<sup>1</sup> For 2001, CHP purchases are combined with IPP data above.

NA = Not available.

R = Revised.

Notes: • Energy-only providers are wholesale power marketers. • IPP are independent power producers and CHP are combined heat and power producers. • Totals may not equal sum of components because of independent rounding. • The data collection instrument was changed in 2001 to collect data at the corporate level, rather than the plant level. As a result, comparisons with data prior to 2001 and after 2001 should be done with caution.
