

February 7th, 2001

Dear FDA Commissioner Jane Henney,

2600 '02 FEB 13 AM 1:18

Genetically engineered food ingredients, crops or fish should not be allowed on the market until:

1. Independent safety testing demonstrates they have no harmful effects on humans, animals or the environment.
2. They are labeled to ensure the consumer's right to know, and
3. The biotechnology Corporations that manufacture them are held responsible for any harm.

Thank You truly for taking time to read my concerns and impact our country's future. I feel that this is a highly important matter for the sake of all lives. I and many others want our right to Choose what goes into our body, don't you?

Sincerely Yours,
Meghan Forthe
