, 7,958,000 bushels; oats, 7,580,000 bushels; potatoes, 2,952,000 bushels; sweet potatoes, 2,700,000 bushels; hay, 1,449,000 tons, and tobacco, 81,760,000 pounds, only four states exceeding this quantity. Peanuts form a product of some importance, yielding about 1,000,000 bushels.

The lumbering interest is very great, there being a large area of valuable hardwood timber. Nearly a third of the state's land area is under forest. About \$25,000,000 is invested in the various branches of the lumber industry. The chief lumber products are cooperage stock, spokes and other vehicle stock, ties, handles, posts, piling and furniture stock.

The total value of manufactured goods in 1909 was \$180,130,000, with a net value, outside of the cost of materials of \$76,114,000; 73,840 wage earners were employed and wages were \$28,252,000. Besides there were 8,417 salaried employes, receiving \$9,186,000. Lumber with a gross output of \$30,457,000 and flour and other mill products \$29,070,000 were the leading industries.

Tennessee is rich in minerals of many kinds, over forty different minerals of economic value being found in commercial quantities. There are immense deposits of marble, limestone and other building stone; valuable copper mines exist in Polk county, producing 18,787,656 pounds in 1914; coal and iron ore are very abundant. The coal fields have an area of 4,400 square miles, and the output in 1914 was 5,943,258 tons. Iron mining and smelting are becoming very extensive, and much iron ore is exported to the iron working towns on the Ohio river. Tennessee is second among the states in the production of phosphate rock, the 1914 output being 483,203 tons. Zinc production is growing fast. The 1914 output was 10,425 tons, nearly double that of 1913. Other minerals in paying quantities are gold, silver, barytes, bauxite, tripoli, etc. Colored marbles are found in immense quantities in East and West Tennessee; roofing slates in East Tennessee; hydraulic limestone in East, Middle and West Tennessee. Fire and potter's clay are abundant and of the finest quality.

The number of newspapers and periodicals published in Tennessee is 311, including 18 daily, 1 three times a week, 3 semi-weekly, 220 weekly, 4 semi-monthly, 43 monthly and 22 quarterly. The places of publication number 147, of which 89, designated by a dagger (†), are county seats.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM A LIBRARIAN:—

A daily companion of mine. I find its  
maps and general information all that I  
can wish.

# TEXAS

Population \*4,257,854  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, AUSTIN

TEXAS is bounded north by New Mexico, Oklahoma, and Arkansas, east by Oklahoma, Arkansas, and Louisiana, southeast by the Gulf of Mexico, southwest by Mexico, and west by New Mexico; greatest length, about 740 miles; greatest breadth, 825 miles; land area, 265,896 square miles. From the Sabine river to the Trinity river is the great timber region, generally level and sandy in the south, rolling and fertile in the north. From the Trinity to the Colorado is prairie, timbered along streams, with extensive forests of live oak, extending through central and western Texas to the Red river, called the "Cross Timbers." The mean elevation is about 850 feet. The pecan tree is widely distributed, and is a valuable nut-bearing tree, its yield being estimated at 9,000,000 pounds, or 56 per cent. of the entire crop of the United States. Western Texas embraces the counties between the Colorado and Rio Grande; four-fifths of it is prairie; timber is generally confined to banks of streams. Between the Colorado and the Brazos rivers are the Comanche and Leon River Mountain ranges. In the north and northwest are the Church and Double Mountains, and the surface is generally broken until the Llano Estacado, or Staked Plain, is reached. It composes a great portion of the "Panhandle" and the natural vegetation consists only of grass. There is some farming here, but the chief industry of this district, and, indeed, the whole northwestern part of the state is stock raising. Between the Pecos and Rio Grande are several ranges, sometimes attaining an elevation of 5,000 feet.

The chief crops of Texas are cotton, corn, and wheat, but almost every variety of plant which can be grown in the temperate or sub-tropical regions, and many which are considered tropical plants, can be grown successfully in some part of this great state. About a fifth of the world's cotton crop is produced in Texas. The 1916 yield was 3,775,000 bales; the total yield of the United States in that year was 11,511,000 bales. The world's yield was estimated at 17,250,000 bales. Galveston, through which port the bulk of Texas cotton is shipped, handles more than any other port, shipping nearly 4,000,000 bales each year. Cotton and corn may be grown in nearly any part of the state, but especially in the eastern and central sections, wheat chiefly in the north and centre. Sea island cotton is grown on the coast. 131,000,000 bushels of corn were grown in 1916, also 13,200,000 of wheat, 42,750,000 of oats (all these grain crops, as in all the western states, being far below the average of other years), 10,575,000 bushels of rice (exceeded by Louisiana only), and some barley and rye. Sweet potatoes produced 7,120,000 bushels. Sugar cane is grown chiefly on the Brazos and other rivers, near their mouths, and produced 1,000 tons of sugar in 1916; rice in the south and southeast. Tobacco and onions are largely grown. Texas had 5,482,000 beef cattle in 1917, one-seventh of the country's stock. While the production of beef cattle is still one of Texas' great industries, the day of the great cattle ranges is passing, and the "nester" is coming into possession of the land. The number of families owning and residing upon their farms rose from 172,160 in 1909 to 297,720 in 1910, and the total agricultural population is estimated at about 2,500,000, two-thirds of the state's whole population. The dairy industry is large and growing. There were 1,175,000 dairy cows in 1917. Texas produces more mules than any other state. There were 760,000 of these useful animals in the state in 1917. The Texas mule is usually somewhat lighter in weight than those of Missouri, Kentucky and Tennessee, but is strong, active and hardy, and in great demand in the gulf states and in Mexico. There were also 1,156,000 horses, 2,328,000 sheep and 3,229,000 hogs. The 1916 wool clip was 10,250,000 pounds. Texas now produces immense quantities of orchard and garden products. Thousands of acres are under irrigation from flowing artesian wells, principally located in southwest Texas. The chief occupation in the west is stock raising and wool growing. Angora goats form a valuable part of the live stock; Texas goats producing fully half of the 3,000,000 pounds of mohair cut annually in the United States. Figs and oranges thrive in the south. The agricultural products of the state in 1915 had a value of \$407,040,000, a very close second to Illinois, which led the states with \$408,110,000.

Manufacturing interests are increasing. The leading products are lumber (1,902,201,000 feet in 1912), cottonseed oil, flour, carriages, foundry and machine shop products, woolens, marble, etc. Cotton mills have been established in the state, operating a total of about 100,000 spindles and 2,500 looms.

Silver is found in Presidio and El Paso counties, the 1915 output being 705,000 ounces. In the southern part of Brewster county quicksilver is found. Copper, lead and zinc are mined in small quantities. There is a field of lignite coal about 8,000 square miles in extent, and three large fields of bituminous coal, one in the north and two in the southwest, and smaller fields elsewhere in the state. The production of coal in 1914 was 2,323,773 tons. In that year the oil wells of the state produced 26,000,000 barrels. Natural gas is also found. Salt is produced in large quantities from springs in El Paso, Lampasas, Llano, and Mitchell counties. Texas leads in asphalt. The 1914 production was 57,934 tons, its value \$608,132. Large quantities of saltpetre are found in Blanco and Burnet counties; marble and roofing slate, grindstones, building stone, gypsum, sulphur, potter's and fire clays, marl and other fertilizers are abundant.

The number of newspapers and periodicals published in Texas is 994, including 107 daily, 1 three times a week, 20 semi-weekly, 791 weekly, 1 fortnightly, 10 semi-monthly, 53 monthly, 2 bi-monthly and 4 quarterly. The places of publication number 616, of which 229, designated by a dagger(†), are county seats.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

WHAT AN OFFICE-WORKER SAYS:—

I use this book year by year with much interest and profit; indeed it has become invaluable and is always near my desk.

# UTAH

Population \*414,518  
(U. S. Census Bureau estimate for 1914)

## STATE CAPITAL, SALT LAKE CITY

UTAH is bounded north by Idaho and Wyoming, east by Wyoming and Colorado, south by Arizona, and west by Nevada; length, north to south, about 350 miles; width, about 200 miles; land area, 82,096 square miles. The surface is generally mountainous, interspersed with arid plains, valleys, and basins. The annual rainfall varies from five to twenty inches, the average for the state from twelve to fifteen inches. The timber lands, with a total stand estimated at 9 billion feet, are almost entirely situated in the National Forests.

Grazing and mountain lands comprise about two-thirds of the state. The area at present under cultivation is about four per cent. It is estimated that "dry" farming can be successfully practised on several million acres of land which has a limited rainfall, but by reason of its location cannot be irrigated. Much of the finest wheat is grown on such land, and the quality is superior to that grown in more humid climates. Twenty per cent. of the soil can be made productive by irrigation, which almost invariably brings good results, as the soil contains all the elements of fertility. The state contains 8,220 miles of canals and lateral ditches and nearly 7,000,000 cubic feet of irrigation reservoirs. The United States government has four reclamation projects under way and in prospect, on which \$12,000,000 is to be expended. There are about 7,000,000 acres susceptible of irrigation, of which about 1,500,000 acres were irrigated in 1912. Laws have been passed by which the rights of settlers on these lands will be thoroughly safeguarded. The mining industry, formerly Utah's chief source of wealth, and still increasing in value, year by year, has been compelled to yield first place by reason of the wonderful development of the state's agricultural resources. Wheat, oats, alfalfa, barley, rye, corn, potatoes, hay, sugar beets, and wool are the chief products. Wheat of fine quality is grown. It is the state's chief crop, 6,900,000 bushels being grown in 1916; 4,480,000 bushels of oats were also grown; 1,224,000 bushels of barley, 8,600,000 bushels of potatoes and 941,000 tons of sugar beets, producing 116,000 tons of sugar. Vegetables and small fruits grow luxuriantly on the irrigated lands. Cattle and sheep raising are profitable industries and are often successfully carried on where farming is impracticable. Utah had, in 1917, 2,089,000 sheep, 81,000 dairy cattle, 408,000 other cattle, 138,000 horses and 101,000 swine. The wool clip of 1916 was 15,000,000 pounds. About 10,000 acres are devoted to orchard and nursery interests. The dairy industry is growing fast, nearly 500 silos have been built in the past four years.

Manufacturing industries, which are numerous and varied, are of considerable importance, goods to the value of \$66,100,000 being sent out from the factories of the state in 1911. Beet sugar, to the amount of 87,300 tons, was made in 1915. Extensive works for the mining and smelting of ores have been established.

The mineral wealth is very great. The total output of gold in 1915 was \$3,908,229; silver, 12,724,000 ounces; copper, 182,549,000 pounds; lead, 219,098,000 pounds; zinc, 22,643,000 pounds; coal, 3,103,036 tons; asphaltum, sulphur, gypsum, clay, building stone and salt are also largely produced and some radium. The coal fields have an area of over 13,000 square miles. Petroleum is found, but not in commercial quantities. The state is exceedingly liberal in the treatment accorded her schools, and there are many well equipped institutions for higher education.

The number of newspapers and periodicals published in Utah is 111, including 8 daily, 2 three times a week, 7 semi-weekly, 77 weekly, 1 semi-monthly and 16 monthly. The places of publication number 61, of which 25, designated by a dagger (†), are county seats.

# VERMONT

Population \*361,205  
(U. S. Census Bureau estimate for 1914)

## STATE CAPITAL, MONTPELIER

VERMONT is the most northwesterly of the New England states, bounded north by Quebec, east by New Hampshire, south by Massachusetts, and west by New York. It is 143 miles long by from 40 to 85 miles wide, with a land area of 9,135 square miles. The Green Mountains traverse it from north to south, mainly in two ranges, generally covered with dense forests, but affording excellent pasturage. Western Vermont and a large tract of the eastern part comprise beautiful pastoral regions, but the central part is rugged and mountainous. The best soil is found on the western slope of the mountains near the border of Lake Champlain, and in the valley lands of the Connecticut river.

The state occupies a prominent position in agriculture. When its area, population, amount of forest land, and long severe winters are considered, there is perhaps no other state that yields so large a return. All the ordinary agricultural staples are abundantly produced; 1,935,000 bushels of corn, 2,560,000 of oats, 210,000 of buckwheat, 2,578,000 of potatoes and 1,666,000 tons of hay were grown in 1916; also some rye, barley and wheat; wool and dairy products are abundant and excellent; cattle, sheep, and horses are raised in large numbers, and the state's live stock exceeds in value that of any other state in New England, although it is the smallest state in population. Vermont continues to be the greatest breeding state of fine horses (Morgans and Hambletonians) and of Spanish merino sheep. Every year numbers of these superior animals are shipped to all parts of this country, to South America and to Australia. The yield of maple syrup is large. As in all New England, the average crops per acre are much greater than in the country at large. The corn average for the United States in 1915 was 23.2 bushels per acre. No New England state went below 41 bushels. Vermont averaged 46 bushels, exceeded only by Massachusetts, with 47 bushels, and Connecticut, with 50 bushels per acre. Some wrapper tobacco is grown in the south, in the valley of the Connecticut.

Manufactures occupy a prominent position in its industries, and cover a wide range of goods, including flour, furniture, cotton and woolen goods, leather, agricultural tools, tin and copper ware, lumber, etc. The 1910 census enumerates 1,958 plants, producing goods valued at \$68,310,000, of which value \$33,487,000 was produced by the labor of the state's workers. Large quantities of lumber are exported.

Vermont leads in the production of marble and granite, and stands second in slate. These three substances make up more than nine-tenths of the value of the state's mineral output. The principal marble quarries are at Brandon, Dorset, Isle La Motte, Manchester, Middlebury, New Haven, Pittsford, Proctorsville (serpentine), Roxbury (verdantique), Rutland, Shelburn, Sutherland Falls, Swanton and West Rutland; slate quarries at Castleton, Fair Haven, Guilford, Northfield, Pawlet and Poultney; granite at Barre and Brattleboro. The United States Geological Survey statistics for 1914 give the value of Vermont's stone output as \$6,635,477; slate, \$1,414,247. Potters' clay comes from Bennington and Rutland; steatite from Castleton and Grafton; manganese, brown hematite, kaolin and ochre from Brandon, South Wallingford and Manchester Center; copper ore from Vershire and Corinth. Other minerals are asbestos, mineral paints, soapstone and small quantities of copper, gold and silver. Rutland is the largest marble center in the world, not less than \$6,000,000 of capital and 4,000 men being employed in 15 quarries and 20 mills. Burlington is a large market for Vermont and Ottawa lumber, having extensive mills and a trade extending throughout the eastern states.

The number of newspapers and periodicals published in Vermont is 97, including 19 daily, 78 weekly, 1 twenty times a year, 1 semi-monthly and 7 monthly. The places of publication number 67, of which 12, designated by a dagger (†), are county seats.

# VIRGINIA

Population \*2,150,009  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, RICHMOND

VIRGINIA is bounded north by West Virginia and Maryland, east by Maryland and the Atlantic Ocean, south by North Carolina and Tennessee, and west by Kentucky and West Virginia. Its greatest length from east to west is about 440 miles, its greatest breadth 192 miles; land area, 40,125 square miles. The surface is divided into six great natural divisions, the Tidewater, comprising the south and southeast; the Middle, an undulating plain, extending westward to the Coast Range; the Piedmont, from the Coast Range to the Blue Ridge Mountains, and from the Potomac River to North Carolina; the Blue Ridge, stretching across the state in a southwesterly direction; the Valley—a part of the great Appalachian valley, reaching from Canada to Alabama—a broad belt of rolling country between the Blue Ridge and the Kittatinny or North Mountain; and the Appalachian, a mountainous region traversed by the Alleghanies. The soil in the Tidewater region is a light sandy loam, yielding large crops of vegetables and small fruits. The Valley region has a rich, fertile soil, well adapted for cereals, of which corn, wheat, oats and rye are the principal. Much of the mountain region is uncultivated and chiefly forest land; but the parallel valleys are very fertile. The Piedmont, Blue Ridge, Valley, and Appalachian regions are noted for their grasses. The forests of Virginia are rich in a large variety of trees, especially the valuable hardwoods, and the export of lumber is large.

The growth in the total products of the farms during the last ten or twenty years has been very large. The 1916 crop of corn was 60,990,000 bushels; wheat, 16,250,000; oats, 5,750,000; potatoes, 16,250,000; also barley, rye and buckwheat. The yield of tobacco is exceeded only by Kentucky and North Carolina; 129,200,000 pounds were produced in 1916. Some cotton is grown in the Tidewater section, 29,000 bales in 1916; fruit grows all over the state, Virginia being especially celebrated for the fine quality of its apples. Virginia's apple crop for 1916 was 4,433,000 barrels, exceeded only by New York and Pennsylvania. A considerable part of the Tidewater region is devoted to the growing of early vegetables for northern markets, especially near Norfolk, where in some cases of intensive culture \$1,000 profit has been made in a year from a single acre. Dairying, stock raising, and wool-growing are important industries. The dairy products in 1909 were worth \$7,000,000, against only \$2,000,000 ten years before. The dairy cows in 1917 numbered 373,000, and other cattle 486,000, sheep 686,000 and hogs 1,023,000. There are profitable fisheries of bass, shad, etc., and Virginia leads in the oyster industry, her output being 6,000,000 bushels annually.

The manufacturing interests are also increasing, the chief seats being Richmond, Alexandria, Danville, and Lynchburg. The more important products are cotton goods, tobacco, leather, coke, saw and planing mill products, flour, clothing, woodenware, paper, agricultural implements, machinery, etc. The smoking and chewing tobacco in 1910 was worth \$12,504,844; cigars and cigarettes, \$8,939,894; leather, \$9,203,427; woodenware, baskets, boxes, etc., \$9,677,994; silk, \$1,533,631; paper and pulp, \$4,888,549; knit goods, \$2,428,152; flour and grist mill products, \$11,270,818; cotton goods, \$8,265,359; boots and shoes, \$3,819,232; lumber, \$10,088,478; sash, doors, etc., \$1,877,899; machinery and iron goods, \$24,143,272. In 1880 the cotton mills used 5,087,519 pounds of cotton. In 1909 they used 36,517,677 pounds. The lumber and mineral products increased almost in the same proportion. Virginia has excellent natural advantages for commerce, but it is only lately that she has begun to take a prominent part in foreign trade.

The state has a great variety of minerals. There are beds of anthracite, semi-bituminous and bituminous coal in the southwestern counties, some of them producing a good coking coal. There are coal-bearing strata in other parts of the state, particularly near Richmond; the coal is bituminous, and generally of good quality. There were 7,959,535 tons of bituminous coal produced in 1914. Virginia produces more than half of the country's output of iron pyrites (used in the manufacture of sulphuric acid) and also is first in the production of soapstone and of articles manufactured therefrom. There are also large deposits of gypsum and marl, and abundance of fine granite, marble, and other building stones; barytes, mica, mineral paints, salt, slate, sulphur, kaolin, fire clay and many other minerals. It abounds in mineral springs of great reputation. Iron and manganese are extensively mined, also zinc and lead ores. A little gold and silver is produced from mines in the northern and central counties. Some copper is mined. Lime burning is an important industry. Transportation facilities are good, both by water and rail. Water power is abundant; even in the Tidewater section the small streams have sufficient fall to operate the local grist mills and other industries.

NOTE:—The 1910 Census does not include the populations of the cities of Bristol, Charlottesville, Clifton Forge, Danville, Fredericksburg, Lynchburg, Newport News, Norfolk, Petersburg, Portsmouth, Radford, Richmond, Roanoke, Staunton, Williamsburg and Winchester in the populations of the counties in which these cities are situated. While these cities are now separate from the counties, we still give, for the purpose of reference, the population figures of the counties to which they formerly belonged.

The number of newspapers and periodicals published in Virginia is 249, including 35 daily, 2 three times a week, 4 semi-weekly, 161 weekly, 2 fortnightly, 1 semi-monthly, 35 monthly, 1 bi-monthly and 8 quarterly. The places of publication number 137, of which 67, designated by a dagger (†), are county seats.

**THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY**

FROM A PUBLISHER'S OFFICE:—

We use it every day. We frequently refer to it for other information besides the names of newspapers. It is a reference book that we could not get along without.

# WASHINGTON

Population **1,407,865**  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, OLYMPIA

WASHINGTON is bounded north by British Columbia, west by the Pacific Ocean, east by Idaho, and south by Oregon. Its average length, east to west, is 330 miles; width, 220 miles; land area 66,880 square miles. It is divided by the Cascade Mountains into two distinct parts.

Western Washington is a fine timber country, with many fertile valleys, well settled and very productive in vegetables, of fine quality, fruit of all kinds and hops. Fruit growing has been especially successful, and some of the largest and finest fruits in the eastern market are those shipped from Washington. Dairying is an interest of growing importance, and produced butter worth \$3,160,599, cheese worth \$32,750, and condensed milk worth \$4,185,330 in 1909. Eastern Washington is especially adapted for the raising of fruit of all kinds, vegetables, hops and grain, particularly wheat, of which 37,635,000 bushels were grown in 1916. Oats also grow luxuriantly, frequently yielding seventy bushels to the acre. The 1916 crop was 14,300,000 bushels; potatoes 9,900,000 bushels; barley, 6,814,000 bushels; apples produced 3,225,000 barrels; hay, 2,006,000 tons. Some rye and corn were also grown. There are some waterless regions in the central and eastern portions of the state, between the eastern slopes of the Cascade range and the western slope of the Rocky mountains. Some parts of this area have been irrigated by private enterprise, and other reclamation projects are under way, in addition to the Yakima and Okanogan projects, which are being constructed by the United States government. The former of these is expected to reclaim at least 500,000 acres, and within a few years the area of irrigated land will be fully 1,500,000 acres. The climate of Washington is perfection; the mean average temperature for the year being 53°, without extremes of heat or cold. It is the best agricultural country on the Pacific coast. Cattle and stock of all kinds do remarkably well; the ranges are good and it is not considered necessary to feed the stock in the winter time, owing to the generally light snow fall and the abundance of natural grasses. In 1917, Washington had 305,000 horses, 283,000 dairy cows, 275,000 other cattle, 585,000 sheep and 283,000 hogs.

Extensive coal and iron mines are being operated, and coke ovens established; 3,061,820 tons of coal were mined in 1914. Next to coal, the principal mineral industry is the manufacture of cement, of which 2,045,465 barrels were made in 1914. Clay products are also of importance. There are copper, silver and gold mines, all of which are being developed; \$407,000 in gold was produced in 1913; silver, 220,000 ounces; copper, 915,000 pounds and also some lead and zinc. There is also an abundance of limestone, granite, marble, etc.

Puget Sound is a vast harbor, having an extent of 1,594 miles of shore line, and Seattle, its principal seaport, is fast becoming the metropolis of the northwest Pacific coast. Fish of all kinds abound, and the taking and canning of salmon employs about ten thousand people in the season. The total value of the fisheries products in 1909 was \$13,534,010.

Manufacturing industries of all kinds are increasing rapidly in numbers and importance. The 1910 census gave the number of plants as 3,674, employing over 80,000 people, and their product had a value of \$220,746,000, nearly half of which was created by the labor of Washington citizens. The principal industry is the manufacture of lumber and its products. In this Washington leads the nation. In addition to general wood-working factories, there are over a thousand lumber and shingle mills, and the pay rolls of the loggers and lumbermen reach a total of \$60,000,000 to \$70,000,000 annually. Washington's cedar shingles are celebrated for quality and durability. In the year 1912 over 8,000,000,000 shingles and over 4,000,000,000 feet of lumber were manufactured. Ship building is one of the most important industries. The principal articles of export are lumber, shingles, coal, wheat and salmon.

Over 12,000 square miles of the state's area is in timber. Parts of this area bear immense trees, ten to twelve feet in diameter and 300 feet high. Douglas fir constitutes more than half of the standing timber. The rest consists of red cedar, hemlock, spruce and western pine. Hardwoods are found in small quantities.

The number of newspapers and periodicals published in Washington is 402, including 40 daily, 11 semi-weekly, 293 weekly, 8 semi-monthly, 41 monthly, 3 bi-monthly, 1 six times a year and 5 quarterly. The places of publication number 201, of which 39, designated by a dagger (†), are county seats.

<b>SEATTLE</b> †, pop. *313,029 (F 3); <b>KING Co. (W.C.)</b> , pop. *370,000. It is estimated that the population of the city is now—December 1913,—about 300,000, and of the county 350,000. On Puget Sound. Chic., Milw. & St. P.; N'thrn Pac.; Gt. N'thrn; Oreg.-Wash. R.R. & Nav. Co. and other R.Rs. Tel. Exp. Banks. Largest city in the state. Extensively engaged in manufacturing, having numerous saw mills, large iron works, sash and door, and furniture factories, brick yards, shingle mills and numerous minor industries. Water power abundant and cheap. Large Sound trade, particularly in coal, of which half a million tons are annually exported, also in lumber, hops, oats, fruits, fish etc. Trans-Pacific commerce is large and growing, and Seattle is the chief gateway to Alaska. Fine harbor, with ample docking facilities. There are sixty steamships lines to home and foreign ports doing business in Seattle. Extensive fisheries.

We would not think of placing our  
advertising without this reliable refer-  
ence book. It is our advertising "Bible."

# WEST VIRGINIA

Population \*1,332,910  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, CHARLESTON

WEST VIRGINIA is bounded north and east by Pennsylvania and Maryland, east and south by Virginia, and west by Kentucky and Ohio. Its greatest length from north to south is about 240 miles; greatest breadth, 160 miles; land area, 24,715 square miles. It is abundantly watered, many navigable tributaries of the Ohio flowing through the state. The surface of its rivers is estimated at 135 square miles. The climate is remarkably healthful, without extremes of temperature or of dryness or moisture, making energetic outdoor labor possible at all seasons, which conditions, combined with the fertility of the soil, make possible the widely diversified and abundant harvests for which the state is celebrated. A large part of the surface is mountainous and hilly; about two-thirds is covered with forest. The soil of the ridges is fertile to the tops, and the summits of many mountains are flat, natural meadows or glades.

There are over 100,000 farms in the state, averaging about 114 acres. The valley of the Great Kanawha is the finest grazing region of the state. No finer blue grass farms exist than those of the central, northern and Greenbrier sections. West Virginia is especially famous for wool, the product of the Northern Panhandle obtaining the highest award at the Paris Exposition; while the live stock interests generally are large. Other great staples are corn, wheat, oats, and tobacco. The 1916 crops included 22,112,000 bushels of corn; 4,640,000 of wheat; 3,220,000 of oats; 1,270,000 tons of hay; 3,344,000 barrels of apples; 4,224,000 bushels of potatoes; 12,690,000 pounds of tobacco; 659,000 bushels of buckwheat and some rye. The soil is particularly well adapted for apples, peaches and other fruits. In 1917 there were 196,000 horses and 614,000 cattle, of these 245,000 were dairy cows. The lumber trade is important, the forests being principally composed of hardwood timber of the most valuable kinds. The product is worth about \$15,000,000 per year.

The mineral wealth is very large, and the total production in 1914 was \$134,071,803, second only to Pennsylvania. Nearly the whole of the state lies within the Alleghany coal system, and large quantities of coal are exported both by river and rail, and new mines are constantly being opened. Fifty of the fifty-five counties have workable coal seams, generally bituminous, and the total area is about 11,000,000 acres, about one-thirteenth of the coal area of the country. In 1914 the mines employed about 75,000 persons, and the total production of coal was 71,707,626 tons, this production being second only to that of Pennsylvania. The coke output was 1,427,962 tons. The salt industry is of considerable importance. The Kanawha valley is one of the great salt-producing regions of the United States. Petroleum is extensively produced, chiefly in Ritchie, Pleasants, Marshall, Wood and Wirt counties. The 1915 output was 9,000,000 barrels. Natural gas is found in several places, Wheeling and the Northern Pan Handle using it as a fuel almost to the exclusion of coal. The state's production in 1914 was worth \$35,515,329, placing it first among the states and exceeding Pennsylvania's output by nearly \$15,000,000. The three fuels, coal, petroleum and natural gas, furnish over 90 per cent. of the state's mineral output. Not more than 25 per cent. of these fuels is consumed in the state, the greater portion being transported by rail, river or pipe line to manufacturing centers in other states. Limestone, sandstone, and grinding stone abound generally throughout the state.

Manufactures are increasing. In the ten years, from the 1900 census to that of 1910, 2,300 new industries were started, costing over \$152,000,000, and employing over 60,000 people. The state has abundant water power, all its streams having a rapid descent, but so far this has been but little utilized. The leading products are steel and iron in various forms, glass, flour, salt, wood pulp, liquor, lumber, queensware and porcelain, firebrick, leather, cigars and tobacco, and machinery. The cigar manufacture is very important. The total value of manufactured goods for 1909 was \$161,950,000, the increase in value through manufacturing processes being \$69,072,000. Wheeling is the largest and most important city; it is the manufacturing center and all the industries enumerated above, except salt manufacturing, flourish there. Transportation facilities are being extended in all directions, 1,200 miles of new railroad having been laid within ten years. Much attention is given to education. Over 1,200 new schoolhouses were built in the ten years after 1901, and the value of property devoted to educational purposes increased in the same time from \$4,515,000 to \$12,931,694. Over \$5,000,000 was appropriated for educational purposes in 1911. The population increased 27.4 per cent. from 1900 to 1910, the total assessed property increased from \$278,829,659 in 1904 to \$1,114,000,000 in 1911, and bank deposits, which in 1895 were \$16,447,000, increased to over \$100,000,000 in 1911.

The number of newspapers and periodicals published in West Virginia is 201, including 33 daily, 3 semi-weekly, 152 weekly and 13 monthly. The places of publication number 94, of which 55, designated by a dagger (†), are county seats.

# WISCONSIN

Population **2,467,716**  
(U. S. Census Bureau estimate for 1914)

STATE CAPITAL, MADISON

WISCONSIN is bounded north by Lake Superior, northeast by Michigan, east by Lake Michigan, south by Illinois, and west by Iowa and Minnesota. Its greatest length from north to south is 300 miles; greatest breadth, 260 miles; land area, 54,450 square miles. The surface is generally an elevated plain, with high bluffs along the rivers and lakes, and elsewhere gently undulating, diversified with prairie, woodlands, and numerous lakes. The northern part is heavily timbered, and has a somewhat severe climate. The lumber business of this section of the state, in pine and hard wood, has built up many large and flourishing inland cities, like Oshkosh, Eau Claire, Wausau, Chippewa Falls, Stevens' Point, Merrill and Shawano.

Wheat, corn, rye, oats, barley, potatoes, dairy products, and maple sugar are all produced in large quantities, especially oats, of which the 1916 crop reached 81,400,000 bushels; rye, of which Wisconsin grew more than any other state, her crop being 6,075,000 bushels, and potatoes, 13,680,000 bushels. Corn produced 60,840,000 bushels; barley (Wisconsin stood fifth), 13,300,000; wheat, 3,315,000 and hay, 4,420,000 tons. Sugar beets are grown largely, the state's factories in 1914 turning out 16,964 tons of sugar. Some linseed is grown; hops are exceedingly prolific; fruit growing is an important industry. The dairy cows number 1,750,000 head, an average of 9 to every farm, in addition to 1,340,000 other cattle. Cheese and butter making have increased to enormous proportions, especially in the central and southern counties, making this state the leader in dairy products. The value of the state's dairy products in 1909 was \$53,843,249, almost a quarter of the country's total. The most recent authentic figures show 1,005 creameries in the state, Wisconsin leading the country in the number of plants devoted to this industry. 46% of the cheese factories of the United States are in Wisconsin. 84,000 farmers supply the creameries and 40,000 the cheese factories. The growing of seed leaf tobacco for wrappers has become an important and profitable industry, and the product commands good prices. The 1916 crop was 55,753,000 pounds. This state is third in cranberry production. Large numbers of horses are bred; hogs numbered 2,060,000 in 1917; sheep are numerous, and the wool clip large and valuable.

Zinc is the most important mineral product. Wisconsin, in 1914, produced 31,113 tons. Iron ore comes next, with a production of 886,512 tons. Limestone and lead exist in the southwest, chiefly near Mineral Point. One of the best hydraulic cements comes from the neighborhood of Milwaukee. Other minerals existing in workable quantities are graphite, mineral paints and pyrites.

The lakes and streams abound with fish, especially trout and black bass. The commercial fisheries are valuable. Those of the waters of Lakes Superior and Michigan, subject to Wisconsin laws and control, during the season of 1911 gave employment to 1,363 fishermen. The catch, amounting to 15,380,137 pounds, had a total value of \$743,485.

Manufactures are thriving and numerous, lumber and wood work of all kinds holding a very prominent position. Wisconsin leads the lake states in the lumber industry. Her 1914 output was 1,391,001,000 feet. The manufactures of furniture, wagons and other goods made wholly, or in great part, of wood; agricultural implements, leather and brooms are large and increasing, while at Milwaukee are situated several of the largest breweries in the world, and the manufactures of cotton and woolen goods, nails, paper, steel rails and merchant iron are of great importance. The 1910 United States census reported, for the year 1909, 9,721 factories, producing \$580,305,000 in goods.

The number of newspapers and periodicals published in Wisconsin is 666, including 57 daily, 2 three times a week, 7 semi-weekly, 521 weekly, 1 fortnightly, 4 semi-monthly, 59 monthly, 5 bi-monthly, 1 five times a year, 1 four times a year, and 7 quarterly and 1 issue unknown. The places of publication number 358, of which 71, designated by a dagger (†), are county seats.

West.; Chic., Milw. & St. P.; Minneap., St. P. & S. Ste. Marie R.Rs. Tel. Exp. Bank. Port of entry, and the largest city in the state. Manufacturing interests here are numerous and extensive. Bay View Rolling Mills employ nearly 2,000 men, the E. P. Allis machine shops about 1,500. Knit goods extensively produced. Flour is manufactured in great quantities. The brewers produce annually over 1,000,000 barrels of beer. Other important products are leather, lumber, boots, and shoes, carriage, furniture, tobacco and cigars. Milwaukee has an excellent harbor and a large shipping trade, being among the greatest grain markets in the world. Its wheat shipments are over 9,000,000 bushels annually, and large quantities of corn, barley, oats, rye, flour and lumber are handled. State Normal School, Marquette University (Rom.Cath.), an Industrial School for Girls, and, in the vicinity, a National Soldiers' Home.

**THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY**

FROM A NATIONAL ADVERTISER :

My office often refers to this book  
for general information as well as for  
information concerning newspapers and  
advertising.

# WYOMING

Population \*141,705

STATE CAPITAL, CHEYENNE

WYOMING is bounded north by Montana, east by South Dakota and Nebraska, south by Colorado and Utah, and west by Utah, Idaho, and Montana; length, east to west, 365 miles; width, 274 miles; land area, 97,575 square miles. The mean elevation of the state is about 6000 feet. The clear, dry atmosphere and the abundance of sunshine has made the state a favorite health resort, especially for persons afflicted with pulmonary diseases. Its surface is broken by mountain ranges, deep river canyons and flat-topped hills or buttes, the latter a feature of South Wyoming, which rise from valley or plain like walled cities or mounds. In the northwest corner is the Yellowstone National Park. There are extensive areas of pine and spruce timber, widely distributed throughout the mountain regions. The forests cover about 7,000,000 acres and as much more of the surface is more or less timbered.

For many years cattle raising was the only industry, and it is still in the front rank. There were on January 1st, 1917, 825,000 cattle in the state, in addition to 55,000 dairy cows, 191,000 horses, and 4,381,000 sheep. But here, as in all the western states, agriculture is steadily progressing over the ranges. Wyoming leads all the states in the value of its sheep and of its annual wool clip, which reached 31,000,000 pounds in 1916, nearly one-seventh of the country's total. Hay is also a leading product. Irrigation is needed in a large part of the country to make the soil productive, as there are few places, except in the eastern portion, where crops can be successfully grown without additional water supply. Where it is used, however, the returns are very large; fine crops of alfalfa, sugar beets, vegetables and small fruits being grown. It is estimated that 10,000,000 acres may be reclaimed, and there are numerous public and private systems in operation and under construction. Over 1,000,000 acres are now supplied from the existing systems. Experiments are being made in methods of "dry farming" suitable for localities where irrigation is not practicable, and good crops of grain and alfalfa have been grown. The best results are obtained from the two-year system, by which half of the farm is allowed to lie idle each year, being plowed and harrowed to preserve the moisture for the next year's crop. By this method profitable crops have been secured where the annual precipitation is less than fifteen inches. Certain varieties of wheat and barley do especially well. It is believed that fully 20,000,000 acres can be made productive by dry farming. The total value of Wyoming farm and range products for 1912 was calculated to be \$50,000,000. The United States crop report for 1916 shows 3,560,000 bushels of wheat, 8,575,000 bushels of oats, 825,000 bushels of barley, 2,340,000 bushels of potatoes and 1,044,000 tons of hay.

There are few states with greater mineral resources than Wyoming. One hundred and fifty-six varieties of minerals have been discovered, and new ores are constantly being brought to light. Copper in commercial quantities has been found in many places. Gold and silver are found, but the quantity produced in recent years is small. There are vast beds of iron ore and plenty of good coal, the latter underlying 41,500 square miles of territory; 6,475,293 tons were dug in 1914. Gypsum, salt, soda, graphite, asphaltum, epsom salts, asbestos, plaster, clays, sulphur, lead, tin, and other minerals are found. There are many mineral springs. The oil fields in central and northern Wyoming cover a territory 350 miles long and 150 miles wide. Many wells have been drilled and promise to be large producers, but the majority are capped until the several projected pipe lines shall be constructed. The 1915 production was 4,200,000 barrels. All the various qualities of petroleum have been found, and several strong wells of natural gas. The total mineral output in 1914 was valued at \$12,417,752. Lumber and railroad ties are the chief articles manufactured.

The number of newspapers and periodicals published in Wyoming is 96, including 7 daily, 4 semi-weekly, 81 weekly and 4 monthly. The places of publication number 59, of which 21, designated by a dagger (†), are county seats.

**PORTO RICO**

Prepared especially for the  
**American Newspaper, Almanac and Directory** by  
 W. W. Blinn, Publisher, Philadelphia, Pa.  
 U.S. SHEET NO. 150, 151.

## PORTO RICO

Population \*1,184,489  
(U. S. Census Bureau estimate for 1914.)

### CAPITAL, SAN JUAN

Seventy miles east of San Domingo and 1,400 miles from New York. The island is 108 miles long from east to west and 36 miles broad. Its area is about 3,600 square miles, approximately the size of Delaware and Rhode Island together. It is traversed by a mountain range from east to west, the highest point of which is about 8,700 feet. The climate is generally salubrious. The soil is unusually fertile.

The chief industry is agriculture and the principal products are sugar, of which 308,178 tons were made in 1915, coffee, rice, tobacco, salt, corn, oranges, pineapples, bananas and other tropical fruits. Some cotton is grown. In the southern parts of the island irrigation has been found necessary for the better development of its agricultural possibilities, and plans have been made to supply water to about 30,000 acres. Beef cattle are raised in large numbers, and the dairy industry is growing fast, especially near the large cities. On December 31st, 1915 there were on the island 58,911 work cattle, 122,000 other cattle, 32,978 horses, mules and donkeys. It is said that there are over 500 varieties of trees growing on the island and lumbering is an industry of considerable importance.

The mineral deposits are not large, but have been worked to some extent. Gold, silver, copper, iron and lignite are found, and there are salt works in several localities. Marble, limestone and other building stones exist in large quantities, but have been very little used.

The trade of Porto Rico is chiefly with the United States and Great Britain. The exports to the United States for the year ending June, 1916, were valued at \$60,906,453, sugar alone accounting for \$45,799,299 and the imports from the United States at \$34,927,311. The imports from foreign countries were \$3,058,400; the exports to foreign countries, \$5,883,589. Large quantities of sugar, coffee, lumber, tobacco and cigars are exported. Fruits, fresh and preserved, are also a large article of export. When the island came into the possession of the United States, in 1898, the people, in common with those of all the Spanish colonies, lived in the densest ignorance, over eighty per cent being unable to read. Since that time numerous good public schools have been established and much progress has been made in education. The public highways and transportation facilities of all kinds have also been greatly extended and improved.

The number of newspapers and periodicals published in Porto Rico is 26, including 11 daily, 2 semi-weekly, 9 weekly and 4 monthly. The places of publication number, 6 of which 4, designated by a dagger (†), are county seats.

(All papers are Spanish unless otherwise stated.)

## VIRGIN ISLANDS

**Population \*10,537**

(About 500 white)

### CAPITAL, CHARLOTTE AMALIE

The Virgin Islands are three in number, situated about 35 miles east of Porto Rico. They consist of St. Thomas, area about 33 square miles; St. Johns, area 21 square miles; Santa Cruz, area 80 square miles. St. Thomas contains the capital. Sugar, rum, cotton and tobacco are the chief products. The islands are the original home and the headquarters of the manufacture of bay rum, which is the principal industry. It is exported to all parts of the world. Large trade in panama hats. The imports of the islands are principally foodstuffs and manufactured goods. There is a magnificent harbor at Charlotte Amalie, which is a favorite coaling station. Goods were imported from the United States to the value of \$398,541 in the year ending June 30th, 1916, and exports to the United States were \$63,496. The islands were taken over by the United States on March 31st, 1917, being purchased from Denmark.

The number of newspapers and periodicals published in the Virgin Islands is 4, published in two towns. There are 3 daily and 1 semi-weekly.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM AN EASTERN NEWSPAPER EDITOR:—

Ayer & Son have apparently spared  
no expense to make their book correct.

# HAWAII

Population, \*208,063  
(U. S. Census Bureau estimate for 1914)

## TERRITORIAL CAPITAL, HONOLULU

The HAWAIIAN ISLANDS are situated in the North Pacific Ocean between longitude 154° 40' and 160° 30' west and latitude 22° 16' and 18° 13' north, 2,100 miles from San Francisco. The eight principal islands have an area of 6,454 square miles, the others are mere rocks. Hawaii is the largest, with an area of 4,210 square miles, and has given its name to the whole group. The islands are of volcanic formation. There are two active volcanoes, Kilauea and Mauna Loa. Mauna Kea, the highest point on Hawaii, is 13,825 feet high; the mountains generally range from 4,000 to 5,000 feet. Their sides abound in forests containing an abundance of timber and ornamental woods. Although the islands are situated within the tropic zone, the heat is tempered by the trade winds and ocean currents, and the average temperature is no higher than that of many places situated much further north. A large proportion of the population is Japanese and Chinese. The Chinese in 1910 numbered 21,674, the Japanese 79,674. The native race is dying out, there being but 26,041 of unmixed blood in the year 1910, a decrease of 3,746 since 1900. There are now 23,000 Portuguese resident in the islands.

The chief agricultural products are sugar, rice, coffee, fruits, and vegetables. The production of sugar in 1916 was 592,763 tons. Nearly 250,000 acres of land is devoted to this crop. Bananas are an important product, over 100,000 bunches being exported annually, with a capacity of many times that number. The culture and canning of pineapples is a large and rapidly developing industry, one of the canneries being the largest fruit preserving plant in the world. Pineapples to the value of \$4,000,000 were exported in 1914. Rubber culture is a new industry, but has made good progress, about 500,000 trees having been planted in the past four years, and they are all thriving. The culture of cotton is increasing, and sisal hemp is one of the established products. The United States Experiment Station has been conducting a series of experiments in tobacco culture, and has discovered that a large area of the soil is suitable for this crop, which will probably be one of the staple products in the near future. Cattle and sheep are raised in sufficient numbers to supply the needs of the islands. Large quantities of commercial fertilizers are manufactured.

The United States practically monopolizes the trade of Hawaii. The total exports from July 1, 1915, to June 30, 1916, to the United States, were valued at \$64,445,631. Sugar forms nearly 80 per cent of the exports and canned pineapples 12 per cent. The imports from the United States reached a total value of \$28,029,681. The principal imports were bread stuffs, textiles and iron and steel goods. There were exported to foreign countries, during the same period, goods to the value of \$225,221; imported, \$8,068,529. There are excellent roads throughout the islands and seven steam railroads, three on Hawaii, two on Oahu, one on Kauai and one on Maui. The steam railroads have a total length of 296.69 miles.

The number of newspapers and periodicals published in five towns of Hawaii is 39, including 9 daily, 3 three times a week, 2 semi-weekly, 15 weekly and 10 monthly.

# PHILIPPINE ISLANDS

Population \*8,650,937  
(U. S. Census Bureau estimate for 1914)

## CAPITAL, MANILA

An important group of islands in the Malay Archipelago, lying mainly between latitude 32° and 19° 38' north and longitude 117° and 126° east. They number over 3,000, large and small, about half of them being known by name. They range in area from the size of New York state down to tiny islets of less than a square mile, nearly ninety per cent. being in the latter class. The total land area is about 115,000 square miles, approximately the size of New York and New England. The principal islands are Luzon, 40,969 square miles, nearly 4,000,000 people; Mindanao, 36,292 square miles, 500,000 people; Samar, 5,081 square miles, 225,000 people; Panay, 4,611 square miles, 750,000 people; Mindoro, 3,811 square miles, 30,000 people; Leyte, 2,732 square miles, 360,000 people; Negros, 4,881 square miles, 475,000 people; Palawan, 4,027 square miles, — people; Cebu, 1,762 square miles, 600,000 people; Bohol, about 1,200 square miles, 250,000 people. There are many diverse races among the people, speaking as many different dialects. The Visayans are the most numerous, numbering about 3,250,000. Next in order come the Tagalogs, 1,500,000, and the Ilocanos, 800,000. Americans number eight or nine thousand; foreigners, chiefly Chinese, about 50,000. Education and religion have made much progress through the islands, and fully ninety per cent. of the people may be considered as being, to some extent, civilized. One beneficial result of American occupation has been the establishment of schools. There are now over 10,000 teachers in primary schools, more than ninety-five per cent. of them being Filipinos, and hundreds of new schools are opened each year. There are about 600 postoffices in the islands and 437 postal savings banks, with 36,000 accounts. All but about 14 per cent. of the depositors are Filipinos. There are about 6,000 miles of telegraph and cable line and 700 miles of railroad in operation.

Agriculture is the chief industry. At present not more than twelve per cent. of the land is under cultivation, but this will, no doubt, be largely extended, as the soil is remarkably fertile, and a great proportion of the total area of the islands is suitable for tillage. One of the chief products is hemp, which is known throughout the world as Manila hemp. The crop from 800,000 acres in 1914 was 150,000 tons, valued at \$15,000,000. Tobacco of good quality is grown almost everywhere. The other principal products are rice, corn, sugar, coconuts, spices, cacao and timber, including dye-woods. Practically all of the forest land is in forest reserves under the control of the Bureau of Forestry of the Philippines. The reserves have a total area of 59,500 square miles, and less than one per cent. of the forest lands are privately controlled. The production of crude sugar in 1914 was 330,000 tons; of corn, over 12,500,000 bushels (shelled), of coffee 1,400,000 pounds, of rice about 46,000,000 bushels; of tobacco, 102,000,000 pounds. There are 49,190,338 coconut trees in the coconut plantations. Their product for 1914 was 591,266,399 nuts, of which 63,057,700 were consumed for food. Other coconut products (for 1914) were 118,122 tons of copra, having a value of \$8,692,543; 900,000 gallons of oil, value \$812,706 and 54,048,393 liters (about 13,500,000 gallons) of tuba. Tuba is the sap of the coconut palm, chiefly used as a fermented beverage. Its value is about thirteen cents in American money per gallon and the 1914 output was worth about \$1,760,551. Copra is dried coconut meat, the material from which desiccated or shredded coconut, coconut oil, etc., are made. The total value of the coconut products was nearly \$12,500,000. Cacao is grown in the southern islands, chiefly in Mindanao. The 1914 crop produced 1,250,000 pounds.

The principal manufacturing industries are those connected with the manufacture of hemp, cigars and tobacco. The commerce is considerable, the imports for the year ending June 30th, 1916, from the United States being valued at \$23,804,367 and from other countries \$22,169,258. The exports to the United States were valued at \$23,838,526, to foreign countries \$32,625,505. Great Britain, China and Spain have most of the foreign trade. There were entered, in 1912, 862 vessels, and cleared 872, with a total tonnage, going and coming, of 3,378,992. Gold was mined to the value of \$1,099,300 in 1914. Silver, copper, iron, lead, coal, sulphur and petroleum are also found, but not in large quantities. Salt is manufactured in considerable quantities, by the evaporation of sea-water and that from saline springs by an old process in use among the natives from time immemorial. By the adoption of modern methods and machinery the salt industry may be made one of great importance.

The number of newspapers and periodicals published in 7 towns of the Philippines is 42, including 20 daily, 1 three times a week, 4 semi-weekly, 8 weekly, 1 three times a month, 6 monthly and 2 quarterly.

## ALBERTA

Population.....374,663

PROVINCIAL CAPITAL, EDMONTON

The PROVINCE OF ALBERTA, formerly a part of the Northwest Territories, is bounded on the north by the parallel of 60° north, on the west by British Columbia, on the south by the 49th parallel (the boundary of the United States) and on the east by the Province of Saskatchewan. Its length from north to south is about 800 miles, its greatest breadth from east to west about 400 miles and its land area is 161,872,000 acres. 100,000,000 acres of this, about 60 per cent. of the whole, is capable of cultivation. The northern half is unsettled except for the scattered trading stations of the Hudson's Bay Company.

The southern portion has for a number of years been the grazing ground of large herds of cattle, and is now attaining prominence in agriculture, especially in grain growing, for which the soil and climate seem peculiarly adapted, wheat in particular being of the finest quality. The number of farms in 1911 was 61,496, an increase of 52,000 over the 1901 census, and the area of land in occupied farms increased in the same period from 2,735,680 acres to 17,751,899 acres and the growth still continues. An enlightened system of taxation, based solely on site values, is in force in many districts and attracts a desirable class of energetic citizens, as the farmer who develops his farm and improves and increases his stock, buildings, etc., is not compelled to pay an extra tax for doing so, as in most communities elsewhere. In 1916 (a year of short grain crops), the wheat crop was 48,738,000 bushels, oats 77,283,000 bushels, barley 8,090,000 bushels, rye 523,000 bushels. Potatoes produced 4,602,000 bushels and flax seed 1,114,000 bushels, turnips, etc., 1,148,000 bushels, hay 348,000 tons. Ninety-six varieties of wild grasses have been identified, of which forty-six make valuable hay. They furnish an abundant supply and very little grass seed is sown. Alfalfa, however, has been tried with success and will, no doubt, come into general use, as the open range is taken up and devoted to farming. The 1916 crop was 32,000 tons. Live stock forms an important part of the wealth of the province, there being 544,772 horses, 229,696 swine, 238,579 sheep, 183,974 dairy cows and 660,000 other cattle in 1915. The creameries and cheese factories are important industries. What is said to be the largest irrigation system in the world is now being constructed in this province by the Canadian Pacific Railway, and will add 1,400,000 acres to the tillable area. It will cost about \$8,000,000, and will have over fifty miles of main canals and nearly 3,000 miles of lateral canals and ditches.

Timber is plentiful in the western portion, chiefly spruce, poplar, tamarack and pine of medium size. In the Rocky mountain section, in the extreme western portion of the province, large deposits of coal are found, also petroleum, natural gas, gold, iron and zinc. The coal is being worked, and the annual production is steadily increasing. In 1916 the coal mines produced 4,563,020 tons, chiefly bituminous. Natural gas produced 6,818,181,000 feet. The total mineral production for 1916 was valued at \$13,336,702. Nearly 1,000,000 barrels of cement and about 90,000,000 bricks were made in 1913. The fur industry in the north is of great value, and a large business is done in Edmonton in supplies for this industry, and in shipping its products. The fishery products in 1916, mostly whitefish, were valued at \$94,134. The province is developing rapidly, its population having increased from 73,022 in 1901 to 374,663 in 1911, and the land is being taken up at the rate of 2,000 acres a day.

The number of newspapers and periodicals published in 95 towns of Alberta is 121, including 7 daily, 1 semi-weekly, 106 weekly, 3 semi-monthly and 4 monthly.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM A NON-ADVERTISER:—

Very useful owing to the maps and  
other information which help our  
Company.

## BRITISH COLUMBIA

Population.....392,480

### PROVINCIAL CAPITAL, VICTORIA

BRITISH COLUMBIA is bounded on the north by the parallel of 60° north, on the west by the Pacific Ocean and Alaska, on the south by the 49th parallel (the boundary of the United States), on the east by Alberta. It has an area of 390,344 square miles. It includes a number of islands, the largest being Vancouver, which contains the capital of the province, and has an area of about 14,000 square miles. The province is about 700 miles long and 500 wide. The Fraser river, its principal stream, is 800 miles long, and 800 yards wide at its mouth, its valley containing much the greater part of the arable land. The climate in the western half is generally mild, the eastern portion reaching greater extremes, both of heat and cold. The rainfall, except in some limited districts in the southeast, is abundant. There is unlimited water power everywhere. The surface is largely mountainous and densely wooded, producing trees of enormous size.

The forest area is about 180,000,000 acres. Lumbering is one of the principal industries, and as the land becomes cleared the soil is found very fertile and a considerable area is well adapted for agriculture of all kinds. The product of the lumber industry in 1913 was worth \$33,650,000. In normal times the lumber industries pay half of the wages in the province. The manufacture of paper and pulp is becoming important. Douglas fir, cedar, hemlock and spruce furnish the bulk of the lumber.

The number of farms is increasing, and agriculture will soon be one of the prominent industries. The 1916 harvest included 495,000 bushels of wheat, 3,630,600 of oats, 124,000 of barley, 130,000 of other grains, 2,892,000 of potatoes, 1,850,000 of turnips, 467,000 tons of hay and 36,000 tons of alfalfa. The fruit growing industry has become a very important one. Tobacco has been successfully grown in the Okanagan Valley. The country is well suited for stock raising, which industry is gradually increasing.

In minerals, this province stands first in copper and lead; second in gold and silver and third in coal. Gold has been found in large quantities, and mining is one of the chief industries. Copper and iron are widely distributed, and many other minerals are found. The mineral production in 1916, exceeded only by Ontario, reached a total value of \$40,191,744, of which gold, \$4,520,868; copper, 65,086,119 pounds and coal, 2,582,737 tons, produced the greater portion. The lead produced was 45,367,055 pounds; silver, 3,235,764 ounces; coke, 299,896 tons; zinc 21,740,950 pounds. Platinum, antimony, tin and mercury are found in small quantities. In addition to the coal on Vancouver Island, at present the chief seat of this industry, there have been already discovered on the mainland over 5,000 square miles of coal-bearing lands. The total mineral wealth of the province is beyond computation, for many thousands of square miles of territory have never been surveyed or prospected, and large regions known to be rich in minerals are almost inaccessible at present, and have barely been touched. Of non-metallic minerals there are abundant supplies of building stone of many kinds, brick, fire and pottery clays, limestone and cement rock.

The fisheries are the most valuable in the Dominion, salmon forming by far the greatest portion of the catch, followed by halibut, herring and cod. The 1915 catch of salmon had a value of \$8,018,835; halibut, \$1,561,626; herring, \$876,651; cod, \$366,957. The whale fisheries produce over \$300,000 annually. The total value of the catch of all kinds in the year ending March 31st, 1916, was \$14,536,320. The capital invested is \$8,829,740 and 18,328 persons are engaged in the industry. Fur bearing animals are very numerous. The fur sealing industry has decreased greatly since the Behring Sea fishing has been restricted. Some seals are still taken off the coast of British Columbia, and a few sea otter pelts are turned in each year, although the animal is almost extinct. The principal town on the mainland is Vancouver, the terminus of the Canadian Pacific Railway.

The number of newspapers and periodicals published in British Columbia is 87, including 16 daily, 1 three times a week, 5 semi-weekly, 49 weekly, 1 semi-monthly and 15 monthly. The places of publication number 48.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM ANOTHER BIG ADVERTISER.—

This book is in constant use in our  
Advertising Department. We could  
not do without it.

# MANITOBA

Population .....455,614

## PROVINCIAL CAPITAL, WINNIPEG

MANITOBA extends from the 49th to the 60th parallel of north latitude, and is bounded south by Minnesota and North Dakota, east by Ontario and Hudson Bay, north by Mackenzie Territory and west by Saskatchewan, and has an area of about 251,831 square miles, of which about 20,000 square miles is water.

The settled portion lies almost wholly south of the 52d parallel. Its surface is principally prairie land, with groves of timber along the rivers and streams. Over 6,000,000 acres are under cultivation at present, in more than 50,000 farms. The area devoted to agriculture is increasing rapidly, as thousands of new settlers take up land in the province each year, coming from all the northern European countries. Many also come from the United States. The soil is classed among the richest in the world, and produces the finest wheat known in the market. Almost all other cereals grow and ripen in great abundance, also vegetables and small fruits of all kinds suited to the latitude. The 1916 crops were: oats, 41,625,000 bushels; wheat, 27,714,000; barley, 13,815,000 (all being far below the average, owing to an unfavorable season); rye, 560,000; other grains, 45,000; flaxseed, 237,000; potatoes, 4,760,000; turnips, etc., 1,297,000; hay, 316,000 tons; alfalfa, 13,000 tons. Field crops in 1916 had a total value of \$77,435,300. There are numerous elevators and warehouses scattered through the province and new ones are constantly being erected to take care of the immense crops of grain. In 1912 there were 3,193 threshing outfits operated in this province. The province has been prominent as a most favorable district for the cattle raising industry for many years. The stock returns for 1915 show 317,847 horses, 157,491 dairy cows, 246,603 other cattle and 163,308 hogs. Dairy products are increasing in amount year by year, the annual output of butter being over 9,000,000 pounds. Irrigation is not needed, the work necessary for improving and adding to the area of tillable land consisting chiefly in reclaiming a large amount of first-class land which has a surplus of water.

Coal of the lignitic variety is abundant, though mining operations so far have been inconsiderable. There are abundant deposits of clay, sand, gypsum, building stone, etc. The mineral production for 1916 was \$1,819,921. The Laurentian district of the north and east is thought to be rich in other minerals, though it is yet unexplored. This region gives a rich yield of furs, while its streams are full of fish.

Winnipeg is on the main line of the Canadian Pacific Railway, which passes through Manitoba from east to west, and from it several railways branch out into the province and the United States, the province having a total of over four thousand miles of railroad. The means of water communication are also very considerable.

Manufacturing industries are growing in size and number, especially those using the products of the province, as flour and oatmeal mills, meat packing houses, breweries, etc. The manufactures are large and rapidly growing larger, and \$39,000,000 worth of goods was the 1912 output of the city of Winnipeg alone. Flour and other mill products reached \$8,809,833, dressed meats and meat products \$2,338,000, lumber and forest products, nearly \$3,000,000. The fisheries are a valuable asset, their 1916 product being worth nearly \$742,925.

The number of newspapers and periodicals published in 67 of the cities and towns of Manitoba is 134, including 7 daily, 1 semi-weekly, 99 weekly, 6 semi-monthly and 21 monthly.

<b>WINNIPEG</b> , pop. 136,035 (E 7); <b>WINNIPEG ELEC. DIST. (E.)</b> , pop. 128,157, and <b>SELKIRK ELEC. DIST. (E.)</b> , pop. 53,091. Capital of the Province. On Red R., at junc. of the Assiniboine Riv. Gr. Trunk Pac.; Can. Pac.; Can. N'thrn and other R.Rs. Tel. Exp. Banks. Surrounded by a fertile prairie region, particularly adapted to wheat. Chief industries flour, saw, planing, grist and oat meal mills, foundries, machine shops, breweries, soap, biscuit, confectionery, boot, shoe pickle, sauce and aerated water factories, tannery, cured meats, linsed oil, etc. The western offices of almost all Canada's largest manufacturing, commercial and financial organizations are situated in Winnipeg. It is the metropolis of western Canada, and does a wholesale business of over \$140,000,000 a year. The freight, incoming and outgoing, averages nearly 2,500,000 tons each year. Winnipeg is the leading grain market on the continent. Its receipts of grain for the year 1912 were 143,682,750 bushels of wheat, 51,633,000 of oats and 10,049,800 of barley. A dam across the Red River of the North with a system of locks, has made it possible for vessels of considerable size to reach the city from Lake Winnipeg, fifty-two miles distant. The water power of Lac du Bois, east of the city, is being developed, and when the work is finished will supply over 500,000 horse power, with electrical distribution. University of Manitoba, Manitoba College, St. John's College (Episcopal Divinity).

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM A WESTERN ADVERTISER:—

The American Newspaper Annual  
and Directory is of great use to us.  
There is not a day that we do not use it.

# SASKATCHEWAN

Population.....492,432

## PROVINCIAL CAPITAL, REGINA

The PROVINCE OF SASKATCHEWAN, formerly a part of the Northwest Territories, is bounded on the north by the parallel of 60° north, on the west by the Province of Alberta, on the south by the 49th parallel (the boundary of the United States), and on the east by Manitoba. Its length from north to south is about 760 miles, and its breadth 320 miles. Its land area is 242,832 square miles. North of the 54th parallel the country is a region of lakes, swamps and forests, and is practically uninhabited, except by Indians, the white population consisting chiefly of the employes of the Hudson's Bay Company. The annual production of furs from this region is very large. The province is well watered, having numerous streams, lakes and rivers, some navigable. The climate is healthful, although the winters are somewhat severe. The summer days are long, and the great duration of the sunlight brings the crops to maturity in a shorter season than in many countries apparently more favorably situated. The rainfall, averaging 16.68 inches, is usually fully sufficient, especially as the heaviest rains occur during the growing period of the crops. The lumber industry, chiefly handling spruce and small pine, is attaining considerable importance.

The acreage under cultivation is increasing at the rate of over 1,000,000 acres yearly, although there is still about 90 per cent. of the tillable land open to settlement. The 1911 census showed 96,371 farms, more than seven times as many as in 1900, containing a total of 28,642,985 acres, and the area of improved land was nearly ten times as great, being nearly 12,000,000 acres. About 60 per cent. of the land, or nearly 100,000,000 acres, is capable of cultivation. The total value of the field crops for 1916 was \$248,018,300, more than double the value of four years before, and more than 30 per cent. of the total value of all field crops in Canada, against a little over \$4,500,000 in 1900, and the yield per acre of all the grain crops has almost doubled since that year. The southern portion is unexcelled as a grain growing district. The wheat production in 1916 (little more than half the 1915 crop) was 123,448,000 bushels; oats (also a short crop), 135,971,000 bushels; barley 10,062,000 bushels; potatoes, 5,280,000 bushels; turnips, etc., 3,245,000 bushels, and flaxseed 5,724,000 bushels. In addition to these, large quantities of hay, sugar beets and other crops were grown. There are over 900 grain elevators in the province, having a total capacity of 29,314,000 bushels. Live stock is also of considerable value, there being, in 1915, 680,062 horses and 755,293 cattle, 211,684 of these being dairy cows, 133,311 sheep, 411,324 hogs and about 5,000,000 head of poultry. The provincial government allows a subsidy to co-operative creameries and the industry is increasing so fast that figures given early in the year afford no idea of conditions at the end of the year. The output has increased more than 1,000 per cent. in four years. Eighty per cent. of the population is engaged in the various branches of agriculture.

Coal is mined to some extent, the 1916 output being 240,107 tons and there are deposits of petroleum, salt, sulphur and various other minerals. There were in December, 1912, 4,617 miles of railroads in the province, and extensions and branches are being built as needed. Many thousands of new citizens settle in the province each year, by far the greater number being farmers. The fishery industry reported in 1916 a production valued at \$165,888.

The number of newspapers and periodicals published in 145 towns of Saskatchewan is 184, including 7 daily, 3 semi-weekly, 151 weekly and 3 monthly.

# YUKON TERRITORY

Population..... **8,512**

PROVINCIAL CAPITAL, DAWSON

**YUKON TERRITORY** is bounded on the north by the Arctic Ocean and Mackenzie Territory, on the east by Mackenzie Territory, on the south by Alaska and British Columbia, and on the west by Alaska. Its extreme length from north to south is about 675 miles, its greatest breadth about 625 miles, and its land area 206,427 square miles.

Yukon contains the great Klondike gold-producing region. Practically the only industry in Yukon is mining, chiefly for gold; silver and copper are mined to some extent. The amount of gold produced has been decreasing for some years past. In 1900 the value of the output was \$22,275,000. In succeeding years it dropped rapidly, reaching in 1907 the low-water mark of \$3,150,000; since then it has increased. In 1916 it was \$4,391,669. The decrease was due to the deposits of gold accessible to the methods of placer mining, formerly used, having become, to a considerable extent, exhausted. Many companies have been formed recently to prosecute the search for this metal by the more modern methods of hydraulic mining and dredging, also quartz mining. Much machinery has been imported for these purposes, and in a few years the output will no doubt be increased. Silver also decreased from \$177,857 in 1900 to \$23,000 in 1909. In 1916 it was \$236,686. The copper production was 3,980,640 pounds, about seven times that of the preceding year. The production of coal is variable. In 1911 it was 2,840 tons; in 1912, 9,245 tons; in 1913, 19,722 tons. In 1915 it dropped to 9,724 tons and 3,300 tons in 1916. The total mineral production for 1916 was \$5,805,687.

There are a number of successful "truck" farms, on which a considerable portion of the vegetables used in the territory are grown, but practically all other agricultural products must be imported. Experiments are being carried on to determine what crops are best suited to the soil and conditions. Oats and barley have been successfully grown. The varieties of wheat so far tested have attained good growth, but have failed to ripen the kernels. Vegetables started under glass, and set out when the summer opens, grow to a large size, the almost continuous sunlight being highly favorable to rapid growth. The fisheries in 1916 reported a product, chiefly white fish and salmon, valued at \$63,730. The population, which was 27,219 in 1901, has decreased, with the decrease of gold production, to 8,512.

Three papers are published in two towns in the Territory, including 1 daily and 2 weekly.

(For map see Alaska)

# NEW BRUNSWICK

Population ..... 351,889

## PROVINCIAL CAPITAL, FREDERICTON

NEW BRUNSWICK is bounded north by Quebec, east by the Gulf of St. Lawrence, west and south by the Bay of Fundy, part of Nova Scotia, and Maine. It is 210 miles in length and 180 miles in breadth, and has a coast line of about 500 miles. Its area is 27,174 square miles. Surface generally is undulating, and there is scarcely an elevation on the east coast exceeding 900 feet, while on the north there is a district of mountainous character, consisting of hills of considerable elevation, covered with dense forest, of which there is about 7,500,000 acres, and surrounded by fertile valleys and table lands. The forests are extensive, and lumbering is one of the principal industries. The stand of available timber is estimated at 22 billion feet. The pulp wood exports in 1910 were 122,698 cords.

The climate is healthful and the soil fertile, with great agricultural capabilities. The principal cereals, legumes, root plants, and vegetables are grown, with apples and the small fruits. The chief grain crop is oats, of which in 1916, 6,039,000 bushels were grown. Buckwheat is also largely grown, the 1916 crop being 1,206,000 bushels. Wheat produced 242,000 bushels. Potatoes and turnips produced 7,488,000 and 3,165,000 bushels respectively; hay, 850,000 tons. The manufacture of cheese, for which New Brunswick has long been famous, is falling off, the production having decreased from 1,910,733 pounds in 1902 to 1,044,825 pounds in 1911, a loss of over 40 per cent. In 1911 there were 16 creameries which made 844,000 pounds of butter. Much attention is given to fruit culture. The area of land under cultivation and the number of farms show a steady increase each year. The live stock reports for 1915 show 198,102 cattle, of which 101,865 were dairy cows, 65,827 horses, 73,533 hogs and 111,026 sheep.

Ship building, formerly extensively carried on, has declined of late years, owing to the modern practice of building almost all large ships of iron. The fisheries, chiefly lobster (which leads in value), salmon, mackerel, cod, sardine, smelt, herring and oyster are third in value among the provinces. About 22,000 persons are engaged in this industry and the 1916 product was worth \$4,737,145.

Coal, iron, antimony, copper, manganese, salt, petroleum, natural gas and other minerals are found in considerable quantities. The total mineral production in 1916 was valued at \$878,446.

Manufactures are chiefly sawed lumber and wooden wares, cotton and woolen goods, refined sugar, rope and cordage, canned goods, especially salmon and lobster, polished granite, boots and shoes, edge tools, furniture, paper, castings, machinery, locomotives, etc. The total value of manufactured goods in 1910 was \$35,422,302, an increase of over sixty per cent. over 1900. Chief exports—lumber, fish, cotton goods, potatoes, butter and eggs, beef and mutton, gypsum, hay, etc. Game and fish, especially salmon, are abundant, and it is a favorite resort for hunters and anglers from the other provinces and the United States.

The number of newspapers and periodicals published in New Brunswick is 49, including 8 daily, 1 three times a week, 11 semi-weekly, 21 weekly, 1 semi-monthly and 7 monthly. The places of publication number 16.

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM A LARGE EDUCATIONAL INSTITUTION:—

We appreciate highly the value of  
the Directory and in our work we  
find it extremely useful.

# NOVA SCOTIA

Population.....492,338

## PROVINCIAL CAPITAL, HALIFAX

NOVA SCOTIA consists of a narrow peninsula, connected with New Brunswick by a narrow isthmus about 16 miles wide, and of the island of Cape Breton. It is bounded on the north by the Gulf of St. Lawrence, on the east and south by the Atlantic, on the west by the Bay of Fundy and New Brunswick. It is 800 miles long and from 80 to 100 wide, with an area of 20,907 square miles, or about 13,000,000 acres, of which 5,000,000 are fit for tillage. The rest is nearly all covered with forest, from which as much as 400,000,000 feet of lumber are cut each year. The wood is mostly spruce, fir, hemlock and pine, with some birch, oak and maple. A great part of the wood is used in the ship-building industries of the province. Much is also used for the manufacture of pulp, which is exported to paper mills in the other provinces and the United States. The lumber cut in 1911 was valued at \$2,000,000. The Cobequid Range runs through the interior, the soil on both sides of it being very fertile; which is also the case in the beautiful valley of the Annapolis river.

The soil is rich and agricultural productions, such as wheat, rye, oats, barley, buckwheat, corn, root crops, vegetables in general, and fruit grow abundantly. The farmers are industrious and prosperous, and all but a very small percentage own their own farms. Oats are largely grown, the 1916 crop being 4,081,000 bushels, that of potatoes 6,935,000 bushels, turnips 3,686,000 bushels. The two latter crops were, in that year, much below average. Potatoes in 1912 produced 3,447,000 bushels, turnips 5,606,000 bushels. The dairy and live stock products are worth \$8,000,000 per year. Farm animals in 1915 were: Horses, 63,244; dairy cows, 128,814; other cattle, 144,458; sheep, 205,542, and swine, 53,402. Fruit growing, especially in the Annapolis valley, is an industry of great importance. Apples are exported in large quantities, being in great demand in England. The crop of this fruit ranges from 750,000 to 1,000,000 barrels annually, and is worth over \$2,000,000.

Nova Scotia is third among the provinces in mineral wealth. The principal minerals are coal, iron and gold. Coal is abundant, and nearly half of Canada's total production comes from Nova Scotia's mines. Over 13,000 men are employed in the coal mining industry, and 6,894,728 tons were dug in 1916. In coke, Nova Scotia leads, producing in 1916 653,836 tons. Canada's total output was 1,443,782 tons. The pig iron output of Nova Scotia was 470,055 tons. Gold was produced to the value of \$108,356. Iron is found in large quantities and is practically inexhaustible; it is of a fine quality and the ore commands the highest price in the market. Small quantities of antimony, tin and tungsten have been found. Manganese, gypsum, and roofing slate abound. The minerals produced in 1916 were worth \$19,963,985.

Manufactures are numerous, and include railroad cars, coarse cloth, flannels, blankets, carpets, boots and shoes, wood pulp, ships and boats, saddlery, furniture and farm implements. The manufactured products have more than doubled in ten years, and the output for 1912 was over \$70,000,000. The fisheries are second only to British Columbia, the 1916 catch being worth \$9,166,861. About 30,000 people are engaged in this industry, with an equipment valued at nearly \$8,000,000. Lobsters, cod, herring, mackerel and haddock are the leading species of fish. Hake and halibut are also abundant.

The capital city, Halifax, is situated on the west side of the harbor of that name, and contains nearly 50,000 inhabitants. The harbor is one of the finest in existence, over half a mile in width at its narrowest part, and large enough to contain the navies of the world. Halifax is the winter port for the direct mail steamers, and has direct communication with Liverpool, Boston, Baltimore, Quebec and the West Indies. As a summer resort it is yearly becoming better known its suburbs furnish the pleasantest of drives and superior bathing facilities, and its public gardens have been pronounced by those who have visited them among the most beautiful on this side of the Atlantic.

The number of newspapers and periodicals published in Nova Scotia is 69, including 13 daily, 1 three times a week, 5 semi-weekly, 37 weekly, 1 fortnightly, 4 semi-monthly and 3 monthly. The places of publication number 32.

(For Map see New Brunswick.)

THE AMERICAN NEWSPAPER  
ANNUAL AND DIRECTORY

FROM A WESTERN FARM PAPER:—

I desire to acknowledge receipt of your American Newspaper Annual and Directory, and to say that this is the most complete and the best publication of its kind we have ever seen.

# ONTARIO

Population.....2,523,274

PROVINCIAL CAPITAL, TORONTO

ONTARIO is bounded on the east by Quebec, north by Hudson Bay and Manitoba, south-west and south by Minnesota, the Great Lakes and St. Lawrence river, west by Manitoba, and has an area of 407,252 square miles, exclusive of its water surface. It is the most populous and wealthy province of the Dominion of Canada, and contains many large cities. Ottawa, population (1911) 87,062, is the seat of government and capital of the Dominion. The surface is mostly undulating, traversed by the Laurentian Hills and Blue Mountains, but except in the neighborhood of Lake Superior and Georgian Bay these nowhere exceed a few hundred feet in height.

The agricultural resources are very great. Three-fourths of the present area of habitation is fertile, while an immense region beyond is capable of cultivation. New Ontario, as the northern and the northwestern districts are called, has scarcely been touched by the plow, but settlement is now beginning, and the farms which have been cut out of the forests show that it will be fully equal to any part of Canada in productiveness. Oats are the chief grain crop, amounting in 1915 to 122,810,000 bushels. The 1916 crop was short, as were the grain crops in most of the western states and provinces, being only 50,771,000 bushels. In the same year barley produced 7,498,000 bushels, against 15,369,000 in 1915, wheat 17,931,000 (about half a crop), buckwheat 2,538,000, corn 5,960,000, rye 1,208,000, peas 1,796,000, flaxseed 42,000, potatoes 8,118,000, turnips 20,467,000, all far below the usual production. Sugar beets, alfalfa, fodder corn and hay yield heavily. The total value of the field crops was \$190,646,000, nearly a quarter of Canada's total, but still \$17,000,000 less than 1915. Two of Canada's three beet sugar factories are in Ontario. The produce of all crops per acre is usually well above the average in other countries. There are no more successful horticulturists than those of Ontario, who produce about seventy-five per cent of all the fruit grown in Canada. About 850,000 acres are devoted to fruit growing, and almost all the fruits of the temperate zone flourish luxuriantly. The apple is the greatest fruit crop. In addition to those used in the province, over 1,000,000 barrels of apples are exported, chiefly to Great Britain, although many go to the western provinces and to the United States. Grapes are another large crop. The 1913 crop was 36,000 tons, about  $3\frac{1}{4}$  tons per acre. Tobacco has been successfully grown in the southern part for some years, chiefly in Essex and Kent Counties. The annual crop is over 7,000,000 pounds, about two-thirds of Canada's total, the remainder coming from Quebec. Some flax is grown for fibre. Horses and cattle are raised in large numbers, and of the finest quality, and have taken many first prizes at international shows. The live stock included in 1915 903,527 horses, 1,077,808 dairy cows, 935,606 other cattle, 611,789 sheep, 1,469,573 swine. The 1912 wool clip was 3,669,419 pounds. The dairy industry is very large and much care is given to improving the breed of dairy cattle. There are over a thousand cheese factories and in 1910 they made 157,631,623 pounds of cheese, worth \$14,845,661. The total value of dairy products ranges from thirty to thirty-five million dollars each year.

There are over 100,000 square miles of forest land in the province, and the timber cut in 1911 was worth \$30,011,000. There are large areas of spruce, which is cut for pulp wood, and the pulp and paper mills of the province use up 300,000,000 cords of pulp wood in a single year. The fisheries, chiefly on the great lakes, employ over 4,000 persons, and the 1916 catch was worth \$3,341,182.

The mineral treasures are exceedingly rich and varied. The total mineral production for Canada in 1916 had a value of \$177,357,454, of which Ontario's share was over forty-five per cent., being \$80,379,352. More than half of this was represented by silver, 21,975,942 ounces, worth \$14,429,623, 85 per cent. of the total for the Dominion, and nickel, 82,958,564 pounds, worth \$29,035,497. Ontario is the only province where nickel is found, and it produces about four-fifths of the world's supply. It is obtained almost entirely from the nickel-copper ores of the Sudbury district. Cobalt is another mineral of which the world's needs are supplied principally by Ontario. It is a valuable by-product of the silver mines of the Cobalt region. Arsenic is another important product. The output of gold in 1916 was \$10,122,563, being 52.8 per cent. of Canada's total; copper, 44,997,035 pounds; cobalt, 841,859 pounds; petroleum, 196,778 barrels; natural gas, 17,838,318,000 feet; pig iron, 699,202 tons; salt, 124,033 tons; pyrites, 177,552 tons. Mica is extensively worked. Marble, said to be equal to that of Carrara, is quarried. Galena, plumbago, and various other minerals exist.

The water power is widely distributed and abundant. Manufactures are rapidly increasing in number and importance, among the principal being agricultural implements of all kinds, wagons, carriages, railroad stock (including locomotives), cotton and woolen goods, leather, furniture, paper and pulp, soap, wooden ware, etc. Ontario is the first province in manufactures. Transportation facilities are abundant. In addition to the great trunk lines, the Grand Trunk Railway and Canadian Pacific, every important section has competing lines stretching out to it. The province has a magnificent system of waterways, both natural and artificial. It has over 1,300 miles of water front on the lakes and the St. Lawrence. Surveys are being made for a ship canal across the province, to connect Georgian Bay, on Lake Huron, with Montreal. It is to have a depth of twenty-two feet, and in addition to its use as a canal is expected to produce power to the extent of over a million horse power.

The number of newspapers and periodicals published in Ontario is 609, including 51 daily, three times a week, 16 semi-weekly, 395 weekly, 1 fortnightly, 9 semi-monthly, 126 monthly bi-monthly and 8 quarterly. The places of publication number 268.

# PRINCE EDWARD ISLAND

Population ..... 93,728

PROVINCIAL CAPITAL, CHARLOTTETOWN

PRINCE EDWARD ISLAND is bounded north by the Gulf of St. Lawrence, east by Cape Breton Island, south by Nova Scotia proper, and west by New Brunswick. The greatest length is 180 miles; greatest breadth, 34 miles; least breadth, 4 miles; area about 2,134 square miles. The surface is gently undulating, a large part of it formerly forest, but the forest area has been greatly reduced by lumbering operations, fires, etc.

The soil is a light loam, not known to contain available minerals, but remarkably rich and particularly favorable for the growth of grasses, and practically the whole is fit for cultivation. The province is essentially agricultural. There are 14,369 farms, with 80 per cent. of the population resident thereon. Principal productions are oats, wheat, barley and other grains, hay, pork, potatoes, butter, cheese, starch, horses, sheep, etc. Oats, as in all the eastern provinces, are the chief grain crop, and produced 7,413,000 bushels in 1916. The potato crop for that year was 6,386,000 bushels, nearly double that of 1915. Turnips are an important root crop, being much in requisition for the dairy cattle. The 1916 crop was 8,816,000 bushels. Hay made 338,000 tons. The cattle in 1915 numbered 106,546, 59,508 being dairy cows; sheep, 86,840 and hogs, 40,792. The production of butter and cheese is very large, the 1910 output of the cheese factories being 3,293,765 pounds, and that of the creameries being 670,913 pounds of butter, in addition to that produced on the farms. Apples are an important crop. The latest count shows 205,979 apple trees in the province.

There are valuable fisheries, especially of lobsters, smelts, cod, herring, mackerel and oysters; upwards of twenty thousand barrels of oysters and nearly 3,000,000 pounds of canned lobsters being shipped annually. The fisheries in 1916 produced a value of \$933,682, the lobster production being the most valuable. In late years a new industry, that of breeding black and silver foxes for their fur, has taken root in Canada. In this industry Prince Edward Island leads. The "fur farms" reported in 1912 numbered 241 for the whole of Canada, and held in captivity 2,500 black, silver, cross and red foxes. Prince Edward Island had 200 of the 241 farms and 1,800 of the animals. As a high grade black fox skin has sold for as much as \$2,500, the industry will probably be much further extended in the future.

Tweeds, flannels, pottery, boots and shoes, agricultural implements and domestic articles, sufficient only for home use, are manufactured; shipbuilding was formerly carried on to a considerable extent, but has latterly become much reduced.

The number of newspapers and periodicals published in Prince Edward Island is 10, including 4 daily and 6 weekly. The places of publication number 2.

(For map see New Brunswick.)

# QUEBEC

Population ..... 2,002,712

## PROVINCIAL CAPITAL, QUEBEC

QUEBEC is bounded north by Hudson Bay, east by Labrador and the Gulf of St. Lawrence, south by New Brunswick, Maine, New Hampshire, New York and the Ottawa river, which separates it from Ontario, and west by Hudson Bay and Ontario. Extreme breadth from east to west 1,080 miles, length from north to south 1,280 miles; area 706,884 square miles. Surface south of St. Lawrence generally hilly, further north mountainous and rocky and abounding in rivers and small lakes. The extreme northern part is an unexplored wilderness. A great part of the surface of the province is covered with forests.

The soil in many districts is rich, and cereals grow well. Oats, potatoes and hay are the chief crops. The 1916 harvest included 24,411,000 bushels of oats, 322,000 bushels of corn, 1,456,000 of barley, 1,919,000 of buckwheat, 14,672,000 of potatoes and 2,650,000 of turnips and other root crops, 960,000 of wheat and 5,224,000 tons of hay. All except hay were much below the average, owing to the same causes which brought about short grain and potato crops through the United States and Canada generally, except in the Pacific coast states and provinces and some of the Atlantic states. Peas, beans, rye and other grains are grown abundantly. The total value of field crops was \$102,937,900. Hops and apples are extensively grown. Some tobacco is grown, the 1913 crop being 4,000,000 pounds. Nearly a third of Canada's sheep are in this province, and the wool clip is large. Cattle raising and cheese dairying are important industries. There were, in 1915, 720,420 dairy cows in the province, besides 612,500 other cattle. Sheep and hogs are raised in great numbers. The creameries in 1910 made 37,346,107 pounds of butter, the production of cheese in the cheese factories was 67,741,802 pounds. The total annual value of the dairy products is over \$25,000,000.

Copper and mica abound in the eastern townships, where silver is also found. The whole Canadian supply of asbestos is in Quebec and the asbestos industries find employment for more than 3,000 people. The 1916 output of this useful mineral was 118,246 tons and its value was \$5,133,332. In the same year Quebec's copper reached 5,707,200 pounds, pyrites, 130,799 tons; zinc, 1,774,080 pounds; mica, to the value of about \$80,000. Gold, silver, graphite, platinum, chromite, magnesite, etc., are found, and there are large deposits of phosphate of lime in the Ottawa river district. The total mineral production for 1916 was \$14,397,909.

Lumbering is the principal industry, and its products form a great part of the exports. The total production is about 1,000,000,000 feet a year. The fisheries are also of considerable importance. Salmon, lobster, cod, herring, mackerel and whale are the leading kinds, with cod in front, followed by herring and lobster. Over 11,000 persons are engaged in this industry and a capital of \$1,400,000. The value of the total catch in the year ending March 31st, 1916, was \$2,076,851. The catch of fur is greater than that of any other province. In 1910 it was over \$400,000, more than a fifth of Canada's total. Shipbuilding is carried on in Quebec.

The principal manufactures are cloth, linen, furniture, leather, sawed timber, flax, iron and hardware, paper, pulp, chemicals, boots and shoes, cut stone, cement, clay products, cotton and woolen goods, agricultural implements, aluminum (from imported bauxite), etc. Quebec is one of the world's great centers in the manufacture of paper and pulp, its immense forests of spruce and other pulp woods and its abundant water power combining to give it unsurpassed advantages in this industry. The manufacturing establishments have increased 30 per cent. in five years. Montreal, though not the capital, is the largest city in the province and the chief commercial city of the Dominion. About 80 per cent. of the people are of French origin.

The number of newspapers and periodicals published in Quebec is 142, including 20 daily, 1 semi-weekly, 38 weekly, 1 fortnightly, 27 monthly, 2 bi-monthly, 1 four times during the college year and 2 quarterly. The places of publication number 44.

Cent.; Intercolonial and other R.Rs. Tel. Exp. Banks. Largest city, and commercial metropolis of the Dominion of Canada. At head of ocean, and commencement of lake and river navigation, with an extensive commerce. Montreal is to be the terminus of the projected ship canal from the St. Lawrence to Georgian Bay, on Lake Huron, which will place the city in a high position among the seaports of the world. Manufactures are numerous, including saw and flour mills, iron, lead, and brass works, locomotive, engine, hardware, farm implement factories and many others. The total output of manufactured goods in 1910 was nearly \$200,000,000; more than double the production of 1900. The city is growing fast, and its present population including suburbs is estimated at 870,000. McGill and Laval Universities and various other institutions of education, charity, etc.

# DOMINION OF NEWFOUNDLAND

Population..... 242,619

CAPITAL, ST. JOHN'S

NEWFOUNDLAND lies to the eastward of the Dominion of Canada and comprises the island of Newfoundland, in the Atlantic Ocean, at the mouth of the Gulf of St. Lawrence, and a strip 800 miles long and about 30 miles wide along the eastern coast of the Labrador peninsula. Newfoundland is bounded on the east, north and south by the Atlantic ocean, and on the west by Quebec and the Gulf of St. Lawrence. The extreme length of the island of Newfoundland is 350 miles; average breadth 130 miles, and area 42,000 square miles. The surface is generally rugged, with numerous lakes and rivers. The central and eastern portion of the interior is but thinly wooded, and consists in part of elevated plains called "barrens." The river valleys and the western portion of the island have a considerable growth of timber, chiefly spruce and birch of moderate size.

The soil is fertile near many of the lakes and rivers, and in many places farming is profitable. The area of the cultivated land is rapidly increasing, having more than doubled within the past ten years. About 200,000 acres is now under cultivation or pasturage. Wheat, oats and barley grow well; also potatoes and green crops generally; apples and small fruits are profitable. The report of the Newfoundland Agricultural Board shows a production during the year 1911 of 15,000 bushels of oats, 80,000 tons of hay, 650,000 barrels of potatoes, 100,000 barrels of turnips and other root crops, 1,500,000 dozens of cabbage, 1,100,000 pounds of butter, 6,650,000 pounds of beef, mutton and pork. There were in the colony 12,745 horses, 18,408 dairy cows, 27,800 other cattle, 101,440 sheep, 36,409 swine. These figures all show considerable increase over those of the 1901 census. Agriculture is progressing, and while it has been necessary to import a proportion of the foodstuffs, especially meat, dairy products and oats, the government is endeavoring to develop the agricultural resources in every way and before long the colony will be self-supporting in the matter of food supplies. The lumber industry, while not large, is growing, and the exports in 1914 were valued at \$106,620. Much of the spruce is also made into paper pulp.

Copper and iron are mined; the other minerals found are lead, gold, silver, manganese, nickel, plumbago, marble, limestone, petroleum, coal, talc, slate, etc. The total value of the mineral exports in 1914 was \$1,450,512, by far the greater part being iron ore. Copper ore is next. Lead and a few other minerals are worked on a small scale. The coal deposits are extensive, but have not yet been developed.

The fisheries, both on the Grand Bank and in shore, are very valuable. The seal fishery employs a large number of vessels. The Newfoundland cod fishery is the most extensive of the kind in the world. The aggregate annual catch of cod in North American waters is estimated at about 150,000,000 fish, worth about \$15,000,000. The principal exports are fish and fish-oils, seal-oil and skins, and other fishery products, forming about 80 per cent. of the total exports. The total exports of all fishery products, including the whale and seal products, in 1914, were valued at \$10,907,677, of which codfish in its various forms, including oil, brought \$8,475,724; herrings, \$469,546; lobsters (canned), \$347,941; salmon, \$101,498; seal products, \$759,854; whale fishery products, \$100,000. Including what is used for home consumption, the total value of the fisheries is not less than \$13,000,000.

Manufactures consist chiefly of lumber, pulp, paper, and canned fish and lobsters. Several large English companies have built pulp mills, with a total capacity of several hundred tons per day. Goods were exported to the United States in the year ending June 30, 1916, to the value of \$1,866,688. The imports from the United States were \$7,217,997. The imports from Canada in 1914 were \$4,861,047, from the United Kingdom \$3,826,529; exports to Canada 1,971,809; to the United Kingdom \$3,256,446. Total imports, chiefly coal, flour, textiles, railroad supplies and hardware, \$15,193,726; total exports \$15,134,543. The exports go chiefly to the United Kingdom and Brazil, each of which takes over \$3,000,000. Besides the United States; Canada, Spain and Italy, each take over \$1,000,000, the rest being distributed all over the world. The coast of Labrador, included in the colony, comprises about 120,000 square miles, but has only 3,989 inhabitants, a large proportion being Esquimaux. They are engaged in the cod and seal fisheries and, during the winter months, in trapping.

The number of newspapers and periodicals published in Newfoundland is 22, including 5 daily, 10 weekly, 5 monthly and 2 quarterly. The places of publication number 7.

## BERMUDA

**Population 21,576**

(White, 9,244; Negroes, 12,332)

CAPITAL, HAMILTON

A group of islands in the North Atlantic Ocean, 660 miles southeast of New York. Although said to be 365 in number, they occupy a space only 18 miles by 2½ miles. The largest has an area of 9,000 acres, the whole group containing only about 12,000. They are of coral formation, on the summit of a submarine mountain. The climate is delightful, without extremes of heat or cold, the temperature ranging from 55 to 85 degrees, and the islands are becoming very popular as a summer and winter pleasure and health resort, and are visited every year by increasing numbers of Americans and Canadians. Although a governor is appointed by the British crown, the islands have their own representative government for local affairs, having the oldest parliament among all the British colonies.

The soil produces almost every description of fruits, flowers and vegetables abundantly. Onions, potatoes, celery and early table vegetables are the chief crops, and the culture of flowers, especially Easter lilies, for the American market, is a large and growing industry. The 1911 crop of onions was worth \$210,000, potatoes, \$165,000, and other vegetables, \$125,000. The United States sent to Bermuda in the year ending June 30, 1916, goods valued at \$2,232,925 and imported from Bermuda \$708,680. There is frequent and regular steamship communication with New York, and also direct lines to Canada and England.

**CUBA AND WEST INDIES.**

## CUBA

Population 2,048,980

CAPITAL, HAVANA

CUBA, the largest of the West India Islands, is situated about 100 miles south of Florida; from which it is separated by the Florida Straits. It is 800 miles in length from east to west; greatest breadth at Cape Cruz, 110 miles; average width from 50 to 60 miles, except at its western extremity where it is about 80 miles. Total area, 44,164 square miles. A mountain range intersects it longitudinally. The climate is hot and dry, and healthy only in the interior. Snow is never known to fall, but frost occurs occasionally on the highest points. The rainy season is mainly confined to July, August and September. The mountains are rich in minerals and there are abundant forests of mahogany, ebony, cedar and other valuable woods.

The vegetation is exceedingly luxuriant; the principal cereal is corn, of which two crops are obtained in a year. Rice is also produced in large quantities, but the principal crops are sugar, coffee and tobacco, and of these the first is by far the most important. The production of sugar in 1915 was 2,592,667 tons, practically all of which went to the United States. The 1914, tobacco crop was 72,585,000 pounds. The chief fruit crops are oranges, pineapples and grape fruit.

The commerce of Cuba is rapidly increasing, especially with the United States, which furnishes about half of the goods imported and takes almost all of the exports. The principal imports are cereals, meats, cotton and cotton goods, and machinery. The total imports for the year ending June 30th, 1915, were \$123,182,000, the total exports \$219,447,000. Honey and beeswax form an important part of the exports. Other exports are cocoa, molasses, asphalt, iron ore, nickel, cedar, mahogany, etc. The exports to the United States for the year ending June 30, 1916, were valued at \$228,977,567, imports from the United States \$127,040,067.

Cuba forms an exception to the rule in the West Indian islands, in that the white people far outnumber the negroes. Fully seventy per cent. of the people are white. Education has made great strides since the people attained independence. Under the policy of those dominant under the Spanish regime, the people had no educational facilities, and only a very small percentage could read. At the present time the percentage of the people over ten years of age who can read is 82.6 in the cities and in the country districts 47.9. In the cities 49.9 per cent. of the children attend school, in the country districts 31.6 per cent.

(All papers are Spanish unless otherwise stated. Papers marked with an asterisk are reported to us as being published, but no copies have yet been received.)

# DOMINICAN REPUBLIC

Population, 650,000

CAPITAL, SANTO DOMINGO

(For Map, see Cuba)

The DOMINICAN REPUBLIC, or SANTO DOMINGO, occupies the eastern and the larger part of the island of Hayti, and has an area of 19,325 square miles, more than double the area of the Republic of Hayti. The central part is mountainous, reaching the highest elevation in the Pico del Yaque—9,695 feet, but the valley lands and the plains along the northern coast are extremely fertile, and abundant crops of tropical and sub-tropical fruits, vegetables, etc., are grown. The country is well watered, numerous rivers having their origin in the mountain ranges. The largest are in the north, and are the Yaque del Norte, which rises near Yaque mountain, and after a course of 249 miles flows into the ocean at Monte Cristo Bay, and the Guna, which rises a few miles east of the source of the Yaque and flows 186 miles to Samana Bay. The basins of these two rivers form the great valley known as the Vega Real de Colon, reaching from Samana Bay on the east to Manzanillo Bay on the northwest, which is unexcelled for fertility. The chief rivers of the south are the Yaque del Sur, the Ozama and the Macoris. While the climate in general is hot and humid, there are districts in the south and east where the rainfall is so slight that agriculture has not been successful. For these regions the government has decided to construct large irrigation works, the surveys for which are now being made.

The principal products are sugar, cacao, coffee, bananas and tobacco, also some cotton. Corn and tropical cereals do well. The value of the 1909 crop of sugar was \$3,500,000. All of it was exported to the United States. Cacao is produced chiefly in the northern part of the island, and most of it goes to Germany, the rest to the United States and France. The 1915 crop was 51,563,000 pounds. Bananas, to the value of \$3,000,000, were shipped to the United States, which takes all the crop. The tobacco is all shipped to Germany. It is grown chiefly in the vicinity of Santiago. The 1912 crop was 18,000,000 pounds. Other products were coffee, \$350,000, and beeswax, \$140,000.

About \$1,000,000 worth of hardwoods and other miscellaneous products is exported each year. The exports in 1912 were \$9,595,321, of which the United States took \$5,223,330, Germany, \$2,795,340, and France, \$1,413,507. The forests produce large quantities of mahogany, satin-wood, logwood and cedar. The timber has been cut chiefly near the coast, and the extensive forests of the interior have scarcely been touched. These contain vast amounts of the most valuable hard woods and dye-woods, and the higher elevations in certain regions are covered with a large growth of pine. The mineral resources have been neglected, although deposits of gold, copper, iron and coal are known to exist. The leading industries are the manufacture of sugar, rum, cigars and cigarettes, leather, soap, candles and lumber, besides minor industries. The major portion of the people are engaged in agricultural pursuits. A railroad in the northern portion and another along the southern coast connect the chief cities in those districts. There is regular steamer communication with France, Germany, the United States and Cuba, and submarine cable connection over French systems. Although political disturbances were formerly frequent, there have been few of importance in recent years, since the United States took charge of the customs, and the government has now a surplus over the necessary expenses. Crops are more abundant and of better quality, and commerce is increasing. Exports to the United States for the year ending June 30th, 1916, were valued at \$13,456,653. Imports from the United States, \$7,581,358.

(All papers are Spanish unless otherwise stated.)

# HAYTI

Population 2,000,000

CAPITAL, PORT-AU-PRINCE

(For Map, see Dominican Republic)

HAYTI occupies the western or smaller part of the island known as Hayti, and has an area of 10,240 square miles. Ninety per cent. of the population is of the negro race. Although much of the land is mountainous and rugged, and covered with dense forests, the soil, where cleared and cultivated, is remarkably fertile, and large crops of coffee, cotton, cacao, sugar and tobacco are grown. The coffee exported in 1915 was 57,594,000 pounds. Large quantities of valuable timber, consisting of mahogany, cedar and various dye-woods, the products of the forests, are also exported. United States Treasury reports show that in the year ending June 30, 1916, Hayti imported from the United States goods worth \$6,485,567. The exports to the United States were \$2,560,340. The amount of trade between the two countries grows larger each year. The mineral deposits, which are valuable, have been but little developed. A convention, signed between the United States government and Hayti and ratified by the senates of both countries, is now in operation and much benefit is expected to result from it in the future development of the country. With the help of the United States, the government will be more settled and industrial progress will probably be rapid.

(All papers are French unless otherwise stated.)

### BAHAMAS. (BRITISH)

**Population 60,000**

(Three-fourths Negroes)

CAPITAL, NASSAU

A chain of islands extending nearly 600 miles northwest from near the north coast of Hayti to the east coast of Florida, and including 20 larger islands, 153 islets, and innumerable reefs. The area is 5,400 square miles. The chief products are sponges, grape fruit, oranges, pineapples, sisal hemp and vegetables. There is an abundance of fine hardwoods and pine. An important industry is the supplying of stevedore and contract labor. The imports for the year 1915 were valued at about \$1,800,000, and consisted chiefly of provisions, which were nearly half of the total, textiles, metal and other manufactured goods. About eighty per cent. came from the United States, the greater part of the rest from Great Britain. The exports were valued at \$1,200,000, and were chiefly sponges, fruits and hemp.

### BARBADOS. (BRITISH)

**Population 180,516**

(Of whom about 12,000 are white)

CAPITAL BRIDGETOWN

One of the Windward Islands, 78 miles east of St. Vincent. Length, 21 miles; greatest breadth, 14½ miles; area, 166 square miles. It is wholly given up to cultivation. There is only one harbor, Carlisle Bay, the island being almost entirely surrounded by coral reefs. Surface diversified, soil generally fertile. Chief articles of export are sugar, rum, cotton, molasses, syrup and bananas. In the year ending June 30th, 1916, Barbados sent to the United States goods worth \$395,318 and imported goods worth \$1,645,592.

	Estab.	*Col.	†Size.	Sub.	Circ.

**DOMINICA. (BRITISH)**

Population 37,963. (Dec. 31, 1915)

(Mostly Negroes)

CAPITAL, ROSEAU

The largest British Island of the Leeward group, lying between Martinique and Guadeloupe, about thirty miles from each. Twenty-nine miles long by sixteen broad, total area 304 square miles. Surface mountainous and picturesque, with streams well stocked with fish. The arable soil is very fertile, and 70,000 acres, more than a third of the area, is under cultivation. The climate is healthful, with a mean temperature varying with the altitude of from 55° to 85°. During the winter months the island is a pleasant resort for tourists and for pulmonary and rheumatic invalids. Yellow fever is unknown. Chief products are lime juice, cocoa, coconuts, oranges and other fruit, hardwood lumber, starch, spices, rubber, essential oils, etc. Total value of imports in the year 1916 was 208,197 pounds sterling (about \$1,040,000). Exports 212,301 pounds sterling (\$1,060,000).

**GRENADA. (BRITISH)**

Population 73,056

(Mostly Negroes)

CAPITAL, ST. GEORGE

In the Windward group, north by west of Trinidad. 24½ miles long north to south by 10 miles broad. Surface rugged and picturesque, traversed from north to south by an irregular mass of volcanic mountains rising to a height of 3,000 feet above the sea. The soil is extremely fertile, adapted to tropical productions generally. Climate remarkably healthful and scenery unsurpassed in all the West Indies. The island offers exceptional advantages as a winter resort, having abundant natural facilities for sea bathing, fishing and all aquatic sports. The people, owing to an equitable system of land distribution, are counted among the most prosperous of the West Indian colonists. The imports in 1915, chiefly food stuffs, had a value of \$1,300,000; the exports reached nearly \$2,400,000. Great Britain enjoys the greater part of the island's trade. The United States has about one-third, both of imports and exports. The chief articles of export are cocoa (16,232,000 pounds in 1915, with a value of about \$2,000,000), nutmegs and other spices, and cotton.

### GUADELOUPE. (FRENCH)

Population \*180,000  
(Mostly Negroes)

#### CAPITAL BASSE-TERRE

GUADELOUPE is the largest of the Lesser Antilles. Area, 494 square miles. Consists of two distinct islands, the western and largest one is known as Guadeloupe proper, the eastern is called Grande-Terre. Other dependent islands are Marie-Galante, La Desirade, Les Saintes, Saint Martin and Saint Barthelemy. The former is of volcanic formation and traversed by a ridge of mountains, one of which, Mount Soufriere, reaches a height of 5,000 feet, and is an active volcano. Grande-Terre is generally flat. Soil is fertile and well cultivated. Climate hot but salubrious. On the upper slopes of the mountains the temperature is much milder, averaging 68 degrees for the year, the minimum being 50 degrees. There have been no cases of yellow fever or contagious disease for twenty years. Forests of valuable hardwoods and dye-woods. Thermal mineral springs of medicinal repute. The chief articles of export are sugar, coffee, dye-woods, rum, limes, vanilla, bananas, cacao, coconuts, preserved pineapples, etc.

(All papers are French).

### JAMAICA. (BRITISH)

Population 831,383. (Census of 1911)  
(Of whom about 15,000 are white)

#### CAPITAL, KINGSTON

The most important of the British West India Islands, situated 90 miles south of Cuba. Its length is 145 miles, the greatest width 50 miles. Area 4,207 square miles, of which 940,126 acres, or over 1,300 square miles are devoted to tillage or pasture, 31,160 acres of this to sugar cane, 20,023 acres to coffee, 85,468 acres to bananas and 19,995 to cocoanut palms. It is traversed by mountains in all directions, the highest of which (Blue Mountain) reaches an elevation of 7,360 feet. There are numerous other peaks varying from 2,000 to 6,000 feet. The census of 1911 gave the population of the island as 831,383; 15,905 being white; 630,181 negroes; 163,201 with an admixture of negro blood; 17,380 East Indian; 2,111 Chinese and 2,905 of races not specified.

The soil in the valleys is very productive and vegetation extremely luxuriant. Most of the staple products of tropical climates are grown. Jamaica is famous for its coffee. The 1915 reports show exports of 10,084,000 pounds. In addition to sugar and bananas, which are the chief products, dye-woods, coconuts, coffee, cocoa, ginger and other spices, rum, fruits, etc., are largely exported. In 1913 the production of sugar was 4,891 tons, valued at \$243,551; rum, 958,677 gallons, value about \$492,454; bananas 11,597,881 bunches, value \$4,802,826. The total exports amounted to \$11,810,806. 57.4 per cent went to the United States. Jamaica is not a manufacturing country, almost all the manufactured goods being imported, chiefly from the United States and England. The value of imports in 1913, consisting chiefly of provisions and manufactured goods, was \$13,789,987. The United States supplied 46.7 per cent and Great Britain 38.3 per cent. The imports of live animals, provisions and beverages, of all kinds, had a value of \$5,950,981; the textiles imported amounted to \$2,425,412; the metal goods to \$1,849,743; raw materials to \$592,071 and other miscellaneous imports to \$3,471,830. The imports from the United States in the year ending June 30th, 1916, were \$6,563,761, the exports to the United States \$4,767,025. There is an abundance of timber, including all tropical hard woods; there are some copper mines. The fisheries are not of great commercial importance.

	Estab.	*Col.	†Size.	Sub.	Circ.
KINGSTON, pop. *60,000 (C 3). Capital of the island of Jamaica. Situated on south coast on north side of Kingston Harbor. Sugar, rum, coffee, cocoa, logwood, honey, sarsaparilla, etc. Bananas largely cultivated and shipped to the United States. Naval and military station of Great Britain and an important shipping point.

## TRINIDAD. (BRITISH)

Population about 333,552 (Census of 1911)

(About 5,000 white)

## CAPITAL, PORT OF SPAIN

The most southerly of the British West India Islands, 7 miles northeast of the coast of Venezuela, and about ten degrees north of the equator. Length, 50 miles from north to south; average breadth, 30 miles; area, 1,754 square miles. The surface is diversified, embracing mountain chains, hills, plains, and valleys. The soil is generally fertile; the climate hot and moist, but generally healthful. The products are sugar, molasses, rum, cocoa (48,073,000 pounds in 1915), tobacco, petroleum, fruits, etc. Pitch Lake, near Labrea on the west coast, yields annually over 100,000 tons of asphalt. The commerce with the United States is large. Trinidad imported therefrom, in the year ending June 30th, 1915, goods valued at \$4,407,108, and sent goods to the United States worth \$7,009,834.

	Estab.	*Col.	†Size.	Sub.	Circ.
PORT OF SPAIN, pop. 59,796 (G 5). Capital of the colony. On the west coast, and one of the handsomest towns in the West Indies. Fine harbor, with large ocean commerce. Queen's Royal College (Government), and St. Mary's College (Catholic).

## DAILY NEWSPAPERS

A LIST OF ALL DAILY NEWSPAPERS IN THE UNITED STATES AND THEIR POSSESSIONS AND THE DOMINION OF CANADA WHICH ARE PUBLISHED CONTINUOUSLY THROUGHOUT THE YEAR.

MORNING PAPERS APPEAR IN ROMAN. EVENING PAPERS IN ITALIC.

DAILY PAPERS HAVING SUNDAY EDITIONS, WHETHER UNDER THE SAME OR DIFFERENT TITLES, ARE MARKED WITH AN ASTERISK (\*). THOSE HAVING WEEKLY, SEMI-WEEKLY OR TRI-WEEKLY EDITIONS, WITH PARALLELS (|).

CIRCULATION FIGURES MARKED "(A.B.C.)" ARE THE TOTAL NET PAID FIGURES OF SWORN STATEMENTS MADE FOR THE AUDIT BUREAU OF CIRCULATIONS, AND COVER A PERIOD OF SIX MONTHS, INCLUDING AT LEAST THREE MONTHS OF THE YEAR 1917. IN A VERY FEW CASES, WHERE NO MORE RECENT STATEMENT WAS RECEIVED, THEY REPRESENT THE TOTAL NET PAID CIRCULATION, AS REPORTED BY AN AUDITOR FROM THE AUDIT BUREAU OF CIRCULATIONS.

## MONTHLY AND WEEKLY PUBLICATIONS OF GENERAL CIRCULATION

---

### **SPECIAL NOTE**

---

In dividing publications of **general circulation** into classes or groups, it is not possible to meet the ideas of every publisher or every advertiser.

It must be borne in mind that some publications have more than one subject to which they devote special attention. Because of this there is apt to be some difference of opinion concerning the best classification of the publications that appear in the Magazine, the Women's, or the Mail Order list.

If the publication sought has general circulation, as distinguished from special or class circulation, it can as a rule be found in one of the three lists in this group, if it is not in the one first consulted.

## MAGAZINES, WOMEN'S PUBLICATIONS, AND MAIL ORDER JOURNALS

See Special Note on Preceding Page

A DATE FOLLOWING THE NAME OF A PUBLICATION IN THIS LIST IS THE DATE ON WHICH IT IS USUALLY PLACED ON SALE OR DELIVERED TO SUBSCRIBERS. IF UNMARKED IT IS DELIVERED ON THE DATE GIVEN IN THE MONTH PRECEDING THE MONTH ON ITS TITLE PAGE. IF MARKED WITH A STAR (\*) THE DATE OF DELIVERY IS IN THE SECOND PRECEDING MONTH. IF MARKED WITH A DAGGER (†) IT IS DELIVERED IN THE MONTH FOR WHICH IT IS DATED. FOR WEEKLIES, THE DAY IS GIVEN, AND IF UNMARKED, INDICATES THAT THE DELIVERY IS IN THE SAME WEEK AS THE DAY CARRIED ON THE DATE LINE OF THE PUBLICATION, IF MARKED BY A STAR DELIVERY IS MADE IN THE PRECEDING WEEK. ALL DITTO MARKS (") REFER TO NAMES OF TOWNS ONLY.
