Disallowed SAS Functions, Statements and Procedures

The list below is used by the RDC remote access system to scan user-submitted programs for functions, statements, and procedures that may result in an unauthorized disclosure. Any user-submitted program that contains one or more of these keywords will be automatically rejected, and the user will be asked to correct the problem and resubmit the program. Because the remote access system is automated, the RDC cannot make any exceptions. This list may change due to changes in SAS or development of additional methodologies.
