Public Use Data Tape Documentation

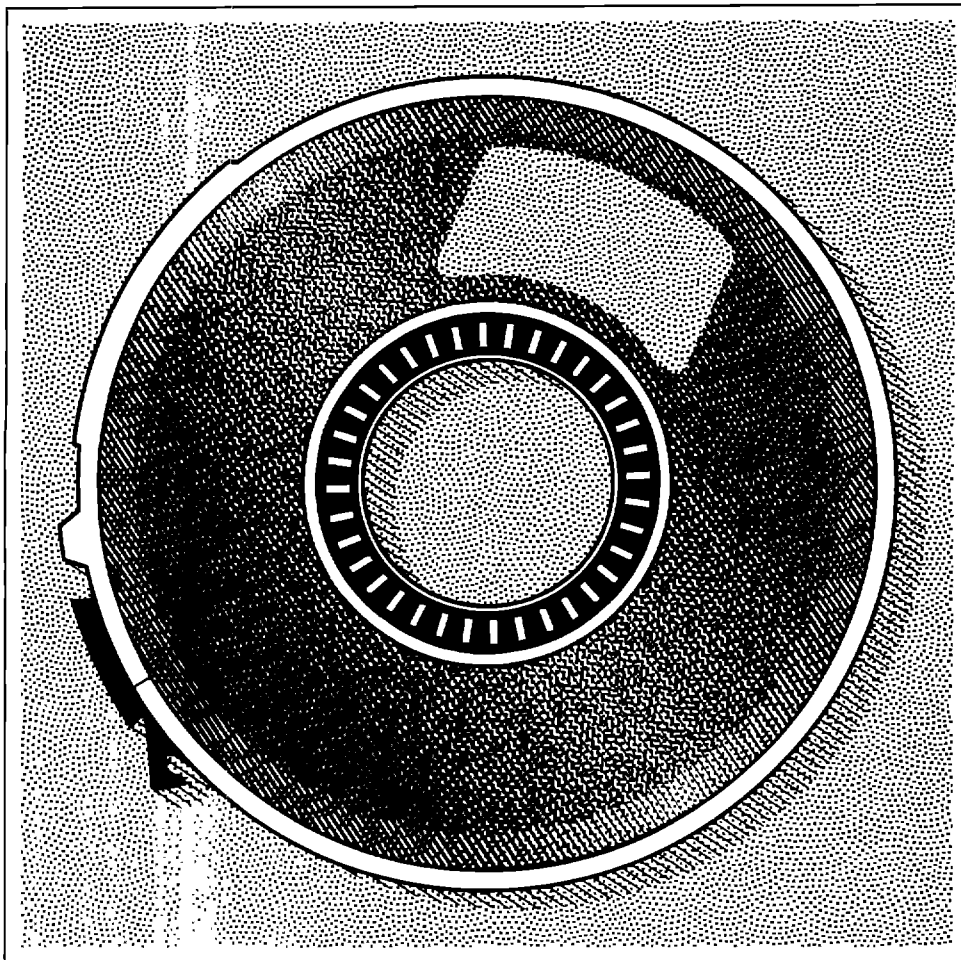

Extended Data Tapes
Tape Number 3EDT
National Health Examination Survey
Cycle III
Ages 12-17 Years
1966-70

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
Public Health Service
National Center for Health Statistics

Hyattsville, Maryland
October 1986

Sections and Item Content of the Cycle III Extended Data Tape (EDT)

A. CONTROL INFORMATION - Positions 1-46

1. Sample Sequence Number
 - a. Strata - Pseudo Primary Sampling Unit
2. HES Cycle II Sample Sequence Number
3. Date of Examination
4. Date of Birth
5. Final Adjusted Sample Weight

B. PERSONAL AND DEMOGRAPHIC CHARACTERISTICS OF EXAMINED YOUTH - Positions 47-123

Personal

1. Sex
2. Race
3. Sex-race recode
4. Age in years at time of examination
5. Age-sex recode
6. Age in 6-month intervals
7. Age in 4-month intervals
8. Age in 1-month intervals
9. Highest grade youth attended in school
10. Did youth finish this grade
11. Youth going to school
12. Not going to school - job status
13. Present grade status
14. Twin status

Demographic

1. Region
2. Population size
3. Rate of population change
4. Size of place
5. SMSA-not SMSA
6. Land Usage

Family

1. Total family income (annual)
2. Parent or guardian relationship to youth (1st listed parent)
3. Parent or guardian relationship to youth (2nd listed parent)
4. Parental relationship to youth of 1st & 2nd listed parents
5. Highest grade finished (1st listed parent)
6. Highest grade finished (2nd listed parent)
7. Sex and race (1st listed parent)
8. Sex and race (2nd listed parent)
9. Age (1st listed parent)
10. Age (2nd listed parent)
11. Place of birth (1st listed parent)
12. Place of birth (2nd listed parent)
13. Handedness (1st listed parent)
14. Handedness (2nd listed parent)
15. Usual activity (1st listed parent)

Family Cont.

16. Usual activity (2nd listed parent)
17. Marital status (1st listed parent)
18. Marital status (2nd listed parent)
19. Other children (not living in household)
20. Number of persons in household (20 years of age or less)
21. Age order of youth (in household 20 years or less)
22. Total number of persons in household
23. Foreign language spoken in home

Household Health Episodes Since Oldest Examined Youth Born

1. Household health episode reported
2. Anyone in hospital, etc., and who
3. Year of occurrence (1st episode)
4. Anyone unable to work, etc., and who
5. Year of occurrence (2nd episode)
6. Any relative died and who
7. Year of occurrence (3rd episode)

C. BIRTH CERTIFICATE - Positions 124-168

1. Birth certificate information available
2. State of birth
3. Place of birth
4. Residence of mother
5. Age of father
6. Age of mother
7. Birthplace of father
8. Birthplace of mother
9. Race of father
10. Race of mother
11. All other children now living
12. All other children born alive, now dead
13. All other children born dead
14. Attendant at birth
15. Length of pregnancy (in weeks)
16. Weight at birth (in pounds and ounces)
17. Number at birth
18. Birth order - multiple births
19. Legitimacy
20. Congenital malformation
21. Complications of pregnancy or labor
22. Birth injury
23. Prophylactic drug used in eyes
24. Induction attempted

D. MEDICAL HISTORY OF YOUTH FROM PARENT - Positions 169-329

1. Medical History availability
2. Born in a hospital
3. Problems during pregnancy or delivery
4. Anything wrong with baby at birth
5. Difficulty with child before age 1 year
6. Doctor consulted about difficulty
7. Serious health problem since 1 year of age

D. MEDICAL HISTORY OF YOUTH FROM PARENT Cont.

8. Health problem(s) of youth that worries parents now
9. Youth's present health evaluation
10. Medicine used regularly
11. Name of medicine given
12. What medicine given used for
13. Is medicine taken under doctor's orders
14. Any bones ever broken
15. Ever any serious accidents or injuries
16. How many serious accidents or injuries
17. Was youth hospitalized for accident or injury
18. Ever been unconscious
19. How long was unconscious
20. Operations
21. Hospitalized overnight or longer
22. Longest time ever spent in hospital
23. How old when in hospital longest time
24. Did adult member of family spend the night at hospital with youth

History of Diseases

25. Measles
26. Mumps
27. Chickenpox
28. Whooping cough
29. Scarlet fever
30. Asthma
31. Hay fever
32. Other allergies
33. Kidney trouble
34. Heart murmur or anything else wrong with heart
35. Fit, convulsion, or seizure
36. Pneumonia
37. Diabetes or Sugar Diabetes
38. Rheumatic Fever
39. Polio
40. Epilepsy
41. Chorea or St. Vitus' Dance
42. Diphtheria
43. Tuberculosis
44. Cerebral Palsy
45. Meningitis or Sleeping Sickness
46. Most serious illness or disease (I.C.D. Code)
47. Age when illness started
48. Seriousness of above illness or disease
49. Any lasting effects from above illness or disease
50. Bed wetting during past year
51. Does youth wear glasses or contact lenses
52. If no: does youth need glasses
53. Youth ever had eye trouble
54. Any eye operations
55. Any injury to ears
56. Ear drums opened or lanced
57. How many times ear drums opened or lanced
58. Which ear drum opened or lanced

History of Diseases Cont.

59. Any other ear operations
60. If yes: which ear
61. Ever have a running ear or discharge from ear
62. If yes: how often
63. If yes: which ear
64. Earache in past year
65. Any difficulty hearing
66. Any other ear trouble
67. Any speech defects now
68. Limp or other trouble walking
69. Anything prevents complete use of legs
70. Anything prevents complete use of arms
71. Exercise or playing now restricted
72. If yes: did doctor advise this
73. Exercise or playing ever restricted
74. Ever had teeth straightened or bands on teeth
75. If no: does parent think they need straightening
76. Does dentist think they need straightening
77. Over-under weight at present
78. Rate of physical growth
79. Rate of mental development
80. How often stayed overnight with friends
81. Did youth attend nursery school
82. Did youth attend kindergarten
83. Was kindergarten attendance compulsory or voluntary
84. Age started first grade
85. First reaction to school at first grade
86. Ease in making friends (at present)
87. How many friends parent knows well
88. How much trouble to bring up
89. How nervous (tense, high-strung) is youth
90. Has youth ever been to a mental hospital or guidance clinic
91. Has youth ever seen a psychiatrist, psychologist, etc.
92. Amount eaten by youth
93. How fussy an eater is youth
94. How many meals youth eats with adult family members

Who makes most of the decisions on

95. Choosing clothes
96. How to spend his money
97. Which friends to go out with
98. How late to stay out
99. Does youth get an allowance
100. If yes: who decides
101. If no: does youth earn money from work
102. Parent's desires on youth's schooling
103. What parent thinks will happen regarding schooling

Importance of certain qualities and characteristics

104. To be neat and clean
105. To be able to defend oneself
106. To have self control
107. To be happy
108. To obey one's parents

Importance of certain qualities and characteristics Cont.

109. To be dependable
110. To be considerate of others
111. To face life's problems calmly
112. To obey the law
113. To be ambitious
114. To know how to keep in good health

If youth had any of the following conditions what would you want to do

115. Stomach ache
116. Sore throat
117. Hurt all over
118. Stiff neck or back
119. Headache
120. Vomit
121. Loss of appetite
122. Overtiredness
123. Pain in chest
124. Lump in stomach or abdomen
125. Blood in urine or bowel movement
126. Nervousness
127. How often does youth exaggerate when ill
128. How often parent thinks it's all right for youth to exaggerate
129. Last time youth saw a doctor for a check-up
130. Last time youth seen by a doctor for treatment
131. Last time youth saw a dentist for a check-up
132. Last time youth saw a dentist for treatment

Girls only

133. Monthly periods started yet
134. If yes: was girl told about periods before they started
135. Age when periods started
136. Pain or discomfort from periods
137. How often when painful
138. How severe is pain or discomfort when present
139. Remedy used to ease pain
140. Has girl talked to a doctor about pain or discomfort
141. Youth's medical history form completed by

E. SCHOOL QUESTIONNAIRE - Positions 330-369

1. Record availability
2. Present grade placement of youth as given by school
3. Grade qualification
4. Any grades skipped or double promotions given
5. Any grades repeated
6. Main reason grade repeated
7. Absent from school an unusual number of days
8. Main reason for such absences
9. Frequency disciplinary action required
10. Special resources needed or currently being used
11. For the gifted
12. For the mentally retarded
13. For "slow learners" not classified as mentally retarded
14. For emotionally disturbed

E. SCHOOL QUESTIONNAIRE Cont.

15. For orthopedically handicapped
16. Special facilities for the "hard of hearing"
17. Special facilities for the visually handicapped
18. Speech therapy
19. Remedial reading
20. English for non-English speaking
21. Remedial training in special subject areas
22. "Other" resources needed
23. Adjustment evaluation
24. Intellectual ability evaluation
25. Academic achievement evaluation
26. Popularity with other students
27. Time known
28. Official title of person completing form

F. HEALTH HABITS AND HISTORY - YOUTH QUESTIONNAIRE - Positions 370-453

1. Record availability
2. Present health rating
3. Problem(s) to talk over with doctor
4. Use medicine regularly
5. Medicine ordered by doctor
6. Ever broken any bones
7. How many times ever broken any bones
8. Ever any other injuries or accidents
9. Ever knocked unconscious
10. Ever stayed in hospital overnight or longer
11. Youth stayed in hospital overnight or longer for most serious illness or disease
12. Ever wear glasses or contact lenses
13. If yes: can you see as well as most with your glasses
14. If not wearing glasses do you need glasses
15. If wearing glasses do you need new glasses
16. When wears glasses
17. If not all day, when do you wear glasses
18. Anything wrong with eyes (except glasses)
19. Any hearing difficulty
20. Ears ever damaged or injured
21. If yes: which ear
22. Any earaches in the past year
23. Any other ear trouble
24. Teeth need straightening
25. Any difficulty in talking or speaking
26. Anything wrong with the way you walk
27. Anything that prevents complete use of legs
28. Anything that prevents complete use of arms
29. Ever prevented for reasons of health from taking part in hard work, exercise, or games
30. If yes: did doctor advise this
31. If yes: are you now forbidden to exercise or play
32. Overweight or underweight
33. Body build
34. Body build preference

F. HEALTH HABITS AND HISTORY - YOUTH QUESTIONNAIRE Cont.

35. Height preference
36. Any backaches in past year or two
37. Sleep alone in own room
38. If no: who else sleeps in room
39. Frequency of trouble getting to sleep or staying asleep
40. Frequency of having bad dreams or nightmares
41. Walked in sleep during past year or so
42. Do you have acne
43. Age when acne started
44. Any treatment used for acne
45. Have you seen a doctor about acne
46. How much does your acne bother you
47. Have you ever been away from home for at least two months
48. If away from home over two months, where stayed
49. Age when first stayed away over 2 months
50. Are you going to school
51. If yes: how many hours work during school year
52. If no: do you have a job
53. Kind of work (for those going to school and working)
54. Paid for work (going to school and working)
55. Work during vacation (going to school)
56. Get an allowance from family
57. If yes: who decides amount
58. If getting allowance, who should decide amount
59. Are duties or chores performed for allowance
60. Is allowance ever withheld as punishment
61. Amount eaten
62. Last time saw doctor for a check-up
63. Last time saw doctor for treatment
64. Last time saw dentist for a check-up
65. Last time saw dentist for treatment

Number of hours per day usually spent

66. Watching TV
67. Listening to radio
68. Reading newspapers, comics, magazines
69. Reading books (except comic books)

G. HEALTH BEHAVIOR - YOUTH REPORT - Positions 454-524

1. Record availability
2. Document completed by
3. Like to do about school
4. What youth thinks will happen about school
5. Ever had a date
6. If yes: age at first date

Who makes decision on following

7. Choosing your clothes
8. How to spend your money
9. Which friends you go out with
10. How late you can stay out

Behavior

11. Number of times run away from home
12. Age when ran away from home
13. Number of times in contact with police
14. Arrested if contacted
15. Punished as a result of police contact
16. Age first smoked
17. Age started smoking regularly
18. Number of cigarettes smoked per day
19. Hour usually goes to bed before school or work day
20. Time usually goes to bed
21. Ever feel tense, nervous, or fidgety

Importance for young person to have qualities listed below

22. To be neat and clean
23. To be able to defend oneself
24. To have self-control
25. To be happy
26. To obey one's parents
27. To be dependable
28. To be considerate of others
29. To face life's problems calmly
30. To obey the law
31. To be ambitious
32. To know how to keep in good health

Want to see a doctor if had any of following conditions

33. Stomach ache
34. Sore throat
35. Hurt all over
36. Stiff neck or back
37. Headache
38. Vomit
39. Loss of appetite
40. Overtiredness
41. Pain in chest
42. Lump in stomach or abdomen
43. Blood in urine or bowel movements
44. Nervousness

Want to see a dentist if had following conditions

45. Crooked teeth
46. Sore gums
47. Bad breath
48. A toothache
49. Sores in the mouth
50. Stains on teeth that wouldn't brush off
51. Hole or cavity in tooth even if it didn't hurt

H. PSYCHOLOGICAL EXAMINATION - Positions 525-599

WISC (Wechsler Intelligence Scale for Children)

1. Vocabulary test
2. Block design test
3. Vocabulary and block design test qualifications

H. PSYCHOLOGICAL EXAMINATION Cont:

WRAT (Wide Range Achievement Test)

4. Reading test
5. Arithmetic test
6. WRAT test qualification
7. Harris-Goodenough draw a person test
8. Sex of person drawn by sex of youth
9. Draw a person test qualification
10. Literacy test - reading
11. Handedness by psychological examiner
12. Foreign language problem

Normalized T-scores

13. Vocabulary test
14. Block design test
15. Reading test
16. Arithmetic test
17. Draw a person test

Indexes

18. Index of intellectual development (WISC)
19. Index of educational achievement (WRAT)

WISC scaled scores based on HES data

20. Vocabulary
21. Block design
22. Sum of vocabulary and block design
23. HES Scaled Scores full scale WISC I.Q. estimate

WISC Manual scaled scores

24. Vocabulary
25. Block design
26. Sum of WISC manual scaled score
27. Race Adjusted Socio-Intellectual Status (SIS) Index
28. Race Adjusted Differential Intellectual Development (DID) Index

ADDENDA - EXERCISE PULSE RATES - Positions 588-596

1. Resting pulse rate
2. 2-minute pulse rate
3. 5-minute pulse rate

I. DIAGNOSTIC IMPRESSIONS - Positions 600-640

1. Normal-abnormal
2. Cardiovascular system
3. Neurological conditions
4. Musco-skeletal
5. Other systems
6. Hand preference
7. Abnormal neurological findings
8. Other systems
9. Nutritional appraisal
10. Temperature Of youth

Grip strength

11. Right hand

Grip Strength

12. Left hand

13. Handedness

14. Test satisfactory

J. BODY MEASUREMENTS - Positions 641-770

1. Cervicale height
2. Acromial height
3. Radial height
4. Stylion height
5. Iliac crest height
6. Trochanter height
7. Tibial height
8. Sitting height
9. Sphyrion height
10. Foot breadth
11. Ankle breadth
12. Knee breadth
13. Elbow breadth
14. Wrist breadth
15. Calf skinfold
16. Standing height (in cm.)
17. Bizygomatic breadth
18. Bigonial breadth
19. Seat breadth
20. Foot length
21. Biacromial breadth
22. Bicristal breadth
23. Bitrochanteric breadth
24. Upper arm girth
25. Forearm girth
26. Chest girth
27. Waist girth
28. Hip girth
29. Calf girth
30. Triceps skinfold
31. Subscapular skinfold
32. Lateral chest wall skinfold
33. Supra-iliac skinfold
34. Weight (in pounds)
35. Thigh height
36. Elbow-elbow width

K. DENTAL EXAMINATION - Positions 771-849

1. Number of missing permanent teeth
2. Number of decayed permanent teeth
3. Number of filled permanent teeth
4. Total number of decayed, missing & filled permanent teeth
5. Number of decayed primary teeth
6. Number of filled primary teeth
7. Number of primary teeth needing extraction
8. Total number of primary teeth decayed, filled & needing extraction
9. Number of permanent teeth present
10. Number of primary teeth present
11. Number of permanent teeth erupted
12. Peridental index
13. Presence of gingivitis and peridental pockets
14. Simplified debris index

K. DENTAL EXAMINATION Cont.

15. Simplified calculus index
16. Simplified oral hygiene index
17. Malocclusion syndrome
18. Examination qualifications
19. Treatment priority index
20. Buccal segment relation (right)
21. Buccal segment relation (left)

Posterior crossbite

22. Number of upper teeth on right - to buccal
23. Number of upper teeth on right - to lingual
24. Number of upper teeth on left - to buccal
25. Number of upper teeth on left - to lingual
26. Incisor vertical relationship
27. Overjet
28. Mandibular protusion
29. Overbite
30. Openbite

Number of malaligned teeth (minor rotated)

31. Upper anterior
32. Upper posterior
33. Lower anterior
34. Lower posterior

Number of malaligned teeth (major rotated)

35. Upper anterior
36. Upper posterior
37. Lower anterior
38. Lower posterior
39. Orthodontic appliances

L. VISION - Positions 850-969

1. Wears glasses for Color Vision Test
2. Ishihara and H-R-R Tests
3. Ishihara Score
4. H-R-R Score
5. Color Vision Deficiency Severity--Red-Green

6. Trial Lens for Myopia - Right Eye
7. Trial Lens Test Score - Right Eye
8. Trial Lens for Myopia - Left Eye
9. Trial Lens Test Score - Left Eye
10. Distance Lateral Phoria--Uncorrected
11. Near Lateral Phoria--Uncorrected
12. Distance Lateral Phoria--Corrected
13. Near Lateral Phoria--Corrected
14. Monocular Distance--Right Eye--Uncorrected
15. Monocular Distance--Left Eye--Uncorrected
16. Binocular Distance--Uncorrected

L. VISION Cont.

17. Monocular Near--Right Eye--Uncorrected
18. Monocular Near--Left Eye--Uncorrected
19. Binocular Near--Uncorrected
20. Monocular Distance Vision--Right Eye--Corrected
21. Monocular Distance Vision--Left Eye--Corrected
22. Binocular Distance Vision--Corrected

Lensometer Readings--Right Eye

23. Sign First Reading
24. First Reading
25. Sign Second Reading
26. Second Reading
27. Axis Reading
28. Power of Lens Sign
29. Power of Lens
30. Spherical Equivalence of Lens Sign
31. Power

Lensometer Readings--Left Eye

32. Sign First Reading
33. First Reading
34. Sign Second Reading
35. Second Reading
36. Axis Reading
37. Power of Lens Sign
38. Power of Lens
39. Spherical Equivalence of Lens Sign
40. Power

41. Trial Lens Test for Myopia--Right Eye
42. Trial Lens Test Score--Right Eye
43. Trial Lens Test for Myopia--Left Eye
44. Trial Lens Test Score--Left Eye

Landolt Ring Tests

45. Distance without correction--Right Eye
46. Distance without correction--Left Eye
47. Distance without correction--Binocular
48. Distance with correction--Right Eye
49. Distance with correction--Left Eye
50. Distance with correction--Binocular
51. Trial Lens Evaluation or Trial Lens Test for Myopia, without correction--Right Eye
52. Trial Lens Test Score--Right Eye
53. Trial Lens Evaluation or Trial Lens Test for Myopia, without correction--Left Eye
54. Trial Lens Test Score--Left Eye
55. Near, with correction--Right Eye
56. Near, with correction--Left Eye
57. Near, with correction--Binocular

L. VISION Cont.

Landolt Ring Tests

- 58. Trial Lens Test for Myopia, with correction--Right Eye
- 59. Trial Lens Test Score--Right Eye
- 60. Trial Lens Test for Myopia, with correction--Left Eye
- 61. Trial Lens Test Score--Left Eye

M. EAR, NOSE AND THROAT EXAMINATION - Positions 970-1011

- 1. External Ear--Right
- 2. External Ear--Left
- 3. Auditory Canal--Right
- 4. Auditory Canal--Left
- 5. Occluded Right Ear
- 6. Occluded Left Ear
- 7. Occluded By.--Right
- 8. Occluded By.--Left
- 9. Drum--Right
- 10. Drum--Left
- 11. Dull, Transparent--Right
- 12. Dull, Transparent--Left
- 13. Bulging, Retracted--Right
- 14. Bulging, Retracted--Left
- 15. Calcium Plaques--Right
- 16. Calcium Plaques--Left
- 17. Coloration--Right
- 18. Coloration--Left
- 19. Fluid--Right
- 20. Fluid--Left
- 21. Perforated--Right
- 22. Perforated--Left
- 23. Scars--Right
- 24. Scars--Left
- 25. Other Findings--Right
- 26. Other Findings--Left
- 27. Drum Mobile--Right
- 28. Drum Mobile--Left
- 29. Tonsils
- 30. Oral Pharynx
- 31. Nares--Right
- 32. Nares--Left
- 33. Obstruction--Right
- 34. Obstruction--Left
- 35. Other Findings--Right
- 36. Other Findings--Left
- 37. Physician's Number

N. AUDIOMETRY--HEARING - Positions 1012-1049

1. Decibel Level at 4000 CPS--Right Ear
2. Decibel Level at 4000 CPS--Left Ear
3. Decibel Level at 1000 CPS--Right Ear
4. Decibel Level at 1000 CPS--Left Ear
5. Decibel Level at 6000 CPS--Right Ear
6. Decibel Level at 6000 CPS--Left Ear
7. Decibel Level at 500 CPS--Right Ear
8. Decibel Level at 500 CPS--Left Ear
9. Decibel Level at 2000 CPS--Right Ear
10. Decibel Level at 2000 CPS--Left Ear
11. Decibel Level at 250 CPS--Right Ear
12. Decibel Level at 250 CPS--Left Ear
13. Decibel Level at 4000 CPS--Right Ear
14. Decibel Level at 4000 CPS--Left Ear
15. Decibel Level at 8000 CPS--Right Ear
16. Decibel Level at 8000 CPS--Left Ear
17. Decibel Level at 3000 CPS--Right Ear
18. Decibel Level at 3000 CPS--Left Ear
19. Conditions Affecting Test Results

O. PHYSICIAN'S EXAMINATION - Positions 1050-1094

Eyes

1. Lids, Conjunctivae and Sclerae--Right
2. Lids, Conjunctivae and Sclerae--Left
3. Pupil and Irides--Right
4. Pupil and Irides--Left
5. Tropia--Right
6. Tropia--Left
7. Extraocular Muscles and Conjugate Gaze--Right
8. Extraocular Muscles and Conjugate Gaze--Left
9. Other Eye Abnormalities

Breast Examination--Males

10. Right
11. Left
12. Gynecomastia--Right
13. Gynecomastia--Left
14. Other Findings

Breast Examination--Females

15. Maturation Stage--Right
16. Maturation Stage--Left
17. Other Breast Findings
18. Findings--Right
19. Findings--Left

O. PHYSICIAN'S EXAM Cont.

Heart

20. Point of Maximal Impulse (P.M.I.) Interspace
21. Midclavicular Line
22. Thrills
23. Systolic--Diastolic
24. Base--Apex
25. Heart Sounds--First
26. Heart Sounds--Second
27. Murmur Present
28. Significance of Murmur
29. Other Murmurs
30. Other Cardiac or Cardiovascular Findings
31. Abdominal Examination
32. Abdominal Examination Findings
33. Herniorraphy--Inguinal
34. Other Abdominal Findings

Genitalia Examination

35. Pubic Hair Maturation
36. Genital Maturation Grade--Males
37. Circumcision--Males
38. Other Genital Findings--Males
39. Findings--Males
40. Skin--Facial Acne Grade
41. Other Skin Findings

P. BLOOD PRESSURE - Positions 1095-1134

1. Systolic (1) Supine--Beginning of Physician's Exam
2. Diastolic (1) Supine--Beginning of Physician's Exam
3. Systolic (2) Supine--End of Physician's Exam
4. Diastolic (2) Supine--End of Physician's Exam
5. Systolic (3) Sitting--End of Physician's Exam
6. Diastolic (3) Sitting--End of Physician's Exam
7. Systolic (1) Supine--Beginning of Physician's Exam (includes imputed data)
8. Diastolic (1) Supine--Beginning of Physician's Exam (includes imputed data)
9. Systolic (2) Supine--End of Physician's Exam (includes imputed data)
10. Diastolic (2) Supine--End of Physician's Exam (includes imputed data)
11. Systolic (3) Sitting--End of Physician's Exam (includes imputed data)
12. Diastolic (3) Sitting--End of Physician's Exam (includes imputed data)
13. Nurse's Number

Q. NURSE'S QUESTIONNAIRE--FEMALES - Positions 1135-1159

1. Monthly Periods Started?
2. Been told about periods?
3. Source of information about periods
4. Told about periods before they started?

Q. NURSE'S QUESTIONNAIRE--FEMALES Cont.

5. Source of first information about periods
6. Preferred source of information
7. Age when periods started
8. Number of days since last period
9. Length of periods
10. Number of days between periods
11. Pain or discomfort from periods
12. Frequency of discomfort
13. Severity of discomfort
14. Medicine for pain?
15. Sick room or nurse?
16. Miss school or work?
17. Talked to doctor about pain or discomfort
18. Number of pads per day of period

R. BONE AGE - Positions 1160-1261

1. Reader Number
2. Film Quality
3. Distal Radius
4. Distal Ulna
5. Capitate
6. Hamate
7. Triquetral
8. Lunate
9. Scaphoid
10. Trapezium
11. Trapezoid
12. Metacarpal I
13. Metacarpal II
14. Metacarpal III
15. Metacarpal IV
16. Metacarpal V
17. Pisiform
18. Adductor Sesamoid
19. Flexor Sesamoid
20. Proximal Phalanx I
21. Proximal Phalanx II
22. Proximal Phalanx III
23. Proximal Phalanx IV
24. Proximal Phalanx V

25. Middle Phalanx II
26. Middle Phalanx III
27. Middle Phalanx IV
28. Middle Phalanx V
29. Distal Phalanx I
30. Distal Phalanx II
31. Distal Phalanx III
32. Distal Phalanx IV
33. Distal Phalanx V
34. Individual Differences
35. Average Bone Age

S. BLOOD TESTING - Positions 1262-1293

1. Uric Acid
2. Imputation Status
3. Cholesterol
4. Imputation Status
5. Blood Type
6. Hematocrit
7. Protein Bound Iodine (PBI)
8. PBI Qualifications

Red Blood Cells (RBC) Antigens

9. Rh-D (D line)
10. Rh-C (C line)
11. Rh-E (E line)
12. Rh ϵ Code (e line)
13. ABH Secretor Ability (Se line)

Plasma Proteins

14. Haptoglobin (Hp line)
15. Transferrins (Tr line)
16. Group Specific Component Type (Gc line)
17. Alpha Type
18. Beta Type

Syphilis Screening

19. VDRL Results
20. FTA/ABS Results
21. Imputation Status of blood Data

T. BACTERIURIA - Position 1296

U. TRACHEAL DIAMETER - Position 1297

DETAILED NOTE
EDT LOCATION 28-31
HES II SEQUENCE NUMBER.

The Health Examination Survey Cycle III of youths aged 12-17 was based on the same sample design as the previous survey of children aged 6-11. Since the same sampling areas and households were used, nearly one-third of the youths examined in Cycle III had also been examined in the earlier Cycle II survey of children. Cycle II was conducted from 1963 to 1965 and Cycle III was in operation from 1966 to 1970. The time lapse between the two examinations of the same sample person ranged from 28 months to five years, with a median time lapse of about four years.

Health Examination Survey data users who have access to both the Cycle II and Cycle III data tapes can then match those records on the Cycle III data tape which have a valid Cycle II sample sequence number to the sample sequence number on the Cycle II data tape and create a composite work tape for studies of a longitudinal nature. It is important to remember, however, that different sample weights were assigned to these sample persons in Cycles II and III, and that neither of these weights are appropriate to use for inflating sample data for the combined subsample to population estimates.

DETAILED NOTES

EDT LOCATION 48

Race

During Cycle III of the Health Examination Survey, the procedure was to record a race classification by observation and to confirm this classification whenever possible by comparison with the race entry on the youth's birth certificate. Race was recorded as "white," "Negro," or "other." "Other" included American Indians, Chinese, and all races other than white or Negro.

DETAILED NOTES

EDT LOCATIONS 61-62, 66-67, 331-332

Grade in School

Grade placement was obtained from three separate sources in the survey. These sources were the Household Questionnaire, the Supplementary School Questionnaire, and from Psychological Test Record Forms. Variations in control counts for given grade levels thus reflect the wording of the source question (which is reflected in the EDT deck description) and the sub-population to which a component of the examination was administered, e.g., unless a youth was currently in school, he or she would not be assigned a given grade level on the Supplementary School information form.

DETAILED NOTES

EDT LOCATION 69

Region

The United States was divided into four broad geographic regions of approximately equal population. These regions which deviate somewhat from those groupings used by the Bureau of the Census are as follows:

<u>Region</u>	<u>States Included</u>
Northeast	Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, and Pennsylvania
South	Delaware, Maryland, District of Columbia, West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Arkansas
Midwest	Ohio, Illinois, Indiana, Michigan, Wisconsin, Minnesota, Iowa, Missouri
West	Washington, Oregon, California, Nevada, New Mexico, Arizona, Texas, Oklahoma, Kansas, Nebraska, North Dakota, South Dakota, Idaho, Utah, Colorado, Montana, Wyoming, Alaska, and Hawaii

DETAILED NOTES

EDT LOCATIONS 70 AND 73

Population Size and SMSA

A standard metropolitan statistical area is basically a county or a group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities.

DETAILED NOTES.

EDT LOCATION 71

Rate of Population Change

The rate of population change measured the increase or decrease of population between 1950 and 1960. The primary sampling unit in which the youth resided was classified as belonging to one of four groups designated "population loss," "below average gain," "average gain," or "above average gain." These classes were defined differently for each geographic region.

DETAILED NOTES

EDT LOCATION 72

Size of Place

Size of place classification was derived from the 1960 census. According to the definition used in the 1960 census, the urban population was comprised of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages and towns (except towns in New York, New England, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contained no incorporated municipalities as subdivisions and had either 2,500 inhabitants or more, or a population of 2,500 to 25,000 and a density factor of 1,500 persons or more per square mile; (d) counties in states other than the New England states, New Jersey, and Pennsylvania, that had no incorporated municipalities within their boundaries and had a density of 1,500 persons per square mile; and (e) unincorporated places of 2,500 inhabitants or more not included in any urban fringe. The remaining population was classified as rural.

Urban areas are further classified by population size for places within urbanized areas and other places outside urbanized areas.

DETAILED NOTES

EDT LOCATIONS 75-76

Total Family Income

The income recorded was the total income received during the past twelve months by the head of the household and all other household members related to the head by blood, marriage, or adoption. This income was the gross cash income (excluding pay in kind) except in the case of a family with its own farm or business, in which case net income was recorded.

DETAILED NOTES

EDT LOCATIONS 580-587

The Socio-Intellectual-Status (SIS) index is somewhat analogous to a Socio-Economic-Status (SES) index. It is a linear composite of five family background variables (first and second parents' education, family income, number in household under 21 years of age, and race) which best predicted the intellectual development index.

The Differential-Intellectual-Development (DID) index is the residual Index of Intellectual Development (WISC) values after the SIS component is extracted. Thus, DID equals ID minus SIS plus a constant value of 100.0. SIS and DID are zero correlated and together they account for 100% of the variance in the ID score for the total sample.

These two indices have been developed under the direction of Dr. Harold J. Dupuy, psychological advisor to the Director of the Division of Health Examination Statistics, NCHS. Details regarding the construction and validity of these indices will be discussed further in a forthcoming NCHS report.

DETAILED NOTE
EDT LOCATIONS 0588 -0596
EXERCISE PULSE RATES

The pulse rates were measured from electrocardiographic tracings recorded before, during, and after a five-minute treadmill exercise.

After electrodes were applied to three sites (the manubrium, the anterior arc of the fifth rib, and the xyphoid process,) the examinee was directed to stand on the treadmill and hold onto the front support bar until the treadmill had started. The grade of treadmill was 0° for the first two minutes but was raised to 10° for the last three minutes of the test. The calibrated treadmill speed was 3 1/2 MPH for the entire test. The subject was instructed to walk naturally, with hips straight, head up, and arms swinging naturally.

EKG's were recorded at three different times: 1) before the test started, called the "resting pulse rate," 2) while the grade was being increased from 0° to 10°, called the "two-minute pulse rate," and 3) at the end of the test, called the "five-minute pulse rate." Each of the three recordings was to contain 15-20 clear complexes. The examiner's subjective evaluation of the examinee's gait ("good," "fair," or "poor") was recorded directly onto the end of the tracing, which was subsequently sent to an expert consultant for measurement.

DETAILED NOTES

EDT Locations 1012-1047

Audiometry

Hearing threshold levels for each sample youth were determined monaurally and individually by trained technicians in an acoustically treated room within a specifically constructed trailer in the mobile examination center. The standard pure-tone air-conduction audiometers used for testing at eight frequencies—250, 500, 1000, 2000, 3000, 4000, 6000, and 8000 cps were modified by the insertion of a 30-decibel attenuator. This was done to allow testing to as low as 40 decibels below audiometric zero (American Standard Association--ASA--1951) in a stable part of the range of the instrument.

The hearing threshold levels on the EDT are coded in 5 decibel intervals as follows:

<u>Code</u>	<u>Decibel Levels Re Audiometric Zero (ASA, 1951)</u>
01	LT -35.0
02	-35.0 to -30.1

Breast Examination - Males

A breast examination for gynecomastia for males was performed in the survey. Gynecomastia findings were classified as follows according to Gallagher, J.R., Medical Care of the Adolescent, New York, Appleton-Century-Crofts, Inc.

- Class I - Benign adolescent gynecomastia. Firm, disk-like plaque of subareolar breast tissue--freely movable, often tender, and ranging in size from 1-10 centimeters in diameter. Must be differentiated from fat pads in obese males. Unilateral or bilateral.
- Class II - Diffuse gynecomastia, with or without endocrine disorder. Large breast mass, with puffy areolae, usually bilateral, and always bilateral if endocrine disorder is present. This condition is rare; however, obese males may have breast development quite similar in appearance to the true gynecomastia.

EDT LOCATION 1064 and 1065

Breast Examination - Females

Breast maturation of females was classified in accordance with Tanner's scale of breast development stages (from Tanner, J.M., Growth at Adolescence, Oxford, Blackwell Scientific Publications, 1955) as follows:

- Stage I - Preadolescent. Elevation of papilla only.
- Stage II - Breast bud stage. Elevation of breast and papilla as small mound. Enlargement of areolar diameter.
- Stage III - Further enlargement and elevation of breast and areola with no separation of their contours.
- Stage IV - Projection of areola and papilla to form a secondary mound above the level of the breast.
- Stage V - Mature stage. Projection of papilla only due to recession of the areola to the general contour of the breast.

Pubic Hair Maturation

The maturation level of the youth's pubic hair was graded as follows according to Tanner's pubic hair stages (from J. Tanner, Growth at Adolescence, Oxford, Blackwell Scientific Publications, 1955) as follows:

- Stage I - Preadolescent. The vellus over the pubes is no further developed than that over the abdominal wall, i.e., no pubic hair.
 - Stage II - Sparse growth of long, slightly pigmented downy hair, straight or only slightly curled, appearing chiefly at the base of the penis or along the labia.
 - Stage III - Considerably darker, coarser, and more curled. The hair spreads sparsely over the junction of the pubes. It is at this stage that pubic hair is first seen in the usual type of black and white photograph of the entire body; special arrangements are necessary to photograph Stage II hair.
 - Stage IV - Hair now resembles adult in type, but the area covered by it is still considerably smaller than in the adult. No spread to the medial surface of the thighs.
 - Stage V - Adult in quantity and type with distribution of the horizontal (or classically "feminine") pattern. Spread to medial surface of thighs but not up linea alba or elsewhere above the base of the inverse triangle.
-

EDT LOCATION 1085

Genitalia Maturation - Male

During the examination by the survey physician, the maturation of the genitalia of males was classified in accordance with Tanner's scale of genital development (from Tanner, J., Growth at Adolescence, Oxford. Blackwell Scientific Publications, 1955) as follows:

- Stage I - Preadolescent. Testes, scrotum, and penis are of about the same size and proportion as in early childhood.
- Stage II - Enlargement of scrotum and of testes. The skin of the scrotum reddens and changes in texture. Little or no enlargement of penis at this stage.
- Stage III - Enlargement of penis (occurs at first mainly in length). Further growth of testes and scrotum.
- Stage IV - Increased size of penis, with growth in breadth and development of glans. Further enlargement of testes and scrotum; increased darkening of scrotal skin.
- Stage V - Genitalia adult in size and shape. No further enlargement takes place after Stage V is reached; it seems, on the contrary, that the penis size decreases slightly from the immediate postadolescent peak.

Acne

In the examination of the skin, the physician inspected the face and neck for acne. Acne found on the face and neck was graded, without considering body or trunkal acne, according to the following scale from Pillsbury's Textbook of Dermatology (Pillsbury, D.M., Shelly, W.B., and Kligman, A.M.: Dermatology, Philadelphia, W.B. Saunders Company, 1961):

- Grade 0 - No acne.
- Grade I - Sparse to profuse comedones with little or no inflammatory reaction.
- Grade II - Acne consisting of comedones and superficial small pustular and inflammatory lesions at the follicular orifice. This process is usually confined to the face.
- Grade III - Acne characterized by comedones, small pustules, and a tendency to deeper inflamed lesions. These inflammatory nodules are not definitely related to the follicular pore and apparently result from rupture of the sebaceous duct, with extrusion of sebum into the skin tissue, and from inflammation caused by chemical and bacterial factors. This grade represents a true disease rather than a passing cosmetic change.
- Grade IV - Extensive secondarily infected cystic acne (acne conglobata). The face and neck may be severely involved, with extensive lesions on the upper trunk. Some extension up into the scalp on the posterior neck may be noted. Coalescence of lesions occurs, with production of boggy canalized sinuses. The resulting scarring may be markedly distorting, with cord-like bands and hypertropic ridges.

Blood Pressure

In using these blood pressure data from Cycle III, the user should be aware that although these data have been found to show a marked degree of internal consistency, the values are unexpectedly high in comparison with previous national survey findings as well as those from the first Health and Nutrition Examination Survey of 1971-1974. This is apparently attributable primarily to factors associated with the examiners as described in the Vital and Health Statistics report: "Blood Pressure of Youths 12-17 Years, United States," NCHS Series 11 No. 163. Copies of the report will be available from:

National Center for Health Statistics

Hand Wrist X-Rays - Individual Differences

The presence or absence of individual differences or anomalies in the bones of the hand and wrist were noted. These differences included nicks or notches, irregular diaphyses, extra bones or sesamoids, fractures, and evidence of irregular growth. The readers did not have a rigorous set of guidelines for the identification of the specific types of individual differences or anomalies noted.

Blood Testing

The test for hematocrit values was done in the Health Examination Survey mobile examination center by laboratory technicians. Serologic tests for syphilis were done at the Venereal Disease Research Laboratory, Communicable Disease Center, Atlanta, Georgia.

Determinations of total serum cholesterol, uric acid, and protein bound iodine were made by the Lipid Standardization Laboratory of the Laboratory Branch, Communicable Disease Center, Atlanta, Georgia. All other blood work was done by the Immunogenetics Laboratory, Johns Hopkins University, Baltimore, Maryland.

The following references may be useful in any analysis of the blood test data:

DETAILED NOTES

TAPE POSITION 1296

The bacteriuria (urine culture) examination was given to all females age 12-17 years. The nurse or health technician took a urine collection from each female examinee and tested it for the presence of bacteria. If the number of organisms present exceeded 100,000 per cc., the examinee was rescheduled for two return visits. If the first repeat specimen showed less than 100,000 organisms per cc., the second visit was cancelled. All cultures having more than 60,000 organisms per cc. were sent to the University of Virginia School of Medicine for organism identification and classification. However, the urine cultures sent to the University of Virginia were misplaced. Thus, the data presented here presents the best data available from the Cycle III urine collection examination. The data presented in position 1296 was reconstructed from the "Unusual Occurrence" forms which had recorded the ID numbers of those examinees with initial positive findings and all follow-up findings. Examinees whose ID's were not listed as positive on the "Unusual Occurrence" forms were assumed to be negative. "Unusual Occurrence" forms could not be found for examinees in Stands 10 and 11 so these are reported as missing but applicable, with a code of '8.' The data here, therefore, should only be viewed as sample data and is highly unreliable in estimating population values.

DETAILED NOTE
EDT LOCATION 1297-1299

Trachial diameter measurements were derived from a posterior-anterior chest x-ray taken for almost all of the youths examined in Cycle III.

On the x-ray, lines were drawn as parallel as possible to the tracheal walls using the second thoracic vertebra as a landmark. A perpendicular to the right tracheal wall was drawn at the superior border of that vertebra. A Fowler caliper was used to measure the distance between the tracheal walls along this perpendicular, and the measurement was recorded to the nearest hundredth of a centimeter.
