Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

I was very much interested in your article "Cell Genetics and Hereditary Symbiosis" which appeared in *Physiological Reviews* (32:403, 1952). I wonder if you can spare a reprint.

If there are any spare reprints of the following articles you have published, I would appreciate receiving copies: "Genetic Exchange in Salmonella" (*J. Bact.* 64: 679, 1952); your article in *Cold Spring Harbor Symposium*, 1951; "Replica plating and indirect selection of bacterial mutants" (*J. Bact.* 63: 399, 1952). I would also appreciate being placed on your mailing list for any future publications.

Yours sincerely,
Arnold W. Kavin
