Hey Bubba!

You're supposed to protect
the consumer not big business! We
want to know which food we purchase is
GE & which is not! It's our right, & you
want to prevent non GE suppliers from telling
us that their products are ~~NON-GE~~ ^{NON-GE} because
that implies Monsanto & other ~~have~~ ^{are} inferior
products. I have one word for that
BULLSHIT! Your notification ^{NOISE} _{NOISE} reply is
an insult to consumers & science. Shady
there are problems - Tox shell death &
Monsanto butterfly - or don't you ~~see~~ ^{see}?

FDA must require pre-market testing &
environmental review as well as mandatory
labeling. If you don't we shall start a

food rebellion. If you
like GE food & think it's safe - eat -

LICENSED CLINICAL PSYCHOLOGIST
CERTIFIED SCHOOL PSYCHOLOGIST
