INTRODUCTION.

The number of Newspapers and Periodicals enumerated in this edition of the AMERICAN NEWSPAPER ANNUAL is 23,595.

A new feature in this edition is the use of the words "See advt." immediately under the circulation rating of all those publications which have advertisements in the book and the thumb index on the edges enabling those using the ANNUAL to turn immediately to the Advertisement section and the index thereto. A similar device is placed at the commencement of the List section.

DAILY NEWSPAPERS.—Following the General Catalogue is a complete list of all dailies in the United States and its possessions and the Dominion of Canada which are issued continuously throughout the year, distinguishing the morning and evening issues by the use of Roman and italic type respectively and also indicating by an asterisk (*) all that have Sunday editions whether under the same or different titles.

MONTHLY AND WEEKLY PUBLICATIONS.—These are comprised in three lists—viz: Magazines, including literary, illustrated and humorous weeklies of general circulation; Women's Publications of Home Circulation, and Mail Order Journals. Attention is invited to the special note on page 1045 relative to this group.

CLASS PUBLICATIONS.—To facilitate reference to this section an Index has been added (page 1063) which gives not only the headings of the lists but also cross references to the several titles contained in many of the headings. The Scientific List includes only journals devoted to the various sciences, and the Mechanical List only those which treat of mechanics in general. Publications devoted to any special branch of mechanics will be found under their respective headings, such as Railroad, Electrical, Milling, Mining, etc.

POPULATION.—The following States have taken count of population since the United States Census of 1900, viz.: Iowa, Kansas, Massachusetts, Minnesota, New Jersey, New York, North Dakota, Oregon, Rhode Island, South Dakota, Wisconsin and Wyoming in 1905, and Michigan in 1904. So far as reports have been received, or we have been able to gather the returns from the press of the several States—in the absence of official reports—we have inserted the new figures. Michigan, Minnesota and Wyoming furnished complete official returns; Wisconsin, for all except places under 1,000; New Jersey, official, except for counties, which are taken from the press; Kansas, official for 1904; Massachusetts, unofficial for counties, principal cities and large towns; New York, forty-five principal cities only, including Greater New York; Iowa, North and South Dakota, all but the smaller places, unofficial. Rhode Island and Oregon did not publish any returns in time. We expect to have the full official figures of all these States in the next edition.

Outside of these States population is taken mainly from the official reports of the United States Census of 1900 and the Canadian Census of 1901. The population of all Cities and Towns of 10,000 and over in the United States has been amended in accordance with a bulletin issued by the Census Bureau giving the estimated population of these places in 1903. Figures marked with an asterisk (*) signify that they are estimated from local or other reports.

On pages 10 to 18 inclusive will be found the population of all places in the United States and Canada which have 3,000 inhabitants and upward, arranged alphabetically by States and by groups in each State as follows: Towns of from 3,000 to 5,000, 5,000 to 10,000, 10,000 to 20,000, 20,000 to 50,000 and 50,000 upward.

MAPS.—The maps have been carefully revised to date, so that practically every newspaper town contained in the ANNUAL will be found on them, and each town indexed so that it may be readily located if reference to it is desired. The reference follows the population each place, as (G 5,) etc., the letters referring to vertical and the figures to horizontal divisions. To facilitate reference where the county in which the town is situated is large, or a number of counties are contained within any one of the divisions, and the place desired is located on, or a little above, or a little below the horizontal line, we have marked it thus, (G 5 $\frac{1}{2}$,) etc. All places so marked will be found very near the line (above or below) between the number given and the next higher one.

STATE HEADINGS.—The State headings have been carefully revised and brought up to the present time, giving concise and valuable statements of the wonderful resources and growth of the country.

TOWN HEADINGS.—These headings have also been carefully revised. The distance of the town, and in most cases the direction from some prominent point is given; its means of communication by railroad, water or stage; whether it is a telegraph and express station or not, and if not, what the nearest telegraph or express point is. If a place has a bank the word "Bank" appears, if more than one, "Banks," if there is no bank in the place the nearest, or most accessible, or the usual banking town for that point is given. Then follows the description of the place itself, setting forth as fully as possible its advantages of location, the nature of the surrounding district, with its productions, agricultural or otherwise, the leading manufactures, and educational and other public institutions.

SUB-EDITIONS.—We endeavor to distinguish between independent and distinct publications and those which are simply reprints of some other paper with but little and often with no change whatever beyond the name. All papers so issued, as far as it was possible to trace them, are entered in the Catalogue under the name of the leading paper, and, under the place of apparent publication, the name of the sub-edition is given with a reference to the paper issuing it. It is very difficult at times to determine positively this question of similarity of issue. Publishers of such papers generally are not willing to give information nor to send sample copies, and it is possible that in some instances an error may have been made either in quoting a paper as a sub-edition of another, when it would be fairly entitled to an independent entry if all the facts were known, or in giving a paper an independent standing when it is not entitled to it. Every effort however, is made to guard against either of these possibilities.

PUBLICATIONS EXCLUDED.—In accordance with our usual custom there are several hundred publications which we do not insert, having no value for the general advertiser or the general public. Among them are those issued by private and high schools, the smaller colleges, local church papers, and publications issued in the interest of institutions, unless having an influence outside of the particular one by or for which they are published. Care has also been exercised in the selection of newspapers and periodicals which do rightly come within the scope of this work. Experience teaches that it is not wise to insert every paper that comes to hand in its first or early number; for, while the exclusion may be unfortunate in a few instances, much dead matter is thereby kept out of the book; not a few of these ventures never reaching beyond their first number, and very many failing to maintain an existence of over a few weeks.

NAMES OF EDITORS AND PUBLISHERS.—No labor has been spared in the effort to have this department of the work as accurate as possible at the time of going to press; the continual changes of ownership and places of publication, however, necessarily preclude absolute accuracy.

CIRCULATION.

The form sent to every publisher when the revision of the ANNUAL commences contains the following:

By CIRCULATION we do not mean the number of readers, on a basis of five (or any other number of) readers to each copy of the paper; nor do we mean sheets, nor impressions. The legitimate circulation of a newspaper or a periodical is its regular, necessary issue, sent to names on its honestly compiled mailing list or subscription book; sold over the counter, or through news agents or news boys. Returned and unused papers should not be included in the count.

Our understanding of the term "CIRCULATION" is embodied in the above paragraph. The word "AVERAGE" is liable to be misinterpreted. It is the custom of some publishers to issue occasional large extra editions; to add these and the regular editions together for a given time, and divide the total by the number of days, weeks or months, as the case may be contained within that period. This is not what we desire. By "AVERAGE CIRCULATION" we mean that number of complete copies which *usually* fills the needs of the mailing lists, and the demand either in or out of the office.

Averages made up by including one or more large editions are not available; the only fair average is one which is made from a uniform, or a slightly fluctuating circulation.

Statements in detail enable us to see to what extent special or extra editions figure in the issues of a given period, and also to what extent the circulation fluctuates or steadily increases; when such statements are furnished, publishers may rely on being rated fairly, and they will have no cause of complaint against us, if, in the absence of such reports, our ratings are inadequate.

SWORN DETAILED STATEMENTS covering a period of not less than six months preceding date of report we consider the strongest kind of statements that can be made. All such are printed in **bold face type** throughout the book, and marked with a star (*). Detailed statements, not sworn to, are printed in Roman and marked by a star (*). A double dagger (‡) indicates the publisher's claim unsupported by either affidavit or detailed statement. Our own estimates are set in Roman figures and unmarked.

While we would greatly prefer a detailed statement of issues for a whole year, yet records for six or nine months, will, if properly signed by the publisher or some responsible person for him, ordinarily entitle the paper to a rating in accordance therewith. We say *ordinarily*, because we do not believe that the rendering of such a statement is incontestible proof of its correctness, and there are instances in which such statements, even when supported by affidavits, could not be accepted in the face of positive information to the contrary; but we believe that such instances are comparatively few in number, and in the large majority of cases a detailed statement covering a period of several months, properly signed, is *prima facie* evidence of its reliability.

It frequently happens that the publishers when sending in their orders and copy for advertisements in the AMERICAN NEWSPAPER ANNUAL inclose therewith a statement of circulation, generally accompanied by a request that the ratings of their papers in the ANNUAL may be made to agree with the figures thus given. This will not be done. Circulation ratings are fixed before the solicitation of advertisements begins, from reports made out in proper form, and signed by publishers, or, in the event of failure to receive such reports, from any believed-to-be-authentic information in the Editorial Office.

Although the greater number of ratings are determined when copy is being made in July and August we are always willing to revise the figures as late as Sept. 30th, provided acceptable statements are sent to the editor of the ANNUAL, entirely apart

from any consideration of the subject of advertising therein, with which he has nothing to do. Advertisements, however, being received up to the time of going to press, not unfrequently contain much later information than can possibly be given in the Catalogue. This will explain, in many cases, what would otherwise appear to be discrepancies between the statements made in the advertisements and the ratings given the papers in the various lists.

Circulation is not given in the following instances—where the paper has been established during the current year, or is entered for the first time in the *ANNUAL*; where the information received is unsatisfactory, or the reports are conflicting; where publishers have requested omission, in which case the word “Decline” is printed in the circulation column, and where the publication is devoted exclusively, or nearly so, to advertising the business or interests of the individual, business house or corporation issuing it. Papers of this latter class are designated in the Catalogue as “issued for advertising purposes,” and in the other lists by the letters “Adv.” in the circulation column.

We aim at strict impartiality in this important part of our work, and desiring always to avoid injustice to publishers, in our efforts to procure accurate and trustworthy information for advertisers, we will gladly receive communications from any who may consider themselves unfairly dealt with in any statement in this volume, and will cheerfully correct in future editions any mistakes made in the present one, if furnished with satisfactory evidence of error.

Papers which are believed to decline general advertising are designated in the Catalogue by the words “No Advts.” in the circulation column.

NEWSPAPER ADVERTISEMENTS.—An alphabetical index to the advertisements will be found commencing with page 1129. A careful examination of these will result in the acquisition of a mass of valuable information which, for the sake of compactness and facility of reference, must necessarily be excluded from the Catalogue. We invite attention to the article on this subject on the insert preceding the Index to the advertisements.

THE REVISION of this book for the edition of 1907 will be commenced immediately, and newspaper publishers will confer a favor by notifying us of the establishment, suspension or change of any papers within their knowledge, or by calling our attention to any inaccuracies.

AMERICAN NEWSPAPERS

GIVING THE PLACES IN WHICH THEY ARE PUBLISHED IN THE UNITED STATES, TERRITORIES, AND DOMINION OF CANADA, ARRANGED ALPHABETICALLY IN STATES; A DESCRIPTION OF EACH PLACE, ITS LOCATION, RAILROAD AND OTHER MEANS OF COMMUNICATION, TELEGRAPH AND EXPRESS ROUTES AND BANKING FACILITIES; THE COUNTIES IN WHICH THE PLACES ARE SITUATED, WITH THE LOCATION AND POPULATION OF EACH; AND, IN CONNECTION WITH THE PAPERS, THE FREQUENCY OF ISSUE, POLITICS, DENOMINATION OR GENERAL CHARACTER, YEAR OF ESTABLISHMENT, SIZE, CIRCULATION, SUBSCRIPTION PRICE AND NAMES OF EDITORS AND PUBLISHERS.

Populations, unmarked, in the United States are from the United States Census of 1900 or State Census of 1904 and 1905 (see footnotes and also Introduction, page 4). Those of 10,000 and over in all States having United States Census are from the Amended Census Bulletin of 1903. Canadian populations are from the Census of 1901. All marked with an asterisk (*) are estimated.

Circulations from which affidavits have been furnished, are printed in **bold-face** figures; detailed statements are designated by a six-pointed star (*); when neither affidavit nor detailed statement is furnished, they are designated by a double-dagger (‡); those unmarked are estimated.

Where statement of circulation is omitted, we have been unable to obtain any satisfactory information, or the paper was established during the current year, or is entered for the first time in the ANNUAL, or else is issued for advertising purposes. The word "decline" indicates that the publishers have declined or objected to furnish any statement for publication.

County seats are indicated by a dagger (†).

PRESIDENTIAL ELECTION 1904.

(OFFICIAL.)

Population of the United States, 79,900,389.

ALABAMA.

Population 1,923,284.

STATE CAPITAL, MONTGOMERY.

ALABAMA is bounded north by Tennessee, east by Georgia and Florida, south by Florida and the Gulf of Mexico, and west by Mississippi. Its extreme length north to south is 336 miles; breadth varying from about 150 to 200 miles; land area, 51,540 square miles. The Alleghany Range enters the State at the northeast and extends toward the centre, finally losing itself in mere hills; then follows a tract of rolling prairies, interspersed with pine barrens and exceedingly rich alluvial bottoms, including the cane brake region, one of the richest cotton producing districts in the world. From this to the Florida border and the Gulf the land is generally flat. This part is thinly settled, and is mostly covered with pine forests, which are of great value, while the product of naval stores here is very considerable. North of this is the broad belt of rich black soil, a space of several miles in breadth, constituting the great cotton producing section of the State. The soil then becomes sandy and poor, but abundant water power renders it capable of becoming a fine manufacturing district. The mineral region occupies the northeast part, while the northwest is a good agricultural and stock raising country. The mountain district and the valley of the Tennessee possess fine forests of hardwood timber. Cotton is grown throughout the State, but mainly in the central belt alluded to; tobacco chiefly in the north; very fine wheat in the north and northeast; rice in the south; corn largely all over the State. Dairy products, fruits, wool, oats, and sweet potatoes are produced in considerable quantities. Manufacturing and mineral development have become very important during recent years. The chief manufactures are iron, steel and their products, machinery and heavy castings, iron and soil pipe, cotton gins, flour, lumber, leather, cotton goods, yarns, thread, turpentine, etc. Alabama's export and import trade centers at Mobile. Cotton, lumber, iron and naval stores are the chief exports. Extensive beds of brown and red iron ore are found in the counties of Jefferson, Bibb, Cleburne, Blount, St. Clair, Franklin, Shelby, Talladega and Etowah. Coal deposits cover a large section of North Alabama in and around the Birmingham district. Bituminous coal of several kinds is found and the mining of it now gives employment to 19,000 men. The State's coal production in 1908 was 11,700,758 tons, or about double what it was six years ago. In 1908 the forty-four furnaces in Alabama made 1,561,398 tons of pig iron, a gain of one hundred per cent in less than a decade. Birmingham is the center of the iron and coal region. Here are located large steel works, many furnaces and scores of foundries, machine shops and pipe plants. The manufacture of basic steel from Alabama ores has proved a practical success and steel rails are now being manufactured at Ensley, a suburb of Birmingham, on a large scale. Considerable gold has been mined; silver and copper are also found; potter's, porcelain and fire clays, hydraulic limestone, manganese and many other minerals exist in considerable quantities; there are various building stones. The statuary granite and white marble of Coosa County and the variegated marbles of Talladega and adjacent counties are not surpassed by any in the country.

The number of newspapers and periodicals published in Alabama is 230, including 20 daily, 2 semi-weekly, 186 weekly, 8 semi-monthly, 13 monthly and 1 quarterly. The places of publication number 125, of which 67 designated by a dagger (†) are county seats.

ALASKA.

Population, 63,592.

TERRITORIAL CAPITAL, SITKA.

ALASKA is bounded north by the Arctic Ocean, east by the Northwest Territories of Canada, west and south by the Pacific Ocean, Behring's Sea and Strait, and numerous islands. It has a total area of about 590,884 square miles, its greatest length, from north to south, being 1100 miles and greatest breadth over 700 miles. The northern half is low with great swampy morasses along the streams, running back into low, rolling hills. Native Indians inhabit that section living along the streams in small bands. The southern half is mountainous, and along the southwest coast are some of the highest mountain peaks on the American continent; Mount St. Elias, the highest, is about 20,000 feet. The northwesterly section comprises the peninsula of Alaska and the Aleutian islands, the latter the seat of the valuable fur seal and sea otter fisheries. This district is mountainous and actively volcanic. The principal industry at present is mining, the country being seamed by the largest quartz veins in the world. The Alaska Mill and Mining Co. have a large plant on Douglas Island, across the bay from Juneau, and ship a large amount in gold bricks every month. There are similar plants in other localities. In a few years the fisheries and forests of red and yellow cedar will yield large returns. The Seal Islands in Behring Sea pay a large yearly revenue to the government. The principal towns are Sitka, the capital, and Juneau, the metropolis and supply point. The western coast, from the southern boundary to Cape Spencer, is lined with a continuous chain of islands, many of them as large as the State of Maine. Between the islands and mainland are salt water channels, navigable for the largest sized steamships. In the interior is one of the largest rivers in the world, the Yukon, navigable for 2,000 miles, and 60 miles wide at the mouth. A railway has been built over the White Pass to Lake Bennett, whence water transportation commences for all points in Yukon territory.

The number of newspapers and periodicals published in Alaska is 15, including 3 daily, 2 semi-weekly and 10 weekly. The places of publication number 11.

ARIZONA.

Population 133,338.

TERRITORIAL CAPITAL, PHOENIX.

ARIZONA is bounded north by Utah and Nevada, south by Mexico, east by New Mexico, and west by California and Nevada; length, north to south, 390 miles, breadth averaging about 300 miles; land area, 113,000 square miles. It lies entirely within the Valley of the Colorado, which stream forms nearly all the western boundary. The streams generally flow through deeply eroded chasms, among them being the remarkable "Grand Canon of the Colorado." The soil of the valleys is very fertile when irrigated; and the mountain lands are well adapted to stock raising and wool growing. Wheat, barley, and alfalfa are the principal crops. Under the National Irrigation Law, the Salt River Valley, in which Phoenix is located, will be the scene of the first large work in government reclamation of arid lands. The Tonto Dam, which is under construction for this purpose, will be the second largest in the world and will supply irrigating water for 200,000 acres of land which has been compared to that in the Valley of the Nile for fertility. Oranges, dates, and deciduous fruits thrive, as well as every variety of fruits and vegetables which will grow in the temperate and semi-tropic zones. The chief wealth of the Territory, however, lies in its mineral deposits. Gold, silver, lead, and copper abound, and the mining and working of gold and copper ores is at present the leading industry.

The number of newspapers and periodicals published in Arizona is 65, including 17 daily, 46 weekly and 2 monthly. The places of publication number 28, of which 13 designated by a dagger (†) are county seats.

ARKANSAS.

Population 1,366,119.

STATE CAPITAL, LITTLE ROCK.

ARKANSAS is bounded north by Missouri, east by Missouri, Tennessee, and Mississippi south by Louisiana, southwest by Texas, and west by the Indian Territory; greatest length from north to south, 240 miles, and breadth from 170 to 250 miles; land area, 58,045 square miles. The eastern part is low and level, with dense forests and many swamps and lakes, and is frequently more or less inundated by the Mississippi, Arkansas, and other rivers. The surface rises toward the centre, where it is hilly and diversified with forests and rolling prairies. Further west are branches of the Ozark Mountains, comprising the Black Hills in the north, Cane Hills in the northwest, and the Ouachita Hills in the south. The Valley of the St. Francis, in the northeast, is nearly all swamp; the Valley of the Arkansas, from the Indian Territory line entirely across the State, is unsurpassed as a cotton producing country; the Valley of the White in the north, abounding in forests, is also rich in agriculture. In the southern part of the State are the Saline, Ouachita, Little Missouri and Red rivers, while in the southeast the Bayou Bartholomew makes a large country tributary to the Mississippi River. The soil is very varied. The river bottoms are very fertile, and yield large crops of cotton, corn, sweet potatoes, tobacco and fruit. The soil is less productive on the uplands, but in many places, particularly north, produces good crops of wheat, oats, and fruit, especially apples. Cotton is the chief staple; corn next. Hay is an important crop. Stock raising is growing rapidly, the mild winters being highly beneficial to stock, and the cost of "keeping up" stock thus avoided. The principal manufactures are cotton seed oil, flour and grist mill products, cotton gins, leather, wool carding, and lumber. The production of black walnut lumber for cabinet purposes is an important industry. In the matter of ores, mechanical and precious, Arkansas is coming to the front as one of the greatest of ore producing States, and millions of dollars are now being used in their development. As a fruit country the northwestern part of Arkansas is unrivalled, especially as to apples. Coal, argentiferous galena, zinc, copper, and iron, marble, grind stone, granite and kaolin are among the minerals. Good coal is mined in Crawford, Conway, Franklin, Johnson, Perry, Pope, Pulaski, Sebastian, Scott, Washington, White, and Yell Counties. Silver is found in connection with galena in Pulaski, and Sevier Counties, and with lead in Benton, Carroll, Independence, Izard, Lawrence, Madison, Marion, Newton, Pulaski, Randolph, Searcy, and Washington Counties; excellent marble, especially in Madison County. Slate for all purposes is quarried in Pike, Pulaski, Polk, Garland and Sevier Counties; Garland County has extensive quarries of Arkansas hone or oilstone. In Pulaski County, a few miles south of Little Rock—very extensive quarries of blue granite have been opened up within the past year, and valuable discoveries of iron have also been made. Among the mineral springs, the "Hot Springs of Arkansas," at Hot Springs, Garland County, are the most renowned.

The number of newspapers and periodicals published in Arkansas is 299, including 25 daily 6 semi-weekly, 254 weekly, 3 semi-monthly and 11 monthly. The places of publication number 165, of which 83 designated by a dagger (†) are county seats.

CALIFORNIA.

Population 1,564,286.

STATE CAPITAL, SACRAMENTO CITY.

CALIFORNIA is bounded north by Oregon, east by Nevada and Arizona, south by Lower California, and west by the Pacific Ocean. A line drawn through its centre, following the curves of the eastern and western borders, would measure about 770 miles. Its greatest breadth is about 330 miles; least breadth, 150 miles; average breadth, 230 miles; land area, 155,980 square miles. It is the largest State in the Union except Texas. The surface is traversed by two great ranges, the Sierra Nevada in the east and the Coast Range in the west, while between them are the beautiful and fertile valleys of the Sacramento and San Joaquin. The Yosemite and other valleys are on the western slope of the Sierra Nevadas, and the entire range teems with minerals, so also does the Coast Range to a lesser degree. The extreme north is an elevated mountain region, with a great deal of good land, and is becoming celebrated for timber, mines, and fresh fruits, such as apples, etc. The soil of a large part of the State is very deep and rich, and the yield of agricultural products generally is very great. Irrigation, originally introduced by the mission fathers, has been largely increased since the American occupation. The Mormons introduced a very elaborate system in San Bernardino County in 1853, and the big Riverside Canal was built in 1869. Large additions are constantly being made. For every kind of fruit that grows in semi-tropical and temperate climates, California is, in soil and climate, pre-eminently favorable. The wheat crop is over 16,000,000 bushels a year. Barley exceeds 22,000,000 bushels. Cattle and sheep are largely raised, dairy cows number over 3,000,000, other meat cattle and calves, over 1,100,000; sheep, over 5,000,000. The wool clip is estimated at 22,000,000 pounds. The yield of raisins is about 115,000,000 pounds; the average yield of wine, 35,000,000 gallons, and of brandy, 500,000 gallons. Dried fruits are extensively produced. The yield of prunes is 115,000,000 pounds; other dried fruits, over 70,000,000 pounds; fresh fruits, 420,000,000 pounds; nuts, 20,000,000 pounds; oranges, 12,000,000 boxes; lemons, 1,200,000 boxes; canned fruits, 2,500,000 cases. Honey, tobacco, corn, barley, and hops are raised in various parts of the State. There are also produced 155,000,000 pounds of beet sugar, 35,000,000 pounds of butter, 7,000,000 pounds of cheese, 21,000,000 pounds of asparagus, nearly 120,000,000 pounds of beans, and over 4,000,000 bushels of potatoes. Nearly 800,000,000 feet of lumber are produced. The olive is attracting a great deal of attention, and justly so, as the State furnishes on its hills and mountain slopes the soil exactly suited to its production, and it is believed that in a few years the California olive groves will rival those of the Mediterranean. The yield of fruits of all kinds, exclusive of home consumption, has a value of over \$55,000,000. California is famous for her wheat, fruit, vineyard produce, and agricultural products generally, scarcely less than for her yield of the precious metals. The estimated production of gold and silver is \$20,000,000, and of quicksilver, over 2,000,000 pounds. There are numerous other minerals, including valuable deposits of lead, copper, iron, chromium, antimony, borax, rock salt, soda, potash, sulphur, etc. Petroleum is produced to the value of \$15,000,000, while natural gas has been discovered at Stockton, Santa Barbara, Redwood City, and other points. Manufacturing interests are growing rapidly, the principal being lumber, flour, woollens, wine, brandy, tobacco, cigars, machinery, and metallic wares. The annual value of the fishing interest is about \$6,000,000.

The number of newspapers and periodicals published in California is 768, including 139 daily, 2 tri-weekly, 21 semi-weekly, 491 weekly, 1 fortnightly, 11 semi-monthly, 95 monthly, 1 five times a year, and 4 quarterly. The places of publication number 275, of which 55, designated by a dagger (†), are county seats.

COLORADO.

Population 574,030.

STATE CAPITAL, DENVER.

COLORADO is bounded north by Nebraska and Wyoming, east by Nebraska and Kansas, south by Oklahoma and New Mexico, and west by Utah. Length, from east to west, 880 miles, breadth, 280 miles; land area, 108,645 square miles. The surface consists of three divisions—the mountains and parks, the foothills and the plains. It is intersected near the center by the main Range of the Rocky Mountains, otherwise known as the "Continental Divide," and including the highest peaks, among which are Pike's and Long's, Mts. Torrey, Lincoln, Gray, Yale and Harvard, the Spanish Peaks, etc. The mountains enclose wonderful valleys or basins known as parks, many of which are small, but others larger than some entire States. These parks are well timbered, and abound with beautiful scenery, being diversified with low hills and ridges, which contain the sources of all the great rivers that rise in the State. The eastern part of Colorado is an immense plain, well adapted to stock raising. Agriculture is being carried on to a greater extent than ever before. Extensive irrigating ditches have been constructed and are being rapidly added to, both in the river valleys of the west, and along the Arkansas in the east. The total length of canals at the present time is about 12,000 miles; acres irrigated, about 2,000,000. Where water can be had, the soil is very productive. The leading farm products are wheat, corn, sugar beets, alfalfa, barley, oats, hay, potatoes, fruits, garden and dairy products. The annual yield of wheat is 6,000,000 bushels; of oats, over 2,000,000; of corn, over 1,000,000, and of potatoes about 2,500 carloads. Cattle raising and sheep farming are among the chief agricultural pursuits. Colorado is estimated to have 2,500,000 sheep, and 1,500,000 cattle, while the wool clip is over 10,000,000 pounds. Lumbering is an important industry, but the mining of gold, silver and other metals is a chief source of wealth. The annual production of the precious and semi-precious metals is about \$50,000,000. Large beds of anthracite, lignite, bituminous and semi-bituminous coal, of good quality, exist, the total extent of coal-bearing strata in the State being estimated at more than 20,000 square miles. Upward of 6,000,000 tons of coal are produced annually. Petroleum has been discovered, and there are about 125 producing wells in the Florence field alone. Copper, cement, fire clay and manganese are worked to some extent, while the iron of the State is manufactured into steel and iron rails.

The number of newspapers and periodicals published in Colorado is 360, including 36 daily, 8 semi-weekly, 273 weekly, 6 semi-monthly, 36 monthly and 1 quarterly. The places of publication number 150, of which 56, designated by a dagger (†), are county seats.

CONNECTICUT.

Population 956,789.

STATE CAPITAL, HARTFORD.

CONNECTICUT is bounded north by Massachusetts, east by Rhode Island, south by Long Island Sound, and west by New York. Its average length from east to west is 86 miles; its average breadth, 55 miles; land area, 4,815 square miles. The eastern part is principally composed of rounded hills, which, though stony, afford rich pasturage; and the valleys support a thrifty agricultural and manufacturing population. The Connecticut Valley, near the river, and at a distance from the Sound, is very fertile. In the south the land is broken and the soil sandy and gravelly, but when well manured yields good crops of potatoes, rye, oats, and corn. In the west the surface is rough and the hills are abrupt. There are several good harbors on the coast, and a large business is done in oyster fishing and in the taking of fish for oil and fish-guano. Agriculture employs one-third of the working population and the value of the farms reaches \$121,000,000. Dairy products and hay are the principal staples of the east and west. Tobacco is largely grown in the Connecticut Valley. Corn, rye, oats, and potatoes are grown in nearly all sections. The land near the large cities and towns is chiefly devoted to market gardening. The Connecticut River is open to steamboat navigation from its mouth to Hartford. The Thames River is likewise navigable by Sound steamers as far as its formation by the Yantic and She-tucket Rivers in Norwich city, and steamers ply regularly between that city and New York, and, in the summer season, to the seaside resorts. Connecticut is mainly a manufacturing State, having an unusual abundance of water power, and its industries are very extensive and varied, among the leading productions being clocks, hardware, india-rubber goods, firearms and textile fabrics. Excellent iron is made from Connecticut ores, and very large quantities of brown stone are taken from the celebrated Portland sandstone quarries. The State of Connecticut, and especially its capital city of Hartford, has become celebrated for the extent and solidity of its insurance interests,—the nineteen life and fire companies of Hartford alone representing in capital and assets nearly two hundred millions of dollars.

The number of newspapers and periodicals published in Connecticut is 167, including 38 daily, 8 semi-weekly, 96 weekly, 2 fortnightly, 1 every third week, 17 monthly, 1 bi-monthly and 4 quarterly. The places of publication number 66, of which 9 designated by a dagger (†) are county seats.

DELAWARE.

Population 189,878.

STATE CAPITAL, DOVER.

DELAWARE is bounded north by Pennsylvania, east by the Delaware River and Bay, and the Atlantic Ocean, south and west by Maryland. Its length from north to south is 96 miles, its breadth ranging from 9 to 12 miles in the north to about 36 miles in the south; land area 1,960 square miles. The surface in the north is finely diversified with hill and dale, and southward the land is rolling, with fringes of marshes and swampy tracts along the indentations of Delaware Bay. The most southerly two fifths of the State is in great part a sandy region. Kaolin and iron ore are found in the north. The soil in the interior of the State is light and easily cultivated. The agricultural products are grain, corn, fruit, and market garden produce; peach growing and small products—berries,—are prominent industries. Over one hundred evaporators and canneries are engaged in conserving all kinds of fruits, berries and garden vegetables, at Dover, Milford, Georgetown, Smyrna and other towns in the lower half of the State. Manufactures are various, and are carried on chiefly in Wilmington and its vicinity. Iron goods, gun-powder, paper, leather, carriages, machinery, cotton and woolen goods, and flour are the leading products. Seaford ships immense quantities of oysters, and Lewes is a station for menhaden and other fisheries. Oyster growing and fishing are important industries. Large quantities of timber are cut for ship building, the manufacture of glass and for railroad ties.

The number of newspapers and periodicals published in Delaware is 35, including 4 daily, 1 semi-weekly, 27 weekly, and 3 monthly. The places of publication number 13, of which 3 designated by a dagger (†) are county seats.

DISTRICT OF COLUMBIA.

Population 293,217.

(No Vote.)

(For map see map of Maryland).

The DISTRICT OF COLUMBIA is inclosed by the State of Maryland, except on the southwest, which is bounded by the Potomac River; land area, 60 square miles. Surface undulating, with a fine fertile soil. The agricultural and market garden products are large, and the principal manufacture is that of flour, at Georgetown, at which place also is carried on an extensive coasting trade in coal, tobacco, grain and flour. Brick, lumber, confectionery, and carriage manufacture are other leading industries.

The number of newspapers and periodicals published in the District of Columbia is 64, including 3 daily, 24 weekly, 1 semi-monthly, 32 monthly, 1 bi-monthly and 3 quarterly.

FLORIDA.

Population 566,885.

STATE CAPITAL, TALLAHASSEE.

FLORIDA is bounded north by Alabama and Georgia, east by the Atlantic Ocean, south and west by the Gulf of Mexico and Alabama. The peninsular portion of the State is about 375 miles long by an average breadth of 90 miles; the upper portion 380 miles from east to west by from 30 to 90 miles from north to south: land area, 51,240 square miles. The surface is diversified with numerous lakes, the largest, Okeechobee, being 40 miles long by about 30 miles broad. There is a coast line of about 1150 miles, while the water surface comprises one fifteenth of the whole. The largest portion of the southern part of the peninsula is occupied by the Everglades, an evergreen marsh or swamp, impassable in the rainy season, and resembling an immense lake dotted with innumerable islands of from half an acre to hundreds of acres in extent, the whole comprising over 2,000,000 acres. From the northern end of the swamp to Georgia is mostly a dead level, with occasional undulations and small hills. West of the neck of the peninsula the surface becomes a little more uneven; the central portion is the most fertile, but there are many pine barrens there. There are numerous gentle eminences called hammocks, which are remarkably fertile, as are also the swamp lands when ditched and drained. Sugar cane is raised chiefly along the Gulf coast. Both long and short staple cotton and tobacco are grown, but corn and rice are the principal cereals. Oranges, lemons, limes, pineapples, figs, olives, and grapes flourish luxuriantly; garden vegetables are largely produced, for the northern market, while of recent years the shipment of oranges north has become very important. Cattle require little care, are not housed in winter, and large numbers are raised and shipped to Havana. Hogs fatten on the roots and mast of the forest. Sponge is found on many parts of the coast. Manufactures of pine lumber, ship timber, tar, rosin, turpentine, cotton seed oil and cake, palmetto hats and braids; salt is made by solar evaporation; cigars are manufactured at Key West and Ybor City, near Tampa, in large quantities. Immense deposits of phosphate rock underlying parts of 8 or 10 counties are being developed. There are considerable fisheries, the inland and coast waters being full of fish; oysters are abundant, and the sponge and coral fisheries are of importance.

The number of newspapers and periodicals published in Florida is 170, including 18 daily, 8 semi-weekly, 133 weekly, 2 semi-monthly and 9 monthly. The places of publication number 81, of which 45, designated by a dagger (†), are county seats.

GEORGIA.

Population 2,336,404.

STATE CAPITAL, ATLANTA.

GEORGIA is bounded north by Tennessee and North Carolina, northeast by South Carolina southeast by the Atlantic Ocean, south by Florida, and west by Alabama. Its extreme length from north to south is 320 miles, extreme breadth 254 miles; land area, 58,980 square miles. The surface is varied; along the coast, it is intersected by numerous rivers and sounds, and the country for miles inland is a succession of ridges of pines and live oaks and swamps of cypress; the great Okeefnokee Swamp is in the southeast. Back from the coast is a stretch of sandy land, mostly pine barrens, and yielding large amounts of timber and naval stores. A series of terraces bring the land in the middle of the State to about 575 feet above tidewater, from which elevation it rises toward the north more rapidly, until it becomes mountainous, being there crossed by spurs of the Appalachians. The soil of the islands is sandy, producing sea island cotton; that of the mainland, rich alluvial, producing corn, cotton, and rice; the middle region is red loam, yielding good cotton, corn, tobacco, etc. In the north there is much fertile soil; grain, tobacco, fruits, and vegetables are largely grown, but not much cotton, which is mainly raised in the central, west central, and southwestern regions. Sugar cane is grown in the south, and considerable pork fattened, mainly for home consumption; sweet potatoes are largely produced; wool is prominent, but corn and cotton are the leading staples. Among the leading industries are lumber, flour, boots and shoes, carriages, cotton and woolen goods, wool carding and cloth dressing, leather, saddlery, metallic wares, furniture, castings, machinery, farm implements, etc. There are very many cotton factories in the State. The most important are at Augusta and Columbus, the other chief seats of the cotton manufacture are Athens, Atlanta, Decatur, Macon, Savannah, and West Point. Savannah, the commercial capital of the State, is the most important South Atlantic seaport. The city is the seat of a large foreign and domestic commerce. Its railroads extend to all parts of the country, and its steamships ply daily to the principal North Atlantic ports. Savannah is the largest naval stores and second largest cotton and rice port in the United States, and also an important point for the manufacture and shipment of lumber and fertilizers. Atlanta has large iron works, and is developing as a manufacturing city with highly encouraging rapidity. Rome, Dalton, Marietta, Thomasville are manufacturing towns. The iron and steel trade is overtaking the cotton manufacture in importance. Other important branches of manufacture are lumber, flour, pulp, etc. Darien, Brunswick, and St. Marys manufacture and export lumber. Minerals; bituminous coal in the northwestern portion; immense deposits of iron ore in Bartow and Cherokee Counties; copper ore in Gilmer County; gold is most plentiful in Cherokee, Carroll, Cobb, and Lumpkin Counties; silver, lead, and many other minerals, granite, marble, gypsum, slate, and petroleum; excellent marble in Pickens and Cherokee Counties; hydraulic limestone in Bartow County. There are numerous mineral springs of which the Indian Spring in Butts County and the Bowden Lithia, or Salt Spring, in Douglas County are the best known. The development of the rich marble resources in north Georgia during the past five years has been wonderful. There are inexhaustible quarries of the finest marble in Pickens, Cherokee, Murray and adjoining counties, and millions of dollars have been invested in opening them.

The number of newspapers and periodicals published in Georgia is 370, including 26 daily, 2 tri-weekly, 12 semi-weekly, 275 weekly, 11 semi-monthly, 41 monthly, 2 bi-monthly and 1 quarterly. The places of publication number 197, of which 125, designated by a dagger (†), are county seats.

Extensive shipments of fertilizers, lumber, rice, wool and hides, and an immense shipping business in early vegetables and fruits for the Northern markets. Rice is extensively cultivated in the vicinity, also fruit and vegetables. Manufacturing interests are unimportant.

IDAHO.

Population, 183,738.

STATE CAPITAL, BOISE.

IDAHO is bounded north by British Columbia, east by Montana and Wyoming, south by Utah, and west by Oregon and Washington; its length from north to south is about 410 miles, width varying from 44 to 306 miles; land area, 84,290 square miles. The surface is chiefly mountainous, but there are also large tracts of prairie and fertile valleys. In the southeast is a volcanic region, abounding in geysers and saline springs. It is generally better adapted for grazing than for agriculture, and stock raising is being diligently prosecuted. Corn is not profitably raised, owing to the shortness of the summer. Barley, wheat, oats, potatoes, dairy products and wool are the staples. There are vast tracts covered with sage grass, on which cattle fatten readily. Fruits of excellent quality are grown in considerable abundance. Many of these plains, if irrigated, would make excellent wheat growing districts. Irrigation has been employed to some extent, and there is abundant water in the streams and lakes, if properly applied, to reclaim the 8,000,000 acres which are susceptible of irrigation. The forest-covered area is very large, embracing about 10,000,000 acres, the timber being chiefly "lodge pole" pine of small diameter, but growing very thickly. Other trees are fir, spruce, cedar, etc., some of these being very large. Gold, silver and lead are plentiful in all parts of the State and are largely produced.

The number of newspapers and periodicals published in Idaho is 108, including 7 daily, 1 tri-weekly, 8 semi-weekly, 91 weekly and 1 monthly. The places of publication number 74, of which 21, designated by a dagger (†), are county seats.

CIRCULATION: Bold face—sworn. * Detailed statement. † Publishers' reports. Roman figures—estimated. POPULATION: Census of 1900. * Estimated. † County Seat. ‡ Size of page.

ILLINOIS.

Population, 5,117,036.

STATE CAPITAL, SPRINGFIELD.

ILLINOIS is bounded north by Wisconsin, northeast by Lake Michigan, east by Indiana southeast and south by Kentucky, and West by Missouri and Iowa; extreme length north and south 385 miles; extreme breadth 218 miles; land area, 58,980 square miles. The surface is mostly level table land, inclining gently toward the south, with bluffs along the principal rivers. A small tract in the northwest, around Galena, is somewhat broken, and a low mountain ridge extends across the southern end from Grand Tower, on the Mississippi River, to Shawneetown, on the Ohio, about 850 feet above sea level. This is a great fruit region. The prairies are sometimes level, but generally undulating. More than two thirds of the state is a productive bituminous coal field. The iron ore is good only when mixed with Michigan and Missouri ores. Lead and zinc are mined extensively in the northwest. Copper ore, gypsum and marble are found in various places. Limestone and freestone abound. The prairie soils are deep and fertile; that of the river bottoms is often inexhaustible. A tract called the American Bottom, extending along the Mississippi River a length of ninety miles by about five in breadth, has an alluvial soil about twenty-five feet in depth. Illinois is unexcelled as an agricultural State, and is among the first in manufactures. Spring and winter wheat, corn, and other cereals, dairy produce, wool, and hay, are leading products. Corn is produced most abundantly. The industrial pursuits embrace a wide range of articles, and the seats of manufacture are distributed generally throughout the State. The leading articles of manufacture include iron and steel and their products, wooden ware, furniture, farming implements, cars and carriages, flour, watches, woolen goods, bridge work, lumber, tiles, glassware, soap, malt and distilled liquors, etc. Fishing interests center chiefly at Chicago, which is also the centre of an immense business in live stock and lumber. Natural gas in large quantities has been discovered at various points in the State.

The number of newspapers and periodicals published in Illinois is 1,709, including 185 daily, 5 tri-weekly, 41 semi-weekly, 1,143 weekly, 4 fortnightly, 26 semi-monthly, 1 every 6 weeks, 288 monthly, 6 bi-monthly and 10 quarterly. The places of publication number 649, of which 102, designated by a dagger (†), are county seats.

INDIANA.

Population 2,614,223.

STATE CAPITAL, INDIANAPOLIS.

INDIANA is bounded north by Michigan and Lake Michigan, east by Ohio, south by Kentucky, and west by Illinois. Its extreme length north and south is 276 miles; average breadth 140 miles; land area 35,910 square miles. About two-thirds of the surface is undulating or level prairie; near the Ohio and other streams the surface is hilly and often abrupt and rugged. In the extreme northwest there is a sandy tract, with considerable marsh land. The northeast abounds in oak openings and prairie land, interspersed with many small lakes. The soil is generally fertile, much of it exceedingly so; the richest is found along the Wabash, White, and White Water Rivers. There is abundance of coal of good quality. The iron manufacture is extensive, Indiana coal being particularly suited to this industry, but the ores used come mainly from the Lake Superior region, Missouri, and Tennessee. Indiana has some bog ore and local deposits of better grades which have been worked to some extent. There are some salt springs, good sandstone, limestone, fire brick, potter's clays, and kaolin. Limestone is particularly abundant, being practically inexhaustible in quantity. Indiana ranks high as a grain producing and stock raising State. Corn, wheat, oats, tobacco, and potatoes are raised in large quantities. Corn is the most abundant product, while of live stock, cattle and swine are the most numerous. Butter, wool, hay, maple sugar, and sorghum molasses are also important products; timber is largely exported. Manufactures are numerous and extensive, the chief industries being flouring and grist mill produce, lumber, woolen goods, furniture, carriages and wagons, iron and iron ware, machinery, agricultural implements, pork-packing, liquors, metallic wares, leather, boots, shoes, and clothing. The natural gas belt, said to be the largest known in the world, extends over 21 counties, or more than 6,000 square miles.

The number of newspapers and periodicals published in Indiana is 811, including 148 daily, 1 tri-weekly, 27 semi-weekly, 565 weekly, 1 fortnightly, 8 semi-monthly, 58 monthly, 1 bi-monthly and 2 quarterly. The places of publication number 320, of which 92 designated by a dagger (†) are county seats.

INDIAN TERRITORY.

Population, 455,624.

TERRITORIAL CAPITAL, TAHLEQUAH.

INDIAN TERRITORY is bounded north by Kansas, east by Missouri and Arkansas, south by Texas and west by Oklahoma. Land area about 69,000 square miles. The surface is mainly rolling prairie, with broad stretches of rich land along the streams, and an abundance of timber. In the west is a broad belt of forest, known as the "cross timbers," stretching north and south across the Territory with a breadth of from 40 to 60 miles. Still further west the country resembles that of the "Great Plains,"—the long incline leading to the Rocky Mountains.

The number of newspapers and periodicals published in Indian Territory is 212, including 16 daily, 2 semi-weekly, 191 weekly, 1 semi-monthly, and 2 monthly. The places of publication number 131.

 POPULATION: Census of 1900. * Estimated. † County Seat. ‡ Size of page.

IOWA.

Population 2,216,068.

STATE CAPITAL, DES MOINES.

IOWA is bounded north by Minnesota, east by Wisconsin and Illinois, south by Missouri and west by Nebraska and Dakota. Its greatest length from east to west is 300 miles, and breadth 208 miles; land area, 55,475 square miles. The surface is generally rolling prairie, with no mountains nor even high hills, but with frequent bluffs along streams; and in places near large rivers it presents a broken appearance, caused by erosion from torrents. The southern part is the most level, with prairies, groves, and the numerous affluents of the two great rivers. In the northeast the surface is more elevated, with numerous low hills with tops covered with oaks, and abounding in lead and other ore; but the distinguishing feature of Iowa is its prairies, which are everywhere fertile and easily tilled, and, having few stones or stumps, are especially adapted for the use of agricultural machinery. The valleys of the Red Cedar, Iowa and Des Moines Rivers contain the richest soils; northward of these the soil becomes less fertile, but is still productive and remunerative. Building stone is abundant; coal and lead are extensively worked. Iron ore and other minerals are found. The cereals generally, dairy and market garden products, wool, linseed, sorghum, and live stock of all kinds are very largely produced. As in Illinois and Indiana, corn is the most important product. Grapes grow well in the south, and fruit culture is increasing. Stock raising is an industry of growing importance. The manufacturing interests are rapidly developing, the leading branches being flour, lumber, wood working, carriages, woolen goods, boots and shoes, pork packing, saddlery, furniture, malt liquors, and farm implements.

The number of newspapers and periodicals published in Iowa is 1,104, including 64 daily, 4 tri-weekly, 54 semi-weekly, 875 weekly, 1 three times a month, 1 fortnightly, 6 semi-monthly, 96 monthly, and 8 quarterly. The places of publication number 616, of which 99, designated by a dagger (†), are county seats.

 POPULATION: State census of 1905. * Estimated. † County Seat. ‡ Size of page.

KANSAS.

Population 1,535,160.

STATE CAPITAL, TOPEKA.

KANSAS is bounded north by Nebraska, east by Missouri, south by the Indian Territory and Oklahoma, and west by Colorado. Its length from east to west is 410 miles, and from north to south 207 miles; land area, 81,700 square miles. The surface is chiefly undulating in the east, while the western part has a rolling and varied surface, with every requisite for grazing. There are no mountains, very few lakes, and those small and shallow; no marshes but salt marshes, and these are valuable. The bottom and table lands are chiefly a rich black loam, and highly productive. When the State was settled only five per cent. of the area was forest, and this was distributed mainly along streams and in occasional groves and small tracts; but it is estimated that the area of forest trees has since doubled by voluntary growth, transplanting, and by seed. Kansas is rapidly developing her rich mineral resources. In 1903 she produced over half of the zinc of the United States, or 87,634 tons; coal, nearly 6,000,000 tons; petroleum, 1,072,000 barrels, and rapidly increasing; Portland cement, 750,000 barrels; clay products to the value of \$1,215,275. The total mineral output for 1903 was \$28,336,823. Winter and springwheat, corn, rye, oats, and potatoes are the chief products, while broom corn, sorghum, flax, hemp, castor beans, tobacco, and hay are also largely produced. The annual wheat crop is about 95,000,000 bushels; that of corn, about 300,000,000 bushels. Cattle raising is a prominent industry, and sheep farming is increasing in the western part. The number of cattle in the State is over 3,000,000; of hogs about 2,000,000, and of sheep nearly 200,000. Dairy products are increasing rapidly, and progress is also being made in fruit growing and wine making. The manufacture of sugar from sorghum and the making of glass are important industries. Manufactures are being developed, and the number of establishments is rapidly increasing, but Kansas is essentially an agricultural State. The principal cities are Kansas City, Topeka, Wichita, Atchison, Leavenworth, and Fort Scott.

The number of newspapers and periodicals published in Kansas is 748, including 67 daily, 1 tri-weekly, 10 semi-weekly, 638 weekly, 2 semi-monthly, 28 monthly and 2 quarterly. The places of publication number 410, of which 103, designated by a dagger (†), are county seats.

CIRCULATION: Bold face—sworn. * Detailed statement. † Publishers' reports. Roman figures—estimated.
 POPULATION: State census of 1904. * Estimated. † County Seat. ‡ Size of page.

KENTUCKY.

Population 2,230,619.

STATE CAPITAL, FRANKFORT.

KENTUCKY is bounded north by Ohio and Indiana, northwest by Illinois, east by West Virginia and Virginia, South by Tennessee, and west by Missouri; greatest length from east to west, 350 miles; greatest breadth, 178 miles; land area, 40,000 square miles. The surface in the east and southeast is mountainous, being broken by numerous parallel ranges of the Alleghany system, with deep and fertile valleys. Northwest of this section, and in the centre of the State, is the famous Blue Grass Region, with a gently undulating upland surface, and deep valleys at the rivers. Between the Green and Cumberland Rivers the surface is level and known as the "Barrens," because of the lack of stout timber in much of it. The western part is generally level with slight undulations. The soil of the whole State is remarkably fertile, and renews itself readily; that part between Lexington and the Ohio River is known as the "Garden of Kentucky." Cereals grow to greater perfection and maturity in Kentucky than almost any other State. The chief products are tobacco, hemp, corn, wheat, oats, rye, barley and potatoes. Kentucky has acquired a world wide fame for its thoroughbred horses and short horn cattle. The wool clip is very large, and immense numbers of hogs are raised. Dairy products are very extensive; also sorghum molasses, maple sugar, honey, and wax; some cotton is raised in the southwest near the Tennessee line. Tobacco is of vast importance, nearly half the American crop being handled within the State, Louisville being the greatest leaf market in the world. Coal, iron, building stones, clays, etc., are abundant. The timber forest in southeastern Kentucky covers 10,000 square miles underlaid with coking and bituminous coals of superior grade. The greatest known area of coking and fine cannel coals exists at the head of the Kentucky river. Large quantities of so-called "Red River" and the Oriskany coals used in the manufacture of car wheels and other fine iron products are annually mined, the product during the last decade averaging over 50,000 tons annually. The manufacturing interests are varied and important, and are carried on chiefly in the towns on the Ohio River; an extensive industry is the smelting and working of iron, while all wood manufactures flourish. Whisky is an important product of the central counties, and more mules are raised than in any other State. Salt is made from springs in the mountain counties.

The number of newspapers and periodicals published in Kentucky is 320, including 28 daily, 2 tri-weekly, 18 semi-weekly, 237 weekly, 3 semi-monthly, 23 monthly and 4 quarterly. The places of publication number 156, of which 106, designated by a dagger (†), are county seats.

LOUISIANA.

Population 1,460,237.

STATE CAPITAL, BATON ROUGE.

LOUISIANA is bounded north by Arkansas and Mississippi, east by Mississippi and the Gulf of Mexico, south by the Gulf of Mexico, and west by Texas. Its extreme length from east to west is about 300 miles, and breadth 240 miles; land area, 45,420 square miles. Surface generally low and level. There are low hills in the north and northwest, from which the land slopes gradually to the Mississippi and the Gulf. Much of the land along the river is below the surface at the spring freshets, and is protected from overflow by the levees, which are built on both banks below Baton Rouge, and on the west bank throughout the State. Many of the principal rivers and bayous are protected in like manner. The extent of navigable water surpasses that of any other State in the Union. The soil of the river bottoms is exceedingly fertile, and yields large crops of cotton, sugar cane, rice, etc. Its prairies are productive, and afford good pasture in places. The hilly section yields good cotton crops, but about half is covered with pine barrens. The total wooded area of the State is estimated at 16,608,800 acres, or three-fifths of the total area. The timber is mainly pine, but there are large bodies of valuable cypress and some important groves of live oaks. The great staples are cotton, sugar, rice, and corn. The State produces nearly all the cane sugar made in the United States. The sugar product has rapidly increased of recent years, and is now claimed to be between 300,000 and 350,000 tons per annum, worth \$20,000,000. The yield of rice is very large, and the quality excellent. Cattle raising is an important interest. The manufacturing output is second largest in the State. The leading industries are sugar refining, cotton goods, lumber, naval stores, castings, machinery, tobacco, clothing, flouring mill products, cotton seed oil, beer, and ship building. Its commerce, carried on chiefly through New Orleans, is extensive and important. Iron ores, ochre, gypsum, and marl are abundant; large deposits of sulphur exist in Calcasieu Parish, and immense amounts of solid rock salt on Petit Anse and Weeks Islands. There are numerous oil wells in the western part of the State.

The number of newspapers and periodicals published in Louisiana is 224, including 22 daily, 1 tri-weekly, 5 semi-weekly, 177 weekly, 1 fortnightly, 3 semi-monthly and 15 monthly. The places of publication number 107, of which 54, designated by a dagger (†), are county seats.

MAINE.

Population 702,875.

STATE CAPITAL, AUGUSTA.

MAINE is the most northeasterly State in the Union, bounded on the north by Quebec and New Brunswick, east by New Brunswick, south by the Atlantic Ocean, and west by New Hampshire and Quebec; its extreme length is 302 miles, width 285 miles, which is extended to 2500 miles by the many indentations; land area, 29,895 square miles. The northern part is mainly a wilderness of forest land with rugged surface and groups of detached mountains; thinly peopled, except in the fertile tracks of Aroostook County. In the northeast, on the St. John's River, are several French Canadian settlements. The southern part is varied, seldom much broken, and has tracts of great fertility, while others are only moderately fertile, especially in the southeast. The hay and potato crop is large and excellent; corn thrives in the south, and winter wheat in the northeast; oats are very fine and prolific, and barley next. Dairy products are of great value. Large numbers of horses and cattle are exported. Wool is abundant and of good quality. The principal fruits are the cherry, plum, pear, and apple. The State holds a prominent position in the lumber trade; fisheries are important, and the canning of fish, lobsters, green corn, fruits, and vegetables is extensively carried on. The seaboard towns enjoy a large coasting and West India trade. Large quantities of lime are exported from Camden, Rockland, and Thomaston. Granite is extensively quarried at various points. Slate is quarried in large quantities at Brownsville and Monson. Ice is an important and profitable article of export. The leading articles of manufacture are cotton goods, lumber, woolen goods, leather, paper, boots and shoes, foundry and machine shop products, ships, agricultural implements, etc. The chief seats of the lumber trade are Augusta, Bangor, Biddeford, Calais, Eastport, Fairfield, Lewiston and Machias; of cotton manufacture, Augusta, Biddeford, Lewiston, Brunswick, Saco and Waterville; of ship building, Bath, Bangor, Belfast, Calais, Damariscotta, Machias, Rockland, Thomaston and Waldoboro. Woolens are made at Bridgton, Dexter, Dover, Lewiston, Madison, Oxford, Sanford, and Warren; boots and shoes at Auburn, Bangor, Fairfield, Farmington, Lewiston, Richmond, Skowhegan, Norway, Paris, and Mechanic Falls. Bangor has foundry and machine shops, furniture factories, and steam planing mills. Extensive hemlock sole leather tanneries are located at Brookton, Grand Lake Stream, Kingman Lincoln, Lowell, Medway, and Winn. Large spool factories are located at Foxcroft, South Lincoln and Willimantic. Apart from these special branches of trade, Belfast, Ellsworth, Gardiner, Hallowell, Portland, Rockland, Skowhegan, and Waterville are seats of varied and extensive manufactures.

The number of newspapers and periodicals published in Maine is 156, including 17 daily, 1 tri-weekly, 4 semi-weekly, 95 weekly, 2 semi-monthly, 35 monthly, and 1 quarterly. The places of publication number 77, of which 15, designated by a dagger (†), are county seats.

MARYLAND.

Population 1,231,739.

STATE CAPITAL, ANNAPOLIS.

MARYLAND is bounded north by Pennsylvania, east and southeast by Delaware and the Atlantic Ocean, west by West Virginia, and south and southwest by Virginia, West Virginia, and the District of Columbia. The Chesapeake Bay divides the greater part of it into two unequal parts, known as the Eastern and Western Shores. Its extreme length from east to west on its northern border is 198 miles, and its width, following the course of the Potomac, varies from 3 or 4 miles to about 120 miles; land area, 9,860 square miles. The surface of the Eastern Shore is mostly level, and in parts low and swampy, but towards the north rocky and broken. The Western Shore, between the Potomac River and Chesapeake Bay, presents mainly the same general features. The northwest is very mountainous; five or six ridges of the Alleghenies, principally the Blue and Laurel, traverse that section. In the extreme west are the beautiful elevated valleys named Glades. The soil of the Eastern Shore and the lower part of the Western is generally light and sandy, well adapted for peaches and market gardening, that of the central and northern parts very rich, yielding immense crops of tobacco, wheat, and corn. The mountain slopes are thickly wooded. The oyster fisheries are more extensive than in any other State. The manufactures are very numerous—canned goods (fruits, meats, and oysters,) being one of the most important. Boots and shoes, bricks, cement, chemicals, clothing, cotton and woolen goods, cooperage, tobacco, flour, leather, lumber, machinery, and metallic wares are leading industries. Its commerce is confined principally to Baltimore, whose foreign trade is very important. Maryland coal is used extensively in all the Atlantic States, the annual product being about 3,000,000 tons. Fire clays are abundant; those of Mt. Savage have a wide reputation. Brown hematite is found in the Trenton limestone, and bog ore on the Eastern Shore. There are numerous quarries of marble, granite, serpentine, and other building stone, limestone for burning, and roofing slate. Kaolin is found in Anne Arundel County; magnesite near Baltimore, from which large quantities of magnesia, carbonate, and Epsom salts are manufactured. There are many other minerals, including alum, amber, barytes, breccia, cements, chromium, bone stone, mill stone, iron pyrites, ochres, etc., some of which are very plentiful. Especial attention is given to tobacco growing in the lower counties of the Western Shore.

The number of newspapers and periodicals published in Maryland is 198, including 16 daily, 1 tri-weekly, 2 semi-weekly, 141 weekly, 3 semi-monthly, 23 monthly, 1 bi-monthly, 1 five times a year and 5 quarterly. The places of publication number 61, of which 23, designated by a dagger (†), are county seats.

CIRCULATION: Bold face—sworn. * Detailed statement. † Publishers' reports. Roman figures—estimated.
POPULATION: Census of 1900. * Estimated. † County Seat. Size of page.

MASSACHUSETTS.

Population 2,998,958.

STATE CAPITAL, BOSTON.

MASSACHUSETTS is bounded north by Vermont and New Hampshire, east by the Atlantic Ocean, south by the Atlantic Ocean and by Rhode Island and Connecticut, and west by Rhode Island and New York. Its extreme length is 160 miles, and breadth from 47 to about 90 miles; land area, 8,040 square miles. The surface is greatly diversified; mountainous in the extreme west, hilly and broken in the east and northeast, and in the southeast mainly low and sandy. Toward the west is the fertile Valley of the Connecticut River. The mountains are the Taconic, and the Hoosac (continuations of the Green mountain ranges of Vermont), with detached members of the White Mountains. The soil is generally somewhat sterile, but energy and intelligence have succeeded in making it very productive. The Connecticut Valley, however, can hardly be excelled for fertility. Dairy products are very extensive, as is also the yield of wool, hay, maple sugar, and honey. Corn and potatoes are very largely produced. Of grain, the crop of oats, rye, and barley is large, buckwheat moderate, and wheat (winter), small. The tobacco crop is large; live stock abundant (cattle largely in excess). More than half the fishing vessels owned in the United States belong to Massachusetts. Manufactures, however, constitute by far the largest of its industries. Not only is it the center of the American boot, shoe, leather, wool, paper and cotton trades, but all the large towns are busy seats of more or less numerous branches of manufacture. The chief seats of the ship building interests are Boston, Newburyport and Salem. The State is rich in building stone, principally granite, which is largely quarried at Rockport, Graniteville, Fall River, Monson, and Quincy; a handsome brown sandstone in the Connecticut Valley, and marble and limestone in Berkshire County; Berkshire County has also deposits of excellent iron ore. Except Rhode Island, it is the most densely peopled State. Railroads enter almost every town, and are sufficient in extent to gridiron the State with lines $4\frac{1}{2}$ miles apart if they were evenly distributed. Fall River, Lowell, New Bedford and Lawrence are, in the order named, the chief cotton manufacturing centers of the country.

The number of newspapers and periodicals published in Massachusetts is 691, including 81 daily, 1 tri-weekly, 5 semi-weekly, 411 weekly, 5 fortnightly, 12 semi-monthly, 146 monthly, 2 bi-monthly, 1 every three weeks, 1 three times a year, and 26 quarterly. The places of publication number 212, of which 20, designated by a dagger (†), are county seats.

MICHIGAN.

Population 2,530,016.

STATE CAPITAL, LANSING.

MICHIGAN is bounded north by Lake Superior, east by Lakes Huron, St. Clair, and Erie, and their connecting rivers, south by Ohio and Indiana, and west by Lake Michigan and Wisconsin; land area, 57,430 square miles. It consists of two peninsulas, of which the southern is the principal seat of wealth and population, its length, north to south, being about 300 miles; width, about 200; coast line of State on lakes not less than 1600 miles. This part of the State is a very level region, abounding in lakes and streams, with very extensive forests of pine and other timber in the north, oak openings or natural parks in the south, and prairies in the southwest. The soil contains sufficient sand to make it easily tilled, and few sections excel it as a farming region. In the west and southwest is the great fruit belt. Winter wheat, oats, and potatoes are abundant, and of excellent quality; corn and other cereals are largely grown. Dairy products are very valuable. Wool is raised in very large quantities, the product being about 15,000,000 pounds; live stock is plentiful. Peppermint and celery are raised extensively in the southwest, and grapes in the south. The surface of the northern peninsula is somewhat rough and mountainous, with a good soil in most parts outside the mining regions; its mineral wealth is very great, especially in copper, iron and silver. Large quantities of iron ore are mined and shipped to Pennsylvania, Ohio, Indiana, and Illinois to be smelted either alone or with the inferior ores found in those States. Marquette, Ishpeming, Negaunee, Gladstone, St. Ignace and Escanaba are the principal points of shipment. By far the most important copper mines of the country, and what is claimed to be the largest iron mine in the world, are in this State. There is a large quantity of coal in the lower peninsula used chiefly for local and railroad purposes. The salt producing territory covers about 9,500 square miles, and the annual product is not far from 5,000,000 barrels, which is more than double that of New York State; it is procured from artesian wells, and the Saginaw River and the mouth of the Manistee are the chief centres of manufacture. About 100,000 barrels of dairy salt are produced pronounced by competent judges to be the best in the world. 3600 hands are employed in the salt manufacture. Michigan ranks first among the States in the value and extent of its lumber product; the largest interest centering in East Saginaw. The lumber product, however, is rapidly falling off, through the rapid and wasteful reduction of the forest area. Gypsum, fire clay, and glass sand are also found. Manufactures are important and varied in extent. Among the leading are iron, lumber, salt, wooden ware, furniture, farm implements, leather, cotton and woolen goods, machinery, castings, and hollowware.

The number of newspapers and periodicals published in Michigan is 785, including 82 daily, 1 tri-weekly, 27 semi-weekly, 580 weekly, 2 fortnightly, 7 semi-monthly, 84 monthly, and 2 quarterly. The places of publication number 392, of which 81, designated by a dagger (†), are county seats.

MINNESOTA.

Population 1,979,912.

STATE CAPITAL, ST. PAUL.

MINNESOTA is bounded north by British America, east by Wisconsin and Lake Superior, south by Iowa, and west by Dakota. Its extreme length from north to south is 380 miles; breadth varies from 188 miles in the center to 262 on the south line, and about 380 on the north border; land area, 79,205 square miles. The surface is generally an undulating plain, diversified with rolling prairies, dotted with lakes and groves, with frequent timber belts. The northeast is generally rugged and hilly, with immense forests and much marsh land. The Red River Valley is a dead level. The southeast is a beautiful rolling prairie region, while the surface rises from the undulating prairies of the south and southwest to the Hauteur des Terres or Heights of Land in the northwest. In St. Louis County in the Northeast is located one of the greatest iron producing regions in the world. There are productive fisheries of white fish and lake trout in Lake Superior. The soil is fertile, about two-thirds of it being adapted to the cultivation of cereals and general farm produce. Very large quantities of spring wheat are raised even as far as the Manitoba line, while corn grows well all over the State. Oats, barley, hops, flaxseed, and hay are leading products. The cereals range in the following order, wheat, oats, corn, barley, rye and buckwheat. Wool growing is remunerative in the southwest. Maple sugar is an important product. Cattle, horses, and swine are largely exported, and pork packing is a valuable industry. Manufactures are rapidly increasing in number and value. The leading branches are flour and grist mill products, lumber and woodenware, carriages, furniture, and cooperage, while boots and shoes, brick, leather, lime, saddlery, and woolen goods are also extensively manufactured.

The number of newspapers and periodicals published in Minnesota is 794, including 43 daily, 3 semi-weekly, 663 weekly, 2 fortnightly, 14 semi-monthly and 69 monthly. The places of publication number 421, of which 82, designated by a dagger (†), are county seats.

CIRCULATION: Bold face—sworn. * Detailed statement. † Publishers' reports. Roman figures—estimated.
 POPULATION: State census of 1905. * Estimated. † County Seat. ‡ Size of page.

MISSISSIPPI.

Population 1,629,771.

STATE CAPITAL, JACKSON.

MISSISSIPPI is bounded north by Tennessee, east by Alabama, south by the Gulf of Mexico and Louisiana, and west by the Mississippi River, which separates it from Louisiana and Arkansas. Its extreme length from north to south is 332 miles; average breadth, 142 miles; land area, 46,340 square miles. The surface is generally hilly or undulating, except in the Mississippi bottom, from Vicksburg to the Tennessee line, and between the Mississippi and Yazoo rivers, where it is low and swampy, subject to inundation, and covered with a dense growth of timber, but with soil which, if reclaimed, would be exceedingly fruitful. Below Vicksburg the surface for some miles inland is hilly, and known as the "cane hills" or "bluffs," and with a generally productive soil. There is a very fertile prairie region in the northeast. The southern part is chiefly a level pine region, and furnishes good pasturage and large quantities of timber, tar, turpentine, etc. The soil of this tract is poor and sandy. Cotton and corn are the great staples, the product of cotton being surpassed probably only by Texas. The corn crop is over 25,000,000 bushels; that of oats over 3,000,000. Wheat is grown in the north, and rice and sugar cane in the south. Grazing is an important industry, much pork is fattened, and the clip of wool is large. Dairy products, sorghum, tobacco, and sweet potatoes are produced in considerable quantities. The manufactures are neither varied nor very extensive, lumber and grist mill products being the most important, while cotton goods and cotton seed oil and cake rank next in importance. Its commerce is carried on principally through New Orleans and Mobile; coasting and river trade large. The State has no coal or iron of practical value. Its mineral deposits are confined mainly to fertilizers, soft limestone and clays. Tishomingo County has large beds of fine pipe and potter's clay, there is also some sandstone suitable for rough masonry.

The number of newspapers and periodicals published in Mississippi is 216, including 15 daily, 5 semi-weekly, 210 weekly, 1 fortnightly, 6 semi-monthly and 9 monthly. The places of publication number 143, of which 80, designated by a dagger (†), are county seats.

CIRCULATION: Bold face—sworn. * Detailed statement. † Publishers' reports. Roman figures—estimated. POPULATION: Census of 1900. * Estimated. † County Seat. ‡ Size of page.

MISSOURI.

Population 3,227,214.

STATE CAPITAL, JEFFERSON CITY.

MISSOURI is bounded north by Iowa, east by Illinois, Kentucky, and Tennessee, south by Arkansas, west by Indian Territory, Kansas and Nebraska; length, north to south, 277 miles; average breadth, about 244 miles, ranging from 208 miles in the north to 312 miles in the south; land area 68,735 square miles. The Missouri River divides the State into two distinct parts. The surface north of the river is generally nearly level, while that south of it is undulating, becoming rougher and somewhat mountainous as it approaches the Ozark Mountains. There are also here open, treeless plains, an extension of those in Kansas, and in the southeast, bordering on the Mississippi River, is an extensive marshy tract, called the "Sunk Country," the result of the earthquake of 1811-12. The State contains every variety of soil. Corn, wheat, oats, and tobacco are the staple products, the yield of corn being about 200,000,000 bushels annually, but barley, rye, hay, fruit, white and sweet potatoes, dairy and market garden products, wool, cattle, and pork are raised largely in excess of home needs. Sorghum and castor oil beans are largely produced. Cotton, hemp, and flax are cultivated to some degree in the southern counties; so are grapes, and much wine is made. The principal live stock are sheep and swine. Iron ore is mined and manufactured in very large quantities, and the supply is inexhaustible. Lead ore is also largely produced, but its product is declining in consequence of the immense output of the western mines. Many other minerals abound; also marble, limestone, glass sand, kaolin, fire clay, etc. Beside iron and lead, there are important manufactures in many branches of trade, the product of flour ranking second in importance to that of iron and steel. Missouri has grown rapidly in population and wealth, railroads have multiplied, and extensive areas of territory, particularly in the southwest and southeast portions of the State, have been brought into cultivation, and now support large populations, and afford a considerable surplus to feed the world.

The number of newspapers and periodicals published in Missouri is 1,029, including 84 daily, 1 tri-weekly, 13 semi-weekly, 778 weekly, 2 fortnightly, 8 semi-monthly, 133 monthly, 2 bi-monthly and 8 quarterly. The places of publication number 417, of which 114, designated by a dagger (†), are county seats.

KANSAS CITY, pop. 173,064 (C 8½); JACKSON Co. (W.), pop. 195,193. On Missouri R., at m. of Kansas R., 283 m. W. by N. of St. Louis. Important railroad center, having 18 roads in all, including the Mo. Pac.; Un. Pac.; Wabash; several lines from Chicago, and others. Tel. Exp. Banks. Second largest city in Missouri, and one of the leading pork packing centers and winter wheat markets of the United States. Stock yards rank second in the country, and trade in live stock is very great. Provisions, lumber, agricultural implements, fruit and coal are also very largely handled. Coal, lead and iron ore are abundant in the neighboring district. Railroad iron, car wheels, furniture, flour, linseed oil, boots and shoes, gasoline engines, hay presses, shirts, overalls, etc., are largely manufactured. ST. LOUIS, pop. 612,279 (M 4). On Mississippi R., abt. 20 m. bel. mouth of Missouri. Has 20 lines of railroad, comprising nearly all the trunk lines running West and several starting from this point. Tel. Exp. Banks. One of the leading cities of the United States, with an immense distributing and manufacturing business. Its principal articles of manufacture include tobacco, flour, beer, plate glass, chairs, carriages, saddles, agricultural implements, stoves, bricks, iron goods, boots and shoes, white lead, linseed and cotton seed oil. The commerce in coal, grain, cotton and hog products is very extensive. Live stock is very largely handled and many other articles are extensively dealt in. St. Louis has numerous important institutions, including Washington and St. Louis Universities, Shaw Botanical Gardens, etc., while one of its most striking features is the bridge which crosses the Mississippi at this point.

MONTANA.

Population 277,102.

STATE CAPITAL, HELENA.

MONTANA is bounded north by British America, east by North and South Dakota, south by Wyoming and Idaho, and west by Idaho; length, east to west, about 540 miles; breadth, about 280 miles; land area, 146,080 square miles. Montana's total area is 94,000,000 acres, classified into mountainous, 26,000,000 acres; farming lands, 80,000,000 acres; grazing lands, 88,000,000 acres. The farming area of Montana is equal in size to the State of Iowa; the Indian and forest reserves equal in area the State of Georgia, and the mountainous and grazing lands are equal in extent to the State of Indiana. In ten years the farms in cultivation have trebled in number and quadrupled in area. The products of the ranges and farms in 1903 reached over \$36,000,000. While Montana has always been considered a mining State, the agricultural production is rapidly reaching the total of mineral products, and in five years, at the present advance, will have passed it in the total yield. Nearly all staple crops known to northern States are grown in Montana. Fruit growing in the western portion of the State has become a great industry, and the last report of the State board of horticulture shows more than one million fruit trees in bearing. From a range country Montana is changing to the stockman-farmer class. The Federal Government, under the reclamation bill of 1902, is preparing to reclaim thousands of acres in northern Montana, while private enterprise is reclaiming an immense area also. In Yellowstone, Gallatin, Beaverhead, and Cascade Counties large numbers of sheep and cattle are winter fed for the spring markets. Montana has more sheep than any State, the assessment rolls showing over 6,000,000 head, producing in 1903 nearly 35,000,000 lbs. of wool, making Montana the greatest wool producing State in the Union. One-third of the population is engaged in farming and stock raising. The mineral output for 1903 was nearly \$60,000,000, comprising about \$5,000,000 over \$18,000,000, and about \$7,000,000 of copper. The production of copper reaching nearly 250,000,000 lbs., or about one-half of the total production of the United States. The production of lead is between 11,000,000 and 12,000,000 lbs. In the western and northwestern portions of the State vast lumbering interests have been developed, fir, pine, tamarack, and cedar being the varieties. Leading manufacturing interests are mining, lumber sawing, quartz milling and smelting, flour, etc. Nearly every county has iron, and ten counties have deposits of bituminous coal. Oil was discovered in northern Montana in the fall of 1903.

The number of newspapers and periodicals published in Montana is 108, including 12 daily, 6 semi-weekly, 77 weekly, 4 semi-monthly and 9 monthly. The places of publication number 54, of which 26, designated by a dagger (†), are county seats.

NEBRASKA.

Population 1,098,139.

STATE CAPITAL, LINCOLN.

NEBRASKA is bounded north by Dakota, east by Iowa and Missouri, south by Kansas and Colorado, and west by Colorado and Wyoming Territory. Its extent from north to south is about 210 miles; greatest length about 420 miles; land area, 78,840 square miles. The surface is generally a vast gently undulating plain, with a gradual ascent toward the mountains; the river bottoms are level. There are some bluffs along the Missouri River, some hills in the north-west, which is also partly occupied by the Mauvais Terres or Bad Lands. The state is well watered, three important rivers, the Niobrara, the Platte, and the Republican crossing it from west to east, while the Missouri flows for 500 miles along the eastern border. The Missouri is the only navigable river. East of the Bad Lands and south of the Niobrara is a tract of sand hills of 8,000 square miles area, which afford some pasturage. Timber is scarce. There is little coal, and that poor; but peat abounds. Brick and potter's clay is plentiful, and there are extensive saline deposits; good building stone abundant. The eastern half of the State is a rich agricultural region, and the west is mainly adapted to grazing; the bottom lands are very rich. There is an abundant rainfall in the east, and that of the west seems increasing annually since the era of agriculture, so that the farm limit is extending westward. The leading products are wheat, corn, barley, oats, sorghum, flax, and hemp; vegetables, small fruits, and grapes are raised extensively. More than 150 species of wild grasses have been classified, which afford excellent pasturage to large numbers of cattle and sheep. Manufacturing interests are but little developed, being confined to a few cities, principally Omaha, Lincoln and Nebraska City. They include meat packing and canning, smelting and refining, and the making of flour, farming implements, wagons, cars, etc.

The number of newspapers and periodicals published in Nebraska is 626, including 27 daily, 3 tri-weekly, 12 semi-weekly, 551 weekly, 1 fortnightly, 2 semi-monthly and 30 monthly. The places of publication number 859, of which 90 designated by a dagger (†) are county seats.

NEVADA.

Population 40,829.

STATE CAPITAL, CARSON CITY.

NEVADA is bounded north by Oregon and Idaho, east by Utah and Arizona, and southwest and west by California. Extreme length from north to south, 485 miles in the eastern, and 210 in the western boundary; greatest breadth, 320 miles, decreasing to 310 miles in the north and to a point in the south; land area, 109,740 square miles. Surface generally is a table land about 4,000 feet above the sea, traversed by nearly parallel mountain ranges, between which are valleys varying in width from 5 to 20 miles, in some cases narrow canons, and in others broad deserts, covered with sage brush and other scanty herbage. The soil when irrigated is fertile, and produces spring wheat, barley, oats, potatoes, butter, hay, wool, etc. There is much good pasturage, and cattle fatten readily upon it. The State lies almost wholly in the "Great Basin," the most arid region of North America. Yet it is considered possible, by storing the waters of its mountain streams, to reclaim several millions of acres by irrigation. Cotton and sub-tropical fruits do well in the south. It has for years been the leading State in the production of the precious metals. The milling and smelting of ore is the leading manufacturing pursuit. The output of precious metals is over \$12,000,000. A valuable deposit of anthracite coal has been discovered on the Elko River near Humboldt, which is being developed. The cattle interests of the State are next in importance to its mineral resources. Lumber sawing, once important, is declining, owing to the rapid disappearance of the forests.

The number of newspapers and periodicals published in Nevada is 39, including 9 daily, 8 semi-weekly and 27 weekly. The places of publication number 26, of which 11, designated by a dagger (†), are county seats.

NEW HAMPSHIRE.

Population 422,109.

STATE CAPITAL, CONCORD.

NEW HAMPSHIRE is bounded on the north by Quebec, east by Maine and the Atlantic Ocean, south by Massachusetts, and west by Vermont. Its length is 180 miles from north to south; its extreme breadth 93 miles; average breadth 50 miles; land area, 9,005 square miles. Most of the State, except the southeastern part, has a rough and hilly surface. In the northern part are the White Mountains. The State is generally well wooded, and the yield of timber is very large. The Valley of the Connecticut is famed for the beauty of its farms and villages. In productions, the hay crop is by far the most valuable, and while this is steadily increasing the agricultural interests have for some years been gradually declining. While there are some very fertile tracts among the valley lands, the greater part of the surface is rugged and stony, and much more valuable as woodland or pasture than as tilled land. Oats, barley, rye, buckwheat, and corn are very generally cultivated. Dairy farming and wool growing are followed to some extent. Tobacco is grown in Cheshire County, in the southwestern part of the State. Fruit raising is generally profitable. In some localities southward the peach is successfully cultivated. Fine building granite is extensively quarried at Concord, Milford, Pelham, Plymouth, and other points, and a fine soapstone at Franconia. Iron ore is mined principally at Franconia, but abounds in several other localities. There is a thin vein of tin at Jackson. Lead, silver, and zinc are developed in Madison and Warren. Manufactures constitute by far the largest industry. There is scarcely a town of any considerable size without its important manufacture. It is especially noted for its textile interests. The other main industries are boots and shoes, leather, lumber, carriages, flouring mills, saddlery, clothing, starch, etc.

The number of newspapers and periodicals published in New Hampshire is 154, including 14 daily, 1 tri-weekly, 1 semi-weekly, 127 weekly, 1 semi-monthly, and 10 monthly. The places of publication number 61, of which 13, designated by a dagger (†), are county seats.

NEW JERSEY.

Population 2,137,766.

STATE CAPITAL, TRENTON.

NEW JERSEY is bounded north and northeast by New York, east by New York and the Atlantic Ocean, south by the Atlantic Ocean and Delaware Bay, and west by Delaware and Pennsylvania. Its extreme length is 167 miles; its greatest breadth 59 miles, and its least 32 miles; land area, 7,525 square miles. The surface is mountainous in the northwest, hilly in the northeast and central parts, low and gently undulating in the south. The mountains, a part of the Appalachian system, are the Kittatinny or Blue, and the Highland Range. Between them lies the Kittatinny Valley, about 10 miles wide; soil productive but varied—the northern part adapted to grain and grass; the central part has been well fertilized, and yields abundant farm and market garden products and fruit; the southern part is sandy and light. Its agricultural products generally, including market garden produce, are very extensive. The central part is the most thickly settled and is, in fact, a vast market garden for the supply of New York and Philadelphia. Large quantities of grapes and small fruits are grown in the south. Cranberries are one of the leading productions. It is estimated that more than half of the cranberries produced in the United States are grown in this State. The chief cranberry counties are Ocean, Atlantic, and Burlington. It is celebrated for its marl and clay deposits, peat, bog iron ore, and glass sand. It has become one of the leading States in the value of its manufactures, which embrace a wide range of goods. Prominent among the instances of greatest growth may be mentioned the pottery and rubber interests, while glass making is an important industry in the sandy region of the south. Its iron mines, zinc mines, slate quarries, and clay banks are very valuable, and the fisheries (deep sea, oyster, and fresh water), a source of great profit. Iron ore is found generally through the State. There are a large number of productive mines of magnetic iron ore in Sussex, Passaic, Morris, and Warren Counties. Clay for gas retorts and fire brick is found at Amboy, and valuable deposits of franklinite at Mine Hill and Stirling. In the northwestern portion of the State, excellent roofing-slates, building and flag stones and rich hematites are abundant. It has a large coasting trade, and considerable ship building is carried on. Newark, the metropolis, has a population of 265,394, and its manufacturing industries are claimed to be more important in proportion to population than those of any other city in the United States. Within the past ten years the sea coast has been built up in almost a continuous line of villages from Sandy Hook to Cape May Point, and the temporary residents in the summer season will reach as high as 100,000 persons.

The number of newspapers and periodicals published in New Jersey is 378, including 55 daily, 3 semi-weekly, 287 weekly, 1 semi-monthly, 29 monthly, 1 bi-monthly and 2 quarterly. The places of publication number 152, of which 21, designated by a dagger (†), are county seats.

POPULATION: State census of 1905. * Estimated. † County Seat. ‡ Size of page.

NEW MEXICO.

Population 205,519.

TERRITORIAL CAPITAL, SANTA FE.

NEW MEXICO is bounded north by Colorado, east by Oklahoma and Texas, south by Texas and Mexico, and west by Arizona; greatest length, north to south, 390 miles, average width, 335 miles. Land area, 122,400 square miles. Its general surface is a region of high plateaus, traversed by mountain ranges with isolated peaks. The valleys are generally nearly level, and their soil fertile. In the southwest is a part of the barren "Llano Estacado" or "Staked Plain." The mesas, or table lands, occupy a large part of the surface, making stock raising and wool growing the leading occupations; the bunch grass affording rich pasturage, and neither hand feeding nor shelter is necessary for the herds and flocks. In 1903 the Territory possessed over 1,000,000 cattle, 5,976,439 sheep, 197,800 goats, and 88,000 horses. Agriculture is successful in the valleys, glens, and on the foot spurs of the mountain ranges. Irrigation is necessary for agriculture except upon a few isolated table lands or mountain valleys. There are extensive systems of water storage and irrigation on the Pecos River and on the Rio Grande, there are works now projecting sufficient to reclaim three or four million acres. There are many river valleys of high fertility, whose soil is susceptible of irrigation, and in the future the Territory must attain agricultural importance. Its agricultural production during the past ten years having increased from \$2,000,000 to \$13,000,000 and its farm values from \$11,000,000 to \$60,000,000. Wheat, corn, beans, onions, cabbage, alfalfa, oats, wild hay, and all kinds of vegetables are the chief crops. Of fruits, the apple, peach, melon, fig, apricot, pomegranate, and especially grapes, flourish. Gold, silver, copper, iron, and lead exist, and all are being extensively worked, while the gold output is increasing. The total mineral product for 1903 was valued at \$3,675,000. Iron ore has recently been discovered in extensive deposits. Bituminous coal is very abundant and large deposits of fine anthracite exist. The mining product in 1903 was about 1,350,000 tons. Large mica mines are worked; plumbago, cement, fire clay, gypsum, and mineral paint are found; marbles and other excellent building stones abound. Manufactures are confined principally to grain, quartz, and lumber milling, woolen mills, manufacturing wines and brandies, the making of blankets by the Navajo Indians, and coarse pottery by the Pueblos.

The number of newspapers and periodicals published in New Mexico is 73, including 5 daily, 1 semi-weekly, 63 weekly and 4 monthly. The places of publication number 39, of which 21, designated by a dagger, are county seats.

CIRCULATION: Bold face—sworn. * Detailed statement. † Publishers' reports. Roman figures—estimated.
 POPULATION: Census of 1900. * Estimated. † County Seat. ‡ Size of page.

NEW YORK.

Population 8,066,672.

STATE CAPITAL, ALBANY.

NEW YORK is bounded on the north and northwest by Lake Ontario and the provinces of Ontario and Quebec, east by Vermont, Massachusetts, Connecticut, and the Atlantic Ocean, south by the Atlantic Ocean, New Jersey, and Pennsylvania, and west and northwest by Pennsylvania and Lake Erie. Its greatest length from north to south is 312 miles; its greatest breadth 412 miles; land area, 47,620 square miles. The surface is exceedingly diversified. It has numerous ranges of mountains, chains of hills, many beautiful valleys, much undulating land, some broad plains, and numerous beautiful lakes. The greater portion of the soil is arable, much of it exceedingly fertile. The mountainous districts are mainly good grazing land, and the dairy products are enormous, notably in St. Lawrence, Herkimer, and Oneida Counties. Immense crops of cereals are grown in the valley lands; hops in Otsego, Madison, Chautauqua, and Oneida Counties; fruit and grapes in the Hudson and Pleasant Valleys; tobacco is raised in several counties, and corn generally throughout the State. In the neighborhood of the large cities, market gardening is extensively carried on. The State is well wooded, and the timber varied and excellent. Its leading mineral is iron ore, of which the mines, especially those of the Champlain and Adirondack regions, yield heavily, and produce some of the most necessary ores for the iron manufacturing interest of the Middle States. Galena is found in large quantities in St. Lawrence and other counties. It abounds in building stone, consisting of granite, white and colored marbles, of which those of Westchester and St. Lawrence Counties are the most important; Potsdam and Medina sandstones and gray and blue limestones; also in fine brick clay. It has large quarries of slate and stone for flagging. There are extensive deposits of hydraulic cement and gypsum, the former being largely produced at Rondout, Manlius, and Akron, the latter near Syracuse. A vast amount of salt is made, chiefly from the springs of Onondaga County, the product being more than 10,000,000 bushels annually. In recent years new and promising salt fields have been developed in Wyoming and Genesee Counties. There are illuminating gas springs in several counties, and oil is found near Olean, Wellsville, etc. New York has no coal. The State ranks first in the value of its manufactures. The industries cover almost the whole range of business, and are well distributed over the State. The fishing industry is relatively large and valuable, the menhaden and oyster fisheries being the most productive.

The number of newspapers and periodicals published in New York is 2,005, including 206 daily, 7 tri-weekly, 48 semi-weekly, 1,079 weekly, 8 fortnightly, 32 semi-monthly, 571 monthly, 17 bi-monthly, 1 five times a year and 36 quarterly. The places of publication number 510, of which 63, designated by a dagger (†), are county seats.

NEW YORK †, pop. 4,014,304 (N 9); (Manhattan borough, 2,112,697; Bronx borough, 271,629; Brooklyn, 1,358,891; Queen's borough, 198,241; Richmond borough, 72,846.) On Manhattan Island at m. of Hudson R., and on L. I. Sound (or East R.), and New York Bay. Term. of 14 important R.Rs. running to all parts of the country, including the Erie; N. Y., C. & H. R.; Penna.; W. Shore; N. J. Cent.; and others. Exp. Banks. Has one of the finest harbors in the world, and is the commercial metropolis of the United States. The foreign commerce of New York is very large, comprising more than half the entire import and export trade of the nation. Its domestic commerce is still greater, a considerable portion of the country drawing its supplies from this city. Its manufactures are little less important, and have grown rapidly of recent years. These are too various to be epitomized. Some few of the larger being furniture, clothing, machinery, sugar refining, tobacco and segars, printing and publishing, lard refining, malt liquors, musical instruments, etc. Its educational and other institutions include Columbia College, University of the City of New York, Cooper Institute, Colleges of Medicine, Law, Theology, etc.; Astor, Lenox, Mercantile, and other libraries; Metropolitan Museum of Art, Museum of Natural History, and many others.
