Department of Veterans Affairs

dialysis is required, any coexisting hypertension or heart disease will be separately rated.

[41 FR 34258, Aug. 13, 1976, as amended at 59 FR 2527, Jan. 18, 1994]

§4.115a Ratings of the genitourinary system—dysfunctions.

Diseases of the genitourinary system generally result in disabilities related to renal or voiding dysfunctions, infections, or a combination of these. The following section provides descriptions of various levels of disability in each of these symptom areas. Where diagnostic codes refer the decisionmaker to these specific areas dysfunction, only the predominant area of dysfunction shall be considered for rating purposes. Since the areas of dysfunction described below do not cover all symptoms resulting from genitourinary diseases, specific diagnoses may include a description of symptoms assigned to that diagnosis.

Renal dysfunction: Requiring regular dialysis, or precluding more than sedentary activity from one of the following: persistent edema and albuminuria; or, BUN more than 80mg%; or, creatinine more than 8mg%; or, markedly decreased function of kidney or other organ systems, estpecially cardiovascular Persistent edema and albuminuria with BUN 40 to 80mg%; or, creatinine 4 to 8mg%; or, generalized poor health characterized by lethargy, weakness, anorexia, weight loss, or limitation of exertion Constant albuminuria with some edema; or, definite decrease in kidney function; or, hypertension at least 40 percent disabling under diagnostic code 7101 Albumin constant or recurring with hyaline and granular casts or red blood cells; or, transient or slight edema or hypertension at least 10 percent disabling under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Moiding dysfunction: Rate particular condition as urine leakage, frequency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials							
Requiring regular dialysis, or precluding more than sedentary activity from one of the following: persistent edema and albuminuria; or, BUN more than 80mg%; or, creatinine more than 8mg%; or, derawardly decreased function of kidney or other organ systems, estpecially cardiovascular		Rat- ing					
than sedentary activity from one of the following: persistent edema and albuminuria; or, BUN more than 80mg%; or, creatinine more than 8mg%; or, markedly decreased function of kidney or other organ systems, estpecially cardiovascular. Persistent edema and albuminuria with BUN 40 to 80mg%; or, creatinine 4 to 8mg%; or, generalized poor health characterized by lethargy, weakness, anorexia, weight loss, or limitation of exertion Constant albuminuria with some edema; or, definite decrease in kidney function; or, hypertension at least 40 percent disabling under diagnostic code 7101 Albumin constant or recurring with hyaline and granular casts or red blood cells; or, transient or slight edema or hypertension at least 10 percent disabling under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Mounin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Mounin and casts with history of scute nephritis; or, hypertension non-compensable under diagnostic code 7101 Mounin and casts with history of acute nephritis; or, hypertension, under condition as urine leakage, frequency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials	Renal dysfunction:						
Persistent edema and albuminuria with BUN 40 to 80mg%; or, creatinine 4 to 8mg%; or, generalized poor health characterized by lethargy, weakness, anorexia, weight loss, or limitation of exertion Constant albuminuria with some edema; or, definite decrease in kidney function; or, hypertension at least 40 percent disabling under diagnostic code 7101 Albumin constant or recurring with hyaline and granular casts or red blood cells; or, transient or slight edema or hypertension at least 10 percent disabling under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Mount and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Mount and casts with history of scute nephritis; or, bypertension non-compensable under diagnostic code 7101 Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials	than sedentary activity from one of the fol- lowing: persistent edema and albuminuria; or, BUN more than 80mg%; or, creatinine more than 8mg%; or, markedly decreased function						
of exertion Constant albuminuria with some edema; or, definite decrease in kidney function; or, hypertension at least 40 percent disabling under diagnostic code 7101 Albumin constant or recurring with hyaline and granular casts or red blood cells; or, transient or slight edema or hypertension at least 10 percent disabling under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Movinin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Movining dysfunction: Rate particular condition as urine leakage, frequency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials	ersistent edema and albuminuria with BUN 40 to 80mg%; or, creatinine 4 to 8mg%; or, generalized poor health characterized by lethargy,	100					
nite decrease in kidney function; or, hypertension at least 40 percent disabling under diagnostic code 7101 Albumin constant or recurring with hyaline and granular casts or red blood cells; or, transient or slight edema or hypertension at least 10 percent disabling under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Albumin and casts with a story of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 Codinal Code 7101 Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials	of exertion	80					
Albumin constant or recurring with hyaline and granular casts or red blood cells; or, transient or slight edema or hypertension at least 10 percent disabling under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 //oiding dysfunction: Rate particular condition as urine leakage, frequency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day. Requiring the wearing of absorbent materials	nite decrease in kidney function; or, hyper- tension at least 40 percent disabling under di-						
percent disabling under diagnostic code 7101 Albumin and casts with history of acute nephritis; or, hypertension non-compensable under diagnostic code 7101 /oiding dysfunction: Rate particular condition as urine leakage, frequency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials	Ibumin constant or recurring with hyaline and granular casts or red blood cells; or, transient	60					
Voiding dysfunction: Rate particular condition as urine leakage, frequency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials	percent disabling under diagnostic code 7101 lbumin and casts with history of acute nephritis; or, hypertension non-compensable under diag-	30					
Rate particular condition as urine leakage, frequency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress Incontinence: Requiring the use of an appliance or the wearing of absorbent materials which must be changed more than 4 times per day Requiring the wearing of absorbent materials which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials		0					
of absorbent materials which must be changed more than 4 times per day	atte particular condition as urine leakage, fre- quency, or obstructed voiding ontinual Urine Leakage, Post Surgical Urinary Diversion, Urinary Incontinence, or Stress In-

	equiring the wearing of absorbent materials which must be changed less than 2 times per						
day	day	20					

	Rat- ing
Urinary frequency:	
Daytime voiding interval less than one hour, or, awakening to void five or more times per night	40
Daytime voiding interval between one and two hours, or; awakening to void three to four times per night	20
Daytime voiding interval between two and three hours, or; awakening to void two times per	20
night Obstructed voiding:	10
Urinary retention requiring intermittent or continuous catheterization	30
Marked obstructive symptomatology (hesitancy, slow or weak stream, decreased force of	
stream) with any one or combination of the fol- lowing:	
 Post void residuals greater than 150 cc. Uroflowmetry; markedly diminished peak 	
flow rate (less than 10 cc/sec). 3. Recurrent urinary tract infections sec-	
ondary to obstruction. 4. Stricture disease requiring periodic dilata-	
tion every 2 to 3 months	10
ture disease requiring dilatation 1 to 2 times	0
Urninary tract infection:	Ĭ
Poor renal function: Rate as renal dysfunction. Recurrent symptomatic infection requiring drainage/frequent hospitalization (greater than two	
times/year), and/or requiring continuous intensive management	30
Long-term drug therapy, 1–2 hospitalizations per year and/or requiring intermittent intensive
