Dear Sirs:

Please do not allow the morning after abortion pill to be made available over the counter. The pills are dangerous to the health of mothers and they kill unborn babies, instead of preventing pregnancy. I am opposed to women being misinformed about what these pills do - kill innocent babies - and about the safety of them for their own health. These pills should be banned rather than making them as available as chocolate. The FDA would be doing a great disservice and lying to women and children, if they allow it to be sold over the counter.

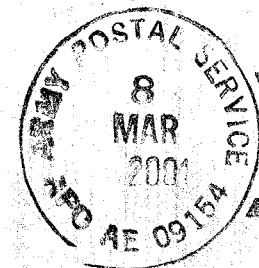

Best regards,
Leeta v. Bulow
(Leeta von Buelow)
