Dear Mr. Foret,

We are offering for sale the following product: Optio Injuv™ with the following Structure Function claim: Promotes Skin Health. The supporting side panel story is: Injuv™ is a proprietary formula that promotes skin health. Injuv™ is a unique formulation that contains hyaluronic acid, an ingredient essential to maintaining fluid balance within cells. Hyaluronic Acid is traditionally used in products that are applied topically to the skin, such as skin creams and lotions. Most products contain only 3% hyaluronic acid, whereas Optio's Injuv™ has a formulation that contains 9% hyaluronic acid, 3 times what is found in other supplements. Optio's Injuv™ offers a formulation that is taken orally, to promote skin health from the inside out.

The FDA disclaimer will also appear on the label.

Sincerely,

A handwritten signature in cursive script, appearing to read "Katie Ferren".
