Re: Docket # OON-1396  
and # OOD-1598

Attention FDA Commissioner,

I was horrified to learn that the FDA has failed in establishing strict rules for testing & labeling genetically engineered (GE) foods. No matter what an individual's opinion about good or bad we MUST have the RIGHT TO CHOOSE. We have learned enough from past mistakes (DDT, Artificial Sweeteners, etc.) how we not? I refuse to be a guinea pig for agricultural experiments no matter how "beneficial" they may be touted. YOU ARE INSULTING OUR INTELLIGENCE

Your current rules make it financially infeasible for farmers who choose not to grow GE foods to do so - that is criminal. 90% of people polled agree with me - an average consumer - LISTEN to us not Agribusiness.

<sup>OON-1396</sup>  
We must have clear & simple labeling & long term testing for all GE foods including those already on the market. C 129  
Thank you, Jaym Avery  
OON-1396 C 129
