Mine Safety and Health Admin., Labor

blasting galvanometer or other instrument specifically designed for testing blasting circuits.

[53 FR 46786, Nov. 18, 1988; 54 FR 27641, June 30, 1989]

§ 75.1324 Methane concentration and tests.

- (a) No shot shall be fired in an area that contains 1.0 volume percent or more of methane.
- (b) Immediately before shots are fired, the methane concentration in a working place or any other area where blasting is to be performed, shall be determined by a person qualified to test for methane.

§75.1325 Firing procedures.

- (a) Shots shall be fired by a qualified person or a person working in the presence of and under the direction of a qualified person.
- (b) Only one face in a working place shall be blasted at a time, except that when blasting cut coal up to three faces may be blasted in a round if each face has a separate kerf and no more than a total of 20 shots connected in a single series are fired in the round. A permit to fire more than 20 boreholes in a round under the provisions of 30 CFR 75.1320 and 75.1321 may not be obtained for use when blasting multiple faces.
 - (c) Before blasting—
- (1) All persons shall leave the blasting area and each immediately adjacent working place where a hazard would be created by the blast, to an area that is around at least one corner from the blasting area;
- (2) The qualified person shall ascertain that all persons are a safe distance from the blasting area; and
- (3) A warning shall be given and adequate time allowed for persons to respond.
- (d) All shots shall be fired promptly, after all persons have been removed to a safe location.

[35 FR 17890, Nov. 20, 1970, as amended at 56 FR 51616, Oct. 11, 1991]

§75.1326 Examination after blasting.

(a) After blasting, the blasting area shall not be entered until it is clear of smoke and dust.

- (b) Immediately after the blasting area has cleared, a qualified person or a person working in the presence of and under the direction of a qualified person, shall examine the area for misfires, methane and other hazardous conditions.
- (c) If a round has partially detonated, the qualified person shall immediately leave the area and no person shall reenter the affected area for at least 5 minutes.

§ 75.1327 Misfires.

- (a) When misfires occur, only work by a qualified person to dispose of misfires and other work necessary to protect persons shall be done in the affected area.
- (b) When a misfire cannot be disposed of—
- (1) A qualified person shall post each accessible entrance to the area affected by the hazard of the misfire with a warning at a conspicuous location to prohibit entry; and
- (2) The misfire shall be immediately reported to mine management.

[53 FR 46786, Nov. 18, 1988; 54 FR 27641, June 30, 1989]

§75.1328 Damaged or deteriorated explosives and detonators.

- (a) Damaged explosives or detonators shall be— $\,$
- (1) Placed in separate containers constructed of nonconductive and nonsparking materials; and
- (2) Removed from the mine or placed in a magazine and removed when the magazine is resupplied.
- (b) Damaged detonators shall be shunted, if practicable, either before being removed from the mine or placed in a magazine.
- (c) Deteriorated explosives and detonators shall be handled and disposed of in accordance with the instructions of the manufacturer.

Subpart O—Hoisting and Mantrips

§75.1400 Hoisting equipment; general.

- (a) Every hoist used to transport persons shall be equipped with overspeed, overwind, and automatic stop controls.
- (b) Every hoist handling a platform, cage, or other device used to transport persons shall be equipped with brakes
