MACDONALD COLLEGE
OF
MCGILL UNIVERSITY

November 10th, 1949

Dr. Joshua Lederberg,
Department of Genetics,
University of Wisconsin,
Madison 6, Wis.,
U. S. A.

Dear Joshua:-

I just chanced upon an article which I thought you might be interested in reading. Since it is in a Commercial Home Organ I thought it possible you might have missed it, so may I suggest the reference to you as follows :-

Bacteriology and Chemical Kinetics.
Endeavour 8 : 151-156. No. 32, October 1949.
Imperial Chemical Industries,
Nobel House,
Buckingham Gate,
London, S.W.1,
England.

Sometime I'd be interested in hearing your comments on this article.

Carolyn and I are enjoying Canada very much. The late fall here has been very beautiful and we have driven around a lot seeing the country. Macdonald Campus is among the most beautiful I have ever seen. It has been a pleasure to get away from the crowded conditions of Wisconsin campus and see well kept, large expanses of lawn again.

Please say "hello" to Esther for both of us.

Best regards,

Bob.

Robert I. Brawn,
Asst. Professor of Agronomy.
