

October 15, 1950.

Dr. L. C. Dunn,
Dept. Zoology,
Columbia University,
New York 27, N.Y.

Dear Dr. Dunn:

Enclosed you will find two copies of my MS for Genetics: Fifty Years. As the dateline indicates, I have satisfied at least my own conscience in getting it to you by the deadline. However, I hope that my unavoidable tardiness will not delay the publication.

Duplicate copies of photographs for the figures are enclosed, except for figures 4 and 5, of which only the original sketch is included.

Two references are cited with pagination "000-000". These are papers which are due to appear momentarily, and for which I will correct the reference in proof.

Sincerely,

Joshua Lederberg,
Associate Professor of Genetics
