

§ 900.112 What are construction phases?

(a) Construction programs generally include the following activities in phases which can vary by funding source (an Indian tribe or tribal organization should contact its funding source for more information regarding the conduct of its program):

(1) *The preplanning phase.* The phase during which an initial assessment and determination of project need is made and supporting information collected for presentation in a project application. This project application process is explained in more detail in § 900.122;

(2) *The planning phase.* The phase during which planning services are provided. This phase can include conducting and preparing a detailed needs assessment, developing justification documents, completing and/or verifying master plans, conducting predesign site investigations and selection, developing budget cost estimates, conducting feasibility studies, and developing a project Program of Requirements (POR);

(3) *The design phase.* The phase during which licensed design professional(s) using the POR as the basis for design of the project, prepare project plans, specifications, and other documents that are a part of the construction documents used to build the project. Site investigation and selection activities are completed in this phase if not conducted as part of the planning phase.

(4) *The construction phase.* The phase during which the project is constructed. The construction phase includes providing the labor, materials, equipment, and services necessary to complete the work in accordance with the construction documents prepared as part of the design phase.

(b) The following activities may be part of phases described in paragraphs (a)(2), (a)(3), and (a)(4) of this section:

(1) Management; and

(2) Environmental, archeological, cultural resource, historic preservation, and similar assessments and associated activities.

§ 900.113 Definitions.

(a) *Construction contract* means a fixed-price or cost-reimbursement self-determination contract for a construc-

tion project, except that such term does not include any contract:

(1) That is limited to providing planning services and construction management services (or a combination of such services);

(2) For the Housing Improvement Program or roads maintenance program of the Bureau of Indian Affairs administered by the Secretary of the Interior; or

(3) For the health facility maintenance and improvement program administered by the Secretary of Health and Human Services.

(b) *Construction management services (CMS)* means activities limited to administrative support services; coordination; and monitoring oversight of the planning, design, and construction process. An Indian tribe or tribal organization's employee or construction management services consultant (typically an engineer or architect) performs such activities as:

(1) Coordination and information exchange between the Indian tribe or tribal organization and the Federal government;

(2) Preparation of Indian tribe or tribal organization's construction contract proposals;

(3) Indian tribe or tribal organization subcontract scope of work identification and subcontract preparation, and competitive selection of Indian tribe or tribal organization construction contract subcontractors (see § 900.110);

(4) Review of work to ensure compliance with the POR and/or the construction contract. This does not involve construction project management as defined in paragraph (d) of this section.

(c) *Construction programs* include programs for the planning, design, construction, repair, improvement, and expansion of buildings or facilities, including but not limited to, housing, law enforcement and detention facilities, sanitation and water systems, roads, schools, administration and health facilities, irrigation and agricultural work, water conservation, flood control, and port facilities, and environmental, archeological, cultural resource, historic preservation, and conduct of similar assessments.

§ 900.114

(d) *Construction project management* means direct responsibility for the construction project through day-to-day on-site management and administration of the project. Activities may include cost management, project budgeting, project scheduling, procurement services.

(e) *Design* means services performed by licensed design professionals related to preparing drawings, specifications, and other design submissions specified in the contract, as well as services provided by or for licensed design professionals during the bidding/negotiating, construction, and operational phases of the project.

(f) *Planning services* means activities undertaken to support agency and/or Congressional funding of a construction project. Planning services may include performing a needs assessment, completing and/or verifying master plans, developing justification documents, conducting pre-design site investigations, developing budget cost estimates, conducting feasibility studies as needed and completion of approved justification documents and a program of requirements (POR) for the project.

(g) *Program of Requirements (POR)* is a planning document developed during the planning phase for an individual project. It provides background about the project; site information; programmatic needs; and, for facilities projects, a detailed room-by-room listing of spaces, including net and gross sizes, finish materials to be used, furnishings and equipment, and other information and design criteria on which to base the construction project documents.

(h) *Scope of work* means the description of the work to be provided through a contract issued under this subpart and the methods and processes to be used to accomplish that work. A scope of work is typically developed based on criteria provided in a POR during the design phase, and project construction documents (plans and specifications) during the construction phase.

25 CFR Ch. V (4-1-06 Edition)

§ 900.114 Why is there a separate subpart in these regulations for construction contracts and grants?

There is a separate subpart because the Act differentiates between construction contracts and the model agreement in section 108 of the Act which is required for contracting other activities. Construction contracts are separately defined in the Act and are subject to a separate proposal and review process.

§ 900.115 How do self-determination construction contracts relate to ordinary Federal procurement contracts?

(a) A self-determination construction contract is a government-to-government agreement that transfers control of the construction project, including administrative functions, to the contracting Indian tribe or tribal organization to facilitate effective and meaningful participation by the Indian tribe or tribal organization in planning, conducting, and administering the construction project, and so that the construction project is responsive to the true needs of the Indian community. The Secretary's role in the conduct of a contracted construction project is limited to the Secretary's responsibilities set out in § 900.131.

(b) Self-determination construction contracts are not traditional "procurement" contracts.

(1) With respect to a construction contract (or a subcontract of such a construction contract), the provisions of the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) and the regulations promulgated under that Act, shall apply to a construction contract or subcontract only to the extent that application of the provision is:

(i) Necessary to ensure that the contract may be carried out in a satisfactory manner;

(ii) Directly related to the construction activity; and

(iii) Not inconsistent with the Act.

(2) A list of the Federal requirements that meet the requirements of this paragraph shall be included in an attachment to the contract under negotiations between the Secretary and the Indian tribe or tribal organization.
