Dear Tracy:

^{and I}
Esther/are down here for a couple of weeks to tap the cornucopia of material they have down here on Salmonella and E. coli serology. We are looking forward to the possibility of visiting you en route home. Would this be convenient for you?

Unfortunately, our plans are not simple, and we arrived here already via Urbana, Carbondale and New Orleans. On the way back, I have an engagement at OSU (Columbus) for the 17th. Our present plan is to leave here about the 14th, and drive to Columbus first (via Oak Ridge), which would let us get to Bloomington either Tuesday evening or Wednesday afternoon (the 13th). If necessary, we might leave here a day or two sooner, and visit Bloomington before Columbus (ca. 15th), but this is doubtful.

Please let us know if we can see you when indicated. I have any number of things I hope to talk over with you.

Sincerely,

Joshua Lederberg
