

Potato Cropping Systems Field Day at Paterson 2008

July 10, 2008

8:30 am Welcome and Introductions

Tour Research Presentations:

BioFuels

9:00-9:15 Yield and Nutrient Requirements of Switchgrass. *Steve Fransen*

9:15-9:30 Carbon Sequestration under Switchgrass. *Hal Collins*

9:30-9:45 Camelina, Flax and Safflower Production. *An Hang*

Cropping Systems

9:45-10:00 White Mold Management of Pinto Bean. *Phil Miklas and Lyndon Porter*

10:15-10:30 Glyphosate drift injury to potato. *R. Boydston, J. Felix, P. Hutchinson*

10:30-10:45 Reduced Tillage in a Three Year Potato Rotation. *Hal Collins*

10:45-11:15 BAS800 herbicide trial on sweet corn. *R. Boydston*

11:15-11:30 Sweet corn competitive ability with reduced atrazine rates. *R. Boydston and M. Williams*

11:30-11:45 V10206 herbicide trial on potato. *R. Boydston*

11:45-12:00 Controlled release fertilizers and soil amendments for potatoes *Ashok Alva*

12:00- 12:15 Evaluation of biofuel co-products for potatoes *Ashok Alva*

12:30 Lunch provided

Posters

Occurrence of Metalaxyl-Resistant Pythium in Potato. *Lyndon Porter and Phil Hamm*

Virus resistance in Common Bean. *Richard Larson and Phil Miklas*

Potato Cyst Nematode Update. *Ekaterini Riga*

Fumigation of Potatoes Destined for International Markets. *Ekaterini Riga*

Application of Anaerobic Digested Manure to Potatoes. *Jason Streubel and Hal Collins*

Breeding Potato Resistance to Columbia Root-knot Nematode *Linhai Zhang*

Nematode Pests Impacting potato tuber quality. *Hassan Mojtahedi,*

Powdery Scab and Black Dot on Potato *Nadav Nitzan*

USDA-ARS and WSU-IAREC, Prosser Scientists and Staff would like to invite you to visit the Paterson Research Field Site and join us for tours of the fields. This is a great time to learn about the current research on all aspects of Potato Cropping Systems and Crop Improvement.

Bring your family and friends with you to enjoy this day. We look forward to seeing you!
