

ROLES AND RESPONSIBILITIES OF THE DOE STI POINTS-OF-CONTACTS

Departmental STI Requirements are listed in the Contractors Requirement Document in the DOE O 241.1A, Scientific and Technical Information Management. The Best Practices as agreed to by the STIP Community are described in the Guide which provides the best printed source with specifics related to the roles and responsibilities of the STI POC.

The STIP Manager has a Role/Responsibility for:

- DOE Order DOE 241.1A and DOE G 241.1-1A
- Managing their STI Program
- STIP Participation
- Performance Measures and Technical Reviews
- Setting STI Program Goals Related to STI Management
- STI Products
- Special STI-focused Teams or Working Groups
- Sensitivity Reviews
- Strategic and Institutional Planning
- Contract Language

The STIP Collaboration

- Working Together to Establish Best Practices for the STI Program
 - This collaboration is effective only if you actively participate.

STICG

The Scientific and Technical Information Coordinating Group (STICG) is comprised of program office representatives, a laboratory representative, and a DOE Ops Office representative and assists in the stewardship of scientific and technical information (STI), a key deliverable of the Department's research and related endeavors, by:
