

Steinhaus

January 2, 1951

Mr. K. M. Hughes
Laboratory of Insect Pathology
University of California
Berkeley 4, Calif.

Dear Mr. Hughes:

Thank you very much for your letter and literature list of the 26th Dec. There were a number of references that I would certainly have overlooked. If any new papers (except for Fraenkel's) should come to Dr. Steinhaus' attention on the particular subject of removal and substitution of microsymbiotes, I would appreciate very much having them called to my attention at any time during the next six months, when my ms. is finally due.

Yours sincerely,

Joshua Lederberg
Associate Professor of Genetics
