Docket No. 00N-0989

Docket Management Branch  
Food + Drug Administration  
5630 Fishers Lane Room 10-61 HFA-305  
Rockville, MD 20852

2697 01 MAR 13 11:30

Dear FDA:

I urge you to approve the proposal that would allow the public to know what is going on with potentially dangerous Xenotransplantation and Gene therapy. Docket No. 00N-0989 would bring Xenotransplantation and Gene therapy in compliance with the same types of information already released to the public by other government agencies. The FDA should assume responsibility for synthesizing the information and making it available to the public.

Ultimately, Xenotransplantation and gene therapy should stop. The clinical trials are hazardous to public health and raise ethical issues that have not yet been adequately addressed.

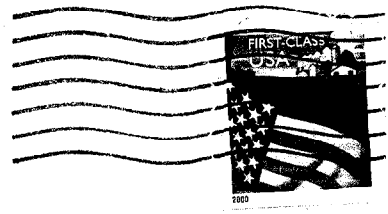

Our health, money (tax dollars), and ethics are being put on the line we - the public - have a right to know. Thank you for your consideration

00N-0989

Sincerely

Monica Engebretson C 11
