Attention: WY-4000, WY-4100, WY-6400  
Assistant Superintendent, National Park Service, Lovell, Wyoming  
Attention: Jim Staebler

From: Reservoir and River Operations, Billings, Montana

Subject: **Yellowtail Water Release Order - BHR No. 08-01**

### **CURRENT RESERVOIR CONDITIONS:**

Elevation: 3633.27; Storage: 992,432 acre-feet; River Release: 1,735 cfs; Inflow: 1,790 cfs;

### **GENERAL COMMENTS:**

In accordance with the operation's plan prepared on October 10, 2007, the following operation change is scheduled at Yellowtail Dam, Powerplant, and Afterbay Dam.

**NOTE:** This is the time period when fish are less affected by high levels of nitrogen gas super-saturation. Since mixing flows through the spillway gates and through the sluice gates is not required at this time, it is still desirable to provide a mixing flow of approximately 75% through the spillway gates and 25% through the sluice gates whenever the level of the Afterbay allows for the flows to be released through the spillway gates.

### **TURBINE RELEASES:**

**At 1800 hour on Monday, November 5, 2007:**

*Maintain average daily turbine release at 1,830 cfs ( $\approx$  1,125 MW-Hrs/day using 39.0 cfs/mw).*

### **AFTERBAY RELEASE AND OPERATION:**

**At 1800 hour on Monday, November 5, 2007:**

*Maintain diversions to Bighorn Canal at 0 cfs.*

*Maintain river release at 1,900 cfs (increase gage height to 60.55 & apply new shift of -1.06).*

*Maintain total release from the Afterbay at 1,900 cfs.*

/S/ Tim H. Felchle
