INTRODUCTION.

GEOGRAPHICAL ARRANGEMENT.

THE ANNUAL is arranged by States in geographical order for the convenience of advertisers who desire to cover any particular section of the country. The grouping together of neighboring States saves time and labor in making up advertising lists. For those, however, who prefer an alphabetical arrangement, the alphabetical index, running head-lines and title-pages afford ample means for ready reference.

POPULATION.

Unmarked populations in the United States are from the Federal Census of 1880, or from the State or Territorial Census of 1885. The foot notes indicate from which source the figures are derived. Canadian populations are from the Census of 1881. Populations marked with a section mark (§) are from recent estimates of State or local authorities.

THE STATE AND COUNTY HEADINGS,

an important feature of the work, subject to constant and careful revision, are of great value to advertisers of specialties, who, by carefully examining them, can readily decide which counties are likely to prove remunerative territory, and thus confine their expenditures within limits which may be expected to yield the greatest return for their outlay.

CIRCULATION.

Circulations for which affidavits have been furnished have been set in **bold-face** type in the Catalogue, and designated by an asterisk (*) in the County and Class Lists. Those not sworn to by publishers are marked with a double dagger (‡) throughout the book; those set in Roman figures and unmarked, represent our own estimates.

The information upon which the revision of the ANNUAL is based is gathered mainly in March of each year and the circulation ratings are in most cases believed to be the average for the three preceding months. Publishers are at liberty to amend their statements, if they desire to do so, as late as the 1st of July, at which time the revision of the book is practically closed. Advertisements on the other hand are received up to the hour of going to press and not unfrequently contain much later information than can possibly be given in the Catalogue. This will explain in many cases what would otherwise appear to be discrepancies between the statements made in the advertisements and the ratings given the papers in the book itself.

Circulation is not given in the following instances—where the paper has been established during the current year; in many cases where it appears for the first time in the ANNUAL; where the information received is unsatisfactory, or the reports are conflicting;

where publishers have requested omission, in which case the word "Decline" is printed in the circulation column, and where the publication is devoted exclusively, or nearly so, to advertising the business or interests of individuals, business houses or corporations. Papers of this latter class are designated in the Catalogue as "issued for advertising purposes," and in the County and Class Lists by the letters "Adv." in the circulation column.

Aiming at strict impartiality in this important part of our work, and desiring always to be just to publishers, in our efforts to procure accurate and trustworthy information for advertisers, we shall gladly receive communications from any who may consider themselves unfairly dealt with in the estimate placed upon the circulation of their papers, and will cheerfully correct in future editions any mistakes made in the present one, if furnished with satisfactory evidence of our error.

Papers which are believed to decline general advertising are designated in the Catalogue by the words "No Advts." in the circulation column, and are omitted entirely from the County and Class Lists.

The political majorities and pluralities are those of the Presidential election of 1884, that being chosen as the standard in the belief that a general election affords the best evidence of the actual political proclivities of the people.

NEWSPAPER ADVERTISEMENTS.

In order to make the advertisements of greater value to publishers, in addition to the index (999 to 1010), we have printed in the Catalogue against the name of each paper having an advertisement, the number of the page on which that advertisement appears. This will enable an advertiser to refer directly to it, without the aid of an index, and that, too, at the moment when the information it contains would be likely to interest him most. A careful examination of the advertising pages will result in the acquisition of a mass of valuable information which, for the sake of compactness and facility of reference, must necessarily be excluded from the Catalogue itself.

The revision of this book for the edition of 1887 will be commenced immediately, and publishers of newspapers will confer a favor by notifying us of the establishment, suspension, or change of any papers within their knowledge, or by calling our attention to any inaccuracies in the present edition, that may come to their notice.

HOW TO OBTAIN AN ESTIMATE.

In writing to ascertain the cost of advertising, please observe the following suggestions:

1. When possible, always send copy of your advertisement. If you have no printed copy, send it in writing.
2. Mention the space you wish it to occupy in **LINES** or **INCHES**. Don't say anything about squares. The size of an advertising square varies from four lines to two and a half inches.
3. Name the papers you wish to use. If undecided on this point, state the cities and towns, or at least the particular section of country you would like to reach.
4. State the length of time you desire it inserted in the different papers.
5. In case your plans are not fully matured, it is always well to state about the amount of money you purpose expending. By so doing you will enable us to make the most suitable selection for your use, including only the best and cheapest papers to cover the ground.

ADVERTISING AGENTS,

WHEN in 1880 we issued the first edition of the AMERICAN NEWSPAPER ANNUAL, it was with the determination to make it a standard authority on newspaper statistics. In presenting this (the seventh) edition, we have the satisfaction of knowing that it is an improvement upon any preceding volume; that the information has been more carefully gathered, and is, we believe, even more trustworthy than heretofore.

The AMERICAN NEWSPAPER ANNUAL is not in any sense an advertising scheme, published mainly for our pecuniary benefit—the advertisements do not occupy the greater portion of the book, as is the case in some similar publications.

We have no ambition to have the ANNUAL known as the “largest” or “thickest” work of the kind; and yearly refuse many advertisements, because we believe the space asked is larger than is warranted by the value of the publication seeking to advertise. We also invariably decline all offers of exchange advertising, although we have the same opportunity as those, who, by availing themselves of it, largely increase the number of their advertising pages. We never, in order that we may boast of the largest number of papers, intentionally include in the ANNUAL amateur and school boy publications, parish papers, local church organs, dead papers, private advertising sheets, and many others that are not newspapers in any correct sense. Just as in a well-conducted daily newspaper the chief editorial difficulty lies not so much in finding matter with which to fill up, as in deciding what should not be omitted, so in the editing of the AMERICAN NEWSPAPER ANNUAL, far less labor would be involved in making a large count of papers, than is now required by the effort to keep out of it those which possess no value either to the general public or advertiser.

Not satisfied with the very creditable reputation which the previous issues of the AMERICAN NEWSPAPER ANNUAL have brought us, our one aim in continuing its publication is to make each succeeding issue more and more creditable on account of its completeness and accuracy.

The Editor of the book has no other occupation, and no knowledge of our business transactions with any paper, but devotes his entire time and ability (together with that of assistants) to the securing and arranging of *facts* connected with the newspaper world. He knows neither fear nor favor in his work, and is as anxious to correct error, as to secure new information.

Such are the principles which underlie the publication of the AMERICAN NEWSPAPER ANNUAL, and from them there will be no deviation. How well we have carried out these principles we leave others to say; preferring in this, as in all the departments of our business, to be judged by experienced critics. The judgment of two such are reproduced elsewhere. You will find them on page 16, and on pages 771, 772 and 773.

Populations in the United States, if unmarked, are from the Census of 1880 or State and Territorial Census of 1885. Canadian populations are from the Census of 1881.

Those marked with a section mark (§) are from recent estimates of State or local authorities.

Circulations for which affidavits have been furnished, are printed in **bold-face** figures; those furnished by publishers, but not sworn to, are designated by a double-dagger (‡); those unmarked are estimated.

When statement of circulation is omitted, we have been unable to obtain any satisfactory information, or the paper was established during the current year, or else is issued for advertising purposes. The word "decline" indicates that the publishers have declined or objected to furnish any statement for publication.

County-seats are indicated by a dagger (†).

A SUCCESSFUL FIRM.

He is not a brilliant salesman who simply effects a sale of sample goods to a customer already determined to purchase. He is an effective worker who develops business where it did not formerly exist. A concern that follows a routine business, never departing from the beaten track, is soon distanced in the race for success by the more observant and more thoughtful competitors.

Hundreds of business concerns nominally profess to believe in newspaper advertising. They never can summon within themselves the genius to plan or the knowledge to execute a successful campaign. They need the tact, the experience, the advice of those who have made an art, a life-study of advertising. Herein lies the secret of the success of the Philadelphia advertising firm of N. W. AYER & SON, whose advance to the front rank of advertising agents is due to their capacity for seeking out the salient points of an advertiser's business, in originating telling announcements, and in knowing the best and most influential mediums in the country. Messrs. AYER & SON have elevated the profession of the advertising agent to the rank and importance of the lawyer to his client or the doctor to his patient. Those who desire to advertise should employ those experts who can supply experience, originality, genius, and consummate skill.

NEWSPAPERS

—OF THE—

UNITED STATES AND CANADA

ARRANGED BY COUNTIES.

A COMPLETE CATALOGUE OF ALL PAPERS, IN WHATEVER LANGUAGE, PUBLISHED IN THE UNITED STATES, TERRITORIES, AND DOMINION OF CANADA, WHICH INSERT ADVERTISEMENTS, ARRANGED ALPHABETICALLY BY COUNTIES, AND GEOGRAPHICALLY IN STATES BY SECTIONS, GIVING THE LOCATION, AREA, NATURAL FEATURES, CHIEF PRODUCTS AND MANUFACTURES, COUNTY-SEAT, POPULATION, AND POLITICAL MAJORITY OF EACH STATE, TERRITORY, AND COUNTY IN THE UNITED STATES, AND THE GENERAL CHARACTERISTICS AND CIRCULATION OF EACH PAPER ACCORDING TO THE LATEST AND BEST OBTAINABLE INFORMATION.

Populations in the United States, if unmarked, are from the U. S. Census of 1880, or State Census of 1885. Canadian populations are from the Census of 1881.

Those marked with a section mark (§) are from recent estimates of State or local authorities.

Circulations for which affidavits have been furnished, are designated by an asterisk (*); those furnished by publishers, but not sworn to, are designated by a double-dagger (‡); those unmarked are estimated.

When statement of circulation is omitted, we have been unable to obtain any satisfactory information, or the paper was established during the current year, or else is issued for advertising purposes, in which latter case "adv." is placed in the circulation column. The word "decline" indicates that the publishers have declined or objected to furnish any statement for publication.

County-seats are indicated by a dagger (†). Unless otherwise specified the papers are issued weekly.

MAINE.

Population 648,936.....Rep. Plur. in 1884, 20,060.

Gbk. vote, 8,994; Prohib. 2,143.

STATE CAPITAL, AUGUSTA.

MAINE is the most northeasterly State in the Union, bounded on the north by Quebec and New Brunswick, east by New Brunswick, south by the Atlantic Ocean, and west by New Hampshire and Quebec; land area, 29,895 square miles. The northern part is mainly a wilderness of forest-land with rugged surface and groups of detached mountains: thinly peopled, except in the fertile tracts of Aroostook County in the northeast inhabited by French Canadians. The southern part is varied, seldom much broken, and has tracts of great fertility, while others are only moderately fertile, especially in the southeast. The hay and potato crop is large and excellent; corn thrives in the south, and winter wheat in the northeast; oats are very fine and prolific, and barley next. Dairy products are of great value. Large numbers of horses and cattle are exported. Wool is abundant and of good quality. The principal fruits are the cherry, plum, pear, and apple. The State holds a prominent position in the lumber trade; fisheries are important, and the canning of fish, lobsters, green-corn, fruits, and vegetables is extensively carried on. The seaboard towns enjoy a large coasting and West India trade. Cotton manufacture is one of the leading industries. Large quantities of lime are exported from Camden, Rockland, and Thomaston. Granite is extensively quarried at Bath, Dix Island, Hallowell, Rockland, West Sullivan, etc. Ice is an important and profitable article of export. The chief seats of the lumber trade are, Bangor, Biddeford, Calais, Eastport, Fairfield, and Machias; of cotton manufacture, Augusta, Biddeford, Lewiston, and Saco; of ship building, Bath, Bangor, Belfast, Calais, Damariscotta, Machias, Rockland, Thomaston and Waldoboro. Woolens are made at Bridgton, Dexter, Lewiston, Sanford, and Warren; boots and shoes at Auburn, Fairfield, Farmington and Richmond. Bangor has foundry and machine shops, furniture factories, and steam planing mills. Apart from these special branches of trade, Belfast, Ellsworth, Gardiner, Hallowell, Portland, Rockland, Skowhegan, and Waterville are seats of varied and extensive manufactures. The number of manufacturing establishments of all kinds in the State in 1880 was 4,481: the amount of capital invested in them, \$49,988,171; total number of hands employed, 10,204; amount paid in wages, \$13,623,313; value of materials used, \$51,120,706; value of products, \$79,829,798.

There are 16 Counties in Maine. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 60, of which the 15 designated by a dagger (†) are county-seats. Of the 136 papers which insert advertisements published in the State, 13 are daily, 1 tri-weekly, 1 semi-weekly, 90 weekly, 1 bi-weekly, 1 semi-monthly, 26 monthly, and 3 quarterly.

NEW HAMPSHIRE.

Population 346,991.....Rep. Plur. in 1884, 4,603

Gbk. vote, 563; Prohib. 1,571.

STATE CAPITAL, CONCORD.

NEW HAMPSHIRE is bounded on the north by Quebec, east by Maine and the Atlantic Ocean, south by Massachusetts, and west by Vermont. Its length is 180 miles from north to south; its extreme breadth 93 miles; average breadth 50 miles; land area, 9,005 square miles. Most of the State, except the southeastern part, has a rough and hilly surface. In the northern part are the White Mountains. The State is generally well wooded, and the yield of timber is very large. The Valley of the Connecticut is famed for the beauty of its farms and villages. In productions, the ~~hay~~ crop is by far the most valuable, and while this is steadily increasing the agricultural interests have for some years been gradually declining. While there are some very fertile tracts among the valley lands, the greater part of the surface is rugged and stony, and much more valuable as woodland or pasture than as tilled land. Oats, barley, rye, buckwheat, and corn are very generally cultivated. Dairy farming and wool-growing are followed to some extent. Tobacco is grown in Cheshire County, in the southwestern part of the State. Fruit-raising is generally profitable. In some localities southward the peach is successfully cultivated. Fine building granite is extensively quarried at Concord, Milford, Pelham, Plymouth, and other points, and a fine soapstone at Franconstown. Iron-ore is mined principally at Frymouth, but abounds in several other localities. There is a thin vein of tin at Jackson. Lead, silver, and zinc are developed in Madison and Warren. Manufactures constitute by far the largest industry. There is scarcely a town of any considerable size without its important manufacture. It is especially noted for its textile interests. The other main industries are boots and shoes, carriages, flouring-mills, saddlery, clothing, starch, etc. The number of manufacturing establishments in the State in 1880, was 3,181; amount of capital invested in them, \$51,112,263; total number of hands employed, 48,831; amount paid in wages, \$14,814,793; value of materials used, \$48,552,462; value of products, \$78,978,028.

There are 10 Counties in New Hampshire. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 56, of which the 12 designated by a dagger (†) are county-seats. Of the 107 papers which insert advertisements published in the State, 12 are daily, 1 semi-weekly, 84 weekly, 1 bi-weekly, 1 semi-monthly, and 8 monthly.

VERMONT.

Population 332,286.....Rep. Plur. in 1884, 22,183

Gbk. vote, 785; Prohib. 1,752.

STATE CAPITAL, MONTPELIER.

VERMONT is the most northwesterly of the New England States, bounded north by Quebec, east by New Hampshire, south by Massachusetts, and west by New York. It is 130 miles long by from 35 to 85 miles wide, with a land area of 9,135 square miles. The Green Mountains traverse it from north to south, mainly in two ranges, generally covered with dense forests, but affording excellent pasturage. Western Vermont and a large tract of the eastern part comprise beautiful pastoral regions, but the central part is rugged and mountainous. The best soil is found on the western slope of the mountains near the border of Lake Champlain, and in the valley lands of the Connecticut River. The State occupies a prominent position in agriculture. When its area, population, amount of forest-land, and long severe winters are considered, there is perhaps no other State that yields so large a return. All the ordinary agricultural staples are abundantly produced; wool and dairy products are large and excellent; cattle, sheep, and horses are raised in large numbers, and the yield of maple-sugar is unequaled. Manufactures occupy a prominent position in its industries, and cover a wide range of goods. The number of manufacturing establishments in the State in 1880, was 2,874; amount of capital invested in them, \$23,265,224; total number of hands employed, 17,540; amount paid in wages, \$5,164,479; value of materials used, \$18,330,677; value of products, \$31,354,366. Large quantities of lumber are exported, and marble and slate extensively quarried. The principal marble quarries are at Brandon, Dorset, Isle La Motte, Manchester, Middlebury, New Haven, Pittsford, Proctorsville (serpentine), Rosebury (verd-antique), Rutland, Shelbourne Sutherland Falls, Swanton; and West Rutland; slate quarries at Castleton, Fair Haven, Guilford, Northfield, Pawlet and Poultney. Potters' clay comes from Bennington and Rutland; steatite from Castleton and Grafton. Manganese, brown hematite, kaolin and ochre from Brandon; copper-ore from Vershire and Corinth.

There are 14 Counties in Vermont. Newspapers are published in 13.—Cities, towns, and villages in which papers are published number 93, of which 11 designated by a dagger (†) are county-seats. Of the 70 papers which insert advertisements published in the State, 4 are daily, 57 weekly, 1 every three weeks, and 8 monthly.

MASSACHUSETTS.

Population 1,942,141.....Rep. Plur. in 1884, 24,372
 Gbk. vote, 24,882; Prohib. 9,925.

STATE CAPITAL, BOSTON.

MASSACHUSETTS is bounded north by Vermont and New Hampshire, east by the Atlantic Ocean, south by the Atlantic Ocean and by Rhode Island and Connecticut, and west by Rhode Island and New York. Its extreme length is 160 miles, and breadth from 47 to about 90 miles; land area, 8,040 square miles. The surface is greatly diversified; mountainous in the extreme west; hilly and broken in the east and northeast, and in the southeast mainly low and sandy. Toward the east is the fertile Valley of the Connecticut River. The mountains are the Green, the Taconic, and the Hoosac, with detached members of the White Mountains. The soil is generally somewhat sterile, but energy and intelligence have succeeded in making it very productive. The Connecticut Valley, however, can hardly be excelled for fertility. Dairy products are very extensive, as is also the yield of wool, hay, maple-sugar, and honey. Corn and potatoes are very largely produced. Of grain, the crop of oats, rye, and barley is large, buckwheat moderate, and wheat (winter), small. The tobacco crop is very great; live-stock abundant (cattle largely in excess). More than half the fishing vessels owned in the United States belong to Massachusetts. Manufactures, however, constitute by far the largest of its industries. Not only is it the center of the American boot, shoe, leather, wool, and cotton trades, but all the large towns are busy seats of more or less numerous branches of manufacture. The number of manufacturing establishments in the State in 1880, was 14,352; amount of capital invested in them, \$303,806,185; total number of hands employed, 352,255; amount paid in wages, \$128,315,362; value of materials used, \$386,972,655; value of products, \$631,135,284. The chief seats of the ship-building interests are Boston, Newburyport, and Salem. The State is rich in building-stone, principally granite, which is largely quarried at Rockport, Graniteville, Fall River, and Quincy; a handsome brown sandstone in the Connecticut Valley, and marble and limestone in Berkshire County; Berkshire County has also deposits of excellent iron-ore, which is extensively mined and smelted. The State has some coal, but it has not been worked to any extent, its excessive hardness rendering its use unprofitable, except in special cases.

There are 14 Counties in Massachusetts. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 186, of which the 19 designated by a dagger (†) are county-seats. Of the 551 papers which insert advertisements published in the State, 48 are daily, 1 tri-weekly, 7 semi-weekly, 375 weekly, 10 bi-weekly, 6 semi-monthly, 96 monthly, 2 bi-monthly, and 6 quarterly.

RHODE ISLAND.

Population 304,284.....Rep. Plur. in 1884, 6,591

Gbk. vote, 423; Prohib. 923.

STATE CAPITALS, NEWPORT AND PROVIDENCE.

RHODE ISLAND is bounded on the north and east by Massachusetts, south by the Atlantic Ocean, and west by Connecticut. Its extreme length from north to south is $47\frac{1}{2}$ miles; extreme breadth, 40 miles; average breadth, 35 miles; land area, 1,085 square miles. The surface is for the most part rough, hilly, and stony. There are no mountains, and few hills of any eminence. Nearly one fourth is woodland. Soil generally fertile, especially that of the smaller islands; but parts are level and marshy. Rhode Island is not an agricultural State. The wheat and buckwheat crop is merely nominal; other cereals small; dairy and market-garden produce and live-stock very moderate. In 1880 nearly one fourth of the population was engaged in manufacturing. The most prominent industries are cotton, woolen and worsted goods, machinery, jewelry, silver and plated ware, clothing, iron and ironware, rubber and elastic goods, leather, refined sugar and molasses, and flouring-mill products. The number of manufacturing establishments in the State in 1880, was 2,205; amount of capital invested in them, \$75,575,943; total number of hands employed, 82,878; amount paid in wages, \$21,355,619; value of materials used, \$58,103,443; value of products, \$104,163,621. Coal is mined at Cumberland, Portsmouth, and Valley Falls, but is hard and difficult to burn. There are extensive granite quarries at Westerly.

There are 5 Counties in Rhode Island. Newspapers are published in all. — Cities, towns, and villages in which papers are published number 17, of which the 4 designated by a dagger (†) are county-seats. Of the 52 papers which insert advertisements published in the State, 7 are daily, 2 semi-weekly, 35 weekly, 2 bi weekly, 1 semi-monthly, 4 monthly, and 1 quarterly.

CONNECTICUT.

Population 622,700.....Dem. Plur. in 1884, 1,294
Gbk. vote, 1,684; Prohib. 2,480.

STATE CAPITAL, HARTFORD.

CONNECTICUT is bounded north by Massachusetts, east by Rhode Island, south by Long Island Sound, and west by New York. Its average length from east to west is 86 miles; its average breadth, 55 miles; land area, 4,845 square miles. The eastern part is principally composed of rounded hills, which, though stony, afford rich pasturage; and the valleys support a thrifty agricultural and manufacturing population. The Connecticut Valley, near the river, and at a distance from the Sound, is very fertile. In the south the land is broken and the soil sandy and gravelly, but when well manured yields good crops of potatoes, rye, oats, and corn. In the west the surface is rough and the hills are abrupt. Agriculture is not a leading industry. Dairy products and hay are the principal staples of the east and west. Tobacco is largely grown in the Connecticut Valley. Corn, rye, oats, and potatoes are grown in nearly all sections. The land near the large cities and towns is chiefly devoted to market-gardening. Connecticut is mainly a manufacturing State, and its industries are very extensive and varied. The number of manufacturing establishments in the State in 1880, was 4,448; amount of capital invested in them, \$120,480,275; total number of hands employed, \$112,915; amount paid in wages, \$43,501,518; value of materials used, \$102,183,341; value of products, \$185,697,311. Excellent iron is made from Connecticut ores, and very large quantities of brown stone are taken from the celebrated Portland sandstone quarries.

There are 8 Counties in Connecticut. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 56, of which the 8 designated by a dagger (†) are county-seats. Of the 156 papers which insert advertisements published in the State, 26 are daily, 105 weekly, 1 every ten days, 2 bi-weekly, 1 semi-monthly, 1 every third week, 17 monthly, and 3 quarterly.

NEW YORK.

Population 5,082,871.....Dem. Plur. in 1884, 1,047

Gbk. vote, 17,002; Prohib. 26,001.

STATE CAPITAL, ALBANY.

NEW YORK is bounded on the north and northwest by Lake Ontario and the provinces of Ontario and Quebec, east by Vermont, Massachusetts, Connecticut, and the Atlantic Ocean, south by the Atlantic Ocean, New Jersey, and Pennsylvania, and west and northwest by Pennsylvania and Lake Erie. Its greatest length from north to south is 812 miles; its greatest breadth 412 miles; land area, 47,620 square miles. The surface is exceedingly diversified. It has numerous ranges of mountains, chains of hills, many beautiful valleys, much undulating land, some broad plains, and numerous beautiful lakes. The greater portion of the soil is arable, much of it exceedingly fertile. The mountainous districts are mainly good grazing land, and the dairy products are enormous, notably in St. Lawrence County. Immense crops of cereals are grown in the valley lands; tobacco is raised in several counties, and corn generally throughout the State. In the neighborhood of the large cities, market-gardening is extensively carried on. The State is well wooded, and the timber varied and excellent. It abounds in building-stone, consisting of granite, white and colored marbles, of which those of Westchester County are the most important; Potsdam and Medina sandstones and gray and blue limestones; also in fine brick-clay. It has large quarries of slate and stone for flagging. A vast amount of salt is made, chiefly from the springs of Onondaga County. There are also illuminating gas springs in several counties. New York has no coal. The State ranks first in the value of its manufactures. The industries cover almost the whole range of business, and are well distributed over the State. The number of manufacturing establishments in the State in 1880, was 42,739; amount of capital invested in them, \$514,246,575; total number of hands employed, 581,538; amount paid in wages, \$198,634,029; value of materials used, \$679,612,545; value of products, \$1,080,696,596. In 1874 it had in vessels of all classes a tonnage of over 1,700,000 tons, more than a third of the tonnage of the country. The fishing industry is relatively large and valuable.

There are 60 Counties in New York. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 405, of which the 68 designated by a dagger (†) are county-seats. Of the 1,533 papers which insert advertisements published in the State, 142 are daily, 3 tri-weekly, 21 semi-weekly, 972 weekly, 13 bi-weekly, 33 semi-monthly, 1 every third week, 311 monthly, 9 bi-monthly, 27 quarterly, and 1 semi-annual.

PENNSYLVANIA.

Population 4,252,992.....Rep. Plur. in 1884, 81,019

Gbk. vote, 16,992; Prohib., 15,288.

STATE CAPITAL, HARRISBURG.

PENNSYLVANIA is bounded north by New York and Lake Erie, east by New York and New Jersey, south by Delaware, Maryland, and West Virginia, and west by West Virginia and Ohio. Its greatest length from east to west is about 302 miles; its greatest breadth about 175 miles; mean length 230 miles; mean breadth 158 miles; land area, 44,985 square miles. The surface is exceedingly varied, chiefly level or slightly undulating in the southeast, hilly and mountainous in the interior, and generally rolling or broken in the west. A series of parallel ridges, members of the Appalachian system, each with a distinct name, traverse the State from northeast to southwest. The easternmost of these is the South Mountain, an extension of the Blue Ridge, and the westernmost and highest the Allegheny, from which the surface slopes generally toward Ohio. Nearly one fourth of the State is wooded, and a very large amount of lumber is manufactured, Williamsport and Lock Haven being the chief centres of this industry. The soil of the valleys and plains is generally fertile, and some of it exceedingly so. Lancaster County, and some of the counties bordering on the Ohio River, are the most productive. The State excels in dairy and market-garden produce and all the agricultural staples of the Northern States. The tobacco crop is exceeded only by that of Kentucky and Virginia, reaching in 1880 nearly 37,000,000 lbs., of which amount Lancaster County alone produced two-thirds, and York nearly 6,000,000 lbs. Its beds of anthracite and bituminous coal and iron-ore, and the great oil basin, are sources of immense wealth. Anthracite coal is found mainly in the counties of Carbon, Dauphin, Luzerne, and Schuylkill, to some extent in Columbia and Northumberland, and semi-anthracite in limited areas in Sullivan and Wyoming. Bedford, Bradford, Centre, Clearfield, Fulton, Lycoming, and Tioga counties contain fields of semi-bituminous coal, while the bituminous coal beds are located beyond the main Allegheny Ridge, every county west of it, with the exception of Erie, yielding more or less of this coal. Mercer supplies a good block coal for furnace use. The petroleum region is situated mainly in the counties of Venango, Butler, McKean, and Clarion. Salt springs abound in the same region, also natural gas wells, the gas from which is used for heating and lighting purposes. It is rich in minerals, slate, and building-stone of many kinds. There are many medicinal springs, the principal of which are at Bedford, Doubling Gap, Ephrata, Yellow Springs, and York. The southeastern corner of the State (bounded by a line running from Trenton, N. J., to Norristown, thence nearly to Lebanon, thence across the Susquehanna in a southwesterly direction to the Maryland line, east of Gettysburg), is rich in limestone and marble, of which great quantities are quarried for use in Philadelphia. This region also produces combined iron and chromium ores, hematite, magnetic iron, and corundum. Nickel is found at Lancaster, galena at Phoenixville, zinc at Friedensville and Bethlehem. A handsome black limestone is quarried at Williamsport, roofing-slates in the Lehigh and Delaware Valleys, Silurian limestone in the Cumberland Valley and at other points. In manufactures, Pennsylvania is second only to New York, and Philadelphia is one of the principal seats of foreign and coast-wise trade. The leading exports are grain, provisions, petroleum, tobacco, oil-cake, lumber, tallow, hides, leather, shoes, cotton goods, machinery, and coal. Erie and Pittsburgh are also great commercial centres. Kensington and Chester are the chief ship building stations. Pittsburgh, Allegheny, Harrisburg, Reading, and Scranton are the chief seats of the iron manufactures. The number of manufacturing establishments in the State in 1880, was 31,232; amount of capital invested in them, \$474,510,993; total number of hands employed, 387,072; amount paid in wages, \$134,055,904; value of materials used, \$465,020,563; value of products, \$744,818,445.

There are 67 Counties in Pennsylvania. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 344 of which 67 designated by a dagger (†) are county-seats. Of the 1,100 Papers which insert advertisements published in the State, 127 are daily, 2 tri-weekly, 9 semi-weekly, 767 weekly, 4 bi-weekly, 14 semi-monthly, 164 monthly, 3 bi-monthly, and 10 quarterly.

NEW JERSEY.

Population 1,278,033.....Dem. Plur. in 1884, 4-412

Gbk. vote, 3,466; Prohib., 6,168.

STATE CAPITAL, TRENTON.

NEW JERSEY is bounded north and northeast by New York, east by New York and the Atlantic Ocean, south by the Atlantic Ocean and Delaware Bay, and west by Delaware and Pennsylvania. Its extreme length is 167 miles; its greatest breadth 59 miles, and its least 32 miles; land area, 7,455 square miles. The surface is mountainous in the northwest, hilly in the northeast and central parts, low and gently undulating in the south. The mountains, a part of the Appalachian system, are the Kittatinny or Blue, and the Highland Range. Between them lies the Kittatinny Valley, about 10 miles wide: soil productive but varied—the northern part adapted to grain and grass; the central part has been well fertilized, and yields abundant farm and market-garden products and fruit; the southern part is sandy and light. Its agricultural products generally, including market-garden produce, are very extensive. Large quantities of grapes and small fruits are grown in the south. Cranberries are one of the leading productions. It is celebrated for its marl deposits, peat, bog-iron ore, and glass-sand. It has become one of the leading States in the value of its manufactures, ranking sixth in this respect in 1880. The manufactures embrace a wide range of goods. The number of manufacturing establishments in the State in 1880, was 7,128; amount of capital invested in them, \$106,296,593; total number of hands employed, 126,038; amount paid in wages, \$46,063,045; value of materials used, \$165,285,779; value of products, \$254,380,236. Its iron-mines, quarries, and clay-banks are very valuable, and the fisheries (deep-sea, oyster, and fresh-water), a source of great profit. Iron-ore is found generally through the State. Clay for gas-retorts and fire-brick is found at Amboy, and valuable deposits of franklinite at Mine Hill and Stirling. In the northwestern portion of the State, excellent roofing-slates, building and flag-stones and rich hematites are abundant. It has a large coasting trade, and considerable ship building is carried on.

There are 21 Counties in New Jersey. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 113, of which 21 designated by a dagger (†) are county-seats. Of the 266 Papers which insert advertisements published in the State, 37 are daily, 1 tri-weekly, 3 semi-weekly, 207 weekly, 2 semi-monthly, 1 every three weeks, 14 monthly, and 1 bi-monthly.

MARYLAND.

Population 934,943.....Dem. Plur. in 1864, 11,118
 Colored pop., 210,230. Gbk. vote, 578; Prohib., 2,827.

STATE CAPITAL, ANNAPOLIS.

MARYLAND is bounded north by Pennsylvania, east and southeast by Delaware and the Atlantic Ocean, west by West Virginia, and south and southwest by Virginia, West Virginia, and the District of Columbia. The Chesapeake Bay divides the greater part of it into two unequal parts, known as the Eastern and Western Shores. Its extreme length from east to west on its northern border is 196 miles, and its width, following the course of the Potomac, varies from 3 or 4 miles to about 120 miles; land area, 9,860 square miles. The surface of the Eastern Shore is mostly level, and in parts low and swampy, but towards the north rocky and broken. The Western Shore, between the Potomac River and Chesapeake Bay, presents mainly the same general features. The northwest is very mountainous: five or six ridges of the Alleghenies, principally the Blue and Laurel, traverse that section. In the extreme west are the beautiful elevated valleys named Glades. The soil of the Eastern Shore and the lower part of the Western is generally light and sandy, well adapted for peaches and market-gardening; that of the central and northern parts very rich, yielding immense crops of tobacco, wheat, and corn. The mountain slopes are thickly wooded. The oyster fisheries are more extensive than in any other State. The manufactures are very numerous—canned goods (fruits, meats, and oysters) being one of the most important. Boots and shoes, bricks, cement, chemicals, clothing, cotton and woolen goods, cooperage, tobacco, flour, leather, lumber, machinery, and metallic wares are leading industries. The number of manufacturing establishments in the State in 1890, was 6,787; amount of capital invested in them, \$58,742,884; total number of hands employed, 74,945; amount paid in wages, \$18,904,965; value of materials used, \$66,987,846; value of products, \$106,780,563. Its commerce is confined principally to Baltimore, whose foreign trade is very important. Maryland coal is used extensively in all the Atlantic States. Fire clays are abundant; those of Mt. Savage have a wide reputation. Brown hematite is found in the Trenton limestone, and bog-ore on the Eastern Shore. There are numerous quarries of marble, granite, serpentine, and other building stone, limestone for burning, and roofing-slate. Kaolin is found in Anne Arundel County; magnesite near Baltimore, from which large quantities of magnesia, carbonate, and Epsom salts are manufactured. There are many other minerals, including alum, amber, barytes, breccia, cements, chromium, hone-stone, mill-stone, iron pyrites, ochres, etc., some of which are very plentiful. Especial attention is given to tobacco-growing in the lower counties of the Western Shore.

There are 23 Counties in Maryland. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 47, of which 24 designated by a dagger (†) are county-seats. Of the 160 papers which insert advertisements published in the State, 13 are daily, 123 weekly, 8 semi-monthly, 18 monthly, 1 bi-monthly, and 2 quarterly.

VIRGINIA.

Population 1,512,565.....Dem. Plur. 6,141

Colored pop., 681,616.

Prohib. vote, 188.

STATE CAPITAL, RICHMOND.

VIRGINIA is bounded north by West Virginia and Maryland, east by Maryland and the Atlantic Ocean, south by North Carolina and Tennessee, and west by Kentucky and West Virginia. Its greatest length from east to west is about 440 miles, its greatest breadth 192 miles; land area, 40,125 square miles. The surface is divided into six great natural divisions, the Tidewater comprising the south and southeast; the Middle, an undulating plain, extending westward to the Coast Range; the Piedmont, from the Coast Range to the Blue Ridge Mountains, and from the Potomac River to North Carolina; the Blue Ridge, stretching across the State in a southwesterly direction; the Valley—a part of the great Appalachian Valley, reaching from Canada to Alabama—a broad belt of rolling country between the Blue Ridge and the Kittatinny or North Mountain; and the Appalachian, a mountainous region traversed by the Alleghenies. The soil in the Tidewater region is a light sandy loam, yielding large crops of vegetables and small fruits. The Valley Region has a rich fertile soil, well adapted for cereals. Much of the Mountain Region is uncultivated and chiefly forest land; but the parallel valleys are very fertile. The Piedmont, Blue Ridge, Valley, and Appalachian regions are noted for their grasses. The yield of tobacco is only equaled by that of Kentucky. Some cotton is grown in the Tidewater section; fruit grows all over the State. The eastern section is largely devoted to raising early vegetables for northern markets. Dairying, stock-raising, and wool-growing are important industries. The timber export is large. There are profitable fisheries of bass, shad, etc., and the oyster trade is very important. The manufacturing interests are comparatively small, but are increasing, the chief seats being Richmond, Alexandria, Danville, and Lynchburg. The number of manufacturing establishments in 1880, was 5,710; amount of capital invested in them, \$26,968,990; total number of hands employed, 40,184; amount paid in wages \$7,425,261; value of materials used, \$32,888,933; value of products, \$51,780,992. Virginia has excellent natural advantages for commerce, but it is only lately that she has begun to take a prominent part in foreign trade. There are beds of anthracite, semi-bituminous, and bituminous coal in the southwestern counties, not much developed; salt is an important product of this region. There are coal-bearing strata in other parts of the State, particularly near Richmond; the coal is bituminous, and generally of good quality. Virginia has vast beds of gypsum and marl, abundant iron-ore, fine granite, marble, and other building stones; zinc, sulphur, kaolin, fire-clay, and many other minerals. It abounds in mineral springs of great reputation.

There are 100 Counties in Virginia. Newspapers are published in 69.—Cities, towns, and villages in which papers are published number 98, of which 58 designated by a dagger (†) are county-seats. Of the 227 papers which insert advertisements published in the State, 19 are daily, 4 tri-weekly, 7 semi-weekly 164 weekly, 31 monthly, 1 bi-monthly, and 1 quarterly.

STATE CAPITAL, CHARLESTON.

WEST VIRGINIA is bounded north and east by Pennsylvania and Maryland, east and south by Virginia, and west by Kentucky and Ohio. Its greatest length from north to south is about 240 miles; greatest breadth, 160 miles; land area, 24,645 square miles. A large part of the surface is mountainous and hilly; about two-thirds is covered with forest. The soil of the ridges is fertile to the tops, and the summits of many mountains are flat, natural meadows or glades. The valley of the Great Kanawha is the finest grazing region of the State. Blue grass is indigenous; the lumber trade is important. Nearly the whole of the State lies within the Allegheny coal system, and large quantities of coal are exported, although comparatively few mines have been opened. It is generally bituminous. The Kanawha Valley is one of the great salt-producing regions of the United States. Petroleum is extensively produced, chiefly in Ritchie, Pleasants, Wood, and Wirt Counties. Limestone, sandstone, and grinding stone abound generally through the State. The minerals and mineral springs are inexhaustible. West Virginia is especially famous for wool. Other great staples are corn, wheat, oats, and tobacco. Manufactures are comparatively undeveloped, except in the towns along the Ohio River. The leading industries are iron in various forms, flour, salt, liquor, lumber, leather, and machinery. The number of manufacturing establishments in the State in 1880, was 2,575; amount of capital invested in them, \$13,883,390; total number of hands employed, 14,311; amount paid in wages, \$4,313,965; value of materials used, \$14,027,388; value of products, \$22,867,126.

There are 54 Counties in West Virginia. Newspapers are published in 53.—Cities, towns, and villages in which papers are published number 69, of which 52 designated by a dagger (†) are county-seats. Of the 130 papers which insert advertisements published in the State, 5 are daily, 1 semi-weekly, 118 weekly, 1 bi-weekly, and 5 monthly.

NORTH CAROLINA.

Population 1,399,750.....Dem. Plur. in 1884, 17,884

Colored, 581,377.

Prohib. vote, 454.

STATE CAPITAL, RALEIGH.

NORTH CAROLINA is bounded north by Virginia, east and southeast by the Atlantic Ocean, south by South Carolina and Georgia, and west by Tennessee. Its extreme length from east to west is 490 miles; extreme breadth, 185 miles; land area, 48,580 square miles. The surface is very varied. For nearly 100 miles inland from the coast the country is level, marshy, and swampy; soil sandy but very fertile. It is estimated that there are nearly 3,000,000 acres of swamps in this region. Next is the middle section, with varied surface and fine soil. The surface then rises into small hills, increasing in altitude until they reach the mountainous region in the west. Some of the peaks in the Black Mountains and the Blue Ridge attain an elevation of from 5,000 to 6,000 feet. This region contains good grazing land, much hard timber; and stock-raising is largely carried on. In the coast region the river bottoms and reclaimed swamp lands are very fertile, and here rice, cotton, corn, honey, beeswax, apples, peaches, and pears abound. The Scuppernon and Catawba grapes are native here; cranberries are extensively produced. The pine region is mainly uncultivated, but a large trade is done in timber, tar, and turpentine. Cotton is raised chiefly in the southern counties. The middle section is adapted to the growth of cereals, tobacco, and cotton; sweet potatoes are a leading staple. The principal manufactures are flour, lumber, tar, turpentine, rosin, cotton and woolen goods, tobacco, zinc (smelted and rolled), carriages, boots and shoes. The number of manufacturing establishments in the State in 1880, was 8,802; amount of capital invested in them, \$13,045,639; total number of hands employed, 18,109; amount paid in wages, \$2,740,768; value of materials used, \$13,090,987; value of products, \$20,095,087. It exports coastwise and to foreign ports large amounts of lumber, cotton, tobacco, flour, and fish. The fisheries are very large and valuable. The State is very rich in minerals. Gold is mined to a considerable extent in Cabarrus, Mecklenburg, Lincoln, and Rowan Counties, and there is a branch of the United States Mint at Charlotte. Silver, lead, and zinc are found in association, particularly in Davidson County; silver ores mixed with lead or copper, principally in the interior counties; copper ores cover a wide field, and there is a very valuable mine in Ashe County; mica is found among the granites of Cleveland, Mitchell, and Yancey Counties; there is an abundance of corundum and many other metals, and even precious stones are found. Coal and iron are very abundant; the coal is mostly bituminous, and is contained in two fields, one in Stokes and Rockingham Counties, known as Dan River Field, the other in Chatham and Moore Counties, known as Deep River Field. The whole of the region from the navigable waters of the Roanoke and Cape Fear Rivers westward to Cherokee County contains rich beds of magnetic and hematite ores; the "Cranberry" mine, in Mitchell County, yields the purest magnetic ore yet found in the United States, producing a remarkably strong and tenacious iron.

There are 96 Counties in North Carolina. Newspapers are published in 70. — Cities, towns, and villages in which papers are published number 90, of which 63 designated by a dagger (†) are county-seats. Of the 168 papers which insert advertisements published in the State, 15 are daily, 3 semi-weekly, 134 weekly, 1 bi-weekly, 4 semi-monthly, and 11 monthly.

SOUTH CAROLINA.

Population 995,577.....Dem. Maj. in 1884, 49,112

Colored pop., 604,532.

STATE CAPITAL, COLUMBIA.

SOUTH CAROLINA is bounded north and northeast by North Carolina, southeast by the Atlantic Ocean west and southwest by Georgia. Its greatest length from east to west is about 275 miles, and its greatest breadth about 210 miles; land area, 30,170 square miles. The surface presents nearly the same features as that of North Carolina. The coast for 100 miles inland is low and level, with sandy soil, numerous swamps, and extensive pine forests; then follows a tract of low sand-hills, the soil of which is moderately productive. The land rises abruptly on the western edge of this belt, and continues to rise until it terminates in the Blue Ridge, the highest peak of which, Table Mountain, is 4,000 feet above the sea. The swamps embrace over 1,000,000 acres, and the pine lands 6,000,000. The sea islands are mainly devoted to sea-island cotton and rice, and the palmetto grows on them; the tidal swamps to rice; inland swamps, when drained, to rice, cotton, corn and pease; the salt marshes to long cotton; the oak and pine and oak and hickory lands to corn and cotton; and the pine-barrens to fruits and vegetables. Rice, cotton, and corn thrive best in the central and southern counties. The northwestern region produces corn, wheat, barley, oats, tobacco, and many fruits. Stock-raising and wool-growing are carried on with profit. Figs and pomegranates grow in the lower counties, and the peach and grape thrive over the State generally; strawberries abundant. The manufactures are principally cotton goods, flour, lumber, machinery, tar, turpentine, carriages, and fertilizers. The number of manufacturing establishments in the State in 1880, was 2,078; amount of capital invested in them, \$11,205,894; total number of hands employed, 22,128; amount paid in wages, \$2,336,289; value of materials used, \$9,885,838; value of products, \$16,738,008. Commerce is mainly confined to Charleston, Georgetown, and Beaufort. Exports are chiefly rice, cotton, lumber, phosphate, naval stores, cotton-seed and its oil, oil-cake, fish, and spring vegetables. Considerable shad and oyster fishing. The mineral wealth, though large, has not been much developed. Considerable gold is found in the northwestern counties; there are large deposits of excellent iron-ore in Greenville, Pickens, Spartanburg, and Union Counties; manganese, copper, lead, and bismuth are also found, mainly in the northwest; white and colored marbles and limestones, granites and cyanites, soapstones, flagging-stone, and buhr-stone abundant. Aiken County contains immense beds of the finest porcelain clay. A little coal is found in Chesterfield County. The most valuable mineral at the present day is, however, a bone phosphate marl, a fossil of very remote origin and one of the best of fertilizers, found in the lowlands and river beds near Charleston; on the Stono, Ashepoo and Edisto Rivers, and also near St Helena Sound.

There are 34 Counties in South Carolina. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 53, of which 34 designated by a dagger (†) are county-seats. Of the 96 papers which insert advertisements published in the State, 4 are daily, 2 tri-weekly, 1 semi-weekly, 81 weekly, 2 semi-monthly, 5 monthly, and 1 quarterly.
