Dear Government & Industry Leaders:

By signing this petition,

- 1) I support a temporary freeze on the sale of all genetically engineered food and crops until adequate pre-market safety-testing proves that these products are safe for human health and the environment, and until labeling of these products is required so that people are more informed about what they are eating.
- 2) I call on the Food and Drug Administration (FDA) to label all genetically engineered food and to develop thorough pre-market safety and environmental testing for genetically engineered foods. I request that my statement through this petition and my signature be counted as a formal comment in FDA docket number 00P-1211/CP 1.
