

DEAR FDA,

I oppose the FDA's new proposed rule of guidance on genetically engineered foods. The agency's voluntary labeling & notification proposals are totally inadequate to protect human health, the environment, & my right to know.

I support the following:

- ALL GE foods & ingredients should be labeled so I am informed & have a choice
- GE foods should not be assumed to be safe & should be subject to mandatory pre-market safety testing
- There should be a moratorium on GE foods until long-term studies show they are safe for human health & the environment.
