NEWSPAPERS
—OF THE—
UNITED STATES AND CANADA

ARRANGED BY COUNTIES.

A COMPLETE CATALOGUE OF ALL PAPERS IN WHATEVER LANGUAGE PUBLISHED IN THE UNITED STATES, TERRITORIES, AND DOMINION OF CANADA, WHICH INSERT ADVERTISEMENTS, ARRANGED ALPHABETICALLY BY COUNTIES AND STATES, GIVING THE LOCATION, AREA, NATURAL FEATURES, CHIEF PRODUCTS AND MANUFACTURES, COUNTY-SEAT, POPULATION, AND POLITICAL MAJORITY OF EACH STATE, TERRITORY, AND COUNTY IN THE UNITED STATES, AND THE GENERAL CHARACTERISTICS AND CIRCULATION OF EACH PAPER ACCORDING TO THE LATEST AND BEST OBTAINABLE INFORMATION.

Populations in the United States, if unmarked, are from the U. S. Census of 1880, or State Census of 1885. Canadian populations are from the Census of 1881.

Those marked with a section mark (§) are from recent estimates of State or local authorities.

Circulations for which affidavits have been furnished are designated by an asterisk (*); those furnished by publishers, but not sworn to, are designated by a double-dagger (‡); those unmarked are estimated.

When statement of circulation is omitted, we have been unable to obtain any satisfactory information, or the paper was established during the current year, or appears for the first time in the ANNUAL, or else is issued for advertising purposes, in which latter case "adv." is placed in the circulation column. The word "decline" indicates that the publishers have declined or objected to furnish any statement for publication.

County-seats are indicated by a dagger (†). Unless otherwise specified the papers are issued weekly.

ALABAMA.

Population 1,262,505.....Dem. Plur.in 1884. 33,829

Colored pop., 600,108.

Dem. vote, 92,973; Rep. 59,144; Gbk. 762; Prohib. 610.

STATE CAPITAL, MONTGOMERY.

ALABAMA is bounded north by Tennessee, east by Georgia and Florida, south by Florida and the Gulf of Mexico, and west by Mississippi. Its extreme length north to south is 336 miles, breadth varying from about 150 to 200 miles; land area, 51,540 square miles. The Alleghany range enters the State at the northeast, and extends towards the centre, finally losing itself in mere hills; then follows a tract of rolling prairies, interspersed with pine barrens and exceedingly rich alluvial bottoms, including the cane-brake region, one of the richest cotton producing districts in the world. From this to the Florida border and the Gulf the land is generally flat. This part is thinly settled, and is mostly covered with pine forests. North of this is the broad belt of rich black soil, a space of several miles in breadth, constituting the great cotton producing section of the State. The soil then becomes sandy and poor, but abundant water-power renders it capable of becoming a fine manufacturing district. The mineral region occupies the northeast part, while the northwest is a good agricultural and stock-raising country. Cotton is grown throughout the State, but mainly in the central belt alluded to; tobacco chiefly in the north; very fine wheat in the north and northeast; rice in the south; corn largely all over the State. Dairy products, fruits, wool, oats, and sweet potatoes are produced in considerable quantities. Manufactures have been unimportant until lately, when considerable increase has been manifested, but agriculture is by far the leading industry. The chief manufactures are flour, lumber, leather, cotton goods and cotton gins, thread and yarn, iron, and machinery. The number of manufacturing establishments in the State in 1880, was 2,070; amount of capital invested in them, \$9,668,008; total number of hands employed, 10,019; amount paid in wages, \$2,500,504; value of materials used, \$8,545,520; value of products, \$13,565,504. No official figures can be obtained of the manufacturing interest at the close of 1887, but it is hardly too much to say that the statistics furnished for the State in 1880 will barely suffice for Birmingham and its vicinity alone to-day. Commerce centres at Mobile. Cotton and lumber are the chief exports. Extensive beds of brown hematite of an excellent quality are found in Bibb, Cleburne, Jefferson, St. Clair, Shelby, and Talladega Counties. Jefferson County is the main seat of the iron production, it is estimated that her iron and coal industries will produce \$30,000,000 during 1888. There are other extensive beds of ore. The coal fields contain thick fields of bituminous coal of several kinds; considerable gold has been mined; silver and copper are also found; potter's, porcelain and fire clays, hydraulic limestone, manganese and many other minerals exist in considerable quantities; there are various building-stones. The statuary granite and white marble of Coosa County and the variegated marbles of Talladega and adjacent counties are not surpassed by any in the country.

There are 66 Counties in Alabama. Newspapers are published in 64.—Cities, towns, and villages in which papers are published number 87, of which 63 designated by a dagger (†) are county-seats. Of the 160 papers which insert advertisements published in the State, 14 are daily, 2 semi-weekly, 134 weekly, 2 semi-monthly, and 8 monthly.

AUTAUGA CO.....Pop. 13,108

Dem. vote in 1884, 911; Rep. 877. (8,717 col'd pop.)

Location—Central, bordering on the Alabama River; area about 660 sq. m. **Natural Features**—Surface undulating; soil fertile. **Chief Products**—Cotton, corn, and sweet potatoes. Some factories of cotton and cotton-gins. ARKANSAS.

Population 802,525.....Dem. Maj. in 1884, 22,121

Colored pop., 210,666.

Dem. vote, 72,927; Rep. 50,806

STATE CAPITAL, LITTLE ROCK.

ARKANSAS is bounded north by Missouri, east by Missouri, Tennessee, and Mississippi, south by Louisiana, southwest by Texas, and west by the Indian Territory; greatest length from north to south, 240 miles, and breadth from 170 to 250 miles; land area, 53,045 square miles. The eastern part is low and level, with dense forests and many swamps and lakes, and is frequently more or less inundated by the Mississippi, Arkansas, and other rivers. The surface rises toward the centre, where it is hilly and diversified with forests and rolling prairies. Further west are branches of the Ozark Mountains, comprising the Black Hills in the north, Cane Hills in the northwest, and the Ouachita Hills in the south. The Valley of the St. Francis, in the northeast, is nearly all swamp; the Valley of the Arkansas, from the Indian Territory line entirely across the State, is unsurpassed as a cotton producing country; the Valley of the White in the north, abounding in forests, is also rich in agriculture; in the southern part of the State are the Saline, Ouachita, Little Missouri and Red rivers, while in the southeast the Bayou Bartholomew makes a large country tributary to the Mississippi River. The soil is very varied. The river bottoms are very fertile, and yield large crops of cotton, corn, sweet potatoes, tobacco, and fruit. The soil is less productive on the uplands, but in many places, especially north, produces good crops of wheat, oats, fruit, and especially apples. Cotton is the chief staple; corn next. Hay is an important crop. Stock-raising is growing rapidly, the mild winters being especially conducive to stock, and the cost of "keeping up" stock avoided. The principal manufactures are cotton seed oil, flour and grist-mill products, cotton-gins, leather, wool-carding, and lumber. The number of manufacturing establishments in the State in 1880, was 1,202; amount of capital invested in them, \$2,953,130; total number of hands employed, 4,557; amount paid in wages, \$925,358; value of materials used, \$4,392,080; value of products, \$6,756,159. In the absence of any statistics from official sources it may be said that the manufacturing and agricultural interests have very largely increased since 1880, while the transfer of timber into merchantable lumber has grown to wonderful proportions. In the matter of ores, mechanical and precious, Arkansas is coming to the front as one of the greatest of ore-producing States, and millions of dollars are now being used in their development. As a fruit country the northwestern part of Arkansas is unrivalled, especially as to apples. There are now nearly 2,000 miles of railroads where there were only a little over 500 in 1880, and perhaps as many more miles have been surveyed as are in process of construction. Coal, argentiferous galena, zinc, copper, and iron, marble, grind-stone, granite, and kaolin are among the minerals. Good coal is mined in Crawford, Conway, Franklin, Johnson, Perry, Pope, Pulaski, Sebastian, Scott, Washington, White, and Yell Counties. Silver is found in connection with galena in Pulaski and Sevier Counties, and with lead in Benton, Carroll, Independence, Izard, Lawrence, Madison, Marion, Newton, Pulaski, Randolph, Searey, and Washington Counties; excellent marble, especially in Madison County. Slate for all purposes is quarried in Pike, Pulaski, Polk, Garland, and Sevier Counties; Garland County has extensive quarries of Arkansas hone or oil-stone. In Pulaski county, a few miles south of Little Rock, very extensive quarries of blue granite have been opened up within the past year, and valuable discoveries of iron have also been made. Among the mineral springs, the "Hot Springs of Arkansas," at Hot Springs, Garland County, are the most renowned.

There are 75 Counties in Arkansas. Newspapers are published in 71.—Cities, towns and villages in which papers are published number 102, of which 66 designated by a dagger (†) are county-seats. Of the 175 papers which insert advertisements published in the State, 13 are daily, 157 weekly, 4 semi-monthly, and 1 monthly.

CALIFORNIA.

Population \$1,250,000.....Rep. Plur. in 1884 13,128
 Chinese pop., 75,182. Rep. vote, 102,416; Dem. 89,288.

STATE CAPITAL, SACRAMENTO CITY.

CALIFORNIA is bounded north by Oregon, east by Nevada and Arizona, south by Lower California, and west by the Pacific Ocean. A line drawn through its center, following the curves of the eastern and western borders, would measure about 770 miles. Its greatest breadth is about 330 miles; least breadth, 150 miles; average breadth, 230 miles; land area, 155,980 square miles. It is the largest State in the Union except Texas. The surface is traversed by two great ranges, the Sierra Nevada in the east and the Coast Range in the west, while between them is the beautiful and fertile valley of the rivers Sacramento and San Joaquin. The Yosemite and other valleys are on the western slope of the Sierra Nevadas, and the eastern slope teems with minerals. The north is an elevated mountain region, with a rugged surface and poor soil. The soil of a large part of the State is very deep and rich, and the yield of agricultural products generally is very great. For every kind of fruit that grows in semi-tropical and temperate climates, California is, in soil and climate, pre-eminently favorable. The wheat crop ranges from 20,000,000 to 24,000,000 bushels a year. Barley in 1887, reached 40,000,000 bushels. The wool-clip was 30,000,000 pounds. The yield of raisins in 1887 was 20,000,000 pounds, and the estimate wine crop for the same year was from 14,000,000 to 16,000,000 gallons, and of brandy 400,000 gallons, of grapes 600,000 pounds. Dried fruits are extensively produced; oranges, lemons, and other tropical fruits, and honey, are raised in the south, and tobacco, corn barley, and hops in various parts of the State. The olive is attracting a great deal of attention, and justly so, as the State furnishes on its hills and mountain slopes the soil exactly suited to its production, and it is believed that in a few years the California olive groves will rival those of the Mediterranean. Indeed, California is famous for her wheat, wool, vineyard produce, and agricultural products generally, scarcely less than for her yield of the precious metals. The estimated gold and silver production in 1887 was \$20,000,000, of quicksilver nearly 600,000 pounds, of petroleum 12,400,000 gallons, and natural gas has been discovered at Stockton, Santa Barbara, Redwood City and other points. Manufacturing interests are growing rapidly, the principal being lumber, flour, woollens, wine, brandy, tobacco, cigars, machinery, and metallic wares. The number of manufacturing establishments in the State in 1880, was 5,885; amount of capital invested in them, \$61,243,784; total number of hands employed, 43,693; amount paid in wages, \$21,065,905; value of materials used, \$72,607,709; value of products, \$116,218,973. Manufactures have made great progress since 1880, and the figures just quoted will, at the present time, represent nearly, if not quite, the manufacturing interest of the city of San Francisco alone. The annual value of the fishing interest is about \$6,000,000.

There are 52 Counties in California. Newspapers are published in 51.—Cities, towns, and villages in which papers are published number 177, of which 50 designated by a dagger (†) are county-seats. Of the 507 papers which insert advertisements published in the State, 89 are daily, 1 tri-weekly, 9 semi-weekly, 361 weekly, 1 bi-weekly, 8 semi-monthly, 37 monthly and 1 quarterly.

ALAMEDA CO.....Pop. \$100,000

(4,381 Chinese.)
 Rep. vote in 1884, 7,473; Dem. 4,734; Pro. 104; Gbk. 90.
Location—West, bordering on San Francisco Bay; area about 690 sq. m. **Natural Features**—Surface mountainous the Coast Range occupying eastern part; soil fertile in lowlands; numerous warm mineral springs. **Chief Products**—Wheat and barley very large; oats, potatoes, butter, wool, hay, market-garden produce, and much fruit; sheep and stock-raising; salt and beet sugar. Manufacturing establishments of all kinds, in 1880, 177; capital invested, \$2,401,332; hands employed, 2,280; value of products, \$5,338,975. **County-seat** Oakland, pop. 563,237.

TEHAMA CO. Pop. \$12,000

Dem. vote in 1884, 1,146; Rep. 1,075; Pro. 21; Gbk. 1. (774 Chinese pop.)

Location - North, lying between the Sierra Nevada and the Coast Range; area about 3,000 sq. m. Natural Features - Surface chiefly a fertile valley or plain between the mountains, except in the east and northeast, where it is rocky and barren; gold is found in the Sierras,

and salt and medicinal springs in the Coast Range. Chief Products - Wheat, barley, butter, wool, hay, and wine; live-stock, especially sheep. Several flour and saw-mills. Manufacturing establishments of all kinds, in 1880, 12; capital invested, \$1,273,700; hands employed, 255; value of products, \$1,078,431. County-seat Red Bluff, pop. \$3,250.

Table listing newspapers and their circulation in Trinity County: Evening Sentinel (daily), News (daily), People's Cause (daily), People's Cause, Sentinel.

TRINITY CO. Pop. \$5,000

Rep. vote in 1884, 445; Dem. 429; Pro. 6; Gbk. 6. (1,946 Chinese pop.)

Location - Northwest, bordering on the Coast Range; area about 2,490 sq. m. Natural Features - Surface generally hilly, part mountainous; large forests; agricultural products small; gold mining chief occupation. Manufacturing establishments of all kinds, in 1880, 22; capital invested, \$49,800; hands employed, 40; value of products, \$53,116. County-seat Weaverville, pop. \$900.

Table listing newspapers and their circulation in Trinity County: Trinity Journal.

TULARE CO. Pop. \$15,000

Dem. vote in 1884, 1,691; Rep. 1,268; Pro. 115; Gbk. 84. (330 Chinese pop.)

Location - South-central, bordering on the Sierra Nevada; area about 5,610 sq. m. Natural Features - Surface diversified with mountains, valleys, and wide bottom-lands; soil of the latter fertile. Chief Products - Barley, wheat, corn, potatoes, butter, wool, and hay; live-stock, especially sheep. Flour and lumber mills. Manufacturing establishments of all kinds, in 1880, 33; capital invested, \$131,500; hands employed, 77; value of products, \$350,069. County-seat Visalia, pop. \$2,000.

Table listing newspapers and their circulation in Tulare County: Sentinel, Enterprise, Advocate, Democratic Free Press, Evening Register (daily), Register, Standard, Delta, San Joaquin Valley Resources (monthly), Tulare County Times.

TUOLUMNE CO. Pop. \$8,000

Dem. vote in 1884, 1,066; Rep. 846; Pro. 5. (805 Chinese pop.)

Location - East-central, bordering on the Sierra Nevada; area about 1,980 sq. m. Natural Features - Surface level in the west, mountainous in the east; much timber; soil fertile on the foot hills and in the valleys. Mining interests once among the most important in the state, have declined of late years, and farming, stock-raising, and fruit growing have become leading and important industries; the cereals, fruit, and grapes are largely cultivated. Manufacturing establishments of all kinds in 1880, 36; capital invested, \$200,300; hands employed, 103; value of products, \$304,915. County-seat Sonora, pop. \$1,750.

Table listing newspapers and their circulation in Tuolumne County: Tuolumne Independent, Union Democrat.

VENTURA CO. Pop. \$10,000

Rep. vote in 1884, 749; Dem. 608; Pro. 20; Gbk. 16. (129 Chinese pop.)

Location - South, bordering on the Pacific Ocean; area about 1,690 sq. m. Natural Features - Surface generally mountainous; soil fertile in the valleys. Chief Products - Grain, tropical fruits, and many cattle and sheep. Manufacturing establishments of all kinds, in 1880, 17; capital invested, \$72,250; hands employed, 43; value of products, \$110,734. County-seat San Buenaventura, pop. \$2,500.

Table listing newspapers and their circulation in Ventura County: Ojai Valley Review, Free Press (daily), Ventura Democrat, Ventura Free Press, Vidette, Golden State.

COLORADO.

Population 273,377.....Rep. Plur. in 1884, 8,563

Rep. vote, 36,166; Dem. 27,608; Gbk. 1,961; Prohib. 762.

STATE CAPITAL, DENVER.

COLORADO is bounded north by Nebraska and Wyoming Territory, east by Nebraska and Kansas south by the Indian Territory and New Mexico, and west by Utah. Average length from east to west 380 miles, breadth, 280 miles; land area, 108,645 square miles. The surface consists of three divisions—the mountains and parks, the foot-hills, and the plains. It is intersected near the center by the Sierra Madre Range of the Rocky Mountains, including the highest peaks, among which are Pike's and Long's Peaks, Mts. Torrey, Lincoln, Gray, Yale, Harvard, the Spanish Peaks, etc. The mountains enclose the wonderful valleys or basins known as parks, many of which are small, but others larger than some entire States. These parks are well timbered, and abound with beautiful scenery, being diversified with low hills and ridges, which contain the sources of all the great rivers that rise in the State. The eastern part of Colorado is an immense plain, well adapted to stock-raising. Agriculture is being carried on to a greater extent than ever before. Extensive irrigating ditches have been constructed; where water can be had the soil is very productive. Cattle raising and sheep farming are the chief agricultural pursuits. Lumbering is an important industry, but the mining of gold, silver, and other metals is the chief source of wealth. The output for 1887 was estimated at \$27,000,000, or a gain of \$6,000,000 over 1886. The number of manufacturing establishments in the State in 1880, was 599; amount of capital invested in them, \$4,811,714; total number of hands employed, 5,074; amount paid in wages, \$2,314,427; value of materials used, \$3,806,762; value of products, \$14,260,159. In the absence of official information it is impracticable to give in detail the present condition of the manufacturing interests, but it is thought that they have increased since 1880 from 75 to 100 per cent.

There are 42 Counties in Colorado. Newspapers are published in 41.—Cities, towns, and villages in which papers are published number 120, of which 37 designated by a dagger (†) are county-seats. Of the 236 papers which insert advertisements published in the State, 27 are daily, 2 tri-weekly, 2 semi-weekly 201 weekly, 1 semi-monthly, and 3 monthly.

CONNECTICUT.

Population 622,700.....Dem. Plur. in 1884, 1,274

Dem. vote, 67,167; Rep. 65,893.

STATE CAPITAL, HARTFORD.

CONNECTICUT is bounded north by Massachusetts, east by Rhode Island, south by Long Island Sound, and west by New York. Its average length from east to west is 86 miles; its average breadth, 55 miles; land area, 4,845 square miles. The eastern part is principally composed of rounded hills, which, though stony, afford rich pasturage; and the valleys support a thrifty agricultural and manufacturing population. The Connecticut Valley, near the river, and at a distance from the Sound, is very fertile. In the south the land is broken and the soil sandy and gravelly, but when well manured yields good crops of potatoes, rye, oats, and corn. In the west the surface is rough and the hills are abrupt. Agriculture employs one-third of the working population and the value of the farms reaches \$121,000,000. Dairy products and hay are the principal staples of the east and west. Tobacco is largely grown in the Connecticut Valley. Corn, rye, oats, and potatoes are grown in nearly all sections. The land near the large cities and towns is chiefly devoted to market-gardening. The Connecticut River is open to steamboat navigation from its mouth to Hartford. The Thames River is likewise navigable by Sound steamers as far as its formation by the Yantic and Shetucket Rivers in Norwich city, and steamers ply regularly between that city New York, and, in the summer season, to the seaside resorts. Connecticut is mainly a manufacturing State, and its industries are very extensive and varied. The number of manufacturing establishments in the State in 1880, was 4,448; amount of capital invested in them, \$120,480,275; total number of hands employed, 112,915; amount paid in wages, \$48,501,518; value of materials used, \$102,183,341; value of products, \$185,697,211. Excellent iron is made from Connecticut ores, and very large quantities of brown stone are taken from the celebrated Portland sandstone quarries. The State of Connecticut, and especially its capital city of Hartford, has become celebrated for the extent and solidity of its insurance interests,—the nineteen life and fire companies of Hartford alone representing in capital and assets nearly two hundred millions of dollars. There are 25 railroad corporations in Connecticut, owning and operating 140,461 miles of road within the State.

There are 8 Counties in Connecticut. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 63, of which the 8 designated by a dagger (†) are county-seats. Of the 173 papers which insert advertisements published in the State, 31 are daily, 1 semi-weekly, 116 weekly, 1 every ten days, 3 bi-weekly, 2 semi-monthly, 1 every third week, 15 monthly, 1 bi-monthly and 2 quarterly.

DELAWARE.

Population 146,608.....Dem. Plur. in 1884, 3,923

Dem. vote, 16,976; Rep. 13,653.

STATE CAPITAL, DOVER.

DELAWARE is bounded north by Pennsylvania, east by the Delaware River and Bay, and the Atlantic Ocean, south and west by Maryland. Its length from north to south is 96 miles, its breadth ranging from 9 to 12 miles in the north to about 36 miles in the south; land area 1,960 square miles. The surface in the north is finely diversified with hill and dale, and southward the land is rolling with fringes of marshes and swampy tracts along the indentations of Delaware Bay. The soil in the interior of the State is light and easily cultivated. The agricultural products are grain, corn, fruit, and market-garden produce; peach-growing and small products—berries, are prominent industries. Over one hundred evaporators and canneries are engaged in conserving all kinds of fruits, berries and garden vegetables, at Dover, Milford, Georgetown, Smyrna and other towns in the lower half of the State. Manufactures are various, and are carried on chiefly in Wilmington and its vicinity. Seaford ships immense quantities of oysters, and Lewes is a station for Menhaden and other fisheries. Oyster growing and fishing are important industries. Large quantities of timber are cut for ship-building, the manufacture of glass and for railroad ties. The number of manufacturing establishments in the State in 1880, was 746; amount of capital invested in them, \$15,655,822; total number of hands employed, 11,638; amount paid in wages, \$4,267,349; value of materials used, \$12,828,461; value of products, \$20,514,438.

There are 3 Counties in Delaware. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 14, of which 3 designated by a dagger (†) are county-seats. Of the 34 papers which insert advertisements published in the State, 5 are daily, 28 weekly, and 1 monthly.

KENT CO.....Pop. 32,874

Dem. vote in 1884, 3,975; Rep. 2,136.

Location—Central, bordering on Maryland, and Delaware Bay; area about 500 sq. m. **Natural Features**—Surface undulating; soil mostly fertile. **Chief Products**—Butter, hay, wool, white and sweet potatoes, peaches, strawberries and other small fruits, corn, wheat, and oats; live-stock numerous. **Manufactures**—Baskets, brick, carriages, canned and preserved fruits, farm implements, flour and saw-mills, iron-castings, leather, and metallic wares. Manufacturing establishments of all kinds, in 1880, 204; capital invested, \$363,839; hands employed, 1,711; value of products, \$1,731,682. **County-seat** Dover (State capital also), pop. 38,400.

POPULATION: § Estimated, Unmarked—Census of 1880.

DISTRICT OF COLUMBIA.

Population, 177,624.....No Vote.

Colored pop., 59,596.

The DISTRICT OF COLUMBIA is inclosed by the State of Maryland, except on the southwest, which is bounded by the Potomac River; land area, 60 square miles. Surface undulating, with a fine fertile soil. The agricultural and market-garden products are large, and the principal manufacture that of flour, at Georgetown, at which place also is carried on an extensive coasting-trade of coal, tobacco, grain, and flour. Brick, lumber, confectionery, and carriages are other leading industries. The number of manufacturing establishments in the State in 1880, was 971; amount of capital invested in them, \$5,552,526; total number of hands employed, 7,146: amount paid in wages, \$3,924,612; value of materials used, \$5,365,400; value of products, \$11,882,316.

Of the 52 papers which insert advertisements published in the District, 4 are daily, 32 weekly 1 semi-monthly, 14 monthly, and 1 quarterly.

 POPULATION: § Estimated, Unmarked—Census of 1880.

FLORIDA.

Population 342,551.....Dem. Plur. in 1884, 3,738

Colored pop., 126,690

Dem. vote 31,769; Rep. 28,031.

STATE CAPITAL, TALLAHASSEE.

FLORIDA is bounded north by Alabama and Georgia, east by the Atlantic Ocean, south and west by the Gulf of Mexico and Alabama. The peninsular portion of the State is about 375 miles long by an average breadth of 90 miles; the upper portion 360 miles from east to west by from 30 to 90 miles from north to south; land area, 54,240 square miles. Surface is diversified with numerous lakes, the largest, Okeechobee, being 40 miles long by about 30 miles broad. The largest portion of the southern part of the peninsula is occupied by the Everglades, an evergreen marsh or swamp, impassable in the rainy season, and resembling an immense lake dotted with innumerable islands of from half an acre to hundreds of acres in extent, the whole comprising over 2,000,000 acres. From the northern end of the swamp to Georgia is mostly a dead level, with occasional undulations and small hills. West of the neck of the peninsula the surface becomes a little more uneven; the central portion is the most fertile, but there are many pine-barrens there. There are numerous gentle eminences called hammocks, which are remarkably fertile, as are also the swamp-lands when ditched and drained. Sugar-cane is raised chiefly along the Gulf coast. Both long and short staple cotton and tobacco are grown, but corn and rice are the principal cereals. Oranges, lemons, limes, pineapples, figs, olives, and grapes flourish luxuriantly; garden vegetables are largely produced. Cattle require little care, are not housed in winter, and large numbers are raised and shipped to Havana. Hogs fatten on the roots and mast of the forest. Sponge is found on many parts of the coast. Manufactures of pine-lumber, ship-timber, tar, rosin, turpentine, cotton-seed-oil and cake, palmetto hats and braids; salt is made by solar evaporation; cigars are manufactured at Key West and Ybor City, near Tampa, in large quantities. During 1887 a great impetus was given to the growing of tobacco. The number of manufacturing establishments in the State in 1880, was 426; amount of capital invested in them, \$3,210,680; total number of hands employed, 5,504; amount paid in wages, \$1,270,875; value of materials used, \$3,040,119; value of products, \$5,546,448. There are considerable fisheries.

There are 45 Counties in Florida. Newspapers are published in 41.—Cities, towns, and villages in which papers are published number 78, of which 35 designated by a dagger (†) are county-seats. Of the 128 papers which insert advertisements published in the State, 12 are daily, 1 tri-weekly, 1 semi-weekly, 110 weekly, 2 semi-monthly and 2 monthly.

GEORGIA.

Population 1,542,180.....Dem. Plur. in 1884, 46,961

Colored pop., 725,138. Dem vote, 94,653; Rep, 47,692.

STATE CAPITAL, ATLANTA.

GEORGIA is bounded north by Tennessee and North Carolina, northeast by South Carolina, southeast by the Atlantic Ocean, south by Florida, and west by Alabama. Its extreme length from north to south is 320 miles, extreme breadth 254 miles; land area, 58,980 square miles. The surface is varied; along the coast, intersected by numerous rivers and sounds, and the country for miles inland is a succession of ridges of pines and live oaks and swamps of cypress; the great Okeefinokee Swamp is in the southeast. Back from the coast is a stretch of sandy land, mostly pine barrens, and yielding large amounts of timber and naval stores. A series of terraces bring the land in the middle of the State to about 575 feet above tidewater, from which elevation it rises toward the north more rapidly, until it becomes mountainous, being there crossed by spurs of the Appalachians. The soil of the islands is sandy, producing sea-island cotton; that of the mainland, rich alluvial, producing corn, cotton, and rice; the middle region is red loam, yielding good cotton, corn, tobacco, etc. In the north there is much fertile soil; grain, tobacco, fruits, and vegetables are largely grown, but not much cotton, which is mainly raised in the central, west-central, and southwestern regions. Sugar-cane is grown in the south, and considerable pork fattened, mainly for home consumption; sweet potatoes are largely produced; wool is prominent, but corn and cotton are the leading staples. Among the leading industries are lumber, flour, boots and shoes, carriages cotton and woolen goods, wool-carding and cloth-dressing, leather, saddlery, metallic wares, furniture, castings, machinery, farm implements, etc. The number of cotton factories in the State in 1880 was 40, with 198,656 spindles and 4,498 looms. The most important are at Augusta and Columbus, the other chief seats of the cotton manufacture are Athens, Atlanta, Decatur, Macon, Savannah, and West Point. Savannah, the commercial capital of the State, is the most important South Atlantic seaport. The city is the seat of a large foreign and domestic commerce. Its railroads extend to all parts of the country and its steamships ply daily to the principal North Atlantic ports. Savannah is the largest naval stores and second largest cotton and rice port in the United States, and also an important point for the manufacture and shipment of lumber and fertilizers. Atlanta has large iron works. Rome, Dalton, Marietta, Thomasville are manufacturing towns. The number of manufacturing establishments in the State in 1880, was 3,593; amount of capital invested in them \$20,672,410; total number of hands employed, 24,375; amount paid in wages, \$5,266,152; value of materials used, \$24,143,939; value of products, \$36,440,948. These figures would of necessity be largely increased at the present time but there exist no means of arriving at even approximate amounts. Darien, Brunswick, and St. Marys manufacture and export lumber. Minerals: bituminous coal in the northwestern portion; immense deposits of iron-ore in Bartow and Cherokee Counties; copper-ore in Gilmer County; gold is most plentiful in Cherokee, Carroll, Cobb, and Lumpkin Counties; silver, lead, and many other minerals, granite, marble, gypsum, slate, and petroleum; excellent marble in Pickens and Cherokee Counties; hydraulic limestone in Bartow County. There are numerous mineral springs of which the Indian Spring in Butts County and the Bowden Lithia, or Salt Spring, in Douglas County are the best known. The development of the rich marble resources in north Georgia during the past five years has been wonderful. There are inexhaustible quarries of the finest marble in Pickens, Cherokee, Murray and adjoining counties, and millions of dollars have been invested in opening them.

There are 137 Counties in Georgia. Newspapers are published in 116.— Cities, towns, and villages in which papers are published number 139, of which 107 designated by a dagger (†) are county-seats. Of the 261 papers which insert advertisements published in the State, 23 are daily, 3 semi-weekly, 204 weekly, 2 bi-weekly, 3 semi-monthly, 24 monthly, and 2 quarterly.

APPLING CO.....Pop. 5,276

Dem. vote in 1884, 503; Rep. 345. (1,193 col'd pop.)

Location—Southeast; area about 1,090 sq. m. **Natural Features**—Surface level; soil sandy. **Chief Products**—Corn, oats, sweet potatoes, rice, and molasses; a little cotton. ILLINOIS.

Population 3,077,871.....Rep. Plur. in 1884, 24,827

Rep. vote, 337,411; Dem. 312,584.

STATE CAPITAL, SPRINGFIELD.

ILLINOIS is bounded north by Wisconsin, northeast by Lake Michigan, east by Indiana, southeast and south by Kentucky, and west by Missouri and Iowa; extreme length north and south 385 miles; extreme breadth 218 miles; land area, 56,000 square miles. The surface is mostly level table-land, inclining gently toward the south, with bluffs along the principal rivers. A small tract in the northwest, around Galena, is somewhat broken, and a low mountain ridge extends across the southern end from Grand Tower, on the Mississippi River, to Shawneetown, on the Ohio, about 850 feet above sea-level. This is a great fruit region. The prairies are sometimes level, but generally undulating. More than two-thirds of the State is a productive bituminous coal-field. The iron-ore is good only when mixed with Michigan and Missouri ores. Lead and zinc are mined extensively in the northwest. Copper-ore, gypsum, and marble are found in various places. Limestone and freestone abound. The prairie soils are deep and fertile; that of the river bottoms is often inexhaustible. A tract called the American Bottom, extending along the Mississippi River a length of ninety miles by about five in breadth, has an alluvial soil about twenty-five feet in depth. Illinois is unexcelled as an agricultural State, and is among the first in manufactures. Spring and winter wheat, corn, and other cereals, dairy produce, wool, and hay, are leading products. In 1886 the crop of corn was 209,818,000 bushels, and of wheat 27,562,000 bushels. The industrial pursuits embrace a wide range of articles, and the seats of manufacture are distributed generally throughout the State. The number of manufacturing establishments in the State in 1880, was 14,549; amount of capital invested in them, \$140,652,066; total number of hands employed, 144,727; amount paid in wages, \$57,429,085; value of material used, \$289,843,907; value of products, \$414,864,673. In 1886 the assessed valuation of property in the State was \$726,178,132, exclusive of \$60,987,317 of railroad property. There are 11,825 miles of railroads belonging to 58 lines. Fishing interests center chiefly at Chicago. Natural gas in large quantities has lately been discovered at various points in the State and is successfully used for heating and lighting in Litchfield.

There are 102 Counties in Illinois. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 441, of which 102 designated by a dagger (†) are county-seats. Of the 1,216 papers which insert advertisements published in the State, 109 are daily, 1 tri-weekly, 19 semi-weekly, 903 weekly, 2 bi-weekly, 26 semi-monthly, 146 monthly, 1 bi-monthly, and 9 quarterly.

INDIANA.

Population 1,978,301.....Dem. Plur. in 1884, 6,512

Dem. vote, 244,932; Rep. 238,480.

STATE CAPITAL, INDIANAPOLIS.

INDIANA is bounded north by Michigan and Lake Michigan, east by Ohio, south by Kentucky, and west by Illinois. Its extreme length north and south is 276 miles; average breadth 140 miles; land area, 35,910 square miles. About two thirds of the surface is undulating or level prairie; near the Ohio and other streams the surface is hilly and often abrupt and rugged. In the extreme northwest there is a sandy tract, with considerable marsh-land. The northeast abounds in oak-openings and prairie land, interspersed with many small lakes. The soil is generally fertile, much of it exceedingly so; the richest is found along the Wabash, White, and White Water Rivers. There is abundance of coal of good quality. The iron manufacture is extensive, Indiana coal being particularly suited to its manufacture, but the ores used come mainly from the Lake Superior region, Missouri, and Tennessee. Indiana has some bog-ore and local deposits of better grades which have been worked to some extent. There are some salt-springs, good sandstone, limestone, fire-brick, potter's clays, and kaolin. Indiana ranks high as a grain-producing and stock-raising State. Corn, wheat, oats, tobacco, and potatoes are raised in large quantities. Butter, wool, hay, maple-sugar, and sorghum-molasses also, are important products; timber is largely exported. Manufactures are numerous and extensive, the chief industries being flouring and grist-mill products, lumber, woolen goods, furniture, carriages and wagons, iron and iron-ware, machinery, agricultural implements, pork-packing, liquors, metallic wares, leather, boots, shoes, and clothing. The number of manufacturing establishments in the State in 1880, was 11,198; amount of capital invested in them, \$65,742,962; total number of hands employed, 69,508; amount paid in wages, \$21,960,888; value of materials used, \$100,262,917; value of products, \$148,006,411. According to the State Biennial Report for 1885-6 the number of manufacturing establishments was 11,885; capital invested, 51,490,656; hands employed, 69,857; wages, \$28,295,828; value of raw material, \$91,872,291; value of products, \$158,562,729. The most important fact of the present is the discovery of a very large natural gas belt, said to be the largest known in the world. This is proving a great stimulus to manufacturing enterprises. This belt extends over 25 counties. There are 133 wells yielding over 10,000 cubic feet per day, 15 yielding between 3,000,000 and 5,000,000 cubic feet, and 10 whose registered capacity exceed 5,000,000 cubic feet per day.

There are 92 Counties in Indiana. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 230, of which 92 designated by a dagger (†) are county-seats. Of the 591 papers which insert advertisements published in the State, 72 are daily, 1 tri-weekly, 2 semi-weekly, 451 weekly, 1 bi-weekly, 5 semi-monthly, 57 monthly, 1 bi-monthly and 1 quarterly.

POPULATION: § Estimated. Unmarked—Census of 1860.

IOWA.

Population 1,753,980.....Rep. Plur. in 1884, 19,796

Rep. vote, 197,082; Dem. 177,286

STATE CAPITAL, DES MOINES.

IOWA is bounded north by Minnesota, east by Wisconsin and Illinois, south by Missouri, and west by Nebraska and Dakota. Its greatest length from east to west is 300 miles, and breadth 208 miles; land area, 55,475 square miles. The surface is generally rolling prairie, with no mountains nor even high hills, but with frequent bluffs along streams; and in places near large rivers it presents a broken appearance, caused by erosion from torrents. The southern part is the most level, beautifully diversified with prairies, groves, and the numerous affluents of the two great rivers. In the northeast the surface is more elevated, with numerous low hills with tops covered with oaks, and abounding in lead and other ore; but the distinguishing feature of Iowa is its beautiful diversified prairies, which are everywhere fertile and easily tilled, and having few stones or stumps, are especially adapted for the use of agricultural machinery. The valleys of the Red Cedar, Iowa, and Des Moines rivers contain the richest soils; northward of these the soil becomes less fertile, but still productive and remunerative. Building-stone is abundant; coal and lead are very extensively worked. Iron-ore and other minerals are found. The cereals generally, dairy and market-garden products, wool, linseed, sorghum, and live-stock of all kinds are very largely produced. Grapes grow well in the south, and fruit-culture is increasing. The manufacturing interests are rapidly developing, the leading branches being flour, lumber, wood-working, carriages, woolen goods, boots and shoes, pork-packing, saddlery, furniture, malt liquors, and farm implements. The number of manufacturing establishments in the State in 1880, was 6,921; amount of capital invested in them, \$33,987,886; total number of hands employed, 28,372; amount paid in wages, \$9,725,962; value of materials used, \$48,704,311; value of products, \$71,045,926.

There are 99 Counties in Iowa. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 372, of which 99 designated by a dagger (†) are county-seats. Of the 765 papers which insert advertisements published in the State, 69 are daily, 10 semi-weekly, 638 weekly, 1 bi-weekly, 4 semi-monthly and 43 monthly.

POPULATION: State Census 1885, § Estimated.

KANSAS.

Population 1,518,255.....Rep. Plur. in 1884. 64,274

Colored pop., 48,084.

Rep. vote, 154,406; Dem 90,132; Gbk. 16,341; Prohib. 4,485.

STATE CAPITAL, TOPEKA.

KANSAS is bounded north by Nebraska, east by Missouri, south by the Indian Territory, and west by Colorado. Its length from east to west is 410 miles, and from north to south 210 miles; land area, 82,300 square miles. The surface is chiefly undulating in the east, while the western part has a rolling and varied surface, with every requisite for grazing. There are no mountains, very few lakes, and those small and shallow; no marshes but salt marshes, and these are valuable. When the State was settled only five per cent. of the area was forest, and this was distributed mainly along streams and in occasional groves and small tracts; but it is estimated that the area of forest trees has since increased twenty per cent by voluntary growth, transplanting, and by seed. The western half, however, is very scantily supplied with timber, but there is an abundance of coal, which is used for domestic purposes and for export to Nebraska, Missouri and other points; there are several varieties of good building-stone. The bottom and table lands are chiefly a rich black loam, and highly productive. Winter and spring wheat, corn, rye, oats, and potatoes are the chief products, while broom-corn, sorghum, flax, hemp, castor-beans, tobacco, and hay are also largely produced. Cattle-raising is a prominent industry, and sheep farming is becoming frequent in the western part. Dairy products are increasing rapidly, and progress is also being made in fruit-growing and wine-making. During 1886 and 1887 attention has been especially devoted in Kansas to the development of a process for making sugar from sorghum, which culminated successfully in 1887. This result is filling the State with sugar factories which promise to be a source of great wealth to the State and of incalculable benefit to the farmers. Glass works were also established in Fort Scott and Paola in 1887. Manufactures are being developed, and the number of establishments is rapidly increasing, but at present the chief industries are agriculture, stock-raising, and fruit-culture. The principal cities are Topeka, Wichita, Atchinson, Leavenworth and Fort Scott. There are 8,000 miles of railway within the limits of the State; 2,070 of which were built during 1887. The number of manufacturing establishments in the State in 1880, was 2,803; amount of capital invested in them, \$11,192,315; total number of hands employed, 12,062; amount paid in wages, \$3,995,010; value of materials used, \$21,453,141; value of products, \$30,843,777. The amount of capital invested in 1887 is estimated at \$16,369,724; amount paid in wages, \$5,758,612; value of materials, \$31,651,913; value of products, \$48,471,406.

There are 106 Counties in Kansas. Newspapers are published in all.— Cities, towns, and villages in which papers are published number 452, of which 102 designated by a dagger (†) are county-seats. Of the 849 papers which insert advertisements published in the State, 67 are daily, 7 semi-weekly, 755 weekly, 2 semi-monthly, 16 monthly, 1 bi-monthly and 1 quarterly.

POPULATION: State Census 1887. § Estimated.

KENTUCKY.

Population §1,978,428 Dem. Plur. in 1884, 34,839

Colored pop., 271,451.

Dem. vote, 152,961; Rep. 118,122.

STATE CAPITAL, FRANKFORT.

KENTUCKY is bounded north by Ohio and Indiana, northwest by Illinois, east by West Virginia and Virginia, south by Tennessee, and west by Missouri; greatest length from east to west, 350 miles; greatest breadth, 178 miles; land area, 42,000 square miles. The surface in the east and southeast is mountainous, being broken by numerous parallel ranges of the Alleghany system, with deep and fertile valleys. Northwest of this section, and in the center of the State, is the famous Blue Grass Region, with a gently undulating upland surface, with deep valleys at the rivers. Between the Green and Cumberland Rivers the surface is level and known as the "Barrens," because of the lack of stout timber in much of it. The western part is generally level with slight undulations. The soil of the whole State is remarkably fertile and renews itself readily; that part between Lexington and the Ohio River is known as the "Garden of Kentucky." Cereals grow to greater perfection and maturity in Kentucky than almost any other State. The chief products are tobacco, hemp, corn, wheat, oats, rye, barley and potatoes. Kentucky has acquired a world-wide fame for its thoroughbred horses and short-horn cattle. The wool clip is very large, and immense numbers of hogs are raised. Dairy products are very extensive; also sorghum-molasses, maple-sugar, honey, and wax; some cotton is raised in the southwest near the Tennessee line. Tobacco is of vast importance, nearly half the American crop being handled within the State, Louisville being the greatest leaf market in the world; in 1887 137,000 hogsheads were sold in the open market there. Coal, iron, building stones, clays, etc., are abundant. The timber forest in southeastern Kentucky covers 10,000 square miles underlaid with coking and bituminous coals of superior grade. The greatest known area of coking and fine cannel coals exists at the head of the Kentucky river. Large quantities of so-called "Red River" and the Oriskany ores used in the manufacture of car wheels and other fine iron products are annually mined. The manufacturing interests are varied and important, and are carried on chiefly in the towns on the Ohio River; an extensive industry is the smelting and working of iron, while all wood manufactures flourish. The number of manufacturing establishments in the State in 1880, was 5,328, in 1885, 7,572; amount of capital invested 1880, \$45,813,039, in 1885, \$57,208,614; total number of hands employed 1880, 37,391, in 1885, 58,136; value of materials used 1880, \$47,461,890, in 1885, \$60,832,462; value of products 1880, \$75,483,377, in 1885, \$103,303,659. Whisky is an important product of the central counties and more mules are raised than in any other state. Salt is made from springs in the mountain counties. Louisville is the principal city and has a population of nearly 205,000. Its manufacturing industries doubled in 17 years from 1870, and the product in 1887 was valued at \$67,000,000. It makes more plows, jeans, cement and oak-tanned sole leather than any city in the world. Louisville is situated at the falls of the Ohio and has two steel bridges across that river, and 14 independent railroad lines.

There are 119 Counties in Kentucky. Newspapers are published in 98.—Cities, towns, and villages in which papers are published number 112, of which 93 designated by a dagger (†) are county-seats. Of the 234 papers which insert advertisements published in the State, 20 are daily, 2 tri-weekly, 7 semi-weekly, 183 weekly, 1 bi-weekly, 4 semi-monthly, and 17 monthly.

LOUISIANA.

Population 939,946.....Dem. Maj. in 1884, 16,182

Colored pop., 483,655.

Dem. vote, 62,529; Rep. 46,347.

STATE CAPITAL, BATON ROUGE.

LOUISIANA is bounded north by Arkansas and Mississippi, east by Mississippi and the Gulf of Mexico, south by the Gulf of Mexico, and west by Texas. Its extreme length from east to west is about 300 miles, and breadth 240 miles; land area, 45,420 square miles. Surface generally low and level. There are low hills in the north and northwest, from which the land slopes gradually to the Mississippi and the Gulf. Much of the land along the river is below the surface at the spring freshets, and is protected from overflow by the levees, which are built on both banks below Baton Rouge, and on the west bank throughout the State. Many of the principal rivers and bayous are protected in like manner. It is estimated that one fifth of the surface of the State is liable to more or less frequent inundation. The soil of the river-bottoms is exceedingly fertile, and yields large crops of cotton, sugar-cane, rice, etc. Its prairies are productive and afford good pasture in places. The hilly section yields good cotton crops, but about half is covered with pine barrens. The great staples are cotton, sugar, rice, and corn. The State produces nearly all the sugar made in the United States. The yield of rice is very large, and the quality excellent. Cattle-raising is an important interest. The manufacturing interests are not large. The leading industries are lumber, naval stores, castings, machinery, tobacco, clothing, flouring-mill products, cotton-seed oil, beer, and ship building. The number of manufacturing establishments in the State in 1880, was 1,553; amount of capital invested in them, \$11,462,468; total number of hands employed; 12,167; amount paid in wages, \$4,360,371; value of materials used, \$14,442,506; value of products, \$24,205,183. In 1887, capital invested, 20,202,000; total number of hands employed, 20,635; value of products, \$38,333,000. Its commerce, carried on chiefly through New Orleans, is extensive and important. Iron-ores, ochre, gypsum, and marl are abundant; large deposits of sulphur exist in Calcasieu Parish, and an immense amount of solid rock-salt on Petit Anse Island.

There are 59 Parishes in Louisiana. Newspapers are published in 58.—Cities, towns, and villages in which papers are published number 74, of which 55 designated by a dagger (†) are parish capitals. Of the 137 papers which insert advertisements published in the State, 10 are daily, 116 weekly, 1 bi-weekly, 8 monthly, and 2 bi-monthly.

ACADIA PAR.....Pop. \$9,000

MAINE.

Population 648,936.....Rep. Plur. in 1884, 20,060.

Rep. vote, 71,716; Dem. 51,656.

STATE CAPITAL, AUGUSTA.

MAINE is the most northeasterly State in the Union, bounded on the north by Quebec and New Brunswick, east by New Brunswick, south by the Atlantic Ocean, and west by New Hampshire and Quebec; land area, 29,895 square miles. The northern part is mainly a wilderness of forest-land with rugged surface and groups of detached mountains: thinly peopled, except in the fertile tracts of Aroostook County. In the northeast, on the St. John's River, are several French Canadian settlements. The southern part is varied, seldom much broken, and has tracts of great fertility, while others are only moderately fertile, especially in the southeast. The hay and potato crop is large and excellent; corn thrives in the south, and winter wheat in the northeast; oats are very fine and prolific, and barley next. Dairy products are of great value. Large numbers of horses and cattle are exported. Wool is abundant and of good quality. The principal fruits are the cherry, plum, pear, and apple. The State holds a prominent position in the lumber trade; fisheries are important, and the canning of fish, lobsters, green-corn, fruits, and vegetables is extensively carried on. The seaboard towns enjoy a large coasting and West India trade. Cotton manufacture is one of the leading industries. Large quantities of lime are exported from Camden, Rockland, and Thomaston. Granite is extensively quarried at Dix Island, Hallowell, Hurricane, Jonesboro, Rockland, Vinal-Haven, West Sullivan, etc. Slate is quarried in large quantities at Brownsville and Monson. Ice is an important and profitable article of export. The chief seats of the lumber trade are Augusta, Bangor, Biddeford, Calais, Eastport, Fairfield, Lewiston and Machias; of cotton manufacture, Augusta, Biddeford, Lewiston, Brunswick, Saco and Waterville; of ship building, Bath, Bangor, Belfast, Calais, Damariscotta, Machias, Rockland, Thomaston and Waldoboro. Woolens are made at Bridgton, Dexter, Dover, Lewiston, Madison, Oxford, Sanford, and Warren; boots and shoes at Auburn, Bangor, Fairfield, Farmington, Lewiston, Richmond, Skowhegan, Norway, Paris, and Mechanic Falls. Bangor has foundry and machine shops, furniture factories, and steam planing mills. Extensive hemlock sole-leather tanneries are located at Brookton, Grand Lake Stream, Kingman, Lincoln, Lowell, Medway, and Winn. Large spool factories are located at Foxcroft, South Lincoln, and Willimantic. Apart from these special branches of trade, Belfast, Ellsworth, Gardiner, Hallowell, Portland, Rockland, Skowhegan, and Waterville are seats of varied and extensive manufactures. The water power of Maine is simply immense. The Hydrographic Survey gives it 2,656,200 horse-power, which is equivalent to the working energy of 34,000,000 men laboring without intermission. The number of manufacturing establishments of all kinds in the State in 1880 was 4,481: the amount of capital invested in them, \$49,988,171; total number of hands employed, 10,204; amount paid in wages, \$13,623,318; value of materials used, \$51,120,708; value of products, \$79,829,793.

There are 16 Counties in Maine. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 68, of which the 15 designated by a dagger (†) are county-seats. Of the 156 papers which insert advertisements published in the State, 14 are daily, 1 tri-weekly, 102 weekly, 2 bi-weekly, 4 semi-monthly, 30 monthly, and 3 quarterly.

MARYLAND

Population 1,187,878.....Dem. Plur. in 1884, 11,118

Colored pop., 3245,327

Dem. vote, 96,866; Rep., 85,748.

STATE CAPITAL, ANNAPOLIS.

MARYLAND is bounded north by Pennsylvania, east and southeast by Delaware and the Atlantic Ocean, west by West Virginia, and south and southwest by Virginia, West Virginia, and the District of Columbia. The Chesapeake Bay divides the greater part of it into two unequal parts, known as the Eastern and Western Shores. Its extreme length from east to west on its northern border is 198 miles, and its width, following the course of the Potomac, varies from 3 or 4 miles to about 120 miles; land area, 9,860 square miles. The surface of the Eastern Shore is mostly level, and in parts low and swampy, but towards the north rocky and broken. The Western Shore, between the Potomac River and Chesapeake Bay, presents mainly the same general features. The northwest is very mountainous: five or six ridges of the Alleghenies, principally the Blue and Laurel, traverse that section. In the extreme west are the beautiful elevated valleys named Glades. The soil of the Eastern Shore and the lower part of the Western is generally light and sandy, well adapted for peaches and market-gardening; that of the central and northern parts very rich, yielding immense crops of tobacco, wheat, and corn. The mountain slopes are thickly wooded. The oyster fisheries are more extensive than in any other State. The manufactures are very numerous—canned goods (fruits, meats, and oysters) being one of the most important. Boots and shoes, bricks, cement, chemicals, clothing, cotton and woolen goods, cooperage, tobacco, flour, leather, lumber, machinery, and metallic wares are leading industries. The number of manufacturing establishments in the State in 1880, was 6,787; amount of capital invested in them, \$58,742,384; total number of hands employed, 74,945; amount paid in wages, \$18,904,965; value of materials used, \$66,937,846; value of products, \$106,780,563. These figures have, it is claimed, increased in 1887 to, establishments, 7,841; capital, \$82,139,187; hands, 80,793; wages, \$26,128,426; raw materials, \$87,529,624; products, \$136,635,738. Its commerce is confined principally to Baltimore, whose foreign trade is very important. Maryland coal is used extensively in all the Atlantic States. Fire clays are abundant; those of Mt. Savage have a wide reputation. Brown hematite is found in the Trenton limestone, and bog-ore on the Eastern Shore. There are numerous quarries of marble, granite, serpentine, and other building stone, limestone for burning, and roofing-slate. Kaolin is found in Anne Arundel County; magnesite near Baltimore, from which large quantities of magnesia, carbonate, and Epsom salts are manufactured. There are many other minerals, including alum, amber, barytes, breccia, cements, chromium, hone-stone, mill-stone, iron pyrites, ochres, etc., some of which are very plentiful. Especial attention is given to tobacco-growing in the lower counties of the Western Shore.

There are 23 Counties in Maryland. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 57, of which 24 designated by a dagger (†) are county-seats. Of the 174 papers which insert advertisements published in the State, 14 are daily, 140 weekly, 4 semi-monthly, 12 monthly, 1 bi-monthly, and 3 quarterly.

ALLEGANY CO.....Pop. 38,012

(1,531 col'd pop.)

Rep. vote in 1884, 3,322; Dem. 2,380; Gbk. 263; Pro. 193.

Location—Northwest, bordering on Pennsylvania, and separated from West Virginia by the Potomac River; area about 520 sq. m. **Natural Features**—Surface traversed by the main Allegheny Mountains and several other high ridges; bituminous coal is extensively mined; iron-ore, limestone and sandstone. **Chief Products**—Butter, wool, maple-sugar, fruit, corn, oats, wheat, rye, and live-stock. **Manufactures**—fire-brick, leather, lumber, glass and metallic wares. Manufacturing establishments of all kinds, in 1880, 178; capital invested, \$2,311,630; hands employed, 1,576; value of products, \$106,780,563. **County-seat** Cumberland, pop. 12,000.

MASSACHUSETTS.

Population 1,942,141.....Rep. Plur. in 1884, 24,372

Rep. vote, 146,724; Dem. 122,352.

STATE CAPITAL, BOSTON.

MASSACHUSETTS is bounded north by Vermont and New Hampshire, east by the Atlantic Ocean, south by the Atlantic Ocean and by Rhode Island and Connecticut, and west by Rhode Island and New York. Its extreme length is 160 miles, and breadth from 47 to about 90 miles; land area, 8,040 square miles. The surface is greatly diversified; mountainous in the extreme west; hilly and broken in the east and northeast, and in the southeast mainly low and sandy. Toward the west is the fertile Valley of the Connecticut River. The mountains are the Taconic, and the Hoosac (continuations of the Green mountain ranges of Vermont), with detached members of the White Mountains. The soil is generally somewhat sterile, but energy and intelligence have succeeded in making it very productive. The Connecticut Valley, however, can hardly be excelled for fertility. Dairy products are very extensive, as is also the yield of wool, hay, maple-sugar, and honey. Corn and potatoes are very largely produced. Of grain, the crop of oats, rye, and barley is large, buckwheat moderate, and wheat (winter), small. The tobacco crop is large; live-stock abundant (cattle largely in excess). More than half the fishing vessels owned in the United States belong to Massachusetts. Manufactures, however, constitute by far the largest of its industries. Not only is it the center of the American boot, shoe, leather, wool, paper and cotton trades, but all the large towns are busy seats of more or less numerous branches of manufacture. The number of manufacturing establishments in the State in 1880, was 14,352; amount of capital invested in them, \$303,806,185; total number of hands employed, 352,255; amount paid in wages, \$128,315,362; value of materials used, \$636,972,655; value of products, \$631,135,234. There has been a rapid growth in manufactures since 1880, but so far as known no details of the increase have been published. The chief seats of the ship-building interests are Boston, Newburyport, and Salem. The State is rich in building-stone, principally granite, which is largely quarried at Rockport, Graniteville, Fall River, Monson, and Quincy; a handsome brown sandstone in the Connecticut Valley, and marble and limestone in Berkshire County; Berkshire County has also deposits of excellent iron-ore. Except Rhode Island, it is the most densely peopled State. Railroads enter almost every town, and are sufficient in extent to gridiron the State with lines $4\frac{1}{2}$ miles apart if they were evenly distributed. Fall River, Lowell, New Bedford and Lawrence are in this order the chief cotton manufacturing centers in the country.

There are 14 Counties in Massachusetts. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 204, of which the 19 designated by a dagger (†) are county-seats. Of the 604 papers which insert advertisements published in the State, 55 are daily, 1 tri-weekly, 8 semi-weekly, 41 weekly, 10 bi-weekly, 4 semi-monthly, 103 monthly, 2 bi-monthly, and 7 quarterly.

BARNSTABLE CO.....Pop. 29,845

Rep. vote in 1884, 3,144; Dem. 937; Gbk. 332.

Location—Extreme east; consists of a peninsula 60 m. long known as Cape Cod, and a few small islands; area about 290 sq. m. **Natural Features**—Surface low and level; soil light and sandy.—The inhabitants are employed in fishing and the coasting trade; cranberries are extensively cultivated; agricultural products nominal. Manufacturing establishments of all kinds, in 1880, 139; capital invested, \$1,529,754; hands employed, 1,232; value of products, \$1,506,152. **County-seat** Barnstable, pop. (township) 4,050.

BRISTOL CO. Pop. 170,000

Rep. vote in 1884, 12,391; Dem. 6,475; Gbk. 988. Location - Southeast, bordering on Buzzard's Bay and Rhode Island; area about 530 sq. m. Natural Features - Surface nearly level, soil partly fertile. Chief Products - Potatoes, butter, hay, corn, oats, rye, and live-stock to a moderate extent. Manufactures important, especially of cotton and woollen goods, locomotives, machinery and tools, cordage, silver-ware, jewelry, carriages, boots and shoes, pictures and frames. Manufacturing establishments of all kinds, in 1880, 1,025; capital invested, \$42,128,969; hands employed, 34,069; value of products, \$46,127,452. A careful estimate of manufacturing interests to-day gives the number of establishments at 1,100; capital invested, \$45,000,000; hands employed, 37,000, and products, \$50,000,000. County-seats New Bedford (the chief whaling port of the country), pop. \$37,000, and Taunton, pop. \$25,000.

Table listing newspapers in Bristol Co. with columns for name, political affiliation, and circulation. Includes titles like Advocate, Star, Advance, Citizen, Evening News, Globe, Herald, Independent, Labor Educator, Monitor, News, Evening Standard, Evening Telegram, Mercury, Republican Standard, Sunday Telegram, Whalemens Shipping List, Chronicle, Easton Bulletin, Easton Journal, Townsman, Bristol County Republican, Gazette, Household Gazette.

DUKES CO. Pop. 4,135

Rep. vote in 1884, 568; Dem. 202; Gbk. 6.

Location - Southeast; composed of several islands in the Atlantic Ocean, the largest being Martha's Vineyard 5 m. from the mainland; area about 120 sq. m. Natural Features - A large portion of surface covered with low forests; soil partly fertile; some iron-ore. Many of the inhabitants are employed in navigation and the fisheries. Chief Products - Wool, potatoes, hay, and salt. Manufacturing establishments of all kinds, in 1880, 8; capital invested, \$7,280; hands employed, 60; value of products, \$9,238. County-seat Edgartown, pop. (township) 1,165.

Table listing newspapers in Dukes Co. with columns for name, political affiliation, and circulation. Includes titles like Martha's Vineyard Herald, Vineyard Gazette, Sentinel.

ESSEX CO. Pop. 263,727

Rep. vote in 1884, 20,304; Dem. 15,148; Gbk. 5,612.

Location - Extreme northeast, bordering on New Hampshire, the Atlantic Ocean, and Massachusetts Bay; area about 600 sq. m. Natural Features - The surface is generally rough, and the soil hard and rocky, but productive when well cultivated; quarries of granite and syenite. Chief Products - Butter, potatoes, hay, corn, oats, barley, rye; live-stock - very few sheep. Manufactures very valuable: boots and shoes, carriages, cotton, woollen, and worsted goods, leather, machinery; ship-yard. The commercial and fishing interests are very large. Manufacturing establishments of all kinds, in 1880, 1,971; capital invested, \$41,713,149; hands employed, 59,569; value of products, \$108,159,439. County-seats Lawrence, pop. 38,862, Salem, pop. 28,090, and Newburyport, pop. 13,716.

CIRCULATION: † Publishers' reports. Roman figures—estimated. *Sworn. † County-seat. POPULATION: State Census 1885, § Estimated.

MICHIGAN.

Population 1,853,658.....Rep. Plur. in 1884, 3,308

Rep. vote, 192,669; Fusion, 189,361.

STATE CAPITAL, LANSING.

MICHIGAN is bounded north by Lake Superior, east by Lakes Huron, St. Clair, and Erie, and their connecting rivers, south by Ohio and Indiana, and west by Lake Michigan and Wisconsin; land area, 57,430 square miles. It consists of two peninsulas, of which the southern is the principal seat of wealth and population. This part of the State is a very level region, abounding in lakes and streams, with very extensive forests of pine and other timber in the north, oak-openings or natural parks in the south, and prairies in the southwest. The soil contains sufficient sand to make it easily tilled, and few sections excel it as a farming region. In the west and southwest is the great fruit-belt. Winter wheat, oats, and potatoes are abundant and of excellent quality; corn and other cereals are largely grown. Dairy products are very valuable. Wool is raised in very large quantities, the product of 1887 being about 15,000,000 pounds; livestock is plentiful. Peppermint and celery are raised extensively in the southwest, and grapes in the south. The surface of the northern peninsula is somewhat rough and mountainous, with a good soil in most parts outside the mining regions; its mineral wealth is very great, especially in copper, iron and silver. Large quantities of iron-ore are mined and shipped to Pennsylvania, Ohio, Indiana, and Illinois to be smelted either alone or with the inferior ores found in those States. Marquette, Ishpeming, Negaunee, Gladstone, St. Ignace and Escanaba are the principal points of shipment. By far the most important copper mines of the country, and what is claimed to be largest iron mine in the world, are in this State. The output of iron in 1887 was 4,393,853 tons as against 1,948,334 in 1880. There is a large quantity of coal in the lower peninsula used chiefly for local and railroad purposes. The salt-producing territory covers about 9,500 square miles, and the amount of the product in 1887 was 4,260,012 barrels, which is more than double that of New York State; it is procured from artesian wells, and the Saginaw River and the mouth of the Manistee are the chief centres of manufacture. 80,000 barrels of dairy salt were produced in 1887, which has been pronounced by competent judges to be the best in the world. Michigan ranks first among the States in the value and extent of its lumber product; the largest interest centering in East Saginaw. Gypsum, fire-clay, and glass-sand are also found. Manufactures are important and varied in extent. Among the leading are iron, lumber, salt, wooden-ware, furniture, farm implements, leather, cotton and woolen goods, machinery, castings, and hollow-ware. The number of manufacturing establishments in the State in 1880, was 8,873; amount of capital invested in them, \$93,980,959; total number of hands employed, 77,591; amount paid in wages, \$25,313,682; value of materials used, \$92,900,269; value of products, \$150,715,025. In 1885 these figures are estimated to have increased as follows: number of establishments, 9,279; capital, \$99,837,624; hands, 81,278; wages, \$31,176,420; value of material, \$97,324,641; value of products, \$158,534,618.

There are 64 Counties in Michigan. Newspapers are published in 81.—Cities, towns, and villages in which papers are published number 304, of which 80 designated by a dagger (†) are county-seats. Of the 634 papers which insert advertisements published in the State, 44 are daily, 2 tri-weekly, 6 semi-weekly, 530 weekly, 6 semi-monthly, 45 monthly, and 1 quarterly.

ALCONA CO.....Pop. 4,028

Rep. vote in 1884, 545; Fus. 339; Pro. 1.

Location—Northeast, bordering on Lake Huron; area about 700 sq.m. **Natural Features**—Surface nearly level; soil generally fertile; wood general farming country. **Chief Products**—wheat, oats, and potatoes; lumber, lath, shingles, and paper pulp wood. Manufacturing establishments of all kinds, in 1880, 6; capital invested, \$146,000; hands employed, 102; value of products, \$24,792. **County-seat** Harrisville, (twp.) pop. 1,713.

⌋CIRCULATION: † Publishers' reports. Roman figures—estimated. *Sworn. † County-seat.
 ⌋POPULATION: State Census 1885, § Estimated.

MINNESOTA.

Population 1,117,798.....Rep. Plur. in 1884, 41,620

Rep. vote, 111,685; Dem. 70,065; Prohib., 4,684; Gbk. 3,588

STATE CAPITAL, ST. PAUL.

MINNESOTA is bounded north by British America, east by Wisconsin and Lake Superior, south by Iowa, and west by Dakota. Its extreme length from north to south is 380 miles; breadth varies from 183 miles in the center to 262 on the south line, and about 330 on the north border; land area, 79,205 square miles. The surface is generally an undulating plain, diversified with rolling prairies, dotted with lakes and groves, with frequent timber belts. The northeast is generally rugged and hilly, with immense forests and much marsh-land. The Red River Valley is a dead level. The southeast is a beautiful rolling prairie region, while the surface rises from the undulating prairies of the south and southwest to the Hauteur des Terres or Heights of Land in the northwest. It is thought that the northeast may develop valuable mineral resources, but the yield of minerals is at present unimportant. The soil is fertile, about two thirds of it being adapted to the cultivation of cereals and general farm produce. Very large quantities of spring wheat are raised even as far as the Manitoba line, while corn grows well all over the State. Oats, barley, hops, flaxseed, and hay are leading products. Wool-growing is remunerative in the southwest. Maple-sugar is an important product. Cattle, horses, and swine are largely exported, and pork-packing is a valuable industry. Manufactures are rapidly increasing in number and value. The leading branches are flour and grist mill products, lumber and woodenware, carriages, furniture, and cooperage, while boots and shoes, brick, leather, lime, saddlery, and woolen goods are also extensively manufactured. The number of manufacturing establishments in the State in 1880, was 3,498; amount of capital invested in them, \$31,004,811; total number of hands employed, 21,247; amount paid in wages, \$8,613,094; value of materials used, \$55,660,681; value of products, \$76,065,198.

There are 80 Counties in Minnesota. Newspapers are published in 76. — Cities, towns, and villages in which papers are published number 186, of which 72 designated by a dagger (†) are county-seats. Of the 382 papers which insert advertisements published in the State, 25 are daily, 1 semi-weekly, 322 weekly, 6 semi-monthly and 28 monthly.

AITKIN CO.....Pop. 3,000

Rep. vote in 1884, 231; Dem. 124.

Location—Northeast-central, traversed by the Mississippi River; area about 1,900 sq. m. **Natural Features**—Surface generally undulating, diversified with forests and lakes; soil fertile. **Lumbering** chief industry. No manufactures in 1880. **County-seat** Aitkin, pop. 31,000.

MISSISSIPPI.

Population 1,131,597.....Dem. Maj. in 1884, 33,001

Colored pop., 650,291.

Dem. vote, 76,510; Rep. 43,509.

STATE CAPITAL, JACKSON.

MISSISSIPPI is bounded north by Tennessee, east by Alabama, south by the Gulf of Mexico and Louisiana, and west by the Mississippi River, which separates it from Louisiana and Arkansas. Its extreme length from north to south is 332 miles; average breadth, 142 miles; land area, 46,340 square miles. The surface is generally hilly or undulating, except in the Mississippi bottom, from Vicksburg to the Tennessee line, and between the Mississippi and Yazoo rivers, where it is low and swampy, subject to inundation and covered with a dense growth of timber, but with soil which, if reclaimed, would be exceedingly fruitful. Below Vicksburg the surface for some miles inland is hilly, and known as the "cane hills" or "bluffs," and with a generally productive soil. There is a very fertile prairie region in the northeast. The southern part is chiefly a level pine region, and furnishes good pasturage and large quantities of timber, tar, turpentine, etc. The soil of this tract is poor and sandy. Cotton and corn are the great staples. Wheat is grown in the north, and rice and sugar-cane in the south. Grazing is an important industry, much pork is fattened, and the clip of wool is large. Dairy products, sorghum, tobacco, and sweet potatoes are produced in considerable quantities. The manufactures are neither varied nor very extensive, lumber and grist-mill products being the most important. The number of manufacturing establishments in the State in 1880, was 1,479; amount of capital invested in them, \$4,727,600; total number of hands employed, 5,827; amount paid in wages, \$1,192,645; value of materials used, \$4,667,183; value of products, \$7,518,302. Its commerce is carried on principally through New Orleans and Mobile; coasting and river trade large. The State has no coal or iron of practical value. Its mineral deposits are confined mainly to fertilizers, soft limestone and clays. Tishomingo County has large beds of fine pipe and potter's clay; there is also some sandstone suitable for rough masonry.

There are 74 Counties in Mississippi. Newspapers are published in 69. — Cities, towns, and villages in which papers are published number 90, of which 64 designated by a dagger (†) are county-seats. Of the 158 papers which insert advertisements published in the State, 8 are daily, 2 tri-weekly, 136 weekly, 3 semi-monthly, and 9 monthly.

MISSOURI.

Population 2,169,380.....Dem. Plur. in 1884, 33,059

Colored pop., 145,560.

Dem. vote, 235,998; Rep. 202,929.

STATE CAPITAL, JEFFERSON CITY.

MISSOURI is bounded north by Iowa, east by Illinois, Kentucky, and Tennessee, south by Arkansas, west by Indian Territory, Kansas, and Nebraska; length, north to south, 277 miles; average breadth, about 244 miles, ranging from 208 miles in the north to 312 miles in the south; land area 68,735 square miles. The Missouri River divides the State into two distinct parts. The surface north of the river is generally nearly level, while that south of it is undulating, becoming rougher and somewhat mountainous as it approaches the Ozark Mountains. There are also here open, treeless plains, an extension of those in Kansas, and in the southeast, bordering on the Mississippi River, is an extensive marshy tract, called the "Sunk Country," the result of the earthquake of 1811-12. It contains every variety of soil. Corn, wheat, oats, and tobacco are the staple products, but barley, rye, hay, fruit, white and sweet potatoes, dairy and market-garden products, wool, cattle, and pork are raised largely in excess of home needs. Sorghum and castor-oil beans are largely produced. Cotton, hemp, and flax are cultivated to some degree in the southern counties; so are grapes, and much wine is made. The principal live-stock are sheep and swine. Iron and lead ore are mined and manufactured in very large quantities, and the supply is inexhaustible. Many other minerals abound; also marble, limestone, glass-sand, kaolin, fire-clay, etc. Beside iron and lead, there are important manufactures in many branches of trade. The number of manufacturing establishments in the State in 1880, was 8,592; amount of capital invested in them, \$72,507,844; total number of hands employed, 63,995; amount paid in wages, \$24,309,716; value of materials used, \$110,798,392; value of products, \$165,886,205. Since the census of 1880, however, Missouri has grown rapidly in population and wealth. Railroads have multiplied and extensive areas of territory, particularly in the southwest and southeast portions of the State, have been brought into cultivation, and now support large populations and afford a considerable surplus to feed the world. Kansas City and Springfield are notable instances of increase. The State is in a prosperous condition and offers more inducements to labor and capital than any other of the southwestern States.

There are 114 Counties in Missouri. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 295, of which 114 designated by a dagger (†) are county-seats. Of the 711 papers which insert advertisements published in the State, 65 are daily, 2 tri-weekly, 4 semi-weekly, 564 weekly, 4 bi-weekly, 9 semi-monthly, 59 monthly, 2 bi-monthly, and 2 quarterly.

NEBRASKA.

Population 740,645.....Rep. Plur. in 1884, 22,512

Rep. vote, 76,908: Dem. and Fusion, 54,391.

STATE CAPITAL, LINCOLN.

NEBRASKA is bounded north by Dakota, east by Iowa and Missouri, south by Kansas and Colorado, and west by Colorado and Wyoming Territory. Its extent from north to south is about 210 miles; greatest length about 420 miles; land area, 76,185 square miles. The surface is generally a vast gently undulating plain, with a gradual ascent toward the mountains; the river bottoms are level. There are some bluffs along the Missouri River, some hills in the northwest, which is also partly occupied by the Mauvais Terres or Bad Lands. The Missouri is the only navigable river. East of the Bad Lands and south of the Niobrara is a tract of sand hills which affords some pasturage. Timber is scarce. There is little coal, and that poor, but peat abounds. Brick and potter's clay plentiful, and there are extensive saline deposits; good building-stone abundant. The eastern half of the State is a rich agricultural region, and the west is mainly adapted to grazing; the bottom lands are very rich. The leading products are wheat, corn, barley, oats, sorghum, flax, and hemp; vegetables, small fruits, and grapes are raised extensively. More than 150 species of wild grasses have been classified, which afford excellent pasturage to large numbers of cattle and sheep. The number of manufacturing establishments in the State in 1880, was 1,403; amount of capital invested in them, \$4,881,150; total number of hands employed, 4,793; amount paid in wages, \$1,742,811; value of materials used, \$8,208,478; value of products, \$12,627,336. According to the State census taken in 1885 these figures would be increased to: establishments, 2,861; capital invested, \$12,722,834; hands, 14,910; wages, \$3,708,766; materials, \$23,880,444, and products, \$43,387,970.

There are 80 Counties in Nebraska. Newspapers are published in all. — Cities, towns, and villages in which papers are published number 301, of which 75 designated by a dagger (†) are county-seats. Of the 542 papers which insert advertisements published in the State, 28 are daily, 3 semi-weekly, 499 weekly, 1 semi-monthly, and 11 monthly.

POPULATION: State Census 1885, \$ Estimated.

NEVADA.

Population 62,266.....Rep. Maj. in 1884, 1,615
Chinese pop., 5,416. Rep. vote, 7,198; Dem. 5,578.

STATE CAPITAL CARSON CITY.

NEVADA is bounded north by Oregon and Idaho, east by Utah and Arizona, and southwest and west by California. Extreme length from north to south, 485 miles in the eastern, and 210 in the western boundary; greatest breadth, 320 miles, decreasing to 310 miles in the north and to a point in the south; land area, 109,740 square miles. Surface generally is a table-land about 4,000 feet above the sea, traversed by nearly parallel mountain ranges, between which are valleys varying in width from 5 to 20 miles, in some cases narrow canyons, and in others broad deserts, covered with sage-brush and other scanty herbage. The soil when irrigated is fertile, and produces spring wheat, barley, oats, potatoes, butter, hay, wool, etc. There is much good pasturage, and cattle fatten readily upon it. Cotton and sub-tropical fruits do well in the south. It has for years been the leading State in the production of the precious metals. The milling and smelting of ore is the leading manufacturing pursuit. The output of precious metals in 1887 was nearly \$10,000,000. A valuable deposit of anthracite coal has been discovered on the Elko River near Humboldt, which is being developed. The cattle interests of the State are next in importance to its mineral resources. The wool product in 1887 was 3,000,000 pounds. The number of manufacturing establishments in the State in 1880, was 184; amount of capital invested in them, \$1,323,300; total number of hands employed, 577; amount paid in wages, \$461,807; value of materials used, \$1,049,794; value of products, \$2,179,626. Lumber sawing, once important, is declining, owing to the rapid disappearance of the forests.

There are 14 Counties in Nevada. Newspapers are published in 13.—Cities, towns, and villages in which papers are published number 15, of which 12 designated by a dagger (†) are county-seats. Of the 26 papers which insert advertisements published in the State, 11 are daily and 15 weekly.

CHURCHILL CO.....Pop. 479
Rep. vote in 1884, 96; Dem. 88. (32 Chinese.)
Location—West-central; area about 8,400 sq. m.

NEW HAMPSHIRE.

Population 346,991.....Rep. Plur. in 1884, 4,603

Rep. vote, 43,250; Dem. 39,187.

STATE CAPITAL, CONCORD.

NEW HAMPSHIRE is bounded on the north by Quebec, east by Maine and the Atlantic Ocean, south by Massachusetts, and west by Vermont. Its length is 180 miles from north to south; its extreme breadth 93 miles; average breadth 50 miles; land area, 9,005 square miles. Most of the State, except the southeastern part, has a rough and hilly surface. In the northern part are the White Mountains. The State is generally well wooded, and the yield of timber is very large. The Valley of the Connecticut is famed for the beauty of its farms and villages. In productions, the hay-crop is by far the most valuable, and while this is steadily increasing the agricultural interests have for some years been gradually declining. While there are some very fertile tracts among the valley lands, the greater part of the surface is rugged and stony, and much more valuable as woodland or pasture than as tilled land. Oats, barley, rye, buckwheat, and corn are very generally cultivated. Dairy farming and wool-growing are followed to some extent. Tobacco is grown in Cheshire County, in the southwestern part of the State. Fruit-raising is generally profitable. In some localities southward the peach is successfully cultivated. Fine building granite is extensively quarried at Concord, Milford, Pelham, Plymouth, and other points, and a fine soapstone at Franconia. Iron-ore is mined principally at Franconia, but abounds in several other localities. There is a thin vein of tin at Jackson. Lead, silver, and zinc are developed in Madison and Warren. Manufactures constitute by far the largest industry. There is scarcely a town of any considerable size without its important manufacture. It is especially noted for its textile interests. The other main industries are boots and shoes, carriages, flouring-mills, saddlery, clothing, starch, etc. The number of manufacturing establishments in the State in 1880, was 3,181; amount of capital invested in them, \$51,112,263; total number of hands employed, 48,831; amount paid in wages, \$14,814,793; value of materials used, \$43,552,462; value of products, \$73,978,028.

There are 10 Counties in New Hampshire. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 60, of which the 13 designated by a dagger (†) are county-seats. Of the 109 papers which insert advertisements published in the State, 14 are daily, 2 semi-weekly, 83 weekly, 1 bi-weekly, 8 monthly and 1 quarterly.

NEW JERSEY.

Population 1,278,033.....Dem. Plur. in 1884, 4,412

Dem. vote, 127,778; Rep. 123,366.

STATE CAPITAL, TRENTON.

NEW JERSEY is bounded north and northeast by New York, east by New York and the Atlantic Ocean, south by the Atlantic Ocean and Delaware Bay, and west by Delaware and Pennsylvania. Its extreme length is 167 miles; its greatest breadth 59 miles, and its least 32 miles; land area, 7,455 square miles. The surface is mountainous in the northwest, hilly in the northeast and central parts, low and gently undulating in the south. The mountains, a part of the Appalachian system, are the Kittatinny or Blue, and the Highland Range. Between them lies the Kittatinny Valley, about 10 miles wide: soil productive but varied—the northern part adapted to grain and grass; the central part has been well fertilized, and yields abundant farm and market-garden products and fruit; the southern part is sandy and light. Its agricultural products generally, including market-garden produce, are very extensive. The central part is the most thickly settled and is, in fact, a vast market garden for the supply of New York and Philadelphia. Large quantities of grapes and small fruits are grown in the south. Cranberries are one of the leading productions. It is estimated that more than half of the cranberries produced in the United States are grown in this State. The chief cranberry counties are Ocean, Atlantic, and Burlington. It is celebrated for its marl and clay deposits, peat, bog-iron ore, and glass-sand. It has become one of the leading States in the value of its manufactures, ranking sixth in this respect in 1880. The manufactures embrace a wide range of goods. The number of manufacturing establishments in the State in 1880, was 7,128; amount of capital invested in them, \$106,226,593; total number of hands employed, 126,038; amount paid in wages, \$46,088,045; value of materials used, \$165,285,779; value of products, \$254,380,236. Prominent among the instances of greatest growth may be mentioned the pottery and rubber interests. Its iron-mines, zinc mines, slate quarries, and clay-banks are very valuable, and the fisheries (deep-sea, oyster, and fresh-water), a source of great profit. Iron-ore is found generally through the State. There are a large number of productive mines of magnetic iron ore in Sussex, Passaic, Morris, and Warren Counties. Clay for gas-retorts and fire-brick is found at Amboy, and valuable deposits of franklinite at Mine Hill and Stirling. In the northwestern portion of the State, excellent roofing-slates, building and flag-stones and rich hematites are abundant. It has a large coasting trade, and considerable ship building is carried on. Newark, the metropolis, has a population of 165,000, and its manufacturing industries are claimed to be more important in proportion to population than those of any other city in the United States. Within the past ten years the sea-coast has been built up in almost a continuous line of villages from Sandy Hook to Cape May Point, and the temporary residents in the summer season will reach as high as 100,000 persons.

There are 21 Counties in New Jersey. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 113, of which 21 designated by a dagger (†) are county-seats. Of the 291 papers which insert advertisements published in the State, 38 are daily, 2 tri-weekly, 3 semi-weekly, 219 weekly, 1 bi-weekly, 4 semi-monthly, 1 every three weeks, and 23 monthly.

ATLANTIC CO.....Pop. 22,356

Rep. vote in 1884, 2,439; Dem. 1,854; Pro. 247; Gbk. 54.

Location—South-southeast, bordering on the Atlantic Ocean; area about 820 sq. m. **Natural Features**—Surface level; soil sandy; marshy near the sea; extensive forests of small pines. **Chief Products**—Cranberries, white and sweet potatoes, hay, little wheat, and wine; small fruits, especially blackberries, strawberries, and grapes; there are numerous factories of clothing and shoes. **Manufacturing establishments** of all kinds, in 1880, 66; capital invested, \$588,800; hands employed, 428; value of products, \$864,569. **County-seat** May's Landing, pop. 3850.

POPULATION: State Census 1885, § Estimated.

NEW YORK.

Population 5,082,871.....Dem. Plur. in 1884, 1,047

Dem. vote, 563,048; Rep. 562,001.

STATE CAPITAL, ALBANY.

NEW YORK is bounded on the north and northwest by Lake Ontario and the provinces of Ontario and Quebec, east by Vermont, Massachusetts, Connecticut, and the Atlantic Ocean, south by the Atlantic Ocean, New Jersey, and Pennsylvania, and west and northwest by Pennsylvania and Lake Erie. Its greatest length from north to south is 312 miles; its greatest breadth 412 miles; land area, 47,620 square miles. The surface is exceedingly diversified. It has numerous ranges of mountains, chains of hills, many beautiful valleys, much undulating land, some broad plains, and numerous beautiful lakes. The greater portion of the soil is arable, much of it exceedingly fertile. The mountainous districts are mainly good grazing land, and the dairy products are enormous, notably in St. Lawrence, Herkimer, and Oneida Counties. Immense crops of cereals are grown in the valley lands; hops in Otsego, Madison, Chautauqua, and Oneida Counties; fruit and grapes in the Hudson and Pleasant Valleys; tobacco is raised in several counties, and corn generally throughout the State. In the neighborhood of the large cities, market-gardening is extensively carried on. The State is well wooded, and the timber varied and excellent. Its leading mineral is iron ore, of which the mines, especially those of the Champlain and Adirondack regions, yield heavily, and produce some of the most necessary ores for the iron manufacturing interest of the Middle States. Galena is found in large quantities in St. Lawrence and other Counties. It abounds in building-stone, consisting of granite, white and colored marbles, of which those of Westchester and St. Lawrence Counties are the most important; Potsdam and Medina sandstones and gray and blue limestones; also in fine brick-clay. It has large quarries of slate and stone for flagging. A vast amount of salt is made, chiefly from the springs of Onondaga County. In recent years new and promising salt fields have been developed in Wyoming and Genesee Counties. There are illuminating gas springs in several counties, and oil is found near Olean, Wellsville, etc. New York has no coal. The State ranks first in the value of its manufactures. The industries cover almost the whole range of business, and are well distributed over the State. The number of manufacturing establishments in the State in 1880, was 42,739; amount of capital invested in them, \$514,246,575; total number of hands employed, 581,533; amount paid in wages, \$198,634,029; value of materials used, \$679,612,545; value of products, \$1,080,696,596. In 1874 it had in vessels of all classes a tonnage of over 1,700,000 tons, more than a third of the tonnage of the country. The fishing industry is relatively large and valuable.

There are 60 Counties in New York. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 416, of which the 63 designated by a dagger (†) are county-seats. Of the 1,617 papers which insert advertisements published in the State, 151 are daily, 5 tri-weekly, 25 semi-weekly, 1,006 weekly, 15 bi-weekly, 33 semi-monthly, 1 every third week, 343 monthly, 10 bi-monthly, 27 quarterly, and 1 semi-annual.

ALBANY CO.....Pop. 154,890

Dem. vote in 1884, 18,344; Rep. 17,698; Gbk. 983; Pro. 312.

Location—East, bordering on the Hudson River; area about 480 sq. m. **Natural Features**—Hilly (north and west mountainous); near the streams the soil is fertile, but in the mountainous districts less so, and occasionally sterile; hydraulic and building limestone. **Chief Products**—Corn, butter, potatoes, hay, wool, hops and garden produce very large; oats, buckwheat, and rye large; barley and wheat small; live-stock numerous. **Manufactures** extremely various and important. Manufacturing establishments of all kinds, in 1880, 1,213; capital invested, \$27,873,440; hands employed, 24,001; value of products, \$36,258,031. **County-seat** Albany, pop. 896,000.

NORTH CAROLINA.

Population 1,399,750.....Dem. Plur. in 1884, 17,884

Colored, 531,277.

Dem. vote, 142,952; Rep. 125,068.

STATE CAPITAL, RALEIGH.

NORTH CAROLINA is bounded north by Virginia, east and southeast by the Atlantic Ocean, south by South Carolina and Georgia, and west by Tennessee. Its extreme length from east to west is 490 miles; extreme breadth, 185 miles; land area, 48,580 square miles. The surface is very varied. For nearly 100 miles inland from the coast the country is level, marshy, and swampy; soil sandy but very fertile. It is estimated that there are nearly 3,000,000 acres of swamps in this region. Next is the middle section, with varied surface and fine soil. The surface then rises into small hills, increasing in altitude until they reach the mountainous region in the west. Some of the peaks in the Black Mountains and the Blue Ridge attain an elevation of from 5,000 to 6,000 feet. This region contains good grazing land, much hard timber; and stock-raising is largely carried on. In the coast region the river bottoms and reclaimed swamp lands are very fertile, and here rice, cotton, corn, honey, beeswax, apples, peaches, and pears abound. The Scuppernong and Catawba grapes are native here; cranberries are extensively produced. The pine region is mainly uncultivated, but a large trade is done in timber, tar, and turpentine. Cotton is raised chiefly in the southern counties. The middle section is adapted to the growth of cereals, tobacco, and cotton; sweet potatoes are a leading staple. The principal manufactures are flour, lumber, tar, turpentine, rosin, cotton and woolen goods, tobacco, zinc (smelted and rolled), carriages, boots and shoes. The number of manufacturing establishments in the State in 1880, was 3,802; amount of capital invested in them, \$13,045,639; total number of hands employed, 18,109; amount paid in wages, \$2,740,768; value of materials used, \$13,090,937; value of products, \$20,095,037. It exports coastwise and to foreign ports large amounts of lumber, cotton, tobacco, flour, and fish. The fisheries are very large and valuable. The State is very rich in minerals. Gold is mined to a considerable extent in Cabarrus, Mecklenburg, Lincoln, and Rowan Counties, and there is a branch of the United States Mint at Charlotte. Silver, lead, and zinc are found in association, particularly in Davidson County; silver ores mixed with lead or copper, principally in the interior counties; copper ores cover a wide field, and there is a very valuable mine in Ashe County; mica is found among the granites of Cleveland, Mitchell, and Yancey Counties; there is an abundance of corundum and many other metals, and even precious stones are found. Coal and iron are very abundant; the coal is mostly bituminous, and is contained in two fields, one in Stokes and Rockingham Counties, known as Dan River Field, the other in Chatham and Moore Counties, known as Deep River Field. The whole of the region from the navigable waters of the Roanoke and Cape Fear Rivers westward to Cherokee County contains rich beds of magnetic and hematite ores; the "Cranberry" mine, in Mitchell County, yields the purest magnetic ore yet found in the United States, producing a remarkably strong and tenacious iron.

There are 96 Counties in North Carolina. Newspapers are published in 74. — Cities, towns, and villages in which papers are published number 107, of which 65 designated by a dagger (†) are county-seats. Of the 199 papers which insert advertisements published in the State, 18 are daily, 1 tri-weekly, 2 semi-weekly, 161 weekly, 1 semi-monthly, 15 monthly, and 1 quarterly.

OHIO.

Population 3,198,062.....Rep. Plur. in 1884, 31.796
Rep. vote, 400,082; Dem. 368,286.

STATE CAPITAL, COLUMBUS.

OHIO is bounded north by Michigan and Lake Erie, east by Pennsylvania and West Virginia, south by West Virginia and Kentucky, and west by Indiana; greatest length from east to west 225 miles; greatest breadth 200 miles; land area, 40,700 square miles. The general character of the surface is that of a plateau from about 800 to 1,000 feet above the sea. The most prominent feature is the great divide which separates the drainage of Lake Erie from that of the Ohio River. This passes diagonally across the State from Trumbull County in the northeast to Mercer and Darke Counties in the west. Its average height is about 600 feet above the lake; and from it the surface slopes gradually northward toward the lake and southward toward the River. The rivers and streams have excavated deep valleys, which give to the surface its distinctive undulating or rolling character. The soil is universally fertile; and Ohio holds a leading position in every branch of agriculture. The uplands are well suited to wheat, the southern slope of the water-shed to grain generally, the northern slope for grazing and dairying, and the northeast section or Western Reserve especially so. The bottom lands of the Miami, Muskingum, and Scioto rivers are very rich in corn; the Western Reserve and Miami regions are famous for apples. Flax and linseed are staple products, and tobacco is largely grown in most of the southern counties. The fishing interests of Lake Erie are important. The manufactures of the State are very numerous and valuable. Iron, pork-packing, farm implements, clothing, flouring and grist mill products, lumber, malt and distilled liquors being among the most important. The number of manufacturing establishments in the State in 1880, was 20,699; amount of capital invested in them, \$188,939,614; total number of hands employed, 173,609; amount paid in wages \$62,103,800; value of materials used, \$215,334,258; value of products, \$348,298,390. Coal underlies a greater part of the State; iron-ore is abundant, especially in the south; salt is very largely produced from springs; petroleum is an important product, also lime and cement. Good grindstones and building-stones are obtained at Amherst, Berea (Berea grit), Buena Vista, and Independence. There are excellent qualities of limestone and sandstone for building, especially at Massillon and Dayton. Marl deposits abound in the Maumee Valley and other points. There are good pottery and fire-clays, the fire-bricks of Mineral Point being among the best in the United States. Cleveland, Massillon, Youngstown, and the towns on the Ohio River are the chief seats of the iron manufacture, which includes pig, forged, and rolled; iron castings and sheet iron works, rails, Bessemer steel rails, etc. The discovery of natural gas in apparently inexhaustible quantities at Findlay, and many other places in the State, has given its industrial interests an additional and marked impetus. The railroad facilities are rapidly increasing, and Ohio is now a net-work of well-constructed and busy transportation lines.

There are 88 Counties in Ohio. Newspapers are published in all.—Cities, towns, and villages in which papers are published number 343, of which 88 designated by a dagger (†) are county-seats. Of the 983 papers which insert advertisements published in the State, 98 are daily, 6 tri-weekly, 14 semi-weekly, 722 weekly, 5 bi-weekly, 15 semi-monthly, 1 every three weeks, 111 monthly, 1 bi-monthly and 10 quarterly.

ADAMS CO.....Pop. 4,2005
Dem. vote in 1884, 2,886; Rep. 2,833; Pro. 55. Gbk. 2.
Location—South; separated from Kentucky by the Ohio River; area about 635 sq. m. **Natural Features**—Surface hilly; soil fertile; large quarries and iron mines. **Chief Products**—Corn, wheat, oats, and tobacco large; barley and rye nominal; potatoes, butter, wool, fruit, pork; live-stock, sheep prominent. Manufacturing establishments of all kinds, in 1880, 104; capital invested, \$173,675; hands employed, 212; value of products, \$386,500. **County-seat** West Union, pop. 950.
