Cabin Creek Trailhead Alternative Access for this fall

West Yellowstone, MT... The Cabin Creek Campground and Trailhead near the Hebgen Lake Dam is closed to public access until work on Hebgen Dam is finished and a contract to thin trees in and around the campground is complete. The closure is needed to address public safety concerns from both Hebgen Dam and the thinning operation.

The Forest is providing an alternative access to the Cabin Creek Trailhead from the Scarp Interpretive Site while the Campground and normal trailhead are closed. Trail users will need to park at the Interpretive Site and ford Cabin Creek above the campground to access the trail.

The logging operation should be completed this fall, and the campground is scheduled to open as usual next May. For more information, please contact the Hebgen Lake Ranger District at (406) 823-6961.
