

RINCHEM CO., INC. New Mexico

EPA ID# NMD085267961
Site ID: 0600846

EPA Region 6
Congressional District 01
Bernalillo County
Albuquerque

Contact: Don Williams
214-665-2197

February 2008

Please Note: This Site has been de-proposed from the NPL. No further updates of this fact sheet are planned.

Present Status and Issues

- No future remedial activities are planned for the Site.

Benefits

- The contaminated area is estimated to be small. EPA has evaluated risk at the site with surface samples provided by Rinchem.
- The site was redeveloped for industrial use prior to initiation of EPA investigations.

National Priorities List (NPL) History

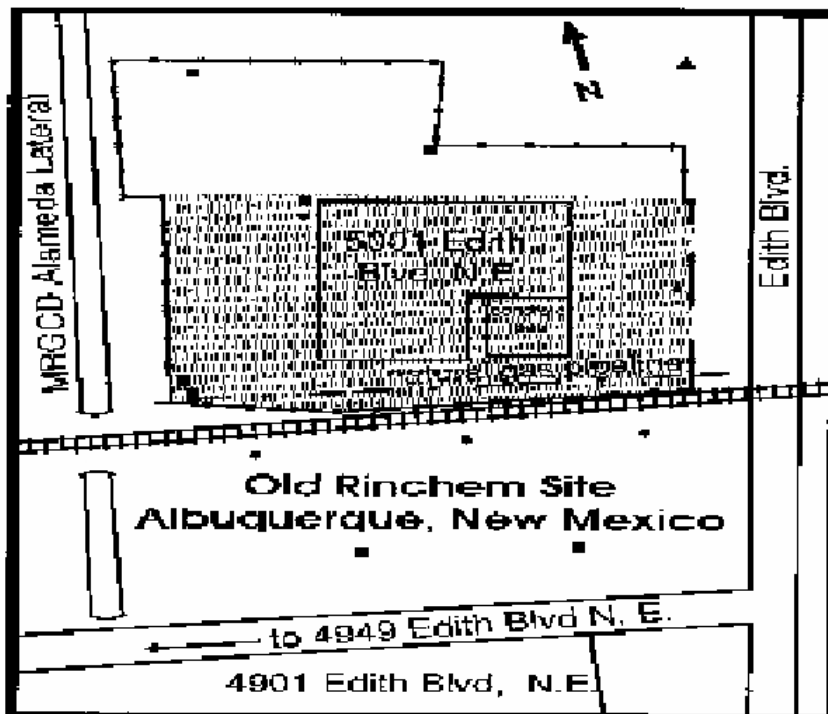

- NPL LISTING HISTORY
- Site HRS Score: 41.20
- Proposed Date: 10/14/92
- Removed from the list of proposed sites on January 19, 1999.
- Location: 5001 Edith Blvd. NE, Albuquerque, New Mexico
- Population: 440,000 residents in Albuquerque

Wastes and Volumes

- The principal pollutants include industrial solvents(dichloro & trichloroethylene, dichloro &/ trichloroethane), acetone, methylisobutylketone (MIBK).
- Ground water contamination above the Federal drinking water standards not found during the remedial investigation for the site.

Comments: Rinchem, Inc. stated that consideration of MIBK in the Hazard Ranking System process (from the 1984 report) was improper, since MIBK was not found in either the 1988 soil or water samples, or in the 1992 water samples taken at the site by Rinchem.

Site Map and Diagram

Record of Decision

Because concentrations of solvents in the ground water at the site did not exceed the Federal drinking water standards, EPA wrote a Record of Decision indicating that no action was justified under the Superfund statute. The ROD was signed on September 30, 1998.
