SUPPLEMENTARY INFORMATION:

Background

The NACMPI provides advice and recommendations to the Secretary of Agriculture pertaining to the Federal and State meat and poultry inspection programs, pursuant to sections 7(c), 24, 205, 301(a)(3), 301(a)(4), and 301(c) of the Federal Meat Inspection Act (21 U.S.C. 607(c), 624, 645, 661(a)(3), 661(a)(4), and 661(c)) and sections 5(a)(3), 5(a)(4), 5(c), 8(b), and 11(e) of the Poultry Products Inspection Act (21 U.S.C. 454(a)(3), 454(a)(4), 454(c), 457(b), and 460(e)).

The Administrator of FSIS is the chairperson of the Committee. Membership of the Committee is drawn from representatives of consumer groups; producers, processors, and marketers from the meat, poultry and

egg product industries; State and local government officials; and academia. The current members of the NACMPI are: Ms. Kibbe M. Conti, Northern Plains Nutrition Consulting, Rapid City, SD; Mr. Brian R. Covington, Keystone Foods LLC, West Conshohocken, PA; Dr. Catherine N. Cutter, Pennsylvania State University, University Park, PA; Dr. James S. Dickson, Iowa State University, Ames, IA; Mr. Kevin M. Elfering, Minnesota Department of Agriculture, St. Paul, MN; Mr. Mike W. Finnegan, Montana Meat & Poultry Inspection Bureau, Helena, MT; Ms. Carol Tucker Foreman, Consumer Federation of America, Chevy Chase, MD; Dr. Andrea L. Grondahl, North Dakota Department of Agriculture, Bismarck, ND; Dr. Joseph J. Harris, Southwest Meat Association, Bryan, TX; Dr. Craig W. The Committee will review a draft report outlining a public health-based slaughter inspection system for young chickens. The components of the planned system are science-based. The focus of the inspection activities in this system are the points within the poultry slaughter process that have the greatest risk for causing microbial or other contamination on young chicken carcasses or otherwise rendering the carcasses adulterated. These focused activities will be performed within the regulatory framework of current FSIS inspection activities regarding verification of Hazard Analysis Critical Control Point systems, Sanitation SOPs, sanitation performance standards, and other regulatory requirements. In addition, FSIS will utilize its inspection resources, including performing Food Safety Assessments on poultry slaughter establishments, as a means of assessing the design of an establishment's inspection system and whether it is under control and functions effectively.

FSIS is considering proposing to require that young chicken slaughter establishments that participate in this inspection system meet public health-based performance standards for microorganisms, such as *Salmonella* and *Campylobacter*. FSIS is also considering to propose that participating young chicken slaughter establishments meet a performance standard for generic *E. coli*. FSIS is considering this standard as a measure of sanitary conditions.

FSIS' traditional method of inspection for young chicken slaughter establishments was designed before microbial contamination was recognized as a leading cause of foodborne human illness. FSIS would like to update the inspection system for young chicken slaughter establishments so that it will function effectively with the significant advances that have been made in the processing methods employed by many of these establishments. FSIS believes that the inspection system that it is considering will be better able to protect public health because it will be better adapted to the methods being used in slaughter plants. FSIS activities will likely focus on establishments and points within the poultry slaughter process at which microbial contamination of young chicken carcasses is likely to occur. Similarly, FSIS believes that the performance standards it is considering will decrease the amount of microbial contamination occurring at the end of the poultry slaughter process.

An approach to inspection that focuses on points within an establishment that present the greatest likelihood of causing microbial and other contamination, and on those establishments with evidence of a loss of process control, could also be applied to processing establishments and to other slaughter establishments in addition to those that slaughter young chickens. The Committee will also review a draft report outlining how a public-health based inspection system could be applied to those establishments and the scientific basis for such a system.

All interested parties are welcome to attend the meetings and to submit written comments and suggestions concerning issues the Committee will review and discuss. The comments and the official transcript of the meeting, when they become available, will be kept in the FSIS Docket Room, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue, SW., Room 2534, South Building, Washington, DC 20250, and posted on the Agency's

NACMPI Web site, http://www.fsis.usda.gov/about_fsis/nacmpi/index.asp.

Members of the public will be required to register before entering the meeting.
