Comment:

The mounting evidence against the use of rBGH is overwhelming. We don't care about Monsanto and how much money they lose. As a consumer, I and others demand and will be demanding that you ban the use of rGHB and other drugs in our dairy products. We will also be demanding that products with rGBH be labelled as long as you allow it's use. You have no right to continue to allow these practices at the public's expense.
