Subject: **Yellowtail Water Release Order - BHR No. 06-14**

CURRENT RESERVOIR CONDITIONS:

Elevation: 3603.45; Storage: 763,955 acre-feet; River Release: 2,500 cfs; Inflow: 1,935 cfs;

GENERAL COMMENTS:

The BIA has requested irrigation deliveries to begin on May 16 and be gradually increased over the next few days. As a result, the following operation changes are required at Yellowtail Dam and Powerplant.

NOTE: This is the time period when fish are more susceptible to high levels of nitrogen gas super-saturation. To provide a more desirable mixing flow of approximately 75% through the spillway gates and 25% through the sluice gates to maintain the total gas super-saturation levels at safe limits, the minimum Afterbay elevation should be maintained at or above elevation 3183 whenever possible. This is only a soft limit and may be deviated from during special or emergency operations.
