Re: Dietary Supplement Statement of Support Notification

To Whom It May Concern:

Fitness Labs Nutrition Corporation, P.O. Box 3896 Torrance, CA 90510-3896, who is the distributor of the following dietary supplement product, intends to make the following statement(s) of support:

“Complete Joint Support Formula.*”

“This maximum-strength formula combines the expert recommended ratios of two of the most effective joint support ingredients, plus MSM. Just take four easy-to-swallow capsules a day.*”

“Glucosamine and chondroitin are the building blocks of healthy joints and tissues. We use the sulfate forms in a preferred 1500 mg to 1200 mg ratio, the same amounts used in clinical studies demonstrating their benefits. Our glucosamine is potassium (2KCl) stabilized to reduce unwanted sodium. Then we add 1,000 mg of MSM, a natural plant source of sulfur, which is an abundant mineral found in connective tissues. Only 99.9% pure MSM (Lignisul™ brand) is used. It’s an ideal formula for all joints including wrists, hands, neck, back, hips, ankles and feet.*”

This claim is being made for D-glucosamine sulfate, chondroitin sulfate and methylsulfonylmethane (MSM), which are contained in Fitness Labs® Glucosamine Chondroitin. This submission is being made in compliance with 21 CFR §101.93.

The undersigned is an authorized representative of the Fitness Labs Nutrition Corporation and certifies that the information contained in this notice is complete and accurate, and that Fitness Labs Nutrition Corporation has substantiation that the above statement(s) is (are) truthful and not misleading.
